

SURGERY

USER MANUAL

Version 3.0
July 1993

(Revised November 2015)

Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists “All,” replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

Date	Revised Pages	Patch Number	Description
11/15	i-viii, 9, 30, 32-33, 37, 38, 40-41, 42, 43, 44, 46, 47-48, 50-52, 65, 67-68, 72-73, 76-77, 79-80, 95, 98-99, 101-102a, 105, 108-110, 111-113, 117, 118, 123, 124, 124a, 124b, 140-147, 150-152b, 212e, 219a, 219b, 432-433, 449-451, 458, 459, 465, 467-469, 470a-472, 473, 479-479a, 481-482a, 484, 486-486c, 489, 491, 493, 495-499, 501, 502a, 502c, 502e, 502g, 507, 510, 512, 527-556	SR*3*184	Updated definitions, added new data fields, made changes to data entry screens, reports, surgery risk management assessment transmissions. For more details, see the Annual Surgery Updates – VASQIP 2015, Release Notes.
09/14	i, ia, iii-vii, 6-9, 11, 13, 14, 28, 31-33, 37, 38, 40-44, 46-48, 50-52, 59, 64, 66-68, 72-73, 76, 77, 79-83, 99-105, 107-111, 114, 116, 117, 119-120a, 122-124a, 131, 140, 140a, 142-147, 149, 151-152a, 165, 180, 180a, 189-191, 218-219a, 285, 346, 349, 358, 360, 394a, 394b, 426-428, 449, 449a, 455-458, 467, 468, 473-474b, 482-484, 507, 510, 512, 519, 549, 549a, 551-556	SR*3*182	Updated definitions, added new data fields, made changes to data entry screens, reports, surgery risk management assessment transmissions. For more details, see the Annual Surgery Updates – VASQIP 2014, Release Notes. (Daniel Reed, PM; Starleigh Vetzal, Technical Writer)

Date	Revised Pages	Patch Number	Description
07/14	i-ii, 212a, 212d-212g, 238, 273, 405, 437, 480, 525, 526	SR*3*177	<p>Updated examples to reflect ICD-10 Diagnosis Codes. Changed File Download Option 2 from “ICD9” to “ICD.”</p> <p>Made ICD-9 references generic to ICD.</p> <p>Added ICD-10-CM Diagnosis Code Search.</p> <p>Updated Warning Message to Surgeon.</p> <p>Updated MailMan Messages for ICD-9 and ICD-10 codes.</p> <p>(K. Krause, VA)</p>
03/12	i-ii, v, vii, 6-11, 81-83, 120, 120a-120b, 140, 144-145, 145a-145b, 146, 151-152, 152a, 178, 207-209, 212c, 212f, 213, 215, 217-219, 219a-219b, 220, 222, 224, 226, 228, 230, 232, 234, 236, 239, 241, 243, 245, 247, 276, 327c, 394c, 395-396, 397a, 397c-397d, 411, 432, 449-450, 461, 464, 467-468, 474b, 482, 484, 486, 486a, 523, 525, 527, 549, 553-554	SR*3*176	<p>Updated definitions, added new data fields, made changes to existing fields, data entry screens, reports, surgery risk assessment transmissions and transplant components of the VistA Surgery application. For more details, see the <i>Annual Surgery Updates – VASQIP 2011, Increment 2, Release Notes</i>.</p> <p>Chapter Seven: “CoreFLS/Surgery Interface” has been removed.</p> <p>(T. Leggett, PM; B. Thomas, Tech Writer)</p>

09/11	i-ii, iii-iv, vi, 64, 66, 70, 98-101, 101a-101b, 109-112, 114-118, 122-124, 124a-124b, 142-152, 152a-152b, 176, 178, 180, 183-184, 184a-184f, 244, 246, 248, 325-326, 326a-326b, 327, 327a-327d, 368, 394a-394b, 394c-394d, 395-397, 397a-397d, 432-433, 441, 449-450, 458-459, 461, 464a, 471-474, 474a-474b, 475, 477, 480a, 482, 486-486a, 509,519, 521, 522a, 522c, 527, 534-535, 550, 552-556	SR*3*175	<p>Updated definitions and made minor modifications to the non-cardiac, cardiac and transplant components of the VistA Surgery application. For more details, see the <i>Annual Surgery Updates – VASQIP 2011, Increment 1, Release Notes</i>.</p> <p>(T. Leggett, PM; B. Thomas, Tech Writer)</p>
-------	--	----------	--

12/10	i-ii, 372, 376, 449-450, 458, 467-468, 468b, 471-474, 474a-474b, 479, 479a, 482, 486, 486a, 522c-522d	SR*3*174	Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software. For more details, see the <i>Annual Surgery Updates – VASQIP 2010 Release Notes</i> . (T. Leggett, PM; B. Thomas, Tech Writer)
11/08	vii-viii, 527-556	SR*3*167	New chapter added for transplant assessments. Changed Glossary to Chapter 10, and renumbered the Index. (M. Montali, PM; G. O’Connor, Tech Writer)
04/08	iii-iv, vi, 160, 165, 168, 171-172, 296-298, 443, 447, 449-450, 459, 471-473, 479-479a, 482, 486-486a, 489, 491, 493-495, 497, 499, 501-502a, 502c, 502d-502h, 513-517, 522c-522d, 529, 534	SR*3*166	Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software. For more details, see the <i>Surgery NSQIP-CICSP Enhancements 2008 Release Notes</i> . (M. Montali, PM; G. O’Connor, Tech Writer)
11/07	479-479a, 486a	SR*3*164	Updated the <i>Resource Data Enter/Edit</i> and the <i>Print a Surgery Risk Assessment</i> options to reflect the new cardiac field for CT Surgery Consult Date. (M. Montali, PM; S. Krakosky, Tech Writer)
09/07	125, 371, 375, 382	SR*3*163	Updated the Service Classification section regarding environmental indicators, unrelated to this patch. Updated the Quarterly Report to reflect updates to the numbers and names of specific specialties in the NATIONAL SURGICAL SPECIALTY file. (M. Montali, PM; S. Krakosky, Tech Writer)
06/07	35, 210, 212b	SR*3*159	Updated screens to reflect change of the environmental indicator “Environmental Contaminant” to “SWAC” (e.g., SouthWest Asia). (M. Montali, PM; S. Krakosky, Tech Writer)
06/07	176-180, 180a, 184c-d, 327c-d, 372, 375-376, 446, 449-450, 452-453, 455-456, 458, 461, 468, 470, 472, 479-479a, 482-484, 486a, 489, 491, 493, 495, 497, 499, 501, 502a-d, 504-506, 509-512, 519	SR*3*160	Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software. For more details, see the <i>Surgery NSQIP-CICSP Enhancements 2007 Release Notes</i> . Updated data entry screens to match software; changes are unrelated to this patch. (M. Montali, PM; S. Krakosky, Tech Writer)

Date	Revised Pages	Patch Number	Description
11/06	10-12, 14, 21-22, 139-141, 145-150, 152, 219, 438	SR*3*157	<p>Updated data entry options to display new fields for collecting sterility information for the Prosthesis Installed field; updated the Nurse Intraoperative Report section with these required new fields. For more details, see the <i>Surgery-Tracking Prosthesis Items Release Notes</i>.</p> <p>Updated data entry screens to match software; changes are unrelated to this patch. (M. Montali, PM; S. Krakosky, Tech Writer)</p>
08/06	6-9, 14, 109-112, 122-124, 141-149, 151-152, 176, 178-180, 180a-b, 181-184, 184a-d, 185-186, 218-219, 326-327, 327a-d, 328-329, 373, 377, 449-450, 452-456, 459, 461-462, 467-468, 468b, 469-470, 470a, 473-474, 474a-474b, 475, 477, 481-486, 486a-b, 489-502, 502a-b, 503-504, 509-512	SR*3*153	<p>Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software.</p> <p>Updated data entry options to incorporate renamed/new Hair Removal documentation fields. Updated the Nurse Intraoperative Report and Quarterly Report to include these fields. For more details, see the <i>Surgery NSQIP/CICSP Enhancements 2006 Release Notes</i>. (M. Montali, PM; S. Krakosky, Tech Writer)</p>
06/06	28-32, 40-50, 64-80, 101-102	SR*3*144	<p>Updated options to reflect new required fields (Attending Surgeon and Principal Preoperative Diagnosis) for creating a surgery case. (M. Montali, PM; S. Krakosky, Tech Writer)</p>
06/06	vi, 34-35, 125, 210, 212b, 522a-b	SR*3*152	<p>Updated Service Classification screen example to display new PROJ 112/SHAD prompt.</p> <p>This patch will prevent the PRIN PRE-OP ICD DIAGNOSIS CODE field of the Surgery file from being sent to the Patient Care Encounter (PCE) package.</p> <p>Added the new Alert Coder Regarding Coding Issues option to the Surgery Risk Assessment Menu option. (M. Montali, PM; S. Krakosky, Tech Writer)</p>
04/06	445, 464a-b, 465, 480a-b	SR*3*146	<p>Added the new <i>Alert Coder Regarding Coding Issues</i> option to the Assessing Surgical Risk chapter. (M. Montali, PM; S. Krakosky, Tech Writer)</p>

Date	Revised Pages	Patch Number	Description
04/06	6-8, 29, 31-32, 37-38, 40, 43-44, 46-48, 50, 52, 65-67, 71-73, 75-77, 79, 100, 102, 109-112, 117-120, 122-123, 125-127, 189-191, 195b, 209-212, 212a-h, 219a, 224-231, 238-242, 273-277, 311-313, 315-317, 369, 379- 392, 410, 449-464, 467-468, 468a-b, 469-470, 470a, 471-474, 474a-b, 475-479, 479a-b, 480, 483-484, 489-502, 507, 519	SR*3*142	<p>Updated the data entry screens to reflect renaming of the Planned Principal CPT Code field and the Principal Pre-op ICD Diagnosis Code field. Updated the <i>Update/Verify Procedure/Diagnosis Coding</i> option to reflect new functionality. Updated Risk Assessment options to remove CPT codes from headers of cases displayed. Updated reports related to the coding option to reflect final CPT codes.</p> <p>For more specific information on changes, see the <i>Patient Financial Services System (PFSS) – Surgery Release Notes</i> for this patch.</p> <p>(M. Montali, PM; S. Krakosky, Tech Writer)</p>
10/05	9, 109-110, 144, 151, 218	SR*3*147	<p>Updated data entry screens to reflect renaming of the Preop Shave By field to Preop Hair Clipping By field.</p> <p>(M. Montali, PM; S. Krakosky, Tech Writer)</p>
08/05	10, 14, 99-100, 114, 119-120, 124, 153-154, 162-164, 164a-b, 190, 192, 209-212f, 238-242	SR*3*119	<p>Updated the Anesthesia Data Entry Menu section (and other data entry options) to reflect new functionality for entering multiple start and end times for anesthesia. Updated examples for Referring Physician updates (e.g., capability to automatically look up physician by name). Updated the PCE Filing Status Report section.</p> <p>(J. Podolec, PM; B. Manies, Tech Writer)</p>
08/04	iv-vi, 187-189, 195, 195a-195b, 196, 207-208, 219a-b, 527-528	SR*3*132	<p>Updated the Table of Contents and Index to reflect added options. Added the new <i>Non-OR Procedure Information</i> option and the <i>Tissue Examination Report</i> option (unrelated to this patch) to the Non-OR Procedures section.</p>
08/04	31, 43, 46, 66, 71-72, 75-76, 311	SR*3*127	<p>Updated screen captures to display new text for ICD-9 and CPT codes.</p>

Date	Revised Pages	Patch Number	Description
08/04	vi, 441, 443, 445-456, 458-459, 461 463, 465, 467-468, 468a-b, 469-470, 470a-b, 471, 473-474, 474a-b, 474-479, 479a-b, 480-486, 486a-b, 519, 531-534	SR*3*125	Updated the Table of Contents and Index. Clarified the location of the national centers for NSQIP and CICSP. Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software and new options have been added. For an overview of the data entry changes, see the <i>Surgery NSQIP/CICSP Enhancements 2004 Release Notes</i> . Added the <i>Laboratory Test Result (Enter/Edit)</i> option and the <i>Outcome Information (Enter/Edit)</i> option to the <i>Cardiac Risk Assessment Information (Enter/Edit)</i> menu section. Changed the name of the <i>Cardiac Procedures Requiring CPB (Enter/Edit)</i> option to <i>Cardiac Procedures Operative Data (Enter/Edit)</i> option. Removed the <i>Update Operations as Unrelated/Related to Death</i> option from the <i>Surgery Risk Assessment Menu</i> .
08/04	6-10, 14, 103, 105-107, 109-112, 114-120, 122-124, 141-152, 218-219, 284-287, 324, 370-377	SR*3*129	Updated examples to include the new levels for the Attending Code (or Resident Supervision). Also updated examples to include the new fields for ensuring Correct Surgery. For specific options affected by each of these updates, please see the <i>Resident Supervision/Ensuring Correct Surgery Phase II Release Notes</i> .
04/04	All	SR*3*100	All pages were updated to reflect the most recent Clinical Ancillary Local Documentation Standards and the changes resulting from the Surgery Electronic Signature for Operative Reports project, SR*3*100. For more information about the specific changes, see the patch description or the <i>Surgery Electronic Signature for Operative Reports Release Notes</i> .

Introduction

This section provides an overview of the Surgery package, and also provides documentation conventions used in this *Surgery V. 3.0 User Manual*. This section also discusses the use of the Screen Server in the Surgery package.

Overview

The Surgery package is designed to be used by Surgeons, Surgical Residents, Anesthetists, Operating Room Nurses and other surgical staff. The Surgery package is part of the patient information system that stores data on the Department of Veterans Affairs (VA) patients who have, or are about to undergo, surgical procedures. This package integrates booking, clinical, and patient data to provide a variety of administrative and clinical reports.

The *Surgery V. 3.0 User Manual* is designed to acquaint the user with the various Surgery options and to offer specific guidance on the use of the Surgery package. Documentation concerning the Surgery package, including any subsequent change pages affecting this documentation, can be found at the Veterans Health Information Systems and Technology Architecture (VistA) Documentation Library (VDL) on the Internet at <http://www.va.gov/vdl/>.

(This page included for two-sided copying.)

Documentation Conventions

This *Surgery V. 3.0 User Manual* includes documentation conventions, also known as notations, which are used consistently throughout this manual. Each convention is outlined below.

Convention	Example
Menu option text is italicized.	The <i>Print Surgery Waiting List</i> option generates the long form surgery Waiting List for the surgical service(s) selected.
Screen prompts are denoted with quotation marks around them.	The "Puncture Site:" prompt will display next.
Responses in bold face indicate user input.	Needle Size: 25G
Text centered between bent parentheses represents a keyboard key that needs to be pressed for the system to capture a user response or move the cursor to another field. <Enter> indicates that the Enter key (or Return key on some keyboards) must be pressed. <Tab> indicates that the Tab key must be pressed.	Type Y for Yes or N for No and press <Enter>. Press <Tab> to move the cursor to the next field.
 Indicates especially important or helpful information.	 If the user attempts to reschedule a case after the schedule close time for the date of operation, only the time, and not the date, can be changed.
 Indicates that options are locked with a particular security key. The user must hold the particular security key to be able to perform the menu option.	 Without the SROAMIS key the <i>Anesthesia AMIS</i> option cannot be accessed.

Getting Help and Exiting

?, ??, ??? One, two or three question marks can be entered at any of the prompts for on-line help. One question mark elicits a brief statement of what information is appropriate for the prompt. Two question marks provide more help, plus the hidden actions, and three question marks will provide more detailed help, including a list of possible answers, if appropriate.

Typing an up arrow ^ (caret or a circumflex) and pressing <Enter> can be used to exit the current option.

(This page included for two-sided copying.)

Using Screen Server

This section provides information about using the Screen Server utility with the Surgery software.

Introduction

Screen Server is a screen-based data entry utility. It allows the user to display and select data elements for entering, editing, and deleting information. The format is designed to display a number of data fields at one time on a menu. With Screen Server, a number of data elements are displayed at one time on a menu and the user is able to choose on which element to work.

This section contains a description of the Screen Server format and gives examples of how to respond to the unique Screen Server prompts. The screen facsimiles used in the examples are taken from the Surgery software; however, these screens may not display on the terminal monitor exactly as they display in this manual, because the Surgery package is subject to enhancements and local modifications. In this document, the different ways to respond to the Screen Server prompt, to perform a task, and to utilize shortcuts are explained. The shortcuts are listed below:

- Enter data
- Edit data
- Move between pages
- Enter/edit a range of data elements
- Multiples
- Multiple screen shortcuts
- Word processing

The user should be familiar with VistA conventions. In the examples, the user's response is presented in bold face text.

Navigating

The user can press the Return key to move through a prompt and go to the next page or item. To return directly to the *Surgery Menu* options, the user can enter an up-arrow (^), unless he or she is in a multiple field. To exit a multiple field, enter two up-arrows (^ ^).

Basics of Screen Server

Each Screen Server arrangement consists of three basic parts: a header, data elements, and an action prompt. These items are defined in the following table.

Term	Definition
Header	The screen heading contains information specific to the record with which you are working. This can include the patient name or case number. The information in the heading is programmed and cannot be easily changed.
Data Elements	Each Screen Server display contains from 1 to 15 data elements (or fields). If information has been entered for any of the data elements defined, it will display to the right of the element. Some data elements are multiple fields, meaning they can contain more than one piece of information. These multiple fields are distinguished by the word "Multiple" next to the data element. If the multiple fields contain information, the word "Data" will be next to the data element.
Prompt	The action prompt is at the bottom of each screen. From the prompt "Enter Screen Server Functions:" you can enter, edit, or delete information from the data elements. The possible responses to this prompt are explained in more detail on the following pages. Enter a question mark (?), for help text with possible prompt responses.

The following is an example of a Screen Server display with help text.

Example: Screen Server with On-line Help Text

```

** SHORT SCREEN **   CASE #16  SURPATIENT,ONE          PAGE 1 OF 4
1  DATE OF OPERATION:      AUG 01, 2006
2  HOSPITAL ADMISSION STATUS: SAME DAY
3  PRIMARY SURGEON:        SURSURGEON,ONE
4  PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE
5  PRIN PRE-OP ICD DIAGNOSIS CODE (ICD9):
6  OTHER PREOP DIAGNOSIS: (MULTIPLE)
7  PRINCIPAL PROCEDURE: REMOVE FACIAL LESIONS
8  PLANNED PRIN PROCEDURE CODE:
9  OTHER PROCEDURES: (MULTIPLE)
10 HAIR REMOVAL BY:
11 HAIR REMOVAL METHOD:
12 HAIR REMOVAL COMMENTS:  (WORD PROCESSING)
13 TIME PAT IN OR:
14 TIME OPERATION BEGAN:
15 TIME OPERATION ENDS:

Enter Screen Server Function: ?
To change entries, enter your choices (numbers) separated by a ';', or
use a ':' for ranges.  i.e. 2;3 or 1:3.  Enter 'A' to enter/edit all.

If there is more than one page to this screen, entering a '+' or '-'
followed by the number of pages or entering 'P' followed by the page
number will take you to the desired page.

Enter '^' to quit, or '^ ^' to return to the menu option.

```

The diagram illustrates the components of the screen server display with callouts:

- Header:** Points to the top line of the screen: "** SHORT SCREEN ** CASE #16 SURPATIENT,ONE PAGE 1 OF 4".
- Data Elements:** Points to the list of data elements, specifically line 4: "PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE".
- Prompt:** Points to the instruction line: "Enter Screen Server Function: ?".
- On-line Help:** Points to the help text block: "If there is more than one page to this screen, entering a '+' or '-' followed by the number of pages...".

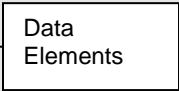

Entering Data

To enter or edit data, the user can type the item number corresponding with the data element for which he/she is entering information and press the **<Enter>** key. In the following example, we typed the number 10 at the prompt and pressed the **<Enter>** key. A new prompt appeared allowing us to enter the data. The software immediately processed this information and produced an updated menu screen and another action prompt.

```
** SHORT SCREEN **      CASE #16  SURPATIENT,ONE      PAGE 1 OF 4

1  DATE OF OPERATION:      AUG 01, 2006
2  HOSPITAL ADMISSION STATUS: SAME DAY
3  PRIMARY SURGEON:              SURSURGEON,ONE
4  PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE
5  PRIN PRE-OP ICD DIAGNOSIS CODE (ICD9):
6  OTHER PREOP DIAGNOSIS: (MULTIPLE)
7  PRINCIPAL PROCEDURE: REMOVE FACIAL LESIONS
8  PLANNED PRIN PROCEDURE CODE:
9  OTHER PROCEDURES: (MULTIPLE)
10 HAIR REMOVAL BY:
11 HAIR REMOVAL METHOD:
12 HAIR REMOVAL COMMENTS:      (WORD PROCESSING)
13 TIME PAT IN OR:
14 TIME OPERATION BEGAN:
15 TIME OPERATION ENDS:

Enter Screen Server Function:  13
Time Patient In the O.R.:  13:00  AUG 1, 2006 AT 13:00
```

The software processes the information and produces an update.

```
** SHORT SCREEN **      CASE #16  SURPATIENT,ONE      PAGE 1 OF 4

1  DATE OF OPERATION:      AUG 01, 2006
2  HOSPITAL ADMISSION STATUS: SAME DAY
3  PRIMARY SURGEON:              SURSURGEON,ONE
4  PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE
5  PRIN PRE-OP ICD DIAGNOSIS CODE (ICD9):
6  OTHER PREOP DIAGNOSIS: (MULTIPLE)
7  PRINCIPAL PROCEDURE: REMOVE FACIAL LESIONS
8  PLANNED PRIN PROCEDURE CODE:
9  OTHER PROCEDURES: (MULTIPLE)
10 HAIR REMOVAL BY:
11 HAIR REMOVAL METHOD:
12 HAIR REMOVAL COMMENTS:      (WORD PROCESSING)
13 TIME PAT IN OR:              AUG 1, 2006 AT 13:00
14 TIME OPERATION BEGAN:
15 TIME OPERATION ENDS:

Enter Screen Server Function:
```

Editing Data

Changing an existing entry is similar to entering. Once again, the user can type in the number for the data element he/she wants to change and press **<Enter>**. In the following example, the number 3 was entered to change the surgeon name. A new prompt appeared containing the existing value for the data element in a default format. We entered the new value, "SURSURGEON,TWO." The software immediately processed this information and produced an updated screen.

```
** SHORT SCREEN **      CASE #16  SURPATIENT,ONE      PAGE 1 OF 4
1  DATE OF OPERATION:      AUG 01, 2006
2  HOSPITAL ADMISSION STATUS: SAME DAY
3  PRIMARY SURGEON:          SURSURGEON,ONE
4  PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE
5  PRIN PRE-OP ICD DIAGNOSIS CODE (ICD9):
6  OTHER PREOP DIAGNOSIS: (MULTIPLE)
7  PRINCIPAL PROCEDURE: REMOVE FACIAL LESIONS
8  PLANNED PRIN PROCEDURE CODE:
9  OTHER PROCEDURES: (MULTIPLE)
10 HAIR REMOVAL BY:
11 HAIR REMOVAL METHOD:
12 HAIR REMOVAL COMMENTS:  (WORD PROCESSING)
13 TIME PAT IN OR:          AUG 1, 2006 AT 13:00
14 TIME OPERATION BEGAN:
15 TIME OPERATION ENDS:

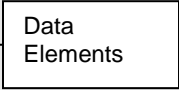

Enter Screen Server Function: 3
PRIMARY SURGEON: SURSURGEON,ONE // SURSURGEON,TWO
```

The software processes the information and produces an update.

```
** SHORT SCREEN **      CASE #16  SURPATIENT,ONE      PAGE 1 OF 4
1  DATE OF OPERATION:      AUG 01, 2006
2  HOSPITAL ADMISSION STATUS: SAME DAY
3  PRIMARY SURGEON:          SURSURGEON,TWO
4  PRINCIPAL PRE-OP DIAGNOSIS: BENIGN LESIONS ON NOSE
5  PRIN PRE-OP ICD DIAGNOSIS CODE (ICD9):
6  OTHER PREOP DIAGNOSIS: (MULTIPLE)
7  PRINCIPAL PROCEDURE: REMOVE FACIAL LESIONS
8  PLANNED PRIN PROCEDURE CODE:
9  OTHER PROCEDURES: (MULTIPLE)
10 HAIR REMOVAL BY:
11 HAIR REMOVAL METHOD:
12 HAIR REMOVAL COMMENTS:  (WORD PROCESSING)
13 TIME PAT IN OR:          AUG 1, 2006 AT 13:00
14 TIME OPERATION BEGAN:
15 TIME OPERATION ENDS:

Enter Screen Server Function:
```

Turning Pages

No more than 15 data elements will fit on a single Screen Server formatted page, but there can be as many pages as needed. Because many screens contain more than one page of data elements, the screen server provides the ability to move between the pages. Pages are numbered in the heading. To go back one page, enter minus one (-1) at the action prompt. To go forward, enter plus one (+1) or press **<Enter>**. The user can move more than one page by combining the minus or plus sign with the number of pages needed to go backward or forward.

Entering or Editing a Range of Data Elements

Colons and semicolons are used as delineators for ranges of item numbers. This allows the user to respond to two or more data elements on the same page of a screen at one time. Typing a colon and/or semicolon between the item numbers at the prompt tells the software what elements to display for editing.

Colons are used when the user wants to respond to all numbers within a sequence (for example, 2:5 means items 2, 3, 4, and 5). Semicolons are used to separate the item numbers for non-sequential items (e.g., 2; 5; 9; 11 means items 2, 5, 9 and 11). To respond to all the data elements on the page, enter "A" for all.

Example 1: Colon

```

** STARTUP **      CASE #24  SURPATIENT,TWO      PAGE 2 OF 3
1  PREOP CONSCIOUS:
2  PREOP SKIN INTEG:
3  TRANS TO OR BY:

14 ASA CLASS:
15 PREOP MOOD:

Enter Screen Server Function: 7;9;
Operating Room Procedure Performed: OR4// OR2
Planned Postop Care: WARD//OUTPATIENT/DISCHARGE
```

Working with Multiples

The notation MULTIPLE indicates a data element that can have more than one answer. Some multiple fields have several layers of screens from which to respond. Navigating through the layers may seem tedious at first, but the user will soon develop speed. Remember, the user can press <Enter> at the prompt to go back to the main menu screen, or enter an up-arrow (^) to go back to the previous screen.

In the following examples, there are other screens after the initial (also called top-level) screen. With the multiple screens, a new menu list is built with each entry.

