VISTA System Design & Development

Enrollment Application System (EAS)

Overview	<p>Enrollment Application System (EAS) is currently a single module application. It facilitates the processing of a 10-10EZ Application for Health Benefits, which has been transmitted to the VHA site from the <i>On-Line 10-10EZ</i> web-based software. .</p> <p>This 10-10EZ module allows site staff with enrollment and registration responsibilities to review all data entered by a veteran on the electronic 10-10EZ form before committing the data to the site database. It also provides a basic tracking mechanism in order to follow the progress of the veteran's application and respond to inquiries.</p>
Features	<p>Automatically receives incoming 10-10EZ data transmissions from the web-based application into a VistA holding file.</p> <p>Provides a List Manager interface that allows the enrollment/registration staff to:</p> <ul style="list-style-type: none">• Match the Applicant with an existing Patient record when appropriate.• Review all 10-10EZ data and perform corrections as needed.• Print the 10-10EZ form with data in order to send to the veteran for signature.• Verify that the veteran has signed the 10-10EZ.• Commit the 10-10EZ data to the VistA Patient database in preparation for further enrollment and/or registration activities.• Respond to customer (e.g., veteran) inquiries as to the status of a 10-10EZ Application. <p>Provides an audit trail of all significant actions performed in processing a 10-10EZ Application as a basis for management reports.</p> <p>Retains a copy of any original Patient database data elements overwritten by incoming 10-10EZ data elements.</p>
