

# Solr tutorial

## Table of contents

1 Requirements.....	2
---------------------	---

## 1. Requirements

1. Java 1.5, from [Sun](#), [IBM](#), or [BEA](#).
2. A servlet container such as Apache's [Tomcat](#) 5.5.
3. On Win32, [cygwin](#), for shell support. (If you plan to use Subversion on Win32, be sure to select the subversion package when you install, in the "Devel" category.)