Example: Multiples

```
** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1 OF 3
1  TIME PAT IN HOLD AREA: AUG 15, 2001 AT 740
2  TIME PAT IN OR:      AUG 15, 2001 AT 800
3  ANES CARE TIME BLOCK: (MULTIPLE) (DATA)
4  TIME OPERATION BEGAN: AUG 15, 2001 AT 900
5  SPECIMENS:           (WORD PROCESSING)
6  CULTURES:            (WORD PROCESSING)
7  THERMAL UNIT:        (MULTIPLE)
8  ELECTROCAUTERY UNIT:
9  ESU COAG RANGE:
10 ESU CUTTING RANGE:
11 TIME TOURNIQUET APPLIED: (MULTIPLE)
12 PROSTHESIS INSTALLED: (MULTIPLE) (DATA)
13 REPLACEMENT FLUID TYPE: (MULTIPLE)
14 IRRIGATION:          (MULTIPLE)
15 MEDICATIONS:         (MULTIPLE)

Enter Screen Server Function: 12

** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1
    PROSTHESIS INSTALLED

1  NEW ENTRY

Enter Screen Server Function: 1
Select PROSTHESIS INSTALLED PROSTHESIS ITEM: MANDIBULAR PLATES
    PROSTHESIS INSTALLED ITEM: MANDIBULAR PLATES// <Enter>
```

Notice the three user responses entered above. The first response, 12, told the software that we want to enter data in the PROSTHESIS INSTALLED field. Then, at the next screen, we entered "1" because we wanted to make a new prosthesis entry for this case. The third response, MANDIBULAR PLATES, told the software the kind of prosthesis being installed. The software echoed back the full prosthesis name "MANDIBULAR PLATES" and we accepted it by pressing <Enter>.

Because the PROSTHESIS INSTALLED field can contain multiple answers, a new screen immediately appeared as follows:

```

** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1
      PROSTHESIS INSTALLED (MANDIBULAR PLATES)

1  PROSTHESIS ITEM:          MANDIBULAR PLATES
2  IMPLANT STERILITY CHECKED:
3  STERILITY EXPIRATION DATE:
4  RN VERIFIER:
5  VENDOR:
6  MODEL:
7  LOT NUMBER:
8  SERIAL NUMBER:
9  STERILE RESP:
10 SIZE:
11 QUANTITY:
12 PROVIDER READ BACK PERFORMED:

Enter Screen Server Function: 2:11
Implant Sterility Checked (Y/N): Y YES
Sterility Expiration Date: 01.30.07 (JAN 30, 2007)
RN Verifier: SURNURSE,ONE OS
Manufacturer/Vendor: SYNTHES
Model: MAXILLOFACIAL
Lot Number: #20-15
Serial Number: 612A874
Who is Accountable for Sterilization: SPD
Size: 10 HOLE
Quantity: 20

```

The first response, 2:10, corresponds to data elements 2 through 10. We entered data for these elements one-by-one and the software processed the information and produced this update:

```

** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1 OF 1
      PROSTHESIS INSTALLED (MANDIBULAR PLATES)

1  PROSTHESIS ITEM:          MANDIBULAR PLATES
2  IMPLANT STERILITY CHECKED: YES
3  STERILITY EXPIRATION DATE: JAN 30, 2007
4  RN VERIFIER:              SURNURSE,ONE
5  VENDOR:                   SYNTHES
6  MODEL:                    MAXILLOFACIAL
7  LOT NUMBER:               20-15
8  SERIAL NUMBER:           612A874
9  STERILE RESP:            SPD
10 SIZE:                     10 HOLE
11 QUANTITY:                 20
12 PROVIDER READ BACK PERFORMED:

Enter Screen Server Function: <Enter>

```

Pressing <Enter> will now bring back the top-level screen and allow us to make another entry. As many as 15 prostheses can be added to this list. If we were to add more prostheses, the N and R shortcuts discussed on the next two pages would come in handy, but it is a good idea to practice the steps just covered before attempting the shortcuts.

Multiple Screen Shortcuts

The help text for a multiple field mentions the N and R functions. The user can enter a question mark (?) to view the help text at the prompt, as displayed in the following example.

```
** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1 OF 1
    PROSTHESIS INSTALLED

1  PROSTHESIS ITEM:   MANDIBULAR PLATES
2  NEW ENTRY

Enter Screen Server Function:  ?
Enter 2N to enter only the top level of this multiple, or the number
of your choice followed by an 'R' to make a duplicate entry.

Press <RET> to continue
```

N Function

The N function allows the user to enter **new** entries without going beyond the top level screen, whereas the R function allows the user to **repeat** a previous top level response. In the following example we will build entries by entering the data element number and the letter N:

```
** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1 OF 1
    PROSTHESIS INSTALLED

1  MANDIBULAR PLATES
2  NEW ENTRY

Enter Screen Server Function:  2N
Select PROSTHESIS INSTALLED PROSTHESIS ITEM:  GLENOID COMPONENT
    PROSTHESIS INSTALLED ITEM: GLENOID COMPONENT// <Enter>
Select PROSTHESIS INSTALLED PROSTHESIS ITEM:  HUMERAL COMPONENT
    PROSTHESIS INSTALLED ITEM: HUMERAL COMPONENT// <Enter>
Select PROSTHESIS INSTALLED PROSTHESIS ITEM:  INTRAMEDULLARY PLUG
    PROSTHESIS INSTALLED ITEM: INTRAMEDULLARY PLUG// <Enter>
Select PROSTHESIS INSTALLED PROSTHESIS ITEM:  <Enter>
```

The software processes the information and produces an update.

```
** OPERATION **      CASE #14  SURPATIENT,THREE          PAGE 1 OF 1
    PROSTHESIS INSTALLED

1  PROSTHESIS ITEM:   MANDIBULAR PLATES
2  PROSTHESIS ITEM:   GLENOID COMPONENT
3  PROSTHESIS ITEM:   HUMERAL COMPONENT
4  PROSTHESIS ITEM:   INTRAMEDULLARY PLUG
5  NEW ENTRY

Enter Screen Server Function:  <Enter>
```

R Function

The R function saves the user from typing in the top-level information again. In this example, we have the same anesthesia technique but different anesthesia agents. By entering the element number we want to repeat, and the letter R, we avoid having to enter the top-level data again. This feature can also be useful in cases where the same medication is repeated at different times. After the user enters the item and the letter R, the software responds with a default prompt. The user can press <Enter> to accept the default.

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE

1  ANESTHESIA TECHNIQUE:  GENERAL
2  ANESTHESIA TECHNIQUE:  LOCAL
3  NEW ENTRY
Enter Screen Server Function:  1R
    ANESTHESIA TECHNIQUE: GENERAL// <Enter>

```

The software processes the information and produces an update.

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE  (0)

1  ANESTHESIA TECHNIQUE:  GENERAL
2  PRINCIPAL TECH:
3  ANESTHESIA AGENTS:      (MULTIPLE)

Enter Screen Server Function:  3

```

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE  (0)
    ANESTHESIA AGENTS

1  NEW ENTRY

Enter Screen Server Function:  1
Select ANESTHESIA AGENTS:  PROCAINE HYDROCHLORIDE
    ANESTHESIA AGENTS: PROCAINE HYDROCHLORIDE // <Enter>

```

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE  (0)
    ANESTHESIA AGENTS

1  ANESTHESIA AGENTS:      PROCAINE HYDROCHLORIDE
2  NEW ENTRY

Enter Screen Server Function:  <Enter>

```

The software processes the information and produces an update.

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE  (0)

1  ANESTHESIA TECHNIQUE:  GENERAL
2  PRINCIPAL TECH:
3  ANESTHESIA AGENTS:      (MULTIPLE) (DATA)

Enter Screen Server Function:  <Enter>

```

The updating continues through to the top layer.

```

** SHORT SCREEN **   CASE #10  SURPATIENT,FOUR  PAGE 1 OF 1
    ANESTHESIA TECHNIQUE

1  ANESTHESIA TECHNIQUE:  INTRAVENOUS
2  ANESTHESIA TECHNIQUE:  LOCAL
3  ANESTHESIA TECHNIQUE:  INTRAVENOUS
4  NEW ENTRY

Enter Screen Server Function:

```

Word Processing

The phrase “Word Processing” in the menu means that the user can enter as much data as needed to complete the entry.

Following is an example of how we entered text on a Screen Server word processing field. Notice that we pressed **<Enter>** after each line of text as there is no automatic word-wrap:

```
      ** SHORT SCREEN **      CASE #25  SURPATIENT,FOUR      PAGE 3 OF 3
1  COUNT VERIFIER:
2  SURGERY SPECIALTY:      GENERAL(OR WHEN NOT DEFINED BELOW)
3  WOUND CLASSIFICATION:
4  ATTENDING SURGEON:      MO,CHAUNCEY G
5  ATTENDING/RES SUP CODE:
6  SPECIMENS:      (WORD PROCESSING)

7  CULTURES:      (WORD PROCESSING)
8  NURSING CARE COMMENTS:  (WORD PROCESSING) (DATA)
9  ASA CLASS:
10 PRINC ANESTHETIST:
11 ANESTHESIA TECHNIQUE:  (MULTIPLE)
12 ANES CARE TIME BLOCK:  (MULTIPLE)
13 DELAY CAUSE:      (MULTIPLE)

Enter Screen Server Function:
```

Chapter One: Booking Operations

Introduction

The options described in this chapter facilitate the scheduling of surgical procedures. Automated scheduling provides better operating room use and greater ease in distributing the operating room schedule. These options help accomplish the following tasks.

- Track patients on a waiting list
- Track operation requests
- Chart operating room availability
- Designate operating rooms for a surgical service
- Schedule operations by assigning operating rooms and time slots
- Generate operating room schedules on any designated printer in the medical center
- Reschedule or cancel any operative procedures

Whether or not the user is booking a case from the Waiting List, *Request Operations* menu, or *Schedule Operations* menu, he/she will be asked to provide preoperative information about the case. Some of the preoperative information is mandatory and must be entered immediately to proceed with the option, while other information can be entered later. It is advisable to enter as much information as possible and update or correct it later. If a prompt cannot be answered, the user can press the <Enter> key to move to the next item.

Key Vocabulary

The following terms are used in this chapter.

Term	Definition
Concurrent Case	The patient undergoes two operations, by two different specialties, at the same time in the same operating room.
Cutoff Time	An institution might have a daily cutoff time for entering requests. After the cutoff time, the user is prohibited from booking a request for an operation to take place through midnight of the following day. The user may still book requests two or more days in advance.
Outstanding Requests	Requests that have been entered but not scheduled. When the patient name is entered, the software will list the outstanding requests for this patient.
Screen Server	After the data concerning the operation has been entered, the terminal display device will clear and then present a two-page Screen Server summary. The Screen Server summary organizes the information entered and gives the user another opportunity to enter or edit data.

Exiting an Option or the System

The user can type the up-arrow (^) at any prompt to stop the line of questioning and return to the previous level in the routine. To completely exit from the system, the user should continue entering up-arrows.

Option Overview

The main options included in this menu are listed below. Each of these options, except the *List Operation Requests* option and *List Scheduled Operations* option, contain submenus. To the left of the option name is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
W	<i>Maintain Surgery Waiting List</i>
R	<i>Request Operations</i>
LR	<i>List Operation Requests</i>
S	<i>Schedule Operations</i>
LS	<i>List Scheduled Operations</i>

Maintain Surgery Waiting List

[SROWAIT]

The options within the *Maintain Surgery Waiting List* menu allow surgeons to develop waiting lists for selected surgery specialties. The patient can remain on the Waiting List until sufficient information is available to book the operation for a specific date (see *Make a Request from the Waiting List* option).

This option is locked with the SROWAIT key.

The *Maintain Surgery Waiting List* menu contains the following options. To the left is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
W	<i>Print Surgery Waiting List</i>

Print Surgery Waiting List [SRSWL2]

Resident surgeons use the *Print Surgery Waiting List* option to print the waiting list for one or more surgical specialties. The Waiting List includes the names of patients waiting to have an operation and the type of operation. Cases entered on the Waiting List are not assigned an operating room or a date of operation.

The report can be sorted in several different ways. First, the user can sort the report by one or more surgical specialties. Then, the user can choose to sort the report either alphabetically by patient name, by the tentative date of the operation, or by the date the case was entered on the waiting list. A brief form can be requested, as in Example 1, or a long form report, as in Example 2. The long form report includes the procedure name, comments, referring physician, tentative admission date, patient address, and phone numbers.

This report has an 80-column format and can be viewed on a software terminal or copied to a printer. When the screen is full the user will be prompted to press the Return key to continue viewing the list.

Example 1: Print the Surgery Waiting List, Brief Form, Sort By T

```
Select Maintain Surgery Waiting List Option: W Print Surgery Waiting List

                Surgery Waiting List Reports

Print Report By:

Enter a Patient on the Waiting List [SROW-ENTER]

Resident surgeons use the *Enter a Patient on the Waiting List* option to enter a patient on the waiting list for a selected surgical specialty.

First, identify the surgical specialty to which the patient will be assigned. To add a new case to the waiting list, the user must enter the patient name and the procedure name. Comments, referring physician name and address, tentative admission date, and tentative operation date can also be added. This information will appear on the *Waiting List Report*. Patient names stay on the Waiting List until the data is used to make a request or until it is deleted.

Example: Enter a Patient on the Waiting List

```
Select Maintain Surgery Waiting List Option: E Enter a Patient on the Waiting List
```

```
Select Surgical Specialty: 62 PERIPHERAL VASCULAR PERIPHERAL VASCULAR 62
...OK? YES// <Enter> (YES)
PERIPHERAL VASCULAR
```

```
Select Patient: SURPATIENT,EIGHT 06-04-35 000370555
```

```
Select Operative Procedure: HAVEST SAPHENOUS VEIN
```

```
Select PATIENT: SURPATIENT,EIGHT// <Enter>
```

```
General Comments/Special Instructions:
1>Patient is an insulin dependent diabetic.
2><Enter>
```

```
EDIT Option: <Enter>
```

```
Tentative Admission Date: 08/25/01 (AUG 25, 2001)
Tentative Date of Operation: 08/26/01 (AUG 26, 2001)
```

```
Select REFERRING PHYSICIAN: DR. ONE SURSURGEON
Street Address: VAMC HOUSTON
City: HOUSTON
State: TEXAS
Zip Code: 77005
Telephone Number: 555 555-5555
```

```
SURPATIENT,EIGHT has been entered on the waiting list for PERIPHERAL VASCULAR
```

```
Press RETURN to continue
```

Edit a Patient on the Waiting List [SROW-EDIT]

The *Edit a Patient on the Waiting List* option is used to edit information collected for a patient who is already on the waiting list. The user enters the patient's name first. The user should be certain that the correct patient has been entered and that the right entry (there can be more than one) has been selected. Information can then be updated by simply typing in the new data at each prompt. If there is no change for a response, press the <Enter> key and the cursor will go to the next prompt.

This option allows changes to the procedure name, the referring physician information, comments, tentative admission date, and/or the tentative operation date. A patient's name cannot be edited. A patient's name will stay on the Waiting List until the data is used to make a request or until it is deleted.

Example: Edit Waiting List

```
Select Maintain Surgery Waiting List Option: U Edit a Patient on the Waiting List
Edit which Patient ? SURPATIENT,EIGHT          06-04-35          000370555
Procedures entered on the Waiting List for SURPATIENT,EIGHT
1. PERIPHERAL VASCULAR          Date Entered on List:      AUG 11,2001

```

Delete a Patient from the Waiting List [SROW-DELETE]

The *Delete a Patient from the Waiting List* option is used to delete a patient's procedure from the Surgery Waiting List. Enter the patient's name and select the procedure from the list of procedures and his or her entry will be deleted. The software will provide a message that the procedure has been deleted.

Example: Delete Patient From Waiting List

```
Select Maintain Surgery Waiting List Option: D Delete a Patient from the Waiting List
```

```
Delete which Patient ? SURPATIENT,EIGHT 06-04-35 000370555
```

```
Procedures entered on the Waiting List for SURPATIENT,EIGHT
```

```
1. PERIPHERAL VASCULAR          Date Entered on List:    AUG 11,2001  
   HARVEST SAPHENOUS VEIN       Tentative Operation Date: AUG 26,2001
```

```
Are you sure that you want to delete this entry ? YES// <Enter>
```

```
SURPATIENT,EIGHT has been removed from the Waiting List.
```

```
Press RETURN to continue
```

(This page included for two-sided copying.)

Request Operations Menu

[SROREQ]

The *Request Operations* menu contains several functions that the surgeons and resident surgeons use to book an operation. Options within the *Request Operations* menu are used to book an operation for a certain day. The surgeon can request, via the software, the operation(s) for a patient on a specific day and then enter additional information concerning the upcoming operation.

This option is locked with the SROREQ key.

To request an operation, the user must have a patient name, an operative procedure to perform, and a date to book it. Also required are the Surgeon, Surgical Specialty, and the Indications for Operations. If the user does not know the anticipated date of surgery, the user can enter the patient on the Waiting List. If there is enough information to book the operation for a specific time and operating room, the user can use the *Schedule Unrequested Operations* option on the *Schedule Operation* menu to schedule the operation.

The information gathered is collated by the software and used to produce reports. The person in charge of scheduling (scheduling manager) arranges the operation requests according to the hospital's Surgical Service protocols and schedules the operation by assigning the case an operating room and a time slot.

The options included in the *Request Operations* menu option are listed below. To the left of the option name is the shortcut character(s) the user can enter to select the option.

Shortcut	Option Name
A	<i>Display Availability</i>
R	<i>Make Operation Requests</i>
D	<i>Delete or Update Operation Requests</i>
W	<i>Make a Request from the Waiting List</i>
CC	<i>Make a Request for Concurrent Cases</i>
V	<i>Review Request Information</i>
OR	<i>Operation Requests for a Day</i>
WR	<i>Requests by Ward</i>

Display Availability [SRODISP]

The *Display Availability* option is used to check on the availability of an operating room before booking an operation. This option allows the user to view the availability of operating rooms on a blockout graph. This screen is “read-only” with no editing capabilities.

Scheduled operations display on the graph as an equal sign (=) followed by the letter X. The equal sign before the X indicates the beginning of a scheduled operation. Surgical specialty blockouts are indicated by an abbreviation for the service (for more information on service blockouts, a function of the Scheduling menu, see the *Create Service Blockouts* option).

After entering this option, the user has a choice of viewing the room availability on the blockout graph in two ways. The user can either view all rooms for a particular date (as in Example 1) or view a particular operating room for a range of dates (Example 2). Notice, in the first example, that the user can also list requests, if any have been made.

Condensed Characters

If the display terminal can print condensed characters, a 24-hour graph will display on the screen. If not, the user will be prompted to select one of three graphs representing different chunks of that day.

Example 1: All O.R.S For One Day

```
Select Request Operations Option:  A Display Availability
```

```
Do you want to view all Operating Rooms on one day ?  YES //  <Enter>
```

```
Do you want to list requests also ?  NO//  <Enter>

Make Operation Requests [SROOPREQ]

The *Make Operation Requests* option allows the resident surgeon or scheduling manager to request an operation for a patient on a specific day. To request an operation the user must know the patient name, the operative procedure to be performed, and the date on which to book the procedure.

This option also asks for detailed information concerning the upcoming operation. First, the user will be prompted to enter required information, including the Date of Operation, Surgeon, Surgical Specialty, Principal Procedure, and indications for the operation. Facilities can set up additional required fields using the *Surgery Site Parameters (Enter/Edit)* option within the *Surgery Package Management* menu. Then, the user will be prompted to enter procedure information, such as the estimated case length, blood product information, and other information about the operation.

The user should enter as much information as possible when making the request. Later, more information can be added or corrections can be made by using the *Delete or Update Operation Requests* option.

About Outstanding Requests

When the patient name is entered, the software will list any requests that have been made but not scheduled. These requests are called outstanding requests. If the user discovers that the request being entered has already been made, he or she should respond **YES** to the prompt "Do you want to update the outstanding request?" Answering **YES** allows the user to view the information and make changes (see the following example).

If the user is entering a new, separate request for the same patient, he or she should respond **NO** to this prompt.

Example: Making an Operation Request

```
Select Request Operations Option:  R  Make Operation Requests
Select Patient:      SURPATIENT,NINE      12-09-51      000345555      NSC VETERAN

The following requests are outstanding for SURPATIENT,NINE:

1.  09-15-99
    Release of Hammer Toes
2.  11-20-99
    CHOLECYSTECTOMY

Do you want to update the outstanding request ?  YES// <Enter>

Select Operation Request:  1
```

Prompts that require a response before the user can continue with the option include the following.

- "Make a Request for which Date ?"
- "Primary Surgeon:"
- "Attending Surgeon:"
- "Surgical Specialty:"
- "Principal Operative Procedure:"
- "Principal Preoperative Diagnosis:"

Entering Preoperative Information

At this prompt:	The user should do this:
Principal Preoperative Diagnosis	Type in the reason this procedure is being performed. The user must enter information into this field prompt before the option can be completed. The information entered in this field will automatically populate the Indications for Operations field, which can be edited through the Screen Server.
Planned Principal Procedure Code (CPT)	Type in the Current Procedural Terminology (CPT) identifying code for each procedure. If the code number is not known, the user can enter the type of operation (i.e., appendectomy) or a body organ and select from a list of codes.
Estimated Case Length (HOURS:MINUTES)	Either accept the default answer by pressing the <Enter> key, or enter a number for the length of time needed for this procedure. If a CPT Code is entered, the software will display the average length of time for the procedure based on the Surgical Specialty and CPT Code.
Brief Clinical History	This information will display on the Tissue Examination Report. It should contain any information relevant to the specimens being sent to the laboratory. This is a word-processing field.

-----*chart continues*-----

At this prompt:	The user should do this:
Select REQ BLOOD KIND	<p>Enter the type of blood product that will be needed for the operation.</p> <p>The package coordinator can select a default response to this prompt when installing the package. If the default product is not what is wanted for a case, it can be deleted by entering the at-sign (@) at this prompt. The user can then select the preferred blood product (enter two question marks for a list of blood products).</p> <p>If no blood products are needed, do not enter NO or NONE. Instead, press the <Enter> key to bypass this prompt.</p> <p>To order more than one product for the same case, use the screen server summary that concludes the option and select item 9, REQ BLOOD KIND. This is a multiple field; as many blood products as needed may be entered.</p>
Requested Preoperative X-Rays	<p>Enter the types of preoperative x-ray films and reports required for delivery to the operating room before the operation. This field may be left blank if the user does not intend to order any x-ray products.</p>
Preoperative Infection	<p>Enter the letter code “C” for clean or “D” for contaminated or “S” for ‘SPECIAL CONSIDERATIONS’ or type in the first few letters of either word. This information allows the scheduling manager to determine how much time is needed between operations for sanitizing a room.</p>

Example: Make Operation Requests

```
Select Request Operations Option: R Make Operation Requests

Select Patient: SURPATIENT,TWENTY          03-27-40      000454886

The following request is outstanding for SURPATIENT,TWENTY:

Service Classifications

The Surgery software allows the user to associate a patient's Service Classification status when entering or editing a surgical case or Non-OR procedure. Service Classifications can be designated for a surgical case *only* if the veteran is first registered with these designations.

The Service Classifications that the user selects for the case also apply to the principal diagnosis.

These classifications default to each Other Postop Diagnosis as they are added to the case.

Updating an Operation Request with Service Classification Information

After the user selects the patient and enters the required data, a screen displays with questions about the Service Classifications.

If the patient is not enrolled, or his/her status is not populated in enrollment, the software displays the text "*SC/NSC status not found, N will be defaulted into all SC/EI categories.*" The software defaults **N** into all Service Connected/Environmental Indicator fields related to the case.

If the user changes the SC/EI classifications at the case level, the software prompts the user with the message "*Update all 'OTHER POSTOP DIAGNOSIS' Eligibility and Service Connected Conditions with these values?*"

The following example depicts Service Classification status change when the user updates a case.

The user can also edit diagnosis classification status individually using the *Surgeon's Verification of Diagnosis & Procedures* option or the *Update/Verify Procedure/Diagnosis Codes* option.

Example: Make an Operation Request with Service Classification Information

```
SURPATIENT,TEN (000-12-3456)          ALLIED VETERAN

* * * Eligibility Information and Service Connected Conditions * * *

Primary Eligibility: SERVICE CONNECTED 50% to 100%
Combat Vet: NO      A/O Exp.: YES      M/S Trauma: NO
ION Rad.: YES      SWAC: YES          H/N Cancer: NO
PROJ 112/SHAD: YES

          SC Percent: 100%

Treatment related to PROJ 112/SHAD (Y/N): YES

Update all 'OTHER POSTOP DIAGNOSIS' Eligibility and
Service Connected Conditions with these values? Enter YES or NO. <NO> Y

Press RETURN to continue
```

Delete or Update Operation Requests [SRSUPRQ]

The *Delete or Update Operation Requests* option is used to delete a request, to update information, or to change the date of a requested operation. When a user enters this option and selects a patient's name and case, he or she can choose one of the three functions. The three functions are explained below and the next few pages contain examples of how to use them.

The prompts differ for concurrent cases (operations performed by two different specialties at the same time on the same patient), as illustrated in Examples 4, 5, and 6. Whenever a user makes a change or updates information for one of the concurrent cases, the software wants to know if the other case is affected.

The three functions available in this option are also available in the *Request Operations* option when the user selects an outstanding request.

With this function:	The user can:
Delete	Permanently remove an operation request from the software files (Examples 1 and 4). Example 4 shows the deletion of one operation in a set of concurrent cases.
Update Request Information	Change the length of the operation and edit other data fields that were entered earlier (Example 2). The software can automatically update each case in a set of two concurrent cases (Example 5).
Change the Request Date	Alter the operation date of the request (Examples 3 and 6). For a set of concurrent cases to remain concurrent, the user must change the request date for both operations (Example 6).

Example 1: Delete a Request

```
Select Request Operations Option: D Delete or Update Operation Requests
Select Patient: SURPATIENT,NINE 12-09-51 000345555 NSC VETERAN
```

The following cases are requested for SURPATIENT,NINE:

1. 08-15-01 CHOLECYSTECTOMY
2. 09-15-01 Release of Hammer Toes

Select Operation Request: **2**

1. Delete
2. Update Request Information
3. Change the Request Date

Select Number: **1**

Are you sure that you want to delete this request ? YES// **<Enter>**

Deleting or Updating Requests for Concurrent Cases

Any changes made to one concurrent case can affect the other case. When one of the concurrent cases is deleted, a prompt will ask if the user wishes to delete the other case also. If the user responds with **NO**, the remaining operation will stay in the records as a single case. When the user changes the date of one operation of a concurrent case, the user must simultaneously change the date for the other operation, otherwise the operations will no longer be considered concurrent.

When updating a response to a prompt or group of related prompts, the software will ask if the user wants to store (meaning duplicate) the information in the other case. This saves time by storing the information into the other case so that it does not have to be entered again. If the user does not want the prompt response duplicated for the other case, enter **N** or **NO**.

Example 4: Delete a Request for Concurrent Cases

```
Select Request Operations Option: D Delete or Update Operation Requests
Select Patient: SURPATIENT,FOUR 01-16-35 000170555 NSC VETERAN
```

The following cases are requested for SURPATIENT,FOUR:

The request for SURPATIENT,FOUR has been changed to JUN 2, 2005.

Press RETURN to continue

Make a Request from the Waiting List [SRSWREQ]

The *Make a Request from the Waiting List* option uses data from the Waiting List to make an operation request. It can save time by moving data from the Waiting List to the request (simultaneously removing it from the waiting list). As with any request, a date for the surgery is required.

After the user enters the patient name, the software will list any operations on the Waiting List for that patient. The user then selects the operative procedure wanted. The software will advise if the patient selected has any outstanding requests.

Each institution might have a daily cutoff time for entering requests. After the cutoff time for a particular day, the users are prohibited from booking a request for an operation to take place through midnight of that day.

When a request is made, the user is asked to provide preoperative information about the case. It is best to enter as much information as available.

Example: Making A Request From the Waiting List

```
Select Request Operations Option: W Make a Request from the Waiting List

Make a request from the waiting list for which patient ? SURPATIENT,FOURTEEN
08-16-51      000457212

Press RETURN to continue:

Make a Request for Concurrent Cases [SRSREQCC]

The *Make a Request for Concurrent Cases* option is used to book concurrent operations. Concurrent cases are two operations performed on the same patient by different surgical specialties simultaneously, or back-to-back in the same room. A request may be made for each case at one time with this option. As usual, whenever a request is entered, the user is asked to provide preoperative information about the case. It is best to enter as much information as possible and update it later if necessary.

Mandatory Prompts

After the patient name has been entered, the user will be prompted to enter some required information about the first case (the mandatory prompts include the date of operation, procedure, surgeon and attending surgeon, principal preoperative diagnosis, and time needed). If a mandatory prompt is not answered, the software will not book the operation and will return the user to the *Request Operations* menu. After answering the prompts for the first case, the user is prompted to answer the same questions about the second case. Then, the software will provide a message that the two requests have been entered and simultaneously prompt the user to select one of the cases for entering detailed information. If the user does not want to enter detailed preoperative information at this time, pressing the <Enter> key will send the user to the *Request Operations* menu. In Example 1, detailed information is entered for the first case only.

Storing the Request Information

After most prompts, the software will ask if the user wants to store (meaning duplicate) this information in the concurrent, or other, case. This saves time by storing the information into the other case so that information does not have to be entered again. If the user does not want the prompt response duplicated for the other case, he or she should enter **N** or **NO**.

Finally, the software will display the Screen Server summary and store any duplicated information into the other case. At this point, the software will provide another message that the two requests have been entered and again prompt the user to select either case for entering detailed information. This whole process may be repeated with the other case by selecting the number for it, or pressing the <Enter> key to get back to the *Request Operations* menu.

Updating the Preoperative Information Later

Use the *Delete or Update Operation Requests* option to change or update any of the information entered for either or both concurrent cases (Example 2).

Requests by Ward [SROWRQ]

Users can utilize the *Requests by Ward* option to print request information for patients in all wards or a specific ward. The first prompt asks if the user wants to print the requests for all wards. If not, accept the **NO** default and the next prompt will ask "Print schedule for which ward?". If the user enters a question mark (?), the help screen will list the ward names from which to choose. Patients not assigned to a ward are listed under the category "Outpatient."

This report prints in an 80-column format and can be viewed on the screen.

Example: Print Requests by Ward

Schedule Operations

[SROSCHOP]

The options contained within the *Schedule Operations* menu are designed to be used by surgeons or the Scheduling Manager to book an operation when the date, time, and operating room are determined. The scheduling manager may schedule an already requested operation using the *Schedule Requested Operation* option. On the other hand, the scheduling manager may book an operation that has not been previously requested if the date, time and operating room are known. In this case, the *Request Operations* option can be skipped and the operation can be scheduled using the *Schedule Unrequested Operations* option.

This option is locked with the SROSCH key.

Whether a user is booking a case from the Waiting List, *Request Menu*, *Scheduling Menu*, or as a new surgery, he or she will be asked to provide preoperative information about the case. It is advisable to enter as much information as possible. Later, the information can be updated.

The information gathered by the *Request Operations* options is collated by the software and used to produce reports. The person in charge of scheduling (scheduling manager) arranges the requests according to the hospital's Surgical Service protocols and schedules the operation by assigning the case an operating room and a time slot. The information gathered by the *Schedule Operations* menu is collated by the software and is used to produce reports for the scheduling manager.

Local restrictions can be applied to the scheduling of procedures. For example, a facility can require CPT codes be entered before a surgical case is scheduled. The *Surgery Site Parameters* (Enter/Edit) option is used to select required fields.

The options included in the *Schedule Operation* menu are listed below. To the left of the option name is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
A	<i>Display Availability</i>
SR	<i>Schedule Requested Operations</i>
SU	<i>Schedule Unrequested Operations</i>
CON	<i>Schedule Unrequested Concurrent Cases</i>
R	<i>Reschedule or Update Scheduled Operations</i>
C	<i>Cancel Scheduled Operation</i>
UC	<i>Update Cancellation Reason</i>
AN	<i>Schedule Anesthesia Personnel</i>
B	<i>Create Service Blockout</i>
DB	<i>Delete Service Blockout</i>
S	<i>Schedule of Operations</i>

Display Availability [SRODISP]

A user can view the availability of operating rooms on a blackout graph before booking an operation with the *Display Availability* option. A user might also use this option to check a booking or service blackout. This feature is the same as the *Display Availability* option available on the *Request Operations* menu option.

Scheduled operations show up on the graph as an equal sign (=) followed by the letter X. The equal sign before the X indicates the beginning of a scheduled operation. Surgical specialty blockouts are indicated by an abbreviation for the service. For more information on service blockouts, a function of the scheduling menu, see the *Create Service Blockout* option.

If the facility has a display terminal that can print condensed characters, a 24-hour graph will display on the screen. If not, the user will be prompted to select one of three graphs representing different chunks of that day.

Example: Display all O.R.s for One Day

```
Select Schedule Operations Option: A Display Availability
Do you want to view all Operating Rooms on one day ? YES // <Enter>
Do you want to list requests also ? NO// <Enter>
Display Operating Room Availability for which Date ? T (JUL 01, 1999)

Schedule Requested Operation [SRSCHD1]

Users utilize the *Schedule Requested Operation* option to schedule a previously requested operation when enough information is available to assign an operating room and time slot. The user will also be prompted to provide anesthesia personnel information. The information entered here is reflected in the Schedule of Operations report. This option is designed for the scheduling manager to expeditiously schedule any or all requests on a specific date.

First, the user enters the patient to be scheduled. The software will automatically display all requests for that patient. The user then picks the request he or she wishes to schedule and assigns the operating room, beginning and end times, and anesthesia personnel for the case. The user can then choose another patient to schedule, or press the <Enter> key to leave the option.

The prompts that require a response before the user can continue with this option include the following.

"Schedule a Case for which Operating Room ?"
"Reserve from what time ? (24HR:NEAREST 15 MIN):"
"Reserve to what time ? (24HR:NEAREST 15 MIN):"

Scheduling a Concurrent Case

A concurrent case occurs when a patient undergoes two operations by different surgical specialties simultaneously, or back-to-back in the same operating room. Example 2 demonstrates scheduling a requested concurrent case. When a user schedules a concurrent case, he or she must answer the prompt "There is a concurrent case associated with this operation. Do you want to schedule it for the same time? (Y/N) ". If the answer is **NO**, the two cases will no longer be considered concurrent. The user can enter anesthesia personnel information for each case.

The user should allow enough time for **both** surgeries when he or she answers the prompts, "Reserve from what time ? (24HR:NEAREST 15 MIN):" and "Reserve to what time ? (24HR:NEAREST 15 MIN):".

Example 1: Schedule a Requested Operation

Select Schedule Operations Option: **SR** Schedule Requested Operations

Select Patient: **SURPATIENT,SIX** 04-04-30 000098797

The following case is requested for SURPATIENT,SIX:

1. 04-24-99 CHOLECYSTECTOMY

Select Patient:

Schedule Unrequested Operations [SROSRES]

Users can use the *Schedule Unrequested Operations* option to schedule an operation that has not been requested. To schedule an operation, the user must determine the date, time, and operating room. The information entered in this option is reflected in the Schedule of Operations Report.

Whenever a new case is booked, the user is asked to provide preoperative information about the case. Enter as much information as possible. Later, the information can be updated or corrected.

Prompts that require a response before the user can continue with this option are listed below.

"Schedule Procedure for which Date ?"
"Select Patient:"
"Schedule a case for which operating Room ?"
"Reserve from what time ? (24HR:NEAREST 15 MIN):"
"Reserve to what time ? (24HR:NEAREST 15 MIN):"
"Desired Procedure Date:"
"Primary Surgeon:"
"Attending Surgeon:"
"Surgical Specialty:"
"Principal Operative Procedure:"
"Principal Preoperative Diagnosis:"

Entering Preoperative Information

At this prompt:	The user should do this:
Planned Principal Procedure Code (CPT)	Enter the Current Procedural Terminology (CPT) identifying code for each procedure. If the code number is not known, the user can enter the type of operation (i.e., appendectomy) or a body organ and select from a list of codes.
Principal Preoperative Diagnosis	Type in the reason this procedure is being performed. The user must enter information into this field prompt before the option can be completed. The information entered in this field will automatically populate the Indications for Operations field, which can be edited through the Screen Server.
Brief Clinical History	Enter any information relevant to the specimens being sent to the laboratory. This is an open-text word-processing field. This information will display on the Tissue Examination Report.
Select REQ BLOOD KIND	<p>Enter the type of blood product needed for the operation.</p> <p>If no blood products are needed, do not enter NO or NONE; instead, press the <Enter> key to bypass this prompt.</p> <p>The package coordinator at each facility can select a default response to this prompt when installing the package. If the default product is not what is wanted for a case, it can be deleted by entering the at-sign (@) at this prompt. Then, the user can select the preferred blood product. (Enter two question marks for a list of blood products.)</p> <p>To order more than one product for the same case, use the screen server summary that concludes the option. On page two of the summary, select item 7, REQ BLOOD KIND, to enter as many blood products as needed.</p>
Requested Preoperative X-Rays	Enter the types of preoperative x-ray films and reports required for delivery to the operating room before the operation. If the user does not intend to order any x-ray products, this field should be left blank.
Preoperative Infection	Enter the letter code “C” for clean or “D” for contaminated or “S” for ‘SPECIAL CONSIDERATIONS’ or type in the first few letters of either word. This information allows the scheduling manager to determine how much time is needed between operations for sanitizing a room.

Example: Schedule an Unrequested Operation

Select Schedule Operations Option: **SU** Schedule Unrequested Operations

Schedule a Procedure for which Date ? **7 18 05** (JUL 18, 2005)

Schedule Unrequested Concurrent Cases [SRSCHDC]

The *Schedule Unrequested Concurrent Cases* option is used to schedule concurrent cases that have not been requested. A concurrent case is when a patient undergoes two operations by different surgical specialties simultaneously, or back to back in the same room. The user can schedule both cases with this one option. As usual, whenever the user enters a request, he or she is asked to provide preoperative information about the case. It is best to enter as much information as possible and update it later if necessary.

Required Prompts

After the patient name is entered, the user will be prompted to enter some required information about the first case. The mandatory prompts include the date, procedures, surgeon and attending surgeon, principal preoperative diagnosis, and time needed. If a mandatory prompt is not answered, the software will not book the operation and will return the cursor to the *Schedule Operations* menu. After answering the prompts for the first case, the user will be asked to answer the same prompts for the second case. The software will then provide a message stating that the two requests have been entered. The user can then select a case for entering detailed preoperative information. If the user does not want to enter details at this time, he or she should press the <Enter> key and the cursor will return to the *Schedule Operations* menu. In the example, detailed information for the first case has been entered.

Storing the Request Information

After every prompt or group of related prompts, the software will ask if the user wants to store (meaning duplicate) the answers in the concurrent case. This saves time by storing the information into the other case so that it does not have to be typed again. The software will then display the screen server summary and store any duplicated information into the other case. Finally, the software will inform the user that the two requests have been entered and prompt to select either case for entering detailed information. The user can select a case or press the <Enter> key to get back to the *Schedule Operations* menu.

Updating the Preoperative Information Later

Use the *Reschedule or Update a Scheduled Operation* option to change or update any of the information entered for either of the concurrent cases.

Example: Schedule Unrequested Concurrent Cases

```
Select Schedule Operations Option: CON Schedule Unrequested Concurrent Cases

Schedule Concurrent Cases for which Patient ? SURPATIENT,EIGHT 06-04-35

Reschedule or Update a Scheduled Operation [SRSCHUP]

The *Reschedule or Update a Scheduled Operation* option has three uses: 1) to add a concurrent case, 2) to reschedule an operation for another date, time, and/or operating room, 3) to update the preoperative information that was entered earlier.

Adding a Concurrent Case (See Example 1)

After the case is selected, the software will ask whether the user wishes to add a concurrent case. If the response is **YES**, the software will prompt for information on the second case. To add the case, the user must enter a surgeon and attending surgeon, a surgical specialty, the principal operative procedure, and a principal preoperative diagnosis. The software will then inform the user that the case has been added. The user can then select another case or the same case for entering detailed preoperative information, or the user can press the <Enter> key to return to the *Schedule Operations* menu.

Changing the Date, Time, or Operating Room (See Example 2)

If a user does not wish to add a concurrent case, the software will prompt to change the date, time or operating room. If the user enters **YES**, the software will erase the old date, time, and operating room and prompt to re-enter this information. The user will be prompted to select a new date, but if the <Enter> key is pressed, the software will default to the original date and allow the user to change the room and time. The software supplies a blockout graph to help with rescheduling.

If the user attempts to reschedule a case after the schedule close time for the date of operation, only the time, and not the date, can be changed.

Updating the Preoperative Info (See Example 3)

To update the preoperative information that was entered earlier, the user should respond **NO** to the prompt asking if the user wishes to change the date, time or operating room. The terminal display screen will clear and present a two-page Screen Server summary. Any of the data fields may be changed, as in Example 2.

Example 3 also shows the user how to order more than one blood product for a case.

Cancel Scheduled Operation [SRSCAN]

When a scheduled operation is cancelled, the *Cancel Scheduled Operation* option will remove that case from the list of scheduled operations. A cancellation will remain in the system as a cancelled case and will be used in computing the facility's cancellation rate.

Enter the patient name and select the operation to be deleted from the choices listed. The "Primary Cancellation Reason:" prompt is a mandatory prompt. Enter a question mark for a list of primary cancellation reasons from which to select. If a mistake is made, or the user finds out later that the primary cancellation reason was not correct, the *Update Cancellation Reason* option allows the primary cancellation reason to be edited.

If there is a concurrent case associated with the operation being cancelled, the software will ask if the user wants to cancel it also.

Example 1: Cancel a Single Scheduled Operation

```
Select Schedule Operations Option: C Cancel Scheduled Operation

Cancel a Scheduled Procedure for which Patient: SURPATIENT,NINETEEN          01-01-40

Primary Cancellation Reason: PATIENT HEALTH STATUS
// 1 PATIENT RELATED ISSUE      1
Cancellation Avoidable: NO// <Enter>

Press RETURN to continue <Enter>
```

Schedule Anesthesia Personnel [SRSCHDA]

The *Schedule Anesthesia Personnel* option allows anesthesia staff to assign, or change, anesthesia personnel for surgery cases. The scheduling manager may have already assigned some personnel to a case using other menu selections. For the user's convenience, the software will default to any previously entered data.

This option is locked with the SROANES key and will not appear on the menu if the user does not have this key.

This option is used to enter the names of the principal anesthetist, the supervisor, and anesthesia techniques for cases scheduled on a specific date. The user should first enter the date, and then select an operating room. The software will display all cases scheduled in that room. After scheduling personnel for any or all cases in one operating room, the user can do the same for other operating rooms without leaving this option.

This option also appears on the *Anesthesia* menu.

Example: Schedule Anesthesia Personnel

Select Schedule Operations Option: **AN** Schedule Anesthesia Personnel

Schedule Anesthesia Personnel for which Date ? **8/16** (AUG 16, 1999)

Schedule Anesthesia Personnel for which Operating Room ? **OR2**

Press RETURN to continue, or '^' to quit **<Enter>**

Would you like to continue with another operating room ? YES// **<Enter>**

Schedule Anesthesia Personnel for which Operating Room ? **OR1**

There are no cases scheduled for this operating room.

Press RETURN to continue **<Enter>**

Would you like to continue with another operating room ? YES// **N**

Create Service Blockout [SRSBOUT]

At times, the surgical staff may need to set aside an operating room for a particular service on a recurring basis. The *Create Service Blockout* option is used by the scheduling manager to blockout the operating room(s) on a graph.

The resulting service blockout is automatically charted on a graph that can be viewed from the *Display Availability* option. This service blockout does not restrict the operating room to the service, but can assist the scheduling manager when assigning operating rooms.

The scheduling manager can create the service blockouts by following the example provided on the following page. The required data fields are listed in the following table.

At this prompt:	The user should do this:
For what service?	Enter a three or four letter abbreviation for the surgical service the room is being reserved (for example, card for cardiology, gen for general surgery). Do not use the letter X or an equal sign (=).
Select Operating Room	Enter the operating room name or code. The operating room must already exist in the HOSPITAL LOCATION file and the OPERATING ROOM file. The user should enter a question mark to get a list of operating rooms already included in these files. The supervisor or package coordinator can add an operating room to these files.
Select Starting Date	The user should enter the date for the blockout to begin.
Reserve from what time?	Enter the times for which this room will be blocked-out for a particular service. A room may be reserved at any time during the 24-hour cycle to the nearest 15 minutes.
Reserve to what time?	Enter the end time for the service blockout.

Example: Create a Service Blockout

```
Select Schedule Operations Option: B Create Service Blockout

For what service ? (3-4 characters, do not use 'X' or '=') CARD
Select Operating Room: OR2

Select Starting Date: T (NOV 18, 1999)

Reserve from what time ? (24HR:NEAREST 15 MIN): 7 (07:00)
Reserve to what time ? (24HR:NEAREST 15 MIN): 12 (12:00)

1. Every week, same time
2. Every other week
3. Every month, same day of week & week of month

Select Number: 1

Updating Schedules...
```

After the service blockout has been created, it will appear on the operating room availability graph display, as shown below.

ROOM	6AM	7	8	9	10	11	12	13	14	15	16	17	18	19	20
OR1		uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.	uro.
OR2		card	card	card	card	card	card	card	card	card	card	card	card	card	card
OR3		thor	thor	thor	thor	thor	thor	thor	thor	thor	thor	thor	thor	thor	thor
OR4		gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.	gen.
OR5		=XXX	XXXX	=XXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX

Delete Service Blockout [SRSDDEL]

The following example shows how to remove a service blockout from the blockout graph. A service blockout can be deleted for just one date or for all the reserved dates.

After starting this option, if the user decides not to delete a service blockout, he or she can enter an up-arrow (^) to exit.

Example: Delete Service Blockout

```
Select Schedule Operations Option: DB Delete Service Blockout
Select service you wish to delete. (3-4 characters) CARD

The service 'card' has the following time(s) scheduled:
  1. OR1 on Tuesday from 07.00 to 12.00

Which number would you like to delete ? 1

Delete the Blockout starting with which date ? 3/29 (MAR 29, 1999)

Do you want to delete the blockout for this service on this
date only ? NO// <Enter>

Updating Schedules...

Press RETURN to continue
```

Schedule of Operations [SROSCH]

The *Schedule of Operations* option generates the Operating Room Schedule used by the OR nurses, surgeons, anesthesiologists and other hospital services. The report lists operations and patients scheduled for a particular date. It sorts by operating room and includes the procedure(s), blood products requested, and any preoperative x-rays requested. The schedule also provides anesthesia information and surgeon names.

This report has a 132-column format and is designed to be copied to a printer.

By setting up default printers in the SURGERY SITE PARAMETERS file, this report can be queued to print in various locations simultaneously. Please see “Chapter 5: Managing the Software Package” for more information.

Example: Print Schedule of Operations

```
Select Schedule Operations Option:  S  Schedule of Operations
Print Schedule of Operations for which date ?  9/8  (SEP 08, 1999)
Do you want to print the schedule at all locations ?  NO//  <Enter>
This report is designed to use a 132 column format.
DEVICE:  [Select Print Device]
```

Chapter Two: Tracking Clinical Procedures

Introduction

The options described in this chapter provide on-line access to medical administration and laboratory information and provide tracking of operative procedures. They allow the following:

- Entry of information specific to an individual surgical case (for example, staff, times, diagnoses, complications, anesthesia).
- On-line entry of data inside the operating room during the actual operative procedure.
- Generation of patient records and reports.

Key Vocabulary

The following terms are used in this chapter.

Term	Definition
Concurrent Case	The patient undergoes two operations, by two different specialties, at the same time in the same operating room.
Screen Server	After the data concerning the operation has been entered, the terminal display device will clear and then present a two-page Screen Server summary. The Screen Server summary organizes the information entered and gives the user another opportunity to enter or edit data.

Exiting an Option or the System

The user should enter an up-arrow (^) to stop what he or she is currently doing. The user can use the up-arrow at almost any prompt to terminate the line of questioning and return to the previous level in the routine. Continue entering up-arrows to completely exit the system.

Option Overview

The main options included in this chapter are listed in the following table. The *Operation Menu* option, *Anesthesia Menu* option, and the *Non-O.R. Procedures* menu contain submenus. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
O	<i>Operation Menu</i>
A	<i>Anesthesia Menu</i>
PO	<i>Perioperative Occurrences Menu</i>
NON	<i>Non-O.R. Procedures</i>
C	<i>Comments</i>

Operation Menu

[SROPER]

The *Operation Menu* provides operating room personnel with on-line access to medical administration and laboratory information and generates post-operative reports, including the Nurse Intraoperative Report and the Operation Report. The menu options provide the opportunity to delete, edit, or review a patient's operation history or to enter information concerning a new surgery. The *Operation Menu* allows the user to select an area on which to concentrate data entry or review, such as post operation or anesthesia information. It is designed for operating room nurses, surgeons, and anesthesiologists to use before, during, and after surgery. The Screen Server utility is used extensively to provide quick access to relevant information.

This option is locked with the SROPER key.

The *Operation Menu* contains the following options. To the left is the keyboard shortcut the user can enter to select the option. A restricted option, such as the *Anesthesia Menu*, will not display if the user does not have security clearance for that option.

Shortcut	Option Name
I	<i>Operation Information</i>
SS	<i>Surgical Staff</i>
OS	<i>Operation Startup</i>
O	<i>Operation</i>
PO	<i>Post Operation</i>
PAC	<i>Enter PAC(U) Information</i>
OSS	<i>Operation (Short Screen)</i>
V	<i>Surgeon's Verification of Diagnosis & Procedures</i>
A	<i>Anesthesia Menu</i>
OR	<i>Operation Report</i>
AR	<i>Anesthesia Report</i>
NR	<i>Nurse Intraoperative Report</i>
TR	<i>Tissue Examination Report</i>
R	<i>Enter Referring Physician Information</i>
RP	<i>Enter Irrigations and Restraints</i>
M	<i>Medications (Enter/Edit)</i>
AB	<i>Abort/Cancel Operation</i>
B	<i>Blood Product Verification</i>

Using the Operation Menu Options

This section provides information on the following:

- accessing the *Operation Menu* option
- entering information
- reviewing information
- deleting a surgery case
- entering a new surgical case

Accessing the Operation Menu

To use one of the *Operation Menu* options, the user must first identify the patient and case on which he or she is currently working. When the *Operation Menu* option is selected, the user will be prompted to enter a patient name. The software will then list all the cases on record for the patient, including scheduled or requested cases and any operations that have been started or completed. Each case will have one of the following designations.

Designation	Definition
REQUESTED	The procedure is booked for a particular day but the time of surgery and the operating room are not yet confirmed.
SCHEDULED	The procedure is booked for both an operating room and a day, and the starting time of the surgery is scheduled.
NOT COMPLETE	The start time of the operation is recorded and the patient is still in the operating room.
COMPLETE	The operation is completed and the patient has left the operating room.
ABORTED	The patient entered the operating room, but the operation had to be cancelled.

Following is an example of how the software lists existing cases on record for a patient.

```
Select Surgery Menu Option:  Operation Menu  
Select Patient: SURPATIENT,SIX 04-04-30 000098797 NSC VETERAN
```

```
SURPATIENT,SIX 000-09-8797
```

1. 01-25-92 ARTHROSCOPY, RIGHT SHOULDER (SCHEDULED)
2. 01-05-92 CORONARY BYPASS (REQUESTED)
3. ENTER NEW SURGICAL CASE

```
Select Operation: <Enter>
```

The user can select from the case(s) listed or, as in an emergency situation, enter a new surgical case. When the existing case is selected, the software will ask whether the user wants to:

- 1) enter information for the case,
- 2) review the information already entered, or
- 3) delete the case.

```
SURPATIENT,SIX 000-09-8797
```

```
01-25-92 ARTHROSCOPY, RIGHT SHOULDER (SCHEDULED)
```

1. Enter Information
2. Review Information
3. Delete Surgery Case

```
Select Number: 1//
```

Entering Information

First, the user selects the patient name. The Surgery software will then list all the cases on record for the patient, including scheduled or requested cases and any operations that have been started or completed. Then, the user selects the appropriate case.

Example: Enter Information

```
Select Surgery Menu Option:  Operation Menu
Select Patient: SURPATIENT,THREE      12-19-53      000212453
```

```
SURPATIENT,THREE      000-21-2453

1. 03-12-92  SHOULDER ARTHROPLASTY-PROSTHESIS (SCHEDULED)
2. 08-15-88  SHOULDER ARTHROPLASTY (NOT COMPLETE)
3. ENTER NEW SURGICAL CASE
```

```
Select Operation: 2
```

```
SURPATIENT,THREE      000-21-2453

08-15-88      SHOULDER ARTHROPLASTY (NOT COMPLETE)
```

```
1. Enter Information
2. Review Information
3. Delete Surgery Case
```

```
Select Number: 1// <Enter>
```

After the case is displayed, the user will press the **<Enter>** key or enter the number **1** to enter information for the case.

```
SURPATIENT,THREE (000-21-2453)      Case #14 - MAR 12,1999

I      Operation Information
SS     Surgical Staff
OS     Operation Startup
O      Operation
PO     Post Operation
PAC    Enter PAC(U) Information
OSS    Operation (Short Screen)
TO     Time Out Verified Utilizing Checklist
V      Surgeon's Verification of Diagnosis & Procedures
A      Anesthesia for an Operation Menu ...
OR     Operation Report
AR     Anesthesia Report
NR     Nurse Intraoperative Report
TR     Tissue Examination Report
R      Enter Referring Physician Information
RP     Enter Irrigations and Restraints
M      Medications (Enter/Edit)
AB     Abort/Cancel Operation
B      Blood Product Verification
```

```
Select Operation Menu Option:
```

Now the user can select any of the *Operation Menu* options.

Reviewing Information

The user enters the number **2** to access this feature. This feature displays a two-page summary of the case. The user cannot edit from this feature. Press the **<Enter>** key at the "Enter Screen Server Function:" prompt to move to the next page, or enter **+1** or **-1** to move forward or backward one page.

Example: Review Information

```
Select Surgery Menu Option: Operation Menu
Select Patient: SURPATIENT,THREE 12-19-53 000212453
```

```
SURPATIENT,THREE 000-21-2453

```

Entering a New Surgical Case

A new surgical case is a case that has not been previously requested or scheduled. This option is designed primarily for entering emergency cases. Be aware that a surgical case entered in the records without being booked through scheduling will not appear on the operating room schedule or as an operative request.

At the "Select Operation:" prompt the user enters the number corresponding to the ENTER NEW SURGICAL CASE field. He or she will then be prompted to supply preoperative information concerning the case.

After the user has entered data concerning the operation, the screen will clear and present a two-page Screen Server summary and provide another opportunity to enter or edit data.

Prompts that require a response include:

"Select the Date of Operation:"

"Desired Procedure Date:"
 "Enter the Principal Operative Procedure:"
 "Principal Preoperative Diagnosis:"
 "Select Primary Surgeon:"
 "Attending Surgeon:"
 "Select Surgical Specialty:"
 "Planned Principal Procedure Code:"

```

Operation Information [SR0MEN-OPINFO]

Surgeons and other members of the surgical staff use the *Operation Information* option for a quick reference on a case. It produces a report that touches on the more important areas of interest recorded for the case. The report can be viewed on screen but cannot be edited from this option.

An asterisk indicates the principal diagnosis for the case, since some cases have more than one diagnosis. Notice that the INTRAOP OCCURRENCES field and the POSTOP OCCURRENCES field indicate if there are occurrences; however, the occurrences will not be defined, as access to this information is restricted.

Example: Operation Information

Select Operation Menu Option: **I** Operation Information

```
-----  
Patient: SURPATIENT,SIX (000-09-8797)      Operation Date: MAR  9, 1999  
Primary Surgeon: SURSURGEON,SIXTEEN  
Attending Surgeon: SURSURGEON,FOUR        Operation Time: 45 Minutes  
Operation(s):  
APPEDECTOMY  
-----  
Postop Diagnosis:                          Intraop Occurrences: YES  
* APPENDICITIS                             Postop Occurrences:  YES

-----  
Wound Classification:  
Intraoperative Blood Loss: 100 CC'S  
-----  
Press RETURN to continue
```

Surgical Staff [SROMEN-STAFF]

The *Surgical Staff* option allows the operating room nurse or scheduling manager to enter or edit the names of the surgical team prior to the operation. Some data fields may be automatically filled in based on previous responses. The names entered will be reflected in the Nurse Intraoperative Report and other staffing reports.

At the "Enter Screen Server Function:" prompt, the user may choose the field(s) to be edited or press the **<Enter>** key to continue. Some of the data fields are "multiple" and may contain more than one value. When a field labeled "multiple" is selected, a new screen is generated so that the user can enter data related to that multiple. For example, the CIRC SUPPORT, SCRUB SUPPORT, and SCRUBBED ASSISTANT fields generate new screens that allow the user to add the TIME ON, TIME OFF, REASON FOR RELIEF, and STATUS. The TIME ON and TIME OFF fields also generate additional screens so that the user may enter more than one TIME ON/OFF for the same operation as some assistants must enter and exit more than once.

If entering times on a day other than the day of surgery, enter both the date and the time. Entering only a time will default the date to the current date.

Field Information

The following are fields that correspond to the Surgical Staff entries.

Field Name	Definition
ATTENDING/RES SUP CODE	This field corresponds to the highest level of supervision provided by the attending staff surgeon during the procedure. Enter a question mark (?) to retrieve the list of codes.
OTHER SCRUBBED ASSISTANTS	If there are more than two assistants scrubbed for this case, they can be entered here.
OTHER PERSONS IN O.R.	This fields includes any observers, such as equipment vendors, in the operating room.

Operation Startup [SR0MEN-START]

The nurse or other operating room staff uses the *Operation Startup* option to enter data concerning the patient's preparation for the surgery (for example, diagnosis, delays, skin prep, and position aids). Some data fields may be automatically filled in based on previous responses.

Some of the data fields are "multiple fields" and can have more than one value. For example, a patient can have more than one diagnosis or restraint/position aid. When a multiple field is selected, a new screen is generated so that the user can enter data related to that multiple. At the "Enter Screen Server Function:" prompt, the user can choose the field(s) to be edited, or press the <Enter> key to go to the next item or page.

Field Information

The following are fields that correspond to the Operation Startup entries.

Field Name	Definition
:	
DELAY CAUSE:	If the actual start time of the surgery is significantly delayed (15 minutes or more, depending on the institution's policy) it is necessary to select a reason at the "Delay Cause:" prompt. Type in a question mark (?) at this prompt to select from a list of delay causes.
RESTR & POSITION AIDS:	A safety strap is automatically included as a restraint.

Example: Operation Startup

Select Operation Menu Option: **OS** Operation Startup

Operation [SR0MEN-OP]

Surgeons and nurses use the *Operation* option to enter data relating to the operation during or immediately following the actual procedure. It is very important to record the time of the patient's entrance into the hold area and operating room, the time anesthesia is administered, and the operation start time.

Many of the data fields are "multiple fields" and can have more than one value. For example, a patient can have more than one diagnosis or procedure done per operation. When a multiple field is selected, a new screen is generated so that the user can enter data related to that multiple. The up-arrow (^) can be used to exit from any multiple field. Enter a question mark (?) for software- assisted instruction.

Field Information

The following are fields that correspond to the Operation entries.

Field Name	Definition
TIME OPERATION BEGAN	The user should check his or her institution's policy concerning an operation's start time. In some institutions, this may be the time of first incision.

If entering times on a day other than the day of surgery, enter both the date and the time. Entering only a time will default the date to the current date.

Example: Operation Option: Entering Information

Post Operation [SRROMEN-POST]

The *Post Operation* option concerns the close of the operation, discharge, and post anesthesia recovery. It is important to enter the operation and anesthesia end times, as well as the time the patient leaves the operation room, as these fields affect many reports.

Field Information

The following are fields that correspond to the *Post Operation* option entries.

Field Name	Definition
TIME PAT OUT OR	Entry of this field generates an alert notifying the circulating nurse that the Nurse Intraoperative Report is ready for signature.
ANES CARE TIME BLOCK	Entry of this multiple generates an alert notifying the anesthetist that the Anesthesia Report is ready for signature.

Example: Post Operation

Select Operation Menu Option: **PO** Post Operation

```

Operation (Short Screen) [SROMEN-OUT]

The *Operation (Short Screen)* option provides a three-page screen of information concerning a surgical procedure performed on a patient. The *Operation (Short Screen)* option allows the nurse or surgeon to easily enter data relating to the operation during, and shortly after, the actual procedure. This time-saving option can replace the *Operation Startup* option, the *Operation* option, and the *Post Operation* option for minor surgeries.

When only one anesthesia technique is entered, the software will assume that it is the principal anesthesia technique for the case. Some data fields may be automatically pre-populated if the case was booked in advance.

Example: Operation Short Screen

Select Operation Menu Option: **OSS** Operation (Short Screen)

```

Surgeon's Verification of Diagnosis & Procedures [SROVER]

Surgeons use this option to verify that the stated procedure(s), diagnosis, and occurrences are correct for a case. With this option, the surgeon can update the Operation Name, Planned CPT Code, Diagnosis, and Intraoperative Occurrences before verifying the case. If the case has already been verified, the user will be asked whether to re-verify it.

If the user responds **YES** to the prompt "Do you need to update the information above ?" the software will provide a summary for editing.

If there are no occurrences, the INTRAOP OCCURRENCES field should be left blank. Do **not** enter **NO** or **NONE**.

The procedure and diagnosis codes are the codes captured with clinical data, and are supplied as defaults to the Coder when entering the final codes that will be sent to PCE.

Service Classifications

Information relating to a patient's status of Service Connected (SC) and Environmental Indicators (EI) are captured during patient registration. The Surgery software receives this data from enrollment and displays it when the user creates a case.

In the Surgery software, the patient's Service Classification status is determined at the case level when the case is created. The user can further refine status designations, not only per case, but also per diagnosis.

The system defaults the case-level Service Classification indicators into each Other Postop Diagnosis field as the user adds the Other Postop Diagnoses. The system allows the user to edit these fields if the user determines that the defaulted value is incorrect.

Anesthesia for an Operation Menu [SROANES]

The *Anesthesia for an Operation Menu* option is restricted to anesthesia personnel and is locked with the SROANES key.

This option is designed for convenient entry of data pertaining to the anesthesia agents, personnel and techniques. When the user selects this option from the *Operation Menu* option, he or she is given a submenu of five options.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym that may be entered to select the option.

Shortcut	Option Name
I	<i>Anesthesia Information (Enter/Edit)</i>
T	<i>Anesthesia Technique (Enter/Edit)</i>
M	<i>Medications (Enter/Edit)</i>
R	<i>Anesthesia Report</i>
S	<i>Schedule Anesthesia Personnel</i>

Prerequisites

To use any of these options, other than the *Schedule Anesthesia Personnel* option, the user must first select a patient case. For the *Schedule Anesthesia Personnel* option, a date and then an operating room must first be selected.

These options can also be accessed from the main *Surgery Menu*.

Information related to these options is contained in “Chapter Two: Tracking Clinical Procedures,” in the Anesthesia Menu section.

Operation Report [SROS RPT]

The *Operation Report* option displays the dictated Operation Report for the patient case selected. This report contains the surgeon's dictation regarding the surgical procedure. The Operation Report is not electronically signed in the Surgery package. After the dictated Operation Report is uploaded into the Text Integration Utilities (TIU) package, it is then available for electronic signature through the Computerized Patient Record System (CPRS) Surgery tab.

When electronically signed, the Operation Report is also viewable through CPRS. The electronically signed Operation Report replaces VA Form 516. If the Operation Report has not been electronically signed, then CPRS will only display a stub for that document.

After the dictated Operation Report is transcribed and uploaded into TIU, the TIU software sends an alert to the surgeon responsible for electronically signing the report.

Until the Operation Report is signed, if the *Operation Report* option is selected, the following text displays:

“The Operation Report for this case is not yet available.”

If the Operation Report has been signed, the *Operation Report* option will display the signed document. (See the example.)

-----printout follows-----

Example: A signed Operation Report

Page: 1

SURPATIENT,TEN 000-12-3456

OPERATION REPORT

NOTE DATED: 07/29/2003 15:15 OPERATION REPORT
VISIT: 07/29/2003 15:15 SURGERY OF REPORT NON-COUNT
SUBJECT: Case #: 73285

PREOPERATIVE DIAGNOSIS: Visually significant cataract, right eye

POSTOPERATIVE DIAGNOSIS: Visually significant cataract, right eye

PROCEDURE: Phacoemulsification with intraocular lens placement, right eye

CLINICAL INDICATIONS: This 64-year-old gentleman complains of decreased vision in the right eye affecting his activities of daily living. Best corrected visual acuity is counting fingers at 6 feet, associated with a 2-3+ nuclear sclerotic and 4+ posterior subcapsular cataract in that eye.

ANESTHESIA: Local monitoring with topical Tetracaine and 1% preservative free Lidocaine.

DESCRIPTION OF THE PROCEDURE: After the risks, benefits and alternatives of the procedure were explained to the patient, informed consent was obtained. The patient's right eye was dilated with Phenylephrine, Mydriacyl and Ocufen. He was brought to the Operating Room and placed on anesthetic monitors. Topical Tetracaine was given. He was prepped and draped in the usual sterile fashion for eye surgery. A Lieberman lid speculum was placed.

A Supersharp was used to create a superior paracentesis port. The anterior chamber was irrigated with 1% preservative free Lidocaine. The anterior chamber was filled with Viscoelastic. The diamond groove maker and diamond keratome were used to create a clear corneal tunneled incision at the temporal limbus. The cystotome was used to initiate a continuous capsulorrhexis, which was then completed using Utrata forceps. Balanced salt solution was used to hydrodissect and hydrodelineate the lens.

Phacoemulsification was used to remove the lens nucleus and epinucleus in a non-stop horizontal chop fashion. Cortex was removed using irrigation and aspiration. The capsular bag was filled with Viscoelastic. The wound was enlarged with a 69 blade. An Alcon model MA60BM posterior chamber intraocular lens with a power of 24.0 diopters, serial #588502.064, was folded and inserted with the leading haptic placed into the bag. The trailing haptic was dialed into the bag with the Lester hook. The wound was hydrated. The anterior chamber was filled with balanced salt solution. The wound was tested and found to be self-sealing. Subconjunctival antibiotics were given, and an eye shield was placed. The patient was taken in good condition to the Recovery Room. There were no complications.

Anesthesia Report [SROARPT]

The Anesthesia Report details anesthesia information for the patient case selected. This option provides the capability to view/print the report, edit information contained in the report, and electronically sign the report. This option can also be accessed from the *Anesthesia Menu* option located on the *Operation Menu*, as well as on the main *Surgery Menu*.

Anesthesia Report (Unsigned)

Upon selecting this option, if the Anesthesia Report is not signed the report will begin displaying. The Anesthesia Report displays key fields on the first page. Several of these fields are required before the software will allow the user to electronically sign the report. If any of these fields are left blank, a warning will appear prompting the user to provide the missing information. The ANES CARE TIME field, PRINCIPAL ANETHESIA TECHNIQUE (primary) field, ANESTHESIA TECHNIQUE field, ASA CLASS field, OP DISPOSITION field, and the PRINC ANESTHETIST field must all be completed before the Anesthesia Report can be electronically signed.

Entering the information into the ANES CARE END TIME field triggers an alert that is sent to the anesthetist responsible for signing the report. By responding to the alert, the user is taken to the *Anesthesia Report* option.

At the bottom of the first screen is the prompt, "Press <return> to continue, 'A' to access Anesthesia Report functions or '^' to exit:". The *Anesthesia Report* functions, accessed by entering **A** at the prompt, allow the user to edit the report, to view or print the report, or to electronically sign the report.

Example: First page of an Anesthesia Report

```
MEDICAL RECORD          SURPATIENT,TEN (000-12-3456)          PAGE 1
                        ANESTHESIA REPORT - CASE #267226

Nurse Intraoperative Report [SRONRPT]

The Nurse Intraoperative Report details case information relating to nursing care provided for the patient during the operative case selected. This option provides the capability to view and print the report, edit information contained in the report, and electronically sign the report.

With the *Surgery Site Parameters* option located on the *Surgery Package Management Menu*, the user can select one of two different formats for this report. One format includes all field names whether or not information has been entered. The other format only includes fields that have actual data.

Electronically signed reports may be viewed through CPRS for completed operations.

Nurse Intraoperative Report - Before Electronic Signature

Upon selecting the *Nurse Intraoperative Report* option, if the Nurse Intraoperative Report is not signed, the report will begin displaying on the screen. The Nurse Intraoperative Report displays key fields on the first page. Several of these fields are required before the software will allow the user to electronically sign the report. If any required fields are left blank, a warning will appear prompting the user to provide the missing information.

The following fields are required before electronic signature of the Nurse Intraoperative Report:

- TIME PAT IN OR
- HAIR REMOVAL METHOD
- CORRECT PATIENT IDENTITY
- SITE OF PROCEDURE
- CONFIRM PATIENT POSITION
- ANTIBIOTIC PROPHYLAXIS
- BLOOD AVAILABILITY
- CHECKLIST COMMENT
- TIME-OUT COMPLETED
- TIME PAT OUT OR
- MARKED SITE CONFIRMED
- PREOPERATIVE IMAGING CONFIRMED
- PROCEDURE TO BE PERFORMED
- CONFIRM VALID CONSENT
- CORRECT MEDICAL IMPLANTS
- APPROPRIATE DVT PROPHYLAXIS
- AVAILABILITY OF SPECIAL EQUIP
- PROSTHESIS INSTALLED

The WOUND SWEEP and INTRAOPERATIVE-XRAY will be required to sign the NIR if any of the count fields (SPONGE FINAL COUNT CORRECT, SHARPS FINAL COUNT CORRECT, and INSTRUMENT FINAL COUNT CORRECT) is answered with “NO”.

If the COUNT VERIFIER field has been entered, the following fields are required:

- SPONGE FINAL COUNT CORRECT
- INSTRUMENT FINAL COUNT CORRECT
- SHARPS FINAL COUNT CORRECT
- SPONGE, SHARPS, & INST COUNTER
- POSSIBLE ITEM RETENTION

The ANESTHESIA TECHNIQUE field is made mandatory in order for the NIR report to be signed.

If the PROSTHESIS INSTALLED field has an item (or items) entered, the following fields are required for each item:

- IMPLANT STERILITY CHECKED
- RN VERIFIER
- SERIAL NUMBER
- STERILITY EXPIRATION DATE
- LOT NUMBER
- PROVIDER READ BACK PERFORMED

If the PLANNED PRIN PROCEDURE CODE field for the case is matches one of these CPT codes 32851, 32852,3 2853, 32854, 33935, 33945, 44135, 44136, 47135, 47136, 48160, 48554, 50360, 50365; the following fields are required:

- ORGAN TO BE TRANSPLANTED
- UNOS NUMBER
- DONOR SEROLOGY HCV
- DONOR SEROLOGY HBV
- DONOR SEROLOGY CMV
- DONOR SEROLOGY HIV
- DONOR ABO TYPE
- RECEIPIENT ABO TYPE
- BLOOD BANK ABO VERIFICATION
- BLOOD BANK ABO VER COMMENTS
- D/T BLOOK BANK ABO VERIF
- OR ABO VERIFICATION
- D/T OR ABO VERIF
- SURGEON VERIFYING UNET
- UNET VERIF BY SURGEON
- ORGAN VER PRE-ANESTHESIA
- SURGEON VER ORGAN PRE-ANES
- SURGEON VER DONOR ORG PRE-ANES
- DONOR ORG VER PRE-ANES
- ORGAN VER PRE-TRANSPLANT
- SURGEON VER ORG PRE-TRANSPLANT
- DONOR VESSEL UNOS ID
- DONOR VESSEL USAGE
- DONOR VESSEL DISPOSITION

Entering the TIME PAT OUT OR field triggers an alert that is sent to the nurse responsible for signing the report. By acting on the alert, the nurse accesses the *Nurse Intraoperative Report* option to electronically sign the report.

At the bottom of the first screen is the prompt, "Press <return> to continue, 'A' to access Nurse Intraoperative Report functions, or '^' to exit:". The *Nurse Intraoperative Report* functions, accessed by entering **A** at the prompt, allow the user to edit the report, to view or print the report, or to electronically sign the report.

Example: First page of the Nurse Intraoperative Report

Select Operation Menu Option: **NR** Nurse Intraoperative Report

```

Nursing Care Comments:

PATIENT STATES HE IS ALLERGIC TO PCN. ALL WRVAMC INTRAOPERATIVE NURSING STANDARDS WERE MONITORED THROUGHOUT THE PROCEDURE. VANCYMYCIN PASTE WAS APPLIED TO STERNUM.

(This page included for two-sided copying.)

To electronically sign the report, the user enters a **3** at the *Nurse Intraoperative Report* functions prompt.

Example: Signing the Nurse Intraoperative Report

```
SURPATIENT,TEN (000-12-3456) Case #267226 - JUL 12, 2004
```

```
Nurse Intraoperative Report Functions:
```

1. Edit report information
2. Print/View report from beginning
3. Sign the report electronically

```
Select number: 2// 3
```

The Nurse Intraoperative Report may only be signed by a circulating nurse on the case. At the time of electronic signature, the software checks for data in key fields. The nurse will not be able to sign the report if the following fields are not entered:

TIME PATIENT IN OR
MARKED SITE CONFIRMED
PREOPERATIVE IMAGING CONFIRMED
PROCEDURE TO BE PERFORMED
CONFIRM VALID CONSENT
CORRECT MEDICAL IMPLANTS
APPROPRIATE DVT PROPHYLAXIS
AVAILABILITY OF SPECIAL EQUIP
TIME-OUT COMPLETED

TIME PATIENT OUT OF OR
CORRECT PATIENT IDENTITY
HAIR REMOVAL METHOD
SITE OF THE PROCEDURE
CONFIRM PATIENT POSITION
ANTIBIOTIC PROPHYLAXIS
BLOOD AVAILABILITY
CHECKLIST COMMENT

The WOUND SWEEP and INTRAOPERATIVE X-RAY fields will be required to sign the NIR if any of the count fields (SPONGE FINAL COUNT CORRECT, SHARPS FINAL COUNT CORRECT, and INSTRUMENT FINAL COUNT CORRECT) is answered with "NO"

If the COUNT VERIFIER field is entered, the other counts related fields must be populated. These count fields include the following:

SPONGE FINAL COUNT CORRECT
INSTRUMENT FINAL COUNT CORRECT
POSSIBLE ITEM RETENTION

SHARPS FINAL COUNT CORRECT
SPONGE, SHARPS, & INST COUNTER

The ANESTHESIA TECHNIQUE field is made mandatory in order for the NIR report to be signed.

If the PROsthESIS INSTALLED field has an item (or items) entered, the following fields are required for each item:

IMPLANT STERILITY CHECKED (Y/N)
RN VERIFIER
SERIAL NUMBER

STERILITY EXPIRATION DATE
LOT NUMBER
PROVIDER READ BACK PERFORMED

If the PLANNED PRIN PROCEDURE CODE field is one of the following codes 32851,32852,32853,32854,33935,33945,44135,44136,47135,47136,48160,48554,50360,50365 the following fields are required:

ORGAN TO BE TRANSPLANTED	SURGEON VERIFYING UNET
UNOS NUMBER	UNET VERIF BY SURGEON
DONOR SEROLOGY HCV	ORGAN VER PRE-ANESTHESIA
DONOR SEROLOGY HBV	SURGEON VER ORGAN PRE-ANES
DONOR SEROLOGY CMV	SURGEON VER DONOR PRE-ANES
DONOR SEROLOGY HIV	DONOR ORG VER PRE-ANES
DONOR ABO TYPE	ORGAN VER PRE-TRANSPLANT
RECIPIENT ABO TYPE	SURGEON VER ORG PRE-TRANSPLANT
BLOOD BANK ABO VERIFICATION	DONOR VESSEL UNOS ID
BLOOD BANK ABO VER COMMENTS	DONOR VESSEL USAGE
D/T BLOOD BANK ABO VERIF	DONOR VESSEL DISPOSITION
OR ABO VERIFICATION	
OR ABO VER COMMENTS	
D/T OR ABO VERIF	

If any of the key fields are missing, the software will require them to be entered prior to signature. In the following example, the final sponge count must be entered before the nurse is allowed to electronically sign the report.

Example: Missing Field Warning

The following information is required before this report may be signed:

ANTIBIOTIC PROPHYLAXIS

WARD: ROOM-BED:

VAMC: MAYBERRY, NC REPLACEMENT FORM 515

Enter Referring Physician Information [SROMEN-REFER]

The *Enter Referring Physician Information* option allows the surgical staff to enter the name, address, and phone number of the individual or institution that referred the patient. The scheduling manager usually enters referring physician information when the operation is booked. This information shows up on many reports.

First, users identify the surgical specialty to which the patient will be assigned. To add a new case to the waiting list, the user must enter the patient's name and the procedure name. The user can also add comments, referring physician name and address, tentative admission date, and tentative operation date. This information will appear on the *Waiting List Report*. Patient names stay on the waiting list until the data is used to make a request or until the data is deleted.

After entering a Referring Physician name or partial name, the system prompts, "Is this a VA Physician from this facility? (Y/N): <Y>". If the user answers Y, a list of VA physician names displays that matches the data entered. The user selects from those listed. The physician's address and telephone number are also copied into the corresponding fields if the data is available. If no selection is made, the system accepts the information entered as free text.

If the referring physician is not from that VA facility, then the system uses the information already entered as the Referring Physician name, or the user can enter the appropriate name.

Example: Enter Referring Physician Information

```
Select Operation Menu Option: R Enter Referring Physician Information
```

```
Select REFERRING PHYSICIAN: SURPHYSICIAN,ONE
Is this a VA physician from this facility? (Y/N): Y
Lookup: NAME
  2 SURPHYSICIAN,O    OJ   112   SURGICAL STUDENT
  3 SURPHYSICIAN,S
  4 SURPHYSICIAN,S A
  5 SURPHYSICIAN,S T
  6 SURPHYSICIAN,T

Press <RETURN> to see more, ^^ to exit this list, ^^^ to exit all lists, OR
CHOOSE 1-5:
```

Enter Irrigations and Restraints [SRMEN-REST]

The *Enter Irrigations and Restraints* option is designed to allow the nurse to quickly document the irrigation solutions or the restraint and positioning devices used in a case. The list of solutions or devices can be different at each facility.

At the "Select Number:" prompt, the user should choose the number corresponding to the solution or device. For more than one choice, numbers are separated with a comma. If an item has been selected before, a default prompt will appear. The user can enter an at-sign (@) to delete the selection, as in Example 3.

Medications (Enter/Edit) [SROANES MED]

The *Medications (Enter/Edit)* option allows the user to enter all the medications administered on a case. It is designed to aid in quickly entering many different medications for a case.

In one entry, the user can enter the medication, dosage, route, and time given with the use of slashes between these categories. After one medication has been entered, the software will return the cursor to the beginning prompt so that the user can enter another medication for the case. When the user is finished entering medications for the case, he or she should press the <Enter> key to return to the menu.

About the prompts

"ENTER MEDICATION/DOSE(MG)/ROUTE/TIME:" Respond to this prompt with the medication, dosage, route, and time given separated by slashes. If the software needs more specific information about the medication, the user will be prompted. In the example below, the software reads "Valium" and then asks the user to select from the Valiums on file. A question mark can be entered in place of one of the categories in order to get help or more information. In the example, a question mark was entered in place of the route. Then, in response to the question mark, the software offered a list of acceptable routes.

Example: Entering Medication

```
Select Operation Menu Option: Medications (Enter/Edit)

ENTER MEDICATION/DOSE (MG) /ROUTE/TIME: DIAZEPAM/5MG/?/8:00

      1  DIAZEPAM 10MG S.R. CAP                N/F      ***NOT MANUFACTURED***
      2  DIAZEPAM 10MG S.T.                   NOTE RESTRICTIONS (ON OPTS ONLY)
      3  DIAZEPAM 15 MG S.R. CAP              N/F      NOTE RESTRICTIONS
      4  DIAZEPAM 2MG S.T.                    N/F
      5  DIAZEPAM 5MG S.T.                    NOTE RESTRICTIONS (ON OPTS ONLY)

Press <RETURN> to see more, '^' to exit this list, OR
CHOOSE 1-5: 5

Route entered is not one of the available choices.
Please enter medication route again.

Blood Product Verification [SR BLOOD PRODUCT VERIFICATION]

The *Blood Product Verification* option is used for transfusion error risk management. This option is used in conjunction with a bar code reader to confirm that the blood product is assigned to the patient. The functionality provided by this option is meant as an additional check for proper patient identification and should never be relied upon as the primary check.

This option prompts the user to scan the blood product unit ID, after which the software checks the Blood Bank files for an association with the patient identified. If there are multiple entries with the unit ID scanned, these entries will be listed along with the Blood Component, Patient Associated, and Expiration Date. The user will then be prompted to select the one that matches the blood product about to be administered. If the selected product is not associated with the patient identified, a warning message will be displayed.

There are certain valid scenarios that are internal to the Blood Bank that may result in a blood component not being readable using the scanner and therefore may give an unexpected response. There will be some rare instances in which this option may not produce an expected result. After verifying proper patient identification, the option may be attempted again; however, it is recommended that the unit ID be typed in manually rather than be scanned in these cases.

Blood product manufacturers are required to label all units of blood in a consistent manner. The barcode that is to be scanned at the "Enter Blood Product Identifier:" prompt will always be the barcode in the upper-left portion of the blood product label. Since this label can be in close proximity to the ABO/Rh label, care should be taken not to read both labels during a scan. One way to accomplish this would be to use a finger or some other convenient object to cover the label that the user does not wish to have read during the scanning process. The light emitted from the scanner itself will cause no harm to skin, latex, or any other object with which it comes in contact.

Example: Option displayed with no discrepancies

```
Select Operation Menu Option: BLOOD PRODUCT VERIFICATION
To use BAR CODE READER
    Pass reader wand over a GROUP-TYPE ( ABO/Rh) label
    =>
Enter Blood Product Identifier: KW10945

1) Unit ID: KW10945                CPDA-1 RED BLOOD CELLS
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: NOV 27,1997

2) Unit ID: KW10945                FRESH FROZEN PLASMA, ACD-A
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: MAY 19,1998

3) Unit ID: KW10945                PLATELETS, POOLED, IRRADIATED
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: MAR 24,1998

Select the blood product matching the unit label: (1-3): 2

No Discrepancies Found
```

Example: Option displayed with discrepancies

```
Select Operation Menu Option: BLOOD PRODUCT VERIFICATION

To use BAR CODE READER
    Pass reader wand over a GROUP-TYPE ( ABO/Rh) label
    =>
Enter Blood Product Identifier: KW10945

1) Unit ID: KW10945                CPDA-1 RED BLOOD CELLS
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: NOV 27,1997

2) Unit ID: KW10945                FRESH FROZEN PLASMA, ACD-A
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: MAY 19,1998

3) Unit ID: KW10945                PLATELETS, POOLED, IRRADIATED
   Patient: SURPATIENT,FOURTEEN 000-45-7212      Expiration Date: MAR 24,1998

Select the blood product matching the unit label: (1-3): 3

                **WARNING**

Blood Product Expiration Date is later than today's date.

Anesthesia Menu

[SROANES1]

The *Anesthesia Menu* is restricted to Anesthesia personnel and is locked with the SROANES key. It is designed for the convenient entry of data pertaining to the anesthesia agents and techniques used in a surgery.

The main options included in this menu are listed below. The *Anesthesia Data Entry Menu* contains sub-options. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
E	<i>Anesthesia Data Entry Menu</i>
R	<i>Anesthesia Report</i>
S	<i>Schedule Anesthesia Personnel</i>

Prerequisites

To use the *Anesthesia Data Entry Menu* or the *Anesthesia Report* option, the user must first select a patient case. The user must select an operating room to use the *Schedule Anesthesia Personnel* option.

Anesthesia Data Entry Menu [SROANES-D]

The *Anesthesia Data Entry Menu* allows the user to enter anesthesia data pertinent to a selected case. The information entered in these sub-options is reflected on the Anesthesia Report.

To use any option within the *Anesthesia Data Entry Menu*, the user must first enter a patient name and choose a patient case, as shown below.

Example: How to Select a Case for the Data Entry Menu

```
Select Surgery Menu Option: A Anesthesia Menu

  E   Anesthesia Data Entry Menu
  R   Anesthesia Report
  A   Anesthesia AMIS
  S   Schedule Anesthesia Personnel

Select Anesthesia Menu Option: E Anesthesia Data Entry Menu
Select Patient: SURPATIENT,NINE      12-09-51      000345555      NSC VETERAN

SURPATIENT,NINE      000-34-5555

1. 04-26-99      CHOLECYSTECTOMY, INTRAOPERATIVE CHOLANGIOGRAM (COMPLETED)
2. 11-20-98      Release of Hammer Toes (REQUESTED)
3. ENTER NEW SURGICAL CASE

Select Operation: 1

SURPATIENT,NINE (000-34-5555)      Case #145 - APR 26,1999

  I   Anesthesia Information (Enter/Edit)
  T   Anesthesia Technique (Enter/Edit)
  M   Medications (Enter/Edit)

Select Anesthesia Data Entry Menu Option:
```

Anesthesia Information (Enter/Edit) **[SROMEN-ANES]**

Anesthesia staff uses this option to enter anesthesia related information for a given case. The first group of prompts affects the Anesthesia AMIS Report. Some of the data fields may be automatically filled in from previous responses.

At the "Enter Screen Server Function:" prompt, the user can choose the field(s) to be edited, or press the <Enter> key to continue. Some of the data fields are "multiple" and may contain more than one value. When a multiple field is selected, a new screen is generated so that the user can enter data related to that multiple. For instance, the MONITORS field generates a new screen for adding the device, time installed, and time removed. The TIME INSTALLED field and TIME REMOVED field generate additional screens so that the user may enter more than one time installed/removed for the same operation.

About the prompts

The prompts are described as follows:

- "Is this the Principal Technique (Y/N): " — Asks if the user has entered a technique that is the primary anesthesia technique for the case. The user is required to establish the principal technique as this information affects many reports.
- "Would you like to enter additional anesthesia related information ? " — If the user wants to enter more detailed information concerning the case, he or she must answer **YES** to this prompt. Two Screen Server-formatted pages are then provided for entering more anesthesia information for the case.
- "Does this entry complete all start and end times for this case? " — The user should answer **YES** only if the block of time just completed is the final block of time for the case that he or she is documenting.

An Anesthesia Care Questionnaire will be added to allow a more complete capture of clinical data, which will support coding and billing efforts. The results of the questionnaire are crucial for a coder to use in order to select the proper modifier. Modifiers are required for reimbursement for all anesthesia services.

This information can be accessed through the Anesthesia menu, specifically through the Anesthesia Data Entry Menu. The user selects a patient and surgical case and completes the anesthesia information.

After completion, the user is prompted with the question, "Would you like to enter additional anesthesia related information? " The questions associated with the Anesthesia Care Questionnaire (shown as numbers 8-12 on the last screen display in this section) are located on page two of the anesthesia information sheet.

Example: Entering Anesthesia Information

Select Anesthesia Data Entry Menu Option: **I** Anesthesia Information (Enter/Edit)

(This page included for two-sided copying.)

Anesthesia Technique (Enter/Edit) **[SROMEN-ANES TECH]**

The *Anesthesia Technique (Enter/Edit)* option is used to enter information concerning the anesthesia technique. More than one anesthesia technique can be entered for a case. When the user is finished entering the first technique, he or she should select this option again to start entering another anesthesia technique.

The Surgery software recognizes the following anesthesia techniques, each with different sets of prompts.

G	<i>GENERAL</i>
M	<i>MONITORED ANESTHESIA CARE</i>
S	<i>SPINAL</i>
E	<i>EPIDURAL</i>
L	<i>LOCAL</i>
R	<i>REGIONAL</i>

Note: The selection of 'OTHER' is no longer available for selection.

Another choice for an anesthesia technique is NO ANESTHESIA. This selection does not include any additional prompts.

About the prompts

"Diagnostic/ Therapeutic (Y/N):" The user should answer **Y** or **YES** if the anesthesia procedure is itself a surgical procedure. The user will then have an opportunity to define the surgical (operative) procedure.

"Is this the Principal Technique (Y/N):" This prompt asks the user whether or not the technique being entered is the primary anesthesia technique for the case. For the technique being entered to appear on the Anesthesia AMIS Report, answer this prompt with a **Y** or **YES**.

"Select ANESTHESIA AGENTS:" The user can enter more than one anesthesia agent for a case by using the up-arrow (^) to jump to the "Select ANESTHESIA AGENTS:" prompt.

Example 1: General Technique

```
Select Anesthesia Data Entry Menu Option: T Anesthesia Technique (Enter/Edit)
Diagnostic/Therapeutic (Y/N): NO// <Enter>
Select ANESTHESIA TECHNIQUE: G (GENERAL)
  Is this the Principal Technique (Y/N): YES// <Enter> YES
  Was the Patient Intubated ? (Y/N): Y YES
  Trauma Resulting from Intubation Process: NONE// <Enter> NONE
Select ANESTHESIA AGENTS: ?
```

More than one anesthesia agent may be entered for each technique.

The ANESTHESIA AGENT field uses entries from the institution's local DRUG file. Prior to using the Surgery package, drugs that will be used as anesthesia agents must be flagged (using the Chief of Surgery Menu) by the user's package coordinator. If the user experiences problems entering an agent, it is likely that the drug being chosen has not been flagged.

```
Select ANESTHESIA AGENTS: ENFLURANE
  Dose (mg): <Enter>
Approach Technique: D DIRECT VISION LARYNGOSCOPY
Endotracheal Tube Route: O ORAL
Type of Laryngoscope: M MACINTOSH

Medications (Enter/Edit) [SROANES MED]

Anesthesia staff members use the *Medications (Enter/Edit)* option to enter medications administered on a case. This is the last sub-option of the *Anesthesia Data Entry Menu*.

This option is designed to help the user quickly enter many different medications for a case. In one entry, the user can enter the medication, dosage, route, and time given with the use of slashes between these categories. (This is a different type of prompt response from what has been used elsewhere). After the user has finished entering one medication, the software will return the cursor to the beginning prompt so that he or she can enter another medication for the case. When the user finishes entering medications for the case, he or she should press the <Enter> key to return to the *Anesthesia Data Entry Menu*.

About the prompts

"ENTER MEDICATION/DOSE(MG)/ROUTE/TIME:" Respond to this prompt with the medication, dosage, route, and time given separated by slashes. If the software needs more specific information about the medication, the user will be prompted. In the example, the software reads "Valium" and then asks the user to select from the Valiums on file. A question mark can be entered in place of one of the categories in order to get help or more information. In the following example, a question mark was entered in place of the route. Then, in response to the question mark, the software offered a list of acceptable routes.

Example: Entering a Medication

```
Select Anesthesia Data Entry Menu Option: M Medications (Enter/Edit)
```

```
ENTER MEDICATION/DOSE (MG) /ROUTE/TIME: VALIUM/5MG/?/7:50
```

```
  1  VALIUM 5MG          N/F
  2  VALIUM DIAZEPAM 10MG S.T.      N/F      RESTRICTED TO
ENT/ANESTHESIA/PSYCHIATRY/PARAPLEGICS
  3  VALIUM DIAZEPAM 2MG S.T.      N/F      RESTRICTED TO
ENT/ANESTHESIA/PSYCHIATRY/PARAPLEGICS
TYPE '^' TO STOP, OR
CHOOSE 1-3: 1      (JAN 13, 1999 07:50)
```

```
Route entered is not one of the available choices.
Please enter medication route again.
```

```
Choose from:
```

```
IV      INTRAVENOUS
T       TOPICAL
IR      IRRIGATION
IM      INTRAMUSCULAR

Anesthesia Report [SROARPT]

Anesthesia staff uses the *Anesthesia Report* option to print all the anesthesia information entered for a case. When a hard copy of this report is made, space is provided for the Anesthetist's signature. This option is located on the *Anesthesia Menu* option. It can also be accessed from the *Operation Menu* option.

For more information, see the Anesthesia Report section in the Operation Menu section of this manual.

Page 171 has been deleted. The *Anesthesia AMIS* option has been removed.

Page 172 has been deleted. The *Anesthesia AMIS* option has been removed.

Schedule Anesthesia Personnel [SRSCHDA]

Anesthesia staff uses the *Schedule Anesthesia Personnel* option to assign or change anesthesia personnel for surgery cases. The Scheduling Manager can also assign personnel to the selected case using other menu options.

This *Schedule Anesthesia Personnel* option is locked with the SROANES key and will not appear on the menu if the user does not have this key.

With this option, the user can enter an anesthesia technique and the names of the principal anesthetist and supervisor. When an operating room is selected, the software will present all cases scheduled for that room. After scheduling personnel for cases in one operating room, the user can do the same for other operating rooms without leaving this option. For convenience, the software will default to the anesthetist and anesthesiologist supervisor previously scheduled for that room.

Example: Scheduling Anesthesia Personnel

```
Select Anesthesia Menu Option: S Schedule Anesthesia Personnel
Schedule Anesthesia Personnel for which Date ? 4/26 (APR 26,1999)

Perioperative Occurrences Menu

[SRO COMPLICATIONS MENU]

Surgeons use options within the *Perioperative Occurrences Menu* option to enter or edit occurrences that occur before, during, and/or after a surgical procedure. It is also possible to enter occurrences for a patient who did not have a surgical procedure performed. The user can enter more than one occurrence per patient.

This option is locked with the SROCOMP key.

Occurrences will be included on the Chief of Surgery's Morbidity & Mortality Reports.

Please review specific institution policy to determine what is considered an occurrence for any category.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
I	<i>Intraoperative Occurrences (Enter/Edit)</i>
P	<i>Postoperative Occurrences (Enter/Edit)</i>
N	<i>Non-Operative Occurrences (Enter/Edit)</i>
U	<i>Update Status of Returns Within 30 Days</i>
M	<i>Morbidity & Mortality Reports</i>

Key Vocabulary

The following terms are used in this section.

Term	Definition
Intraoperative Occurrence	Occurrence that occurs during the procedure.
Postoperative Occurrence	Occurrence that occurs after the procedure.
Non-Operative Occurrence	Occurrence that develops before a surgical procedure is performed.

Intraoperative Occurrences (Enter/Edit) [SRO INTRAOP COMP]

The *Intraoperative Occurrences (Enter/Edit)* option is used to add information about an occurrence that occurs during the procedure. The user can also use this option to change the information. Occurrence information will be reflected in the Chief of Surgery's Morbidity & Mortality Report.

First, the user should select an operation. The software will then list any occurrences already entered for that operation. The user may edit a previously entered occurrence or can type the word **NEW** and press the **<Enter>** key to enter a new occurrence.

At the prompt "Enter a New Intraoperative Occurrence:" the user can enter two question marks (??) to get a list of categories. Be sure to enter a category for all occurrences to satisfy Surgery Central Office reporting needs.

Example: Entering Intraoperative Occurrences

```
Select Perioperative Occurrences Menu Option: I Intraoperative Occurrences (Enter/Edit)
```

```
Select Patient: SURPATIENT,FIFTY 10-28-45 000459999

JUN 30,2006 CHOLECYSTECTOMY
```

```
-----  
There are no Intraoperative Occurrences entered for this case.
```

```
Enter a New Intraoperative Occurrence: CARDIAC ARREST REQUIRING CPR  
Definition Revised (2011): Indicate if there was any cardiac arrest  
requiring external or open cardiopulmonary resuscitation (CPR)  
occurring in the operating room, ICU, ward, or out-of-hospital after  
the chest had been completely closed and within 30 days of surgery.  
Patients with AICDs that fire but the patient does not lose  
consciousness should be excluded.
```

```
If patient had cardiac arrest requiring CPR, indicate whether the  
arrest occurred intraoperatively or postoperatively. Indicate the  
one appropriate response:  
- intraoperatively: occurring while patient was in the operating room  
- postoperatively: occurring after patient left the operating room
```

```
Press RETURN to continue: <Enter>
```

Select Occurrence Information:

Postoperative Occurrences (Enter/Edit) [SRO POSTOP COMP]

The *Postoperative Occurrences (Enter/Edit)* option is used to add information about an occurrence that occurs after the procedure. The user can also utilize this option to change the information. Occurrence information will be reflected in the Chief of Surgery's Morbidity & Mortality Report.

First, the user selects an operation. The software will then list any occurrences already entered for that operation. The user can choose to edit a previously entered occurrence or type the word **NEW** and press the **<Enter>** key to enter a new occurrence.

At the prompt "Enter a New Postoperative Complication:" the user can enter two question marks (??) to get a list of categories. Be sure to enter a category for all occurrences in order to satisfy Surgery Central Office reporting needs.

Example: Entering a Postoperative Occurrence

```

There are no Postoperative Occurrences entered for this case.

Enter a New Postoperative Occurrence: ACUTE RENAL FAILURE
VASQIP Definition (2011):
Indicate if the patient developed new renal failure requiring renal
replacement therapy or experienced an exacerbation of preoperative
renal failure requiring initiation of renal replacement therapy (not on
renal replacement therapy preoperatively) within 30 days
postoperatively. Renal replacement therapy is defined as venous to
venous hemodialysis [CVVHD], continuous venous to arterial hemodialysis
[CVAHD], peritoneal dialysis, hemofiltration, hemodiafiltration or
ultrafiltration.

TIP: If the patient refuses dialysis report as an occurrence because
he/she did require dialysis.

Press RETURN to continue: <Enter>

Select Occurrence Information:

Non-Operative Occurrence (Enter/Edit) [SROCOMP]

The *Non-Operative Occurrence (Enter/Edit)* option is used to enter or edit occurrences that are not related to surgical procedures. A non-operative occurrence is an occurrence that develops before a surgical procedure is performed.

At the "Occurrence Category:" prompt, the user can enter two question marks (??) to get a list of categories. Be sure to enter a category for each occurrence in order to satisfy Surgery Central Office reporting needs.

Example: Entering a Non-Operative Occurrence

Select Perioperative Occurrences Menu Option: **N** Non-Operative Occurrences (Enter/Edit)

NOTE: You are about to enter an occurrence for a patient that has not had an operation during this admission. If this patient has a surgical procedure during the current admission, use the option to enter or edit intraoperative and postoperative occurrences.

Select PATIENT NAME: **SURPATIENT, SEVENTEEN** 09-13-28 000455119

SURPATIENT, SEVENTEEN

1. ENTER A NEW NON-OPERATIVE OCCURRENCE

Select Number: **1**

Select the Date of Occurrence: **063007** (JUN 30, 2007)

Name of the Surgeon Treating the Complication: **SURSURGEON, ONE**

Name of the Attending Surgeon: **SURSURGEON, TWO**

Surgical Specialty: **GENERAL** (OR WHEN NOT DEFINED BELOW)

Select NON-OPERATIVE OCCURRENCES: **SYSTEMIC SEPSIS**

Occurrence Category: **SYSTEMIC SEPSIS**

Definition Revised (2014): 2. Sepsis is the systematic response to infection. Answer YES if both of the following

criteria are met a) Clinical documentation of infection (such as wound with purulent drainage, ruptured bowel with free air, etc.); or a positive culture from any site thought to be causative; or specialized laboratory evidence of causative infection (such as viral DNA in blood). AND b) The presence of two or more of the following systemic responses: - Temperature > 38 degrees C or < 36 degrees C - HR > 90 beats/minute - RR > 20 breaths /minute or PaCO2 < 32 mmHg - WBC > 12,000 cell/mm3, <4,000cells/mm3, or > 10% immature neutrophils ("bands") 3. Severe Sepsis/Septic Shock: Sepsis is considered severe when it is associated with organ and/or circulatory dysfunction. Terminology such as Severe Sepsis/Septic Shock/Refractory Septic Shock and Multiple Organ Dysfunction Syndrome (MODS) all fall into this category. Answer YES if the definition of SEPSIS is present AND there is documented organ and/or circulatory dysfunction defined by one or more of the following: - Areas of acutely mottled skin not related to peripheral arterial disease - Capillary refilling requires three seconds or longer not related to peripheral arterial disease - Urine output <0.5 mL/kg for at least one hour, or renal replacement therapy - Lactate >2 mmol/L

- Abrupt change in mental status
- Abnormal EEG findings
- Platelet count < 100,000 platelets/mL
- Disseminated intravascular coagulation (DIC)
- Acute lung injury or acute respiratory distress syndrome (ARDS) - New cardiac dysfunction as defined by ECHO or direct measurement of the cardiac index
- An arterial systolic blood pressure (SBP) of <=90 mm Hg or a mean arterial pressure (MAP) <=70 mm Hg for at least 1 hour despite adequate fluid resuscitation, adequate intravascular volume status, or the need for vasopressors to maintain SBP >= 90 mm Hg or MAP >=70 mm Hg.

(This page included for two-sided copying.)

Update Status of Returns Within 30 Days [SRO UPDATE RETURNS]

The *Update Status of Returns Within 30 Days* option will define a case as related or unrelated to another case. When a new surgical case is entered into the software, the user is asked whether it is related to any previous cases within the past 30 days. This option is designed to update that information.

The user should first enter the patient name and select a case. The software will list any cases that occurred within 30 days prior to the selected case and will indicate if the listed cases have been flagged as related or unrelated. At this point the user may update the status of the cases listed.

Example: Updating Status of Returns Within 30 days

```
Select Perioperative Occurrences Menu Option: Update Status of Returns Within 30  
Days
```

```

Morbidity & Mortality Reports [SROMM]

The *Morbidity & Mortality Reports* option generates two reports: the Perioperative Occurrences Report and the Mortality Report. The Perioperative Occurrences Report includes all cases that have occurrences, both intraoperatively and postoperatively, and can be sorted by specialty, attending surgeon, or occurrence category. The Mortality Report includes all cases performed within the selected date range that had a death within 30 days after surgery, and sort by specialty within a date range. Each surgical specialty will begin on a separate page.

After the user enters the date range, the software will ask whether to generate both reports. If the user answers **NO**, the software will ask the user to select from the Perioperative Occurrences Report or the Mortality Report.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Printing the Perioperative Occurrences Report – Sorted by Specialty

```
Select Perioperative Occurrences Menu Option: M Morbidity & Mortality Reports
```

```
The Morbidity and Mortality Reports include the Perioperative Occurrences Report and the Mortality Report. Each report will provide information from cases completed within the date range selected.

Non-O.R. Procedures

[SRONOP]

The *Non-O.R. Procedures* option, located in the main *Surgery Menu* and locked with the SROPER key, is designed for documenting and reviewing Non-O.R. Procedures.

A Non-O.R. Procedure is any procedure not performed in an operating room, but which still involves surgical or anesthesia providers. Any procedures involving anesthesia providers will display on the Anesthesia AMIS Report.

The main options included in this menu are listed below. The first option, *Non-O.R.. Procedures (Enter Edit)*, contains options to enter or update cases. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
E	<i>Non-O.R.. Procedures (Enter/Edit)</i>
A	<i>Annual Report of Non-O.R.. Procedures</i>
R	<i>Report of Non-O.R.. Procedures</i>

Non-O.R. Procedures (Enter/Edit) [SRNOP-ENTER]

The *Non-O.R. Procedures (Enter/Edit)* option allows the user to enter, edit, or delete information related to a Non-O.R. Procedure. The editing feature branches to another submenu that allows the user to enter or edit anesthesia information for a procedure. To use one of the *Non-O.R. Procedures (Enter/Edit)* options, the user must first identify the patient on which he or she is working.

Accessing the Non-O.R. Procedures Menu

When the *Non-O.R. Procedures (Enter/Edit)* option is selected, the user will be prompted to enter a patient name. The Surgery software will then list all non-O.R. procedures on record for the patient.

```
SURPATIENT, FIFTEEN    000-98-1234
1. APR 22, 2002        BRONCHOSCOPY
2. NEW PROCEDURE
Select Procedure: 1
```

The user can select from the procedure(s) listed or enter a new procedure. When selecting an existing procedure, the software will ask whether the user wants to 1) edit information for the case, or 2) delete the procedure, as follows.

```
SURPATIENT, FIFTEEN    000-98-1234
APR 22, 2002           BRONCHOSCOPY
Do you want to edit or delete this procedure ?
1. Edit
2. Delete
Select Number: 1// 1
```

If the user enters **2** to delete, the software will permanently remove the procedure from the records. On the other hand, if the user accepts the default answer, **1**, to edit the existing procedure, the software will display the *Non-O.R. Procedures (Enter/Edit)* menu option. The user will see the following options.

```
SURPATIENT, FIFTEEN (000-98-1234)    Case #267260 - APR 22,2002
E      Edit Non-O.R. Procedure
AI     Anesthesia Information (Enter/Edit)
AM     Medications (Enter/Edit)
AT     Anesthesia Technique (Enter/Edit)
PR     Procedure Report (Non-O.R.)
TR     Tissue Examination Report
I      Non-OR Procedure Information
Select Non-O.R. Procedures (Enter/Edit) Option:
```

Three of these sub-options, the *Anesthesia Information (Enter/Edit)* option, the *Medications (Enter/Edit)* option, and the *Anesthesia Technique (Enter/Edit)* option, are the same as the sub-options of the same name on the *Anesthesia Menu* option.

Edit Non-O.R. Procedure [SRONOP-EDIT]

The *Edit Non-O.R. Procedure* option on the *Non-O.R. Procedures* menu allows the user to enter or edit data on the selected procedure.

The DICTATED SUMMARY EXPECTED field is used to determine whether a dictated summary will be required for this Non-O.R. Procedure case. If **NO** is entered into the DICTATED SUMMARY EXPECTED field, no alerts will be generated and no report information will be displayed. If **YES** is entered into the DICTATED SUMMARY EXPECTED field, an alert will be sent to the appropriate provider when the dictated summary is uploaded, informing him or her that the Procedure Summary is ready for signature.

The DICTATED SUMMARY EXPECTED field is used to determine whether a dictated summary will be required for a Non-O.R. Procedure case.

Example: Setting the DICTATED SUMMARY EXPECTED field to YES

```

Procedure Report (Non-O.R.) [SR NON-OR REPORT]

The *Procedure Report (Non-O.R.)* option details operation information for the patient case selected. This report includes the Procedure Summary section. The Procedure Summary is dictated by the provider after completing the Non-O.R. procedure and then is electronically signed.

Prior to Signature

The *Edit Non-O.R. Procedure* option on the *Non-O.R. Procedures* menu is used to enter the non-O.R. procedure data. The DICTATED SUMMARY EXPECTED field is used to determine whether a dictated summary will be required for this non-O.R. procedure. This field is a required entry when creating a new non-O.R. procedure and may be edited using the *Edit Non-O.R. Procedure* option. Entering YES in this field allows a Procedure Summary to be uploaded and signed in TIU, making a Procedure Report (Non-O.R.) available for this procedure.

The DICTATED SUMMARY EXPECTED field is used to determine whether a dictated summary will be required for a Non-O.R. Procedure case.

After the Procedure Summary has been electronically signed, the Procedure Report (Non-O.R..) is viewable through CPRS. If the Procedure Summary has not been electronically signed, the following displays:

“* * A Non-O.R. Procedure Summary is not available. * *”

After the Procedure Summary is transcribed and uploaded into TIU, the TIU software sends an alert to the provider responsible for electronically signing the report. The provider can then sign using CPRS options or the List Manager.

After Electronic Signature

After electronic signature, the report is available for viewing.

Example 1: Printing a Procedure (Non-O.R.) Report when the Procedure Summary has been signed

SURPATIENT, ONE 000-44-7629

PROCEDURE REPORT

NOTE DATED: 02/13/2002 00:00 PROCEDURE REPORT

SUBJECT: Case #: 267236

PREOPERATIVE DIAGNOSIS: RESPIRATORY FAILURE, PROLONGED TRACHEAL INTUBATION
AND FAILURE TO WEAN

POSTOPERATIVE DIAGNOSIS: SAME

PROCEDURE PERFORMED: OPEN TRACHEOSTOMY

PROVIDER: DR. SURSURGEON

ASSISTANT PROVIDER:

ANESTHESIA: GENERAL ENDOTRACHEAL ANESTHESIA

ESTIMATED BLOOD LOSS: MINIMAL

COMPLICATIONS: NONE

INDICATIONS FOR PROCEDURE: The patient is a sixty-four-year-old gentleman with a rather extensive past surgical history, mostly significant for status post esophagogastrectomy and presented to the hospital approximately three weeks ago with abdominal pain. Diagnostic evaluation consisted of an abdominal CT scan, liver function tests and right upper quadrant ultrasound, all of which were consistent with a diagnosis of acalculus cholecystitis. Because of these findings, the patient was brought to the operating room approximately three weeks ago where an open cholecystectomy was performed. The patient subsequent to that has had a very rocky postoperative course, most significantly focusing around persistently spiking fevers with sources significant for an E-coli sinusitis as well as a Staphylococcus E-coli pneumonia with no evidence of bacteremia. As a result of all of this sepsis and persistent spiking fevers, the patient has had a pneumonia, the patient has had a rather difficult time weaning from the ventilator and because of the almost three week period since his last operation with persistent endotracheal tube in place, the patient was brought to the operating room for an open tracheostomy procedure.

DESCRIPTION OF PROCEDURE: After appropriate consent was obtained from the patient's next of kin and the risks and benefits were explained to her, the patient was then brought to the operating room where general endotracheal anesthesia was induced. The area was prepped and draped in the usual fashion with a towel roll under the patient's scapula and the neck extended.

A longitudinal incision of approximately 2 cm was made just below the cricoid cartilage. The strap muscles were taken down using Bovie electrocautery. The isthmus of the thyroid was clamped and tied off using 2-0 silk x two. Hemostasis was assured. The thyroid cartilage was carefully dissected directly onto it. The window in the third ring of the trachea was opened after placement of retraction sutures of 0 silk, The hatch was cut open using a hatch box shape. This opening was then dilated using the tracheal dilator. The endotracheal tube was pulled back. A #7 Tracheostomy tube was placed with ease. Breath sounds were assured. The patient was oxygenating well and the stay sutures were placed. The patient tolerated the procedure well. The skin was closed with 0 silk and trachea tip was applied. The patient tolerated the procedure well. The endotracheal tube was finally removed. He was brought to the Surgical Intensive Care Unit in stable, but critical condition.

Three Sursurgeon, M.D.

Comments Option

[SROMEN-COM]

Surgeons use the *Comments* option to respond to the GENERAL COMMENTS field for a surgical case or non-O.R. procedure. This option is designed to give surgeons an opportunity to directly add general comments after a case has been booked. The GENERAL COMMENTS field may already contain information added by the person booking the operation.

After selecting the patient case, the surgeon can add the general comments using the VA FileMan word-processing device, demonstrated below. The surgeon must press the <Enter> key at the end of each line with this type of word processing. The surgeon would press the <Enter> key again when he or she is through with the comments.

Example: Enter General Comments

```
Select Surgery Menu Option:  C  Comments
```

```
Select Patient:  SURPATIENT,THREE      08-15-42      000212453
```

1. 11/20/99 CAROTID ARTERY ENDARTERECTOMY (COMPLETED)
2. 11/20/99 AORTO CORONARY BYPASS GRAFT (CANCELLED)

```
Select Number:  1
```

```
General Comments:
```

```
1>Patient at high risk due to severe hypertension. Pre-operative  
2>evaluation recommended treatment by other than surgical means.  
3>This treatment, however, was unsuccessful necessitating

Select Surgery Menu Option:
```

(This page included for two-sided copying.)

CPT/ICD Coding Menu

[SRCODING MENU]

The Surgery *CPT/ICD Coding Menu* option was developed to help assure access to the most accurate source documentation and to provide a means for efficient coding entry and validation. It provides coders with special, limited access to the VistA Surgery package.

From the menu, coders have ready access to the Operation Report, which is dictated by the surgeon postoperatively and contains the most comprehensive and accurate description of the procedure(s) actually performed. Coders can also view the Nurse Intraoperative Report, which is often an important supplementary source of data.

Using the same menu, coders can add and edit procedures, CPT codes, diagnoses, and International Classification of Diseases (ICD) codes, without having to rely on a paper-based system. Options are available to assist surgery staff and others who perform coding validation, as are several commonly used reports.

The *Surgery CPT/ICD Coding Menu* contains the following options. To the left is the shortcut synonym the user can enter to select the option:

Shortcut	Option Name
EDIT CPT/ICD	<i>Update/Verify Menu ...</i>
C	<i>Cumulative Report of CPT Codes</i>
A	<i>Report of CPT Coding Accuracy</i>
M	<i>List Completed Cases Missing CPT Codes</i>
L	<i>List of Operations</i>
LS	<i>List of Operations (by Surgical Specialty)</i>
U	<i>List of Undictated Operations</i>
D	<i>Report of Daily Operating Room Activity</i>
PS	<i>PCE Filing Status Report</i>
R	<i>Report of Non-O.R. Procedures</i>

CPT/ICD Update/Verify Menu [SRCODING UPDATE/VERIFY MENU]

The *CPT/ICD Update/Verify Menu* is locked with the SR CODER security key.

This option provides coding personnel with access to review and edit procedure and diagnosis information. It also provides access to the Operation Report and Nurse Intraoperative Report for operations and to the Procedure Report (Non-O.R.) for non-O.R. procedures.

The *CPT/ICD Update/Verify Menu* contains the following options. To the left is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
UV	<i>Update/Verify Procedure/Diagnosis Codes</i>
OR	<i>Operation/Procedure Report</i>
NR	<i>Nurse Intraoperative Report</i>
PI	<i>Non-OR Procedure Information</i>

To access the *CPT/ICD Update/Verify Menu*, the user must first identify the patient and case. When the user selects **EDIT** for the *CPT/ICD Update/Verify Menu* from the *CPT/ICD Coding Menu*, the user will be prompted to enter a patient name. The software will then list all the cases on record for the patient, including any operations that are completed or are in progress and any non-O.R. procedures.

```
Select CPT/ICD Coding Menu Option: EDIT CPT/ICD Update/Verify Menu

Select Patient: SURPATIENT, TWELVE          02-12-28      000418719      YES      S
C VETERAN

SURPATIENT, TWELVE      000-41-8719

NR      Nurse Intraoperative Report
PI      Non-OR Procedure Information

Select CPT/ICD Update/Verify Menu Option:
```

From this point, the user can select any of the *CPT/ICD Update/Verify Menu* options.

Update/Verify Procedure/Diagnosis Codes [SRCODING EDIT]

The *Update/Verify Procedure/Diagnosis Codes* option allows the user to enter the final codes and associated information required for PCE upon completion of a Surgery case.

The procedure and diagnoses codes entered/edited through this option will be the coded information that is sent to the Patient Care Encounter (PCE) package. After the case is coded, the user will select to send the information to PCE.

When the user first edits a case through this option, the values will be pre-populated, using the values for planned codes entered by the nurse or surgeon. If there is no Planned Principal Procedure Code or no Principal Pre-op Diagnosis Code, then the Surgery software will prompt for the final CPT and ICD codes.

Because a case can have more than one procedure and/or diagnosis, the user can associate one or more diagnosis with each procedure. The Surgery software displays the diagnoses in the order in which the user entered them in the case. The user can then associate and reorder the relevant diagnoses to each procedure.

The user can also edit the service classifications for the Postoperative Diagnoses.

The following examples depict using the *Update/Verify Procedure/Diagnosis Codes* option to edit a Bronchoscopy, with no planned CPT or ICD codes entered by a clinician.

Example: Entering Required Information

```
Select CPT/ICD Update/Verify Menu Option: UV Update/Verify Procedure/Diagnosis Codes
```

```

Enter number of item to edit (1-4): <Enter>
```

Because the coding for the case is completed, the user can select to stop editing the case and send the case to PCE.

```
Is the coding of this case complete and ready to send to PCE? NO// YES
Coding completed and sent to PCE.
Press Enter/Return key to continue
```

Prior to sending the case to PCE, the Surgery software checks to see if a specific code, 065.0 CRIMEAN HEMORRHAGIC FEV, is entered as a diagnosis code. If it is entered, the software prompts the user to make sure that the code is correct for the specified case. This check is added to prevent the inadvertent assignment of code 065.0 when "CHF" is entered for the Principal or Other ICD Diagnosis codes.

After the case has been sent to PCE, any changes made to the case through the Update/Verify Procedure/Diagnosis Codes option will be automatically sent to PCE.

Example: Editing a Case After Sending to PCE

```
Select CPT/ICD Update/Verify Menu Option: UV Update/Verify Procedure/Diagnosis
Codes
```

Operation/Procedure Report [SRCODING OP REPORT]

The *Operation/Procedure Report* option is used by the coders to print the Operation Report for an operation or the Procedure Report (Non-O.R.) for a non-O.R. procedure.

Any user may print this report, which prints in an 80-column format and can be viewed on the screen or copied to a printer.

Example 1: Operation Report

SURPATIENT, TEN 000-12-3456

OPERATION REPORT

NOTE DATED: 07/29/2003 15:15 OPERATION REPORT
VISIT: 07/29/2003 15:15 SURGERY OF REPORT NON-COUNT
SUBJECT: Case #: 73285

PREOPERATIVE DIAGNOSIS: Visually significant cataract, right eye

POSTOPERATIVE DIAGNOSIS: Visually significant cataract, right eye

PROCEDURE: Phacoemulsification with intraocular lens placement, right eye

CLINICAL INDICATIONS: This 64-year-old gentleman complains of decreased vision in the right eye affecting his activities of daily living. Best corrected visual acuity is counting fingers at 6 feet, associated with a 2-3+ nuclear sclerotic and 4+ posterior subcapsular cataract in that eye.

ANESTHESIA: Local monitoring with topical Tetracaine and 1% preservative free Lidocaine.

DESCRIPTION OF THE PROCEDURE: After the risks, benefits and alternatives of the procedure were explained to the patient, informed consent was obtained. The patient's right eye was dilated with Phenylephrine, Mydriacyl and Ocufer. He was brought to the Operating Room and placed on anesthetic monitors. Topical Tetracaine was given. He was prepped and draped in the usual sterile fashion for eye surgery. A Lieberman lid speculum was placed.

A Supersharps was used to create a superior paracentesis port. The anterior chamber was irrigated with 1% preservative free Lidocaine. The anterior chamber was filled with Viscoelastic. The diamond groove maker and diamond keratome were used to create a clear corneal tunneled incision at the temporal limbus. The cystotome was used to initiate a continuous capsulorrhexis, which was then completed using Utrata forceps. Balanced salt solution was used to hydrodissect and hydrodelineate the lens.

Phacoemulsification was used to remove the lens nucleus and epinucleus in a non-stop horizontal chop fashion. Cortex was removed using irrigation and aspiration. The capsular bag was filled with Viscoelastic. The wound was enlarged with a 69 blade. An Alcon model MA60BM posterior chamber intraocular lens with a power of 24.0 diopters, serial #588502.064, was folded and inserted with the leading haptic placed into the bag. The trailing haptic was dialed into the bag with the Lester hook. The wound was hydrated. The anterior chamber was filled with balanced salt solution. The wound was tested and found to be self-sealing. Subconjunctival antibiotics were given, and an eye shield was placed. The patient was taken in good condition to the Recovery Room. There were no complications.

SURPATIENT, ONE 000-44-7629

PROCEDURE REPORT

NOTE DATED: 02/13/2002 00:00 PROCEDURE REPORT

SUBJECT: Case #: 267236

PREOPERATIVE DIAGNOSIS: RESPIRATORY FAILURE, PROLONGED TRACHEAL INTUBATION
AND FAILURE TO WEAN

POSTOPERATIVE DIAGNOSIS: SAME

PROCEDURE PERFORMED: OPEN TRACHEOSTOMY

SURGEON: DR. SURSURGEON

ASSISTANT SURGEON:

ANESTHESIA: GENERAL ENDOTRACHEAL ANESTHESIA

ESTIMATED BLOOD LOSS: MINIMAL

COMPLICATIONS: NONE

INDICATIONS FOR PROCEDURE: The patient is a forty-nine-year-old gentleman with a rather extensive past surgical history, mostly significant for status post esophagogastrectomy and presented to the hospital approximately three weeks ago with abdominal pain. Diagnostic evaluation consisted of an abdominal CT scan, liver function tests and right upper quadrant ultrasound, all of which were consistent with a diagnosis of acalculus cholecystitis. Because of these findings, the patient was brought to the operating room approximately three weeks ago where an open cholecystectomy was performed. The patient subsequent to that has had a very rocky postoperative course, most significantly focusing around persistently spiking fevers with sources significant for an E-coli sinusitis as well as a Staphylococcus E-coli pneumonia with no evidence of bacteremia. As a result of all of this sepsis and persistent spiking fevers, the patient has had a pneumonia, the patient has had a rather difficult time weaning from the ventilator and because of the almost three week period since his last operation with persistent endotracheal tube in place, the patient was brought to the operating room for an open tracheostomy procedure.

DESCRIPTION OF PROCEDURE: After appropriate consent was obtained from the patient's next of kin and the risks and benefits were explained to her, the patient was then brought to the operating room where general endotracheal anesthesia was induced. The area was prepped and draped in the usual fashion with a towel roll under the patient's scapula and the neck extended.

A longitudinal incision of approximately 2 cm was made just below the cricoid cartilage. The strap muscles were taken down using Bovie electrocautery. The isthmus of the thyroid was clamped and tied off using 2-0 silk x two. Hemostasis was assured. The thyroid cartilage was carefully dissected directly onto it. The window in the third ring of the trachea was opened after placement of retraction sutures of 0 silk, The hatch was cut open using a hatch box shape. This opening was then dilated using the tracheal dilator. The endotracheal tube was pulled back. A #7 Tracheostomy tube was placed with ease. Breath sounds were assured. The patient was oxygenating well and the stay sutures were placed. The patient tolerated the procedure well. The skin was closed with 0 silk and trachea tip was applied. The patient tolerated the procedure well. The endotracheal tube was finally removed. He was brought to the Surgical Intensive Care Unit in stable, but critical condition.

Three Sursurgeon, M.D.

Cumulative Report of CPT Codes [SROACCT]

The *Cumulative Report of CPT Codes* option counts and reports the number of times a procedure was performed (based on CPT codes) during a specified date range. There is also a column showing how many times it was in the Other Operative Procedure category.

After the user enters the date range, the software will ask if the user wants the Cumulative Report of CPT Codes to include only operating room surgical procedures, non-O.R. procedures, or both.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Print the Cumulative Report of CPT Codes for only OR Surgical Procedures

```

Report of CPT Coding Accuracy

The Report of CPT Coding Accuracy lists cases sorted by the CPT code used in the PRINCIPAL PROCEDURES field and OTHER OPERATIVE PROCEDURES field entered by the coder. This option is designed to help check the accuracy of the coding procedures.

About the prompts

"Do you want to print the Report of CPT Coding Accuracy for all CPT Codes ?" The user should reply **NO** to this prompt to produce the report for only one CPT code. The user will then be prompted to enter the CPT code or category.

"Do you want to sort the Report of CPT Coding Accuracy by Surgical Specialty ?" The user should press the **<Enter>** key if he or she wants to sort the report by specialty. Enter **NO** to sort the report by date only.

"Do you want to print the Report to Check Coding Accuracy for all Surgical Specialties ?" The user can enter the code or name of the surgical service he or she wants the report to be based on. Or, the user can press the **<Enter>** key to print the report for all surgical specialties.

List Completed Cases Missing CPT Codes [SRSCPT]

The *List Completed Cases Missing CPT Codes* option generates a report of completed cases that are missing the Principal CPT code for a specified date range. Only procedures that have CPT codes will be counted on the Annual Report of Surgical Procedures.

After the user enters the date range, the software will ask whether the user wants the Cumulative Report of CPT Codes to include: 1) only operating room surgical procedures, 2) non-O.R. procedures, or 3) both.

This report is in an 80-column format and can be viewed on the screen.

List of Operations [SROPLIST]

The List of Operations report contains general information for completed cases within a specified date range. It sorts the cases by date and includes the procedure(s), surgical service, length of actual operation, surgeons, and anesthesia technique. This report also includes aborted cases.

This report has a 132-column format and is designed to be copied to a printer.

Example: List of Operations

PCE Filing Status Report [SRO PCE STATUS]

The *PCE Filing Status Report* option provides a report of the Patient Care Encounter (PCE) filing status of completed cases performed during the selected date range in accordance with the site parameter controlling PCE updates. If this site parameter is turned off, the report will show no cases. The report may be printed for O.R. surgical cases, non-O.R. procedures or both. The report may also be printed for all specialties or for a single specialty only.

This report is intended to be used as a tool in the review of Surgery case information that is passed to PCE. The report uses 2 status categories:

- (1) FILED - This status indicates that case information has already been filed with PCE.
- (2) NOT FILED - This status indicates that the case information has not been filed with PCE. The case may or may not be missing information needed to file with PCE.

Two forms of the report are available: the short and the long forms. The short form uses an 80-column format and does not include surgeon/provider, attending, principal post-op diagnosis, and CPT and ICD code information. The totals printed at the end will show only the total cases for each status.

The long form uses a 132-column format and prints case information including the surgeon/provider, the attending, the specialty, the principal post-op diagnosis, and the principal procedure. If the PCE filing status is FILED, the CPT codes and ICD diagnosis codes will be printed. If the filing status is NOT FILED, information fields needed for PCE filing that do not contain data will be printed. At the end of the report, the number of cases in each PCE filing status will be printed, plus the number of CPT and ICD codes for cases with a status of FILED.

The PCE Filing Status report will display missing clinical indicator data information, per encounter. This indicates to the user what information is missing. The report displays CPT codes that do not have an associated diagnostic code, and textual diagnoses that do not have a corresponding ICD diagnosis code.

Example 1: PCE Filing Status Report (Short Form)

Select CPT/ICD Coding Menu Option: **PS** PCE Filing Status Report

Chapter Three: Generating Surgical Reports

Introduction

The Surgery package integrates clinical and patient data to provide a variety of reports for Surgery Service management. This chapter describes reports that are generated for Surgical Service staff. Among the reports generated are the Annual Report of Surgical Procedures, Anesthesia AMIS, Attending Surgeons Report, and Nurse Staffing Report.

Exiting an Option or the System

The user can enter an up-arrow (^) to stop what he or she is doing. The up-arrow can be used at almost any prompt to stop the line of questioning and return to the previous level in the option. The user should continue entering up-arrows to completely exit the system.

Option Overview

The main options included in this chapter are listed below. The *Surgery Reports* menu contains submenus. To the left of the option name is the shortcut synonym the user can enter to select the option. A restricted option (such as the *Surgery Reports* menu) will not display if the user does not have security clearance for that option.

Shortcut	Option Name
SR	<i>Surgery Reports</i>
L	<i>Laboratory Interim Report</i>

(This page included for two-sided copying.)

Surgery Reports

[SRORPTS]

The Chief of Surgery and staff members use the *Surgery Reports* menu to select various reports for the Surgical Service. Among the reports generated are the Annual Report of Surgical Procedures, Anesthesia AMIS, Attending Surgeons Report, and Nurse Staffing Report.

This menu is locked with the SROREP key.

All of the menu items below contain sub-options. To the left of the menu name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
M	<i>Management Reports</i>
S	<i>Surgery Staffing Reports</i>
A	<i>Anesthesia Reports</i>
CPT	<i>CPT Code Reports</i>

Management Reports [SR MANAGE REPORTS]

The *Management Reports* menu provides access to several *Management Reports* options. These options generate reports on completed cases, meaning cases that have an entry for the TIME PAT OUT OR field.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
S	<i>Schedule of Operations</i>
A	<i>Annual Report of Surgical Procedures</i>
L	<i>List of Operations</i>
LD	<i>List of Operations (by Postoperative Disposition)</i>
LS	<i>List of Operations (by Surgical Specialty)</i>
LP	<i>List of Operations (by Surgical Priority)</i>
P	<i>Report of Surgical Priorities</i>
U	<i>List of Undictated Operations</i>
D	<i>Report of Daily Operating Room Activity</i>
PS	<i>PCE Filing Status Report</i>
NOX	<i>Outpatient Encounters Not Transmitted to NPCD</i>

Schedule of Operations

[SROSCH]

The *Schedule of Operations* option generates the Operating Room Schedule used by the operating room nurses, surgeons, anesthesiologists, and other hospital services. The report lists operations and patients scheduled for a particular date. It sorts by operating room and includes the procedure(s), blood products requested, and any preoperative x-rays requested. The schedule also provides anesthesia information and surgeon names.

This report can be printed on multiple printers simultaneously. Use the options included within the *Surgery Package Management Menu* option to enter the name of all printers on which the schedule will print.

This report has a 132-column format and is designed to be copied to a printer with wide paper.

Example: Print Schedule of Operations

```
Select Management Reports Option:  S  Schedule of Operations
```

```
Print Schedule of Operations for which date ?  9/8  (SEP 08, 1999)
```

```
This report is designed to use a 132 column format.
```

```
Print the Report on which device:  [Select Print Device]
```

```

Annual Report of Surgical Procedures

[SROARSP]

The *Annual Report of Surgical Procedures* option is used to generate the Annual Report of Surgical Procedures required by VA Central Office. This report counts the number of times a procedure was performed, based on the CPT code entry, within a surgical specialty.

The report includes only cases that have not been cancelled and that have an entry for the TIME PAT OUT OR field. Procedures without CPT codes are not included in this report.

This report can be generated for any date range, not only annually.

The report has a 132-column format and is designed to be copied to a printer.

Example: Annual Report of Surgical Procedures

```
Select Management Reports Option:  A Annual Report of Surgical Procedures
```

```
Annual Report of Surgical Procedures
```

```
Start with Date:  9/1  (SEP 01, 2001)
```

```
End with Date:   9/30 (SEP 30, 2001)
```

```
Do you want to print the Annual Report of Surgical Procedures for all Surgical Specialties?  
YES// <Enter>
```

```
This report is designed to use a 132 column format, and must be run on a printer.
```

PCE Filing Status Report

The *PCE Filing Status Report* option provides a report of the Patient Care Encounter (PCE) filing status of completed cases performed during the selected date range in accordance with the site parameter controlling PCE updates. If this site parameter is turned off, the report will show no cases. The report may be printed for O.R. surgical cases, non-O.R. procedures or both. The report may also be printed for all specialties or for a single specialty only.

This report is intended to be used as a tool in the review of Surgery case information that is passed to PCE. The report uses 2 status categories:

- (1) FILED - This status indicates that case information has already been filed with PCE.
- (2) NOT FILED - This status indicates that the case information has not been filed with PCE. The case may or may not be missing information needed to file with PCE.

Two forms of the report are available: the short and the long forms. The short form uses an 80-column format and does not include surgeon/provider, attending, principal post-op diagnosis, and CPT and ICD code information. The totals printed at the end will show only the total cases for each status.

The long form uses a 132-column format and prints case information including the surgeon/provider, the attending, the specialty, the principal post-op diagnosis, and the principal procedure. If the PCE filing status is FILED, the CPT codes and ICD diagnosis codes will be printed. If the filing status is NOT FILED, information fields needed for PCE filing that do not contain data will be printed. At the end of the report, the number of cases in each PCE filing status will be printed, plus the number of CPT and ICD codes for cases with a status of FILED.

The PCE Filing Status report will display missing clinical indicator data information, per encounter. This indicates to the user what information is missing. The report displays CPT codes that do not have an associated diagnostic code, and textual diagnoses that do not have a corresponding ICD diagnosis code.

Example 1: PCE Filing Status Report (Short Form)

Select Management Reports Option: **PS** PCE Filing Status Report

Report of PCE Filing Status

This report displays the filing status of completed cases performed during the selected date range.

Print PCE filing status of completed cases for

Outpatient Encounters Not Transmitted to NPCD

Outpatient surgical and non-O.R. procedures that are filed as encounters in the PCE package without an active count clinic identified for each encounter are not transmitted to the National Patient Care Database (NPCD) as workload. The *Outpatient Encounters Not Transmitted to NPCD* option may be used as a tool for identifying these encounters that represent uncounted workload so that corrective actions may be taken in the Surgery package to insure these procedures are associated with an active count clinic. After corrections are made, these encounters may be re-filed with PCE to be transmitted to NPCD.

This option provides functionality:

- To count and/or list surgical cases and non-O.R. procedures that have entries in PCE but have no matching entries in the OUTPATIENT ENCOUNTER file or have matching entries that are non-count encounters or encounters requiring action.
- To re-file with PCE the cases identified as having no matching entries in the OUTPATIENT ENCOUNTER file or having matching entries that are non-count encounters or encounters requiring action.

Both the report and the re-filing process may be run for O.R. surgical cases, non-O.R. procedures or both. The report and the re-filing process may be run for a specific specialty or for all specialties and may be run for a selected date range.

Example 1: Print List of Cases

```
Select Management Reports Option: NOX Outpatient Encounters Not Transmitted to
NPCD

      Outpatient Surgery Encounters Not Transmitted to NPCD

Surgical cases filed with PCE that have no Scheduling appointment status
or that have an appointment status of ACTION REQUIRED or NON-COUNT indicate
surgical encounters that have not transmitted to the National Patient
Care Database. This option is intended as a tool to identify these
encounters and, after taking appropriate corrective measures, to
reinitiate the encounter transmission process.

1. Print list of cases.
2. Print total number of cases only.
3. Re-file cases in PCE.

Surgery Staffing Reports **[SR STAFFING REPORTS]**

The *Surgery Staffing Reports* menu provides access to several staffing related report options.

The options included in this submenu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
A	<i>Attending Surgeon Reports</i>
S	<i>Surgeon Staffing Report</i>
N	<i>Surgical Nurse Staffing Report</i>
NS	<i>Scrub Nurse Staffing Report</i>
NC	<i>Circulating Nurse Staffing Report</i>

Attending Surgeon Reports

[SROATT]

The *Attending Surgeon Reports* option generates the Attending Surgeon Report, which provides staffing information for completed cases (Example 1). The Attending Surgeon Cumulative Report is a table with cumulative totals for each attending code (Example 2). You can print these reports separately or you can print both reports at one time.

The Attending Surgeon Report can be sorted by surgical specialty. They can also be generated for an individual surgeon, or for all attending surgeons.

The Attending Surgeon Report has a 132-column format and is designed to be copied to a printer. The Attending Surgeon Cumulative Report has an 80-column format and can be viewed on the screen.

Example 1: Print the Attending Surgeon Report

```
Select Surgery Staffing Reports Option: A Attending Surgeon Reports

Anesthesia Reports [SR ANESTH REPORTS]

The *Anesthesia Reports* menu provides options for printing various anesthesia reports.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option:

Shortcut	Option Name
P	<i>List of Anesthetic Procedures</i>
D	<i>Anesthesia Provider Report</i>

Page 297 has been deleted. The *Anesthesia AMIS* option has been removed.

Page 298 has been deleted. The *Anesthesia AMIS* option has been removed.

List of Anesthetic Procedures

[SROANP]

The *List of Anesthetic Procedures* option generates a report listing each completed case within the date range selected. It sorts by date order and provides the anesthesia personnel. This report also provides the anesthesia start, end, and elapsed times for each case.

After the user enters the date range, the software will ask whether the user wants the List of Anesthetic Procedures to include 1) only operating room surgical procedures, 2) non-O.R. procedures, or 3) both.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Print the List of Anesthetic Procedures for only O.R. Surgical Procedures

```
Select Anesthesia Reports Option: P List of Anesthetic Procedures
```

```

Anesthesia Provider Report

[SROADOC]

The *Anesthesia Provider Report* option provides information concerning the anesthesia staff and techniques for completed cases within a selected date range. This report can be generated for all anesthesia providers or the user can specify one. It sorts the cases by the principal anesthetist and includes information on anesthesia personnel, technique, agent, level of supervision, and elapsed anesthesia time.

This report has a 132-column format and is designed to be copied to a printer.

Example: Print the Anesthesia Provider Report

```

CPT Code Reports [SR CPT REPORTS]

The *CPT Code Reports* menu contains reports based on CPT codes.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
C	<i>Cumulative Report of CPT Codes</i>
A	<i>Report of CPT Coding Accuracy</i>
M	<i>List Completed Cases Missing CPT Codes</i>

Cumulative Report of CPT Codes

[SROACCT]

The *Cumulative Report of CPT Codes* option counts and reports the number of times a procedure was performed (based on CPT codes) during a specified date range. There is also a column showing how many times the procedure was in the Principal Procedure category, and how many times it was in the Other Operative Procedure category.

After the date range is entered, the software will ask if the user wants the Cumulative Report of CPT Codes to include 1) only operating room surgical procedures, 2) non-O.R. procedures, or 3) both.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Print the Cumulative Report of CPT Codes for only OR Surgical Procedures

```
Select CPT Code Reports Option: C Cumulative Report of CPT Codes
```

```
Cumulative Report of CPT Codes
```

```
Start with Date: 3/28 (MAR 28, 2001)
```

```
End with Date: 4/3 (APR 03, 2001)
```

```
Include which cases on the Cumulative Report of CPT Codes ?
```

1. OR Surgical Procedures
2. Non-OR Procedures
3. Both OR Surgical Procedures and Non-OR Procedures.

```
Select Number: 1// <Enter>
```

```
This report is designed to use a 132 column format.
```

```

Report of CPT Coding Accuracy

[SR CPT ACCURACY]

The *Report of CPT Coding Accuracy* option lists cases sorted by the CPT code used in the PRINCIPAL PROCEDURES field and OTHER OPERATIVE PROCEDURES field. This option is designed to help check the accuracy of the coding procedures.

About the prompts

"Do you want to print the Report of CPT Coding Accuracy for all CPT Codes ?" The user should reply **NO** to this prompt to produce the report for only one CPT code. The software will then prompt the user to enter the CPT code or category.

"Do you want to sort the Report of CPT Coding Accuracy by Surgical Specialty ?" The user should press the **<Enter>** key if he or she wants to sort the report by specialty. The user would enter **NO** to sort the report by date only.

"Do you want to print the Report to Check Coding Accuracy for all Surgical Specialties ?" The user can enter the code or name of the surgical service he or she wants the report to be based on or can press the **<Enter>** key to print the report for all surgical specialties.

Example 1: Print the Report of CPT Coding Accuracy for OR Surgical Procedures, sorted by Surgical Specialty

List Completed Cases Missing CPT Codes

[SRSCPT]

The *List Completed Cases Missing CPT Codes* option generates a report of completed cases that are missing the Principal CPT code for a specified date range. Only procedures that have CPT codes will be counted on the Annual Report of Surgical Procedures.

After the date range has been entered, the software will ask if the user wants the Cumulative Report of CPT Codes to include: 1) only operating room surgical procedures, 2) non-O.R. procedures, or 3) both.

This report is in an 80-column format and can be viewed on the screen.

Example: List Completed Cases Missing CPT Codes

```

Laboratory Interim Report

[SRO-LRRP]

The *Laboratory Interim Report* option accesses the Laboratory Package to show what lab tests the patient has had. This option will print or display interim reports for a selected patient, within a given time period. The printout will go in inverse date order. This report will output all tests for the time period specified. This option only prints verified results and does not output the microbiology reports.

Example: Print Laboratory Interim Report

```

Chapter Four: Chief of Surgery Reports

Introduction

This chapter describes options and reports for the exclusive use of the Surgical Service Chief, or his or her designee. The Chief has access to lists of cancellations, the Morbidity and Mortality Report, and Patient Occurrences.

Exiting an Option or the System

The user should enter an up-arrow (^) to stop what he or she is doing. The up-arrow can be used at almost any prompt to terminate the line of questioning and return to the previous level in the routine. Continuing to enter up-arrows will cause the user to completely exit the system.

Option Overview

The main options included in this chapter are listed below. To the left of the option name is the shortcut synonym that the user can enter to select the option. The *Chief of Surgery Menu* option will not display if the user does not have proper security clearance.

Shortcut	Option Name
CH	<i>Chief of Surgery Menu</i>

(This page included for two-sided copying.)

Chief of Surgery Menu

[SROCHIEF]

The *Chief of Surgery Menu* is a restricted option (locked with the SROCHIEF key), allowing access to various management reports and functions. It is designed for the Chief of Surgery and his or her designees. The options available from this menu are shown in the following table.

Shortcut	Option or Menu Name
V	<i>View Patient Perioperative Occurrences</i>
M	<i>Management Reports</i>
U	<i>Unlock a Case for Editing</i>
RET	<i>Update Status of Returns Within 30 Days</i>
CAN	<i>Update Cancelled Case ...</i>
D	<i>Update Operations as Unrelated/Related to Death</i>
CODE	<i>Update/Verify Procedure/Diagnosis Codes</i>

View Patient Perioperative Occurrences [SRROMEN-M&M]

The *View Patient Perioperative Occurrences* option is designed to provide a quick view of any occurrences for a particular case. This report can be viewed on a screen.

Example: View Patient Perioperative Occurrences

Select Chief of Surgery Menu Option: **V** View Patient Perioperative Occurrences

Select Patient: **SURPATIENT,NINE** 09-01-50 000345555

SURPATIENT,NINE 000-34-5555

1. 09-15-04 BYPASS (REQUESTED)
2. 09-15-04 CAROTID ARTERY ENDARTERECTOMY (SCHEDULED)
3. 03-09-04 CHOLECYSTECTOMY, INTRAOPERATIVE CHOLANGIOGRAM (COMPLETED)

Select Operation: **3**

SURPATIENT,NINE (000-34-5555) OCCURRENCES

Date of Operation: JUN 09, 2004 09:15
Principal Operation: CHOLECYSTECTOMY (47480)

Surgeon: SURSURGEON,TWO
Attending Surgeon: SURSURGEON,ONE
Attending Code: LEVEL B: ATTENDING IN O.R., SCRUBBED

Principal Postop Diagnosis: CHOLECYSTITIS (574.01)

Intraoperative Occurrences: PUNCTURED MESENTERIC ARTERY
Outcome: IMPROVED

Postoperative Occurrences: EDEMA (03/10/92)
Outcome: IMPROVED

Press RETURN to continue **<Enter>**

Management Reports [SRO-CHIEF REPORTS]

The *Management Reports* menu is designed to give the Chief of Surgery various management reports. The reports contained on this menu are listed below. To the left of the option/report name is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
MM	<i>Morbidity & Mortality Reports</i>
MV	<i>M&M Verification Report</i>
CD	<i>Comparison of Preop and Postop Diagnosis</i>
D	<i>Delay and Cancellation Reports ...</i>
V	<i>List of Unverified Surgery Cases</i>
RET	<i>Report of Returns to Surgery</i>
A	<i>Report of Daily Operating Room Activity</i>
NS	<i>Report of Cases Without Specimens</i>
ICU	<i>Report of Unscheduled Admissions to ICU</i>
OR	<i>Operating Room Utilization Report</i>
WC	<i>Wound Classification Report</i>
BA	<i>Print Blood Product Verification Audit Log</i>
KEY	<i>Key Missing Surgical Package Data</i>
OC	<i>Admitted w/in 14 days of Out Surgery If Postop Occ</i>
DS	<i>Death Within 30 Days of Surgery</i>

Morbidity & Mortality Reports

[SRMMM]

The *Morbidity & Mortality Reports* option generates two reports: the Perioperative Occurrences Report and the Mortality Report. The Perioperative Occurrences Report includes all cases that have occurrences, both intraoperatively and postoperatively, and can be sorted by specialty, attending surgeon, or occurrence category. The Mortality Report includes all cases performed within the selected date range that had a death within 30 days after surgery, and sort by specialty within a date range. Each surgical specialty will begin on a separate page.

After the user enters the date range, the software will ask whether to generate both reports. If the user answers **NO**, the software will ask the user to select from the Perioperative Occurrences Report or the Mortality Report.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Printing the Perioperative Occurrences Report – Sorted by Specialty

```
Select Perioperative Occurrences Menu Option: M Morbidity & Mortality Reports
```

```
The Morbidity and Mortality Reports include the Perioperative Occurrences Report and the Mortality Report. Each report will provide information from cases completed within the date range selected.

Print the report for which Occurrence Category ? ACUTE RENAL FAILURE

VASQIP Definition (2011):

Indicate if the patient developed new renal failure requiring renal replacement therapy or experienced an exacerbation of preoperative renal failure requiring initiation of renal replacement therapy (not on renal replacement therapy preoperatively) within 30 days postoperatively. Renal replacement therapy is defined as venous to venous hemodialysis [CVVHD], continuous venous to arterial hemodialysis [CVAHD], peritoneal dialysis, hemofiltration, hemodiafiltration or ultrafiltration.

TIP: If the patient refuses dialysis report as an occurrence because he/she did require dialysis.

Select an Additional Occurrence Category: **<Enter>**

This report is designed to use a 132 column format.

M&M Verification Report

[SRO M&M VERIFICATION REPORT]

The *M&M Verification Report* option produces the M&M Verification Report that may be useful for (1) reviewing occurrences and their assignments to operations and (2) reviewing deaths unrelated/related assignments to operations

Two varieties of this report are available. The first variety provides a report of all patients who had operations within the selected date range and experienced intraoperative occurrences, postoperative occurrences, or death within 90 days of surgery. The second variety provides a similar report for all risk-assessed operations that are in a completed state but have not yet been transmitted to the national database.

Variety #1: Report information is printed patient-by-patient, listing all operations for the patient that occurred during the selected date range, as well as any operations that may have occurred within 30 days prior to any postoperative occurrences or within 90 days prior to death. Therefore, this report may include some operations that were performed prior to the selected date range, and, if printed by specialty, may include operations performed by other specialties. For every operation that is listed, the intraoperative and postoperative occurrences are also listed. The report also includes information about whether the operation was unrelated or related to death as well as the risk assessment type and status (if assessed). The report may be printed for a selected list of surgical specialties.

Variety #2: Report information is printed patient-by-patient in a format similar to Variety #1. This report lists all risk-assessed operations that are in a completed state but have not yet been transmitted to the national database and that have intraoperative occurrences, postoperative occurrences, or death within 90 days of surgery. The report includes any operations that may have occurred within 30 days prior to any postoperative occurrences or within 90 days prior to death. Therefore, this report may include some other operations that may or may not be risk assessed, and, if risk assessed, may have any risk assessment status (incomplete, complete, or transmitted). Every patient listed on this report will have at least one operation with a risk assessment status of “complete.”

Delay and Cancellation Reports

[SRO DEL MENU]

The *Delay and Cancellation Reports* menu provides access to various reports used to track delays and cancellations. The reports on this menu are listed below. To the left of the option/report name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
D	<i>Report of Delayed Operations</i>
R	<i>Report of Delay Reasons</i>
T	<i>Report of Delay Time</i>
C	<i>Report of Cancellations</i>
A	<i>Report of Cancellation Rates</i>

Report of Delayed Operations [SRODELA]

The *Report of Delayed Operations* option will list all cases that have been delayed within a specified date range. The report sorts by surgical service and includes both the delay cause and delay time.

This report is in a 132-column format and should be copied to a printer with wide paper.

Example: Report of Delayed Operations

Select Delay and Cancellation Reports Option: **D** Report of Delayed Operations

Report of Delayed Operations

Start with which Date ? **7/1** (JUL 01, 1999)

End with which Date ? **7/31** (JUL 31, 1999)

Do you want to print the Report of Delayed Operations for all Surgical
Specialties ? YES// **<Enter>**

This report is designed to use a 132 column format.

Print the Report on which device ? **[Select Print Device]**

Report of Cancellation Rates [SROCRAT]

The *Report of Cancellation Rates* option generates a report on the calculations of cancellation rates. This report can be printed for one or a few surgical specialties (Example 1), or for all surgical specialties (Example 2). Emergency cases are not included in this report.

This report is in an 80-column format and can be viewed on your screen.

How the Cancellation Rates Are Calculated

Cancellation Rate for Scheduled Cases =
(Total Cancels / Total Scheduled) x 100

Avoidable Cancellation Rate for Scheduled Cases =
(Total Avoidable Cancels / Total Scheduled) x 100

Avoidable Cancellation rate for all Cancelled Cases =
(Total Avoidable Cancels / Total Cancels) x 100

Operating Room Utilization Report

[SR OR UTL1]

The *Operating Room Utilization Report* option prints utilization information for a selected date range for all operating rooms or for a single operating room. The report displays the percent utilization, the number of cases, the total operation time and the time worked outside normal hours for each operating room individually and all operating rooms collectively.

How the Percent Utilization is Derived

The percent utilization is derived by dividing the total operation time for all operations (including total time patients were in OR, plus the cleanup time allowed for each case) by the total functioning time, as defined in the SURGERY UTILIZATION file. The quotient is then multiplied by 100.

This report must be copied to a printer with wide paper

Example: Print the Operating Room Utilization Report

```
Select Management Reports Option: OR Operating Room Utilization Report

Wound Classification Report

[SROWC]

The *Wound Classification Report* option generates a report showing the total number of surgical cases in each of the various wound classifications for a specified date range. The report is sorted by surgical service.

After selecting a date range, the user has the choice of printing one of three reports.

- **Wound Classification Report:** The user enters the number 1 to print this summary of wound classifications entered for surgical cases performed during the date range.
- **List of Operations by Wound Classification:** The user enters the number 2 to print this list of operations sorted by wound classification and by surgical specialty performed during the date range.
- **Clean Wound Infection Summary:** The user enters the number 3 to print this summary of clean wound infections.

These reports are in an 80-column format and can be viewed on the screen.

Example 1: Wound Classification Report (Summary)

Deaths Within 30 Days of Surgery [SROQD]

The *Deaths Within 30 Days of Surgery* option lists patients who had surgery within the selected date range, died within 30 days of surgery. Two separate reports are available through this option.

1. Total Cases Summary: This report may be printed in one of three ways.

A. All Cases

The report will list all patients who had surgery within the selected date range and who died within 30 days of surgery, along with all of the patients' operations that were performed during the selected date range.

B. Outpatient Cases Only

The report will list only the surgical cases that are associated with deaths that are counted as outpatient (ambulatory) deaths.

C. Inpatient Cases Only

The report will list only the surgical cases that are associated with deaths that are counted as inpatient deaths.

2. Specialty Procedures: This report will list the surgical cases that are associated with deaths that are counted for the national surgical specialty linked to the local surgical specialty. Cases are listed by national surgical specialty.

These reports have a 132-column format and are designed to be copied to a printer.

Example 1: Deaths Within 30 Days of Surgery - Total Cases Summary

Select Management Reports Option: DS Deaths Within 30 Days of Surgery

Select Management Reports Option: DS Deaths Within 30 Days of Surgery
Deaths Within 30 Days of Surgery

This report lists patients who had surgery within the selected date range and who died within 30 days of surgery.

Start with Date: **4/1** (APR 01, 2005)

End with Date: **4/30** (APR 30, 2005)

Print which report?

1. Total Cases Summary
2. National Specialty Procedures

Select number: 1// **2** Specialty Procedures

Do you want the report for all National Surgical Specialties ? YES// **<Enter>**

This report is designed to use a 132 column format.

Print the report to which Printer ? **[Select Print Device]**

-----*printout follows*-----

MAYBERRY, NC
 DEATHS WITHIN 30 DAYS OF SURGERY LISTED FOR SPECIALTY PROCEDURES
 FOR SURGERY PERFORMED FROM: APR 1,2005 TO: APR 30,2005
 Report Printed: MAY 18,2005@12:38

Unlock a Case for Editing [SRO-UNLOCK]

The Chief of Surgery, or a designee, uses the *Unlock a Case for Editing* option to unlock a case so that it can be edited. A case that has been completed will automatically lock within a specified time after the date of operation. When a case is locked, the data cannot be edited.

With this option, the selected case will be unlocked so that the user can use another option (such as in the *Operation Menu* option or *Anesthesia Menu* option) to make changes. The case will automatically re-lock in the evening. The package coordinator has the ability to set the automatic lock times.

Although the case may be unlocked to allow editing, any field that is included in an electronically signed report, for example in the Nurse Intraoperative Report, will require the creation of an addendum to the report before the edit can be completed.

Example: Unlock a Case for Editing

```
Select Chief of Surgery Menu Option: Unlock a Case for Editing
```

```
Select PATIENT NAME: SURPATIENT,THREE 08-15-91 000212453
```

1. 05-15-91 CAROTID ARTERY ENDARTERECTOMY
2. 05-15-91 AORTO CORONARY BYPASS GRAFT

```
Select Number: 1
```

```
Press <Enter> to continue. <Enter>
```

```
Case #115 is now unlocked
```

```
Select Chief of Surgery Menu Option:

1. 07/13/92 SPLENECTOMY (CPT MISSING) - RELATED

This return to surgery is currently defined as RELATED to the case selected.
Do you want to change this status ? NO// **Y**

Press RETURN to continue

Update Cancelled Cases [SRO UPDATE CANCELLED CASE]

This option is locked with the SROCHIEF key and will not appear on the menu if the user does not have this key.

Normally, a cancelled case cannot be accessed for editing. However, the restricted *Update Cancelled Cases* option allows the Chief of Surgery to edit a cancelled case.

When the user enters this option, the software will allow access to the *Operations Menu* option.

Example: Update a Cancelled Case

```
Select Chief of Surgery Menu Option: CAN Update Cancelled Case
```

```
Update Cancelled Case

Chapter Five: Managing the Software Package

Introduction

This chapter describes options designed for the exclusive use of the Surgery package coordinator. The package coordinator can configure certain Surgery package fields to conform to a facility's needs.

Exiting an Option or the System

The user should enter an up-arrow (^) to stop what he or she is doing. The up-arrow can be used at almost any prompt to terminate the line of questioning and return to the previous level in the routine. The user would continue entering up-arrows to completely exit the system.

Option Overview

The main option included in this menu is listed below. To the left of the option name is the shortcut synonym that the user can enter to select the option. This is a restricted option and only users with the SRCOORD security key have access.

Shortcut	Option Name
M	<i>Surgery Package Management Menu</i>

(This page included for two-sided copying.)

Surgery Package Management Menu

[SRO PACKAGE MANAGEMENT]

The *Surgery Package Management Menu* provides access to options that are used to manage the Surgery software. Each option is discussed in the rest of this chapter.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
S	<i>Surgery Site Parameters (Enter/Edit)</i>
OR	<i>Operating Room Information (Enter/Edit)</i>
SU	<i>Surgery Utilization Menu ...</i>
KEY	<i>Person Field Restrictions Menu ...</i>
SD	<i>Update O.R. Schedule Devices</i>
U	<i>Update Staff Surgeon Information</i>
D	<i>Flag Drugs for Use as Anesthesia Agents</i>
F	<i>Update Site Configurable Files</i>
SI	<i>Surgery Interface Management Menu ...</i>
V	<i>Make Reports Viewable in CPRS</i>

Surgery Site Parameters (Enter/Edit) [SRPARAM]

Surgical Service managers use this option to create or update local site parameters for the Surgery package.

A question mark or two can be entered to access the help text at any prompt.

Example: Enter Surgery Site Parameters

```
Select Surgery Package Management Menu Option: S Surgery Site Parameters (Enter/Edit)
```

```
Edit Parameters for which Surgery Site: MAYBERRY, NC

Operating Room Information (Enter/Edit) [SRO-ROOM]

The *Operating Room Information (Enter/Edit)* option is used to enter or edit information pertinent to a selected operating room, including start and end times, and cleaning time.

At the TYPE field, the user can enter two question marks (??) to get a list of operating room types from which to select. If an operating room is not in service, the user can enter "YES" at the INACTIVE field to make the operating room inactive and prevent its use by other people using the Surgery software.

Example: Entering Operating Room Information

```
Select Surgery Package Management Menu Option: OR Operating Room Information (Enter/Edit)
```

```
Enter/Edit Information for which Operating Room ? OR1
```

```
OR1  ** Update O.R. **                                PAGE 1 OF 1

```
Enter Screen Server Function:
```

Surgery Utilization Menu [SR OR UTIL]

The *Surgery Utilization Menu* contains options designed to help determine operating room use. With this menu, Surgery Service managers can schedule the normal operating hours for an operating room, as well as the actual hours an operating room was in use. Operating rooms can also be inactivated. A report can be generated to see what percentage of available hours an operating room was in use and to see if an O.R. was used outside normal hours.

Shortcut	Option Name
E	<i>Operating Room Utilization (Enter/Edit)</i>
N	<i>Normal Daily Hours (Enter/Edit)</i>
R	<i>Operating Room Utilization Report</i>
H	<i>Report of Normal Operating Room Hours</i>
P	<i>Purge Utilization Information</i>

Operating Room Utilization (Enter/Edit)

[SR UTIL EDIT ROOM]

The *Operating Room Utilization (Enter/Edit)* option is used to update the actual start and end times for operating rooms on a selected date, one operating room at a time. This information is used when generating the operating room utilization reports.

The user first enters the date, then the name of the operating room. The software will default to the start and end times and allow the times to be edited. There is also a prompt for inactivating a room. If the user does not want to edit an entry, pressing the **<Enter>** key will display the next prompt.

When the user is finished entering or editing times for an operating room, he or she will be prompted for the name of the next operating room. If the user does not wish to edit times for any more operating rooms on this date, he or she should press the **<Enter>** key. The software will then prompt for a new date and the cycle begins again. When the user is finished editing times, he or she can press the **<Enter>** key or enter an up-arrow (^) to exit this option.

Example: Enter and Edit Operating Room Times

```
Select Surgery Utilization Menu Option: E Operating Room Utilization (Enter/Edit)
```

```

Normal Daily Hours (Enter/Edit)

[SR NORMAL HOURS]

The *Normal Daily Hours (Enter/Edit)* option is used to schedule the normal start and end times of an operating room for each day of the week, one operating room at a time. The information is used to help determine operating room use on a weekly basis.

First, the user enters the name of the operating room. Beginning with Sunday, the software will provide an editing schedule for each day of the week and prompt for normal start and end times for each day. There is also a prompt for inactivating a room. When the schedules for the week have been completed, the user will be prompted for the name of the next operating room for which to enter times. When the user finishes editing times, he or she can press the **<Enter>** key or enter an up-arrow (^) to exit this option.

At the "Select information to edit:" prompt, the user can 1) enter the letter **A** to update all the information on the schedule, 2) enter a number to update information in the corresponding field, 3) enter a range of numbers separated by a colon (:), or 4) press the **<Enter>** key to move to the next day's schedule. To edit the schedule for a particular day, the user enters an up-arrow followed by a day of the week. For example, to edit Friday's schedule, **^Friday** would be entered. This is demonstrated in the following example.

The start and end times must be in military time. Also, use a leading zero when the hour is a single digit (e.g., 7 AM is 07:00).

Example: Enter Normal Start and End Times for an Operating Room

```
Select Surgery Utilization Menu Option: N Normal Daily Hours (Enter/Edit)
```

Operating Room Utilization Report

[SR OR UTL1]

The *Operating Room Utilization Report* option prints utilization information, within a selected date range, for all operating rooms or for a single operating room. The report displays the percent utilization, the number of cases, the total operation time and the time worked outside normal hours for each operating room individually and all operating rooms collectively.

How the Percent Utilization is Derived

The percent utilization is derived by dividing the total operation time for all operations (including total time patients were in O.R., plus the cleanup time allowed for each case) by the total functioning time as defined in the SURGERY UTILIZATION file. The quotient is then multiplied by 100.

This report has a 132-column format and is designed to be copied to a printer.

Example: Print the Operating Room Utilization Report

```
Select Management Reports Option: OR Operating Room Utilization Report
```

```
Operating Room Utilization Report
```

```
Print utilization information starting with which date ? 3/8 (MAR 08, 2003)
```

```
Print utilization information through which date ? 3/9 (MAR 09, 2003)
```

```
Do you want to print the Operating Room Utilization Report for all  
operating rooms ? YES// <Enter>
```

```
Print the Operating Room Utilization Report on which Device ? [Select Print Device]
```

-----*printout follows*-----

MAYBERRY, NC
 SURGICAL SERVICE
 OPERATING ROOM UTILIZATION REPORT
 FOR ALL OPERATING ROOMS FROM: MAR 8,2003 TO: MAR 9, 2003
 DATE PRINTED: MAR 17,2003

Purge Utilization Information

[SR PURGE UTILIZATION]

The *Purge Utilization Information* option is used to purge utilization information for a selected date range. After selecting a starting date, the user can purge all utilization information for dates prior to, and including, that specified starting date.

Example: Purge Utilization Information

```
Select Surgery Utilization Menu Option: P Purge Utilization Information
```

```
Purge Utilization Information
```

```
Starting with Date: 2/1 (FEB 28, 1999)
```

```
This option will purge all utilization information for the dates prior to (and including) FEB 28, 1999.
```

```
Are you sure that you want to purge for this date range ? NO// Y
```

```
The option to purge utilization data has been queued.
```

```
Press RETURN to continue
```

Person Field Restrictions Menu [SROKEY MENU]

The *Person Field Restrictions Menu* contains options used by the package coordinator to maintain restrictions applied to person-type fields (meaning a field that points to the NEW PERSON field) in files.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option. None of these options will display if the user does not have proper security clearance.

Shortcut	Option Name
E	<i>Enter Restrictions for 'Person' Fields</i>
R	<i>Remove Restrictions on 'Person' Fields</i>

Enter Restrictions for 'Person' Fields

[SROKEY ENTER]

The *Enter Restrictions for 'Person' Fields* option allows IRM personnel to assign a key to a specific person-type field (meaning any field that points to the NEW PERSON field) in a file or sub-file.

A key limits the acceptable responses to a field. The Surgery software can be tailored to limit acceptable responses in the field to only those people assigned one of the keys used to restrict the field. For example, a prompt asking for the name of the attending surgeon can be modified to accept only the names of surgeons. Additionally, a field can have more than one key assigned to it; thus, the ATTENDING SURGEON field can be modified to accept the names of surgeons and other surgical staff.

Example 1 below shows how to enter the surgeon key for the SURGEON field in the SURGERY file. Example 2 shows how to enter the surgeon, nurse, and anesthetist keys for a sub-field in the SURGERY file.

Keys can be removed using the *Remove Restrictions on 'Person' Fields* option.

The user can enter one or two question marks to access the on-line help if assistance is needed while interacting with the software. A question mark can also be entered at the "Select Additional Key:" prompt for a list of keys from which to select.

Example 1: Enter Restrictions

```
Select Person Field Restrictions Menu Option: E Enter Restrictions for 'Person' Fields
```

```
Add 'PERSON' Field Restrictions:
```

```
Select File: SURGERY
```

- 1 SURGERY
- 2 SURGERY CANCELLATION REASON
- 3 SURGERY DISPOSITION
- 4 SURGERY EXTRACT
- 5 SURGERY INTERFACE PARAMETER

```
Press <RETURN> to see more, '^' to exit this list, OR
```

```
CHOOSE 1-5: 1 SURGERY
```

```
Select FIELD: SURGEON
```

- 1 SURGEON
- 2 SURGEON'S DICTATION (word-processing)

```
CHOOSE 1-2: 1 SURGEON
```

```
There are no keys restricting entries in this field.
```

```
Do you want to add a key ? YES// <Enter>
```

```
Select Additional Key: SR SURGEON
```

```
Select Additional Key: <Enter>
```

```
Entering Keys...
```

Example 2: Enter Restrictions

Select Person Field Restrictions Menu Option: E Enter Restrictions for 'Person' Fields

Add 'PERSON' Field Restrictions:

Select File: **SURGERY**

- 1 SURGERY
- 2 SURGERY CANCELLATION REASON
- 3 SURGERY DISPOSITION
- 4 SURGERY EXTRACT
- 5 SURGERY INTERFACE PARAMETER

Press <RETURN> to see more, '^' to exit this list, OR

CHOOSE 1-5: **1** SURGERY

Select FIELD: **RESTR** & POSITION AIDS (multiple)

Select RESTR & POSITION AIDS SUB-FIELD: **APPLIED BY**

There are no keys restricting entries in this field.

Do you want to add a key ? YES// **<Enter>**

Select Additional Key: **SR NURSE**

Select Additional Key: **SR SURGEON**

Select Additional Key: **SR ANESTHETIST**

Select Additional Key: **<Enter>**

Entering Keys...

Remove Restrictions on 'Person' Fields

[SROKEY REMOVE]

The *Remove Restrictions on 'Person' Fields* option allows IRM personnel to remove a key to a specific person-type field in a specific file. A key limits the acceptable responses to a field; removing a key removes a restriction on the acceptable responses.

In the example below, the key that permits the name of an anesthetist is removed from the RESTRAINTS & POSITION AIDS field, leaving the nurse and surgeon keys intact. All of the keys can be removed at one time by entering **ALL** at the "Select Number or 'ALL':" prompt.

Example: Remove Restrictions

```
Select Person Field Restrictions Menu Option: R Remove Restrictions on 'Person' Fields
```

```
Remove 'PERSON' field restrictions:
```

```
Select File: SURGERY
```

- 1 SURGERY
- 2 SURGERY CANCELLATION REASON
- 3 SURGERY DISPOSITION
- 4 SURGERY EXTRACT
- 5 SURGERY INTERFACE PARAMETER

```
Press <RETURN> to see more, '^' to exit this list, OR
```

```
CHOOSE 1-5: 1 SURGERY
```

```
Select FIELD: RESTR & POSITION AIDS (multiple)
```

```
Select RESTR & POSITION AIDS SUB-FIELD: APPLIED BY
```

```
Current Restrictions for this Field:
```

- 1. SR NURSE
- 2. SR SURGEON
- 3. SR ANESTHETIST

```
Do you want to remove one of these keys ? YES// <Enter>
```

```
Select Number or "ALL": 3
```

```
Select Person Field Restrictions Option:
```

Update O.R. Schedule Devices [SR UPDATE SCHEDULE DEVICE]

The *Update O.R. Schedule Devices* option is used to update the list of devices that will print the Schedule of Operations when printing to all pre-defined printers.

Example: Add a New Schedule Device

```
Select Surgery Package Management Menu Option: SD Update O.R. Schedule Devices
```

```
Update O.R. Schedule Devices  
-----
```

```
Select OR SCHEDULE DEVICES: SPD PTR  
  ARE YOU ADDING 'SPD PTR ' AS A NEW OR SCHEDULE DEVICES (THE 1ST FOR THIS SURGERY  
SITE PARAMETERS)? Y (YES)  
Select OR SCHEDULE DEVICES:
```

Update Staff Surgeon Information [SROSTAFF]

The *Update Staff Surgeon Information* option allows the designation of a user as a staff surgeon by assigning a security key called SR STAFF SURGEON. The Annual Report of Surgical Procedures will count cases performed by holders of this security key as having been performed by “staff.” All other cases will be counted as performed by “resident.”

Example 1: Designate a Staff Surgeon

```
Select Surgery Package Management Menu Option: U Update Staff Surgeon Information
```

```
Update Information for which Surgeon: SURSURGEON,ONE
```

```
Do you want to designate this person as a 'Staff Surgeon' ? YES// <Enter>
```

```
SURSURGEON,ONE is now designated as a staff surgeon.
```

```
Press RETURN to continue
```

Example 2: Remove Staff Surgeon Designation

```
Select Surgery Package Management Menu Option: U Update Staff Surgeon Information
```

```
Update Information for which Surgeon: SURSURGEON,ONE
```

```
This person is already designated as a staff surgeon. Do you want to remove  
that designation ? NO// Y
```

```
Removing key designating SURSURGEON,ONE as a staff surgeon...
```

```
Press RETURN to continue
```

Flag Drugs for Use as Anesthesia Agents [SROCODE]

Surgery Service managers use the *Flag Drugs for Use as Anesthesia Agents* option to mark drugs for use as anesthesia agents. If the drug is not flagged, the user will not be able to select it as an entry for the ANESTHESIA AGENT data field.

To flag a drug, it must already be listed in the Pharmacy DRUG file. To add a drug to this file, the user should contact the facility's Pharmacy Package Coordinator.

Example: Flag Drugs Used as Anesthesia Agents

```
Select Surgery Package Management Menu Option:  D  Flag Drugs for use as Anesthesia Agents
```

```
Enter the name of the drug you wish to flag:  HALOTHANE
```

```
Do you want to flag this drug for SURGERY (Y/N)?  YES
```

```
Enter the name of the drug you wish to flag:
```

Update Site Configurable Files [SR UPDATE FILES]

The *Update Site Configurable Files* option is designed for the package coordinator to add, edit, or inactivate file entries for the site-configurable files.

The software provides a numbered list of site-configurable files. The user should enter the number corresponding to the file that he or she wishes to update. The software will default to any previously entered information on the entry and provide a chance to edit it. The last prompt asks whether the user wants to inactivate the entry; answering **Yes** or **1** will inactivate the entry.

Example 1: Add a New Entry to a Site-Configurable File

```
Select Surgery Package Management Menu Option: F Update Site Configurable Files
```

```
=====
                          Update Site Configurable Surgery Files

Surgery Interface Management Menu **[SRHL INTERFACE]**

The *Surgery Interface Management Menu* contains options that allow the user to set up certain interface parameters that control the processing of Health Level 7 (HL7) messages. The interface adheres to the HL7 protocol and forms the basis for the exchange of health care information between the VistA Surgery package and any ancillary system.

Currently, there are four options on the *Surgery Interface Management Menu*.

Shortcut	Option Name
I	<i>Flag Interface Fields</i>
F	<i>File Download</i>
T	<i>Table Download</i>
P	<i>Update Interface Parameter Field</i>

Flag Interface Fields

[SRHL INTERFACE FLDS]

The *Flag Interface Fields* option allows the package coordinator to set the INTERFACE field in the SURGERY INTERFACE file. The categories listed on the first screen correspond to entries in SURGERY INTERFACE file. These categories are listed in the Surgery HL7 Interface Specifications document as being the OBR (Observation Request) text identifiers. Each identifier corresponds to several fields in the VistA Surgery package. This allows the user to control the flow of data between the VistA Surgery package and the ancillary system on a field-by-field basis.

The option lists each identifier and its current setting. To receive the data coming from the ancillary system for a category, the flag the flag should be set to **R** for receive. To ignore the data, the flag should be set to **N** for not receive. To see a second underlying layer of OBX (Observation/Result) text identifiers (the SURGERY file fields) and their settings, the OBR (Observation Request) text identifier should be set to **R** for receive. The option will allow the user to toggle the settings for a range of items or for individual items.

Example: Flagging Operation Information to be Received

```
Select Surgery Interface Management Menu Option: I Flag Interface Fields
```

```

Surgery Interface Setup Menu

To change the setting in one of the following categories, enter the
corresponding number.
(R - Receive)
(S - Send)
(S/R - Send and Receive)
(I - Ignore)

1. OPERATION (S/R)
2. TOURNIQUET (I)
3. MONITOR (I)
4. MEDICATION (R)
5. ANESTHESIA (R)
6. PROCEDURE (I)
7. PROCEDURE OCCURRENCE (I)
8. INTRAOPERATIVE OCCURRENCE (I)
9. POSTOPERATIVE OCCURRENCE (I)
10. NONOPERATIVE OCCURRENCE (I)

Enter a number: ?

The categories above refer to VistA Surgery data fields. Below are examples:
OPERATION -> File 130 fields.
TOURNIQUET -> TIME TOURNIQUET APPLIED (#.48) and File 130.02 fields.
MONITOR -> MONITORS (#.293) and File 130.41 fields.
MEDICATION -> MEDICATIONS (#.375) and File 130.33 fields.
ANESTHESIA -> ANESTHESIA TECHNIQUE (#.37) and File 130.06 fields.
Enter the corresponding number of the category you wish to edit. To edit
underlying fields, set the category to R for receive or S to send.

Enter a number: 1

Do you wish to change the current setting of OPERATION: IGNORE// RECEIVE

OPERATION DATA

Toggle the current setting to (R)eceive, (S)end, or (I)gnore.
```

1. TIME OPERATION BEGAN (S)	17. OR SETUP TIME (I)
2. TIME OPERATION ENDS (S)	18. ANESTHESIA TEMP (I)
3. NURSE PRESENT TIME (I)	19. HR (I)
4. TIME PATIENT IN HOLDING AREA (I)	20. RR (I)
5. ANESTHESIA AVAILABLE TIME (I)	21. BP (I)
6. TIME PATIENT IN OR (S)	22. ASA CLASS (I)
7. SURGEON PRESENT TIME (I)	23. CASE SCHEDULE TYPE (I)
8. ANESTHESIA CARE START TIME (I)	24. ATTENDING CODE (I)
9. ANESTHESIA CARE END TIME (I)	25. REPLACEMENT FLUID (R)
10. TIME PATIENT OUT OR (I)	26. INDUCTION COMPLETE (I)
11. PRIN. ANES. (I)	27. ANES. SUPERVISE CODE (I)
12. RELIEF ANESTHETIST (I)	28. SURGEON PGY (I)
13. ASSISTANT ANESTHETIST (I)	29. OR LOCATION (I)
14. ANES. SUPER. (I)	30. PAC(U) ADMIT TIME (I)
15. BLOOD LOSS (I)	31. PAC(U) DISCHARGE TIME (I)
16. TOTAL URINE OUTPUT (I)	

Enter a number: ?

The items above refer to VistA Surgery package fields. Below are examples:

```
HR -> End Pulse (#.84)
BP -> End BP    (#.85)
RR -> End Resp  (#.86)
```

To toggle the current setting of an item, enter its corresponding number.

File Download

[SRHL DOWNLOAD INTERFACE FILES]

The *File Download* option is used to download Surgery interface files to the Automated Anesthesia Information System (AAIS). The process is currently being done by a screen capture to a file. In the future, this will be changed to a background task that can be queued to send HL7 master file updates.

Example: Downloading Interface Files

Select Surgery Interface Management Menu Option: **F** File Download

```
Surgery Interface File Download Option

1. CPT4
2. ICD
3. MEDICATION
4. MONITOR
5. PERSONNEL
6. REPLACEMENT FLUID
7. ANES SUPERVISE CODE
8. LOCATION

Enter file to Capture: (1-8): 4
Update the MONITOR file? YES// <Enter>
Queuing message
```

Table Download

[SRHL DOWNLOAD SET OF CODES]

The *Table Download* option downloads the SURGERY file set of codes to the AAIS. This process is currently being done by a screen capture to a file. In the future, this will be changed to a background task that can be queued to send HL7 master file updates.

Example: Downloading Surgery Set of Codes

Select Surgery Interface Management Menu Option: **T** Table Download

```
Surgery Interface Table Setup Menu

This option allows the users to populate table files on the Automated
Anesthesia Information System.

1. CASE SCHEDULE TYPE                10. TUBE TYPE

Update Interface Parameter Field

[SRHL DOWNLOAD SET OF CODES]

The *Update Interface Parameter Field* option may be used to edit the parameter that determines which Surgery HL7 interface will be used, the interface compatible with HL7 V. 1.6 or the older one compatible with HL7 V. 1.5.

If applications communicating with the Surgery HL7 interface must use the interface designed for use with HL7 V. 1.5, **YES** should be entered. Otherwise, **NO** should be entered or this field should be left blank.

Example: Updating Interface Parameter Field

Select Surgery Interface Management Menu Option: **P** Update Interface Parameter Field

This option may be used to edit the parameter that determines which Surgery HL7 interface will be used, the interface compatible with HL7 v1.6 or the older one compatible with HL7 v1.5.

If applications communicating with the Surgery HL7 interface must use the interface designed for HL7 v1.5, enter YES. Otherwise, enter NO or or leave this field blank.

Use Surgery Interface Compatible with VistA HL7 v1.5 (Y/N) : **NO**

Make Reports Viewable in CPRS [SR VIEW HISTORICAL REPORTS]

This option allows Operation Reports, Nurse Intraoperative Reports, Anesthesia Reports, and Procedure Reports (Non-O.R.) for historical cases to be moved into TIU as “electronically unsigned” to make them viewable on the CPRS Surgery tab. This option lets the user move reports by division, if necessary.

```
Select Surgery Package Management Menu Option: v Make Reports Viewable in CPRS
```

```
Make Reports Viewable in CPRS
```

```
This option allows Operation Reports, Nurse Intraoperative Reports, Anesthesia Reports and Procedure Reports (Non-O.R.) for historical cases to be moved into TIU as "electronically unsigned" to make them viewable within the CPRS Surgery tab. Historical cases are cases performed before the Surgery Electronic Signature for Operative Reports feature was implemented.
```

```
These "electronically unsigned" reports will contain a disclaimer stating: "This information is provided from historical files and cannot be verified that the author has authenticated/approved this information. The authenticated source document in the patient's medical record should be reviewed to ensure that all information concerning this event has been reviewed or noted."
```

```
CAUTION!! This is a system intensive process that creates new documents in TIU. Please ensure adequate disk space availability before running this process.
```

```
Enter starting date for reports to be moved: T-180 (MAR 19, 2003)
```

```
Move reports for all divisions? YES// NO
```

1. ALBANY
2. PHILADELPHIA, PA
3. SAN JUAN, PR

```
Select Number: (1-3): 1
```

```
Do you want to move the Operation Reports (Y/N)? NO// YES
```

```
Do you want to move the Nurse Intraoperative Reports (Y/N)? NO// YES
```

```
Do you want to move the Anesthesia Reports (if used) (Y/N)? NO// YES
```

```
Do you want to move the Procedure Reports (Non-O.R.) (Y/N)? NO// YES
```

```
The following reports for cases performed MAR 19, 2003 to the present for ALBANY will be moved.
```

```
Operation Report  
Nurse Intraoperative Report  
Anesthesia Report  
Procedure Report (Non-O.R.)

Chapter Six: Assessing Surgical Risk

Introduction

Unadjusted surgical mortality and morbidity rates can vary dramatically from hospital to hospital in the VA hospital system, as well as in the private sector. This can be the result of differences in patient mix, as well as differences in quality of care. Studies are being conducted to develop surgical risk assessment models for many of the major surgical procedures done in the VA system. It is hoped that these models will correct differences in patient mix between the hospitals so that remaining differences in adjusted mortality and morbidity might be an indicator of differences in quality of care. The objective of this module is to facilitate data entry and transmission to the national centers in Denver, Colorado, where the data is analyzed. The Veterans Affairs Surgery Quality Improvement Program (VASQIP) Executive Committee oversees the overall direction of the Surgery Risk Assessment program.

This Risk Assessment part of the Surgery software provides medical centers a mechanism to track information related to surgical risk and operative mortality. It gives surgeons an on-line method of evaluating and tracking patient probability of operative mortality. For example, a patient with a history of chronic illness may be more “at risk” than a patient with no prior illness.

Exiting an Option or the System

To get out of an option, the user should enter an up-arrow (^). The up-arrow can be entered at almost any prompt to terminate the line of questioning and return to the previous level in the routine. To completely exit the system, the user continues entering up-arrows.

(This page included for two-sided copying.)

Surgery Risk Assessment Menu

[SROA RISK ASSESSMENT]

The *Surgery Risk Assessment Menu* option provides the designated Surgical Clinical Nurse Reviewer with on-line access to medical information. The menu options provide the opportunity to edit, list, print, and update an existing assessment for a patient or to enter information concerning a new risk assessment.

This option is locked with the SR RISK ASSESSMENT key.

This chapter follows the main menu of the Risk Assessment module and contains descriptions of the options and sub-options needed to maintain a Risk Assessment, transmit data, and create reports. The options are organized to follow a logical workflow sequence. Each option description is divided into two main parts: an overview and a detailed example.

The top-level options included in this menu are listed in the following table. To the left is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
N	<i>Non-Cardiac Assessment Information (Enter/Edit) ...</i>
C	<i>Cardiac Risk Assessment Information (Enter/Edit) ...</i>
P	<i>Print a Surgery Risk Assessment</i>
U	<i>Update Assessment Completed/Transmitted in Error</i>
L	<i>List of Surgery Risk Assessments</i>
F	<i>Print 30 Day Follow-up Letters</i>
R	<i>Exclusion Criteria (Enter/Edit)</i>
M	<i>Monthly Surgical Case Workload Report</i>
V	<i>M&M Verification Report</i>
O	<i>Update 1-Liner Case</i>
T	<i>Queue Assessment Transmissions</i>
CODE	<i>Alert Coder Regarding Coding Issues</i>
ERM	<i>Risk Model Lab Test (Enter/Edit)</i>

(This page included for two-sided copying.)

Non-Cardiac Risk Assessment Information (Enter/Edit)

[SROA ENTER/EDIT]

The nurse reviewer uses the *Non-Cardiac Risk Assessment Information (Enter/Edit)* option to enter a new risk assessment for a non-cardiac patient. This option is also used to make changes to an assessment that has already been entered. Cardiac cases are evaluated differently from non-cardiac cases and are entered into the software from different options. See the section, “Cardiac Risk Assessment Information (Enter/Edit)” for more information about risk assessments for cardiac cases.

The following options are available from this option, and let the user add in-depth data for a case. To the left is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
PRE	<i>Preoperative Information (Enter/Edit)</i>
LAB	<i>Laboratory Test Results (Enter/Edit)</i>
O	<i>Operation Information (Enter/Edit)</i>
D	<i>Patient Demographics (Enter/Edit)</i>
IO	<i>Intraoperative Occurrences (Enter/Edit)</i>
PO	<i>Postoperative Occurrences (Enter/Edit)</i>
RET	<i>Update Status of Returns Within 30 Days</i>
U	<i>Update Assessment Status to 'COMPLETE'</i>
CODE	<i>Alert Coder Regarding Coding Issues</i>

The following example demonstrates how to create a new risk assessment for non-cardiac patients and how to get to the sub-option menu below.

Creating a New Risk Assessment

1. The user is prompted to select either a patient name or a case. Selecting by case lets the user enter a specific surgery case number. Selecting by patient will display any previously entered assessments for a patient. An asterisk (*) indicates cardiac cases. The user can then choose to create a new assessment or edit one of the previously entered assessments.
2. After choosing an operation on which to report, the user should respond **YES** to the prompt, "Are you sure that you want to create a Risk Assessment for this surgical case ? " The user must answer **YES** (or press the <Enter> key to accept the **YES** default) to get to any of the sub-options. If the answer is **NO**, the case created in step 1 will not be considered an assessment, although it can appear on some lists, and the software will return the user to the "Select Patient:" prompt.
3. Preoperative, operative, postoperative, and lab information is entered and edited using the sub-option(s).

If assistance is needed while interacting with the software, the user should enter one or two question marks (??) to access the on-line help.

Example: Creating a New Risk Assessment (Non-Cardiac)

```
Select Surgery Risk Assessment Menu Option: N Non-Cardiac Assessment Information (Enter/Edit)
```

```
Select Patient: ?
```

```
To lookup by patient, enter patient name or patient ID. To lookup by
surgical case/assessment number, enter the number preceded by "#",
e.g., for case 12345 enter "#12345" (no spaces).
```

```
Select Patient: SURPATIENT,THREE 01-01-45 000212453 NSC VETERAN
```

```
SURPATIENT,THREE 000-21-2453
```

1. 02-01-95 INTRAOCULAR LENS (INCOMPLETE)
2. 02-01-95 HIP REPLACEMENT (INCOMPLETE)
3. 09-18-91 FEMORAL POPLITEAL BYPASS GRAFT (INCOMPLETE)
4. ---- CREATE NEW ASSESSMENT

```
Select Surgical Case: 4
```

```
SURPATIENT,THREE 000-21-2453
```

1. 10-03-91 ABDOMINAL AORTIC ANEURYSM RESECTION (NOT COMPLETE)

```
Select Operation: 1
```

When selecting a case to be assessed, if coding is completed for the case, and only excluded CPT codes are assigned, the software warns the Nurse Reviewer with the message:

“Based on the CPT Codes assigned for this case, this case should be excluded.”

This is only a warning. The Nurse Reviewer may still create the assessment.

When selecting a case to be assessed, if no CPT codes have been assigned to the case, the software warns the Nurse Reviewer with the message:

“No CPT Codes have been assigned for this case.”

This is only a warning. The Nurse Reviewer may still create the assessment.

```
Are you sure that you want to create a Risk Assessment for this surgical
case ? YES// <Enter>
```

To enter information for the risk assessment, use the sub-options from this menu option. These options are described in the following sections. For example, to enter operation information, select the *Operation Information Enter/Edit* option.

Editing an Incomplete Risk Assessment

To edit an incomplete risk assessment, the user can either select the assessment by patient or by surgery case number.

Example: Using the Select by Case Number Function to Edit an Incomplete Assessment

```
Select Surgery Risk Assessment Menu Option: N Non-Cardiac Assessment Information (Enter/Edit)
```

```
Select Patient: #210
```

```
SURPATIENT,TEN 000-12-3456
```

```
03-22-02 HIP REPLACEMENT (INCOMPLETE)
```

1. Enter Risk Assessment Information
2. Delete Risk Assessment Entry
3. Update Assessment Status to 'COMPLETE'

```
Select Number: 1// <Enter>
```

```
Division: ALBANY (500)
```

```
SURPATIENT,TEN 000-12-3456 Case #210 - MAR 22,2002
```

```
PRE Preoperative Information (Enter/Edit)
LAB Laboratory Test Results (Enter/Edit)
O Operation Information (Enter/Edit)
D Patient Demographics (Enter/Edit)
IO Intraoperative Occurrences (Enter/Edit)
PO Postoperative Occurrences (Enter/Edit)
RET Update Status of Returns Within 30 Days
U Update Assessment Status to 'COMPLETE'
CODE Alert Coder Regarding Coding Issues
```

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option:
```

These options are described in the following sections.

Preoperative Information (Enter/Edit) [SROA PREOP DATA]

The *Preoperative Information (Enter/Edit)* option is used to enter or edit preoperative assessment information. The software will present two pages. At the bottom of each page is a prompt to select one or more preoperative items to edit. If the user does not want to edit any items on the page, pressing the <Enter> key will advance to the next page or, if the user is already on page two, will exit the option.

About the "Select Preoperative Information to Edit:" Prompt

At this prompt the user enters the item number he or she wishes to edit. Entering **A** for **ALL** allows the user to respond to every item on the page, or a range of numbers separated by a colon (:) can be entered to respond to a range of items. Number-letter combinations can also be used, such as **2C**, to update a field within a group, such as CURRENT PNEUMONIA.

Each prompt at the category level allows for an entry of **YES** or **NO**. If **NO** is entered, each item under that category will automatically be answered **NO**. On the other hand, responding **YES** at the category level allows the user to respond individually to each item under the main category.

For instance, if number **2** is chosen, and the "PULMONARY:" prompt is answered **YES**, the user will be asked if the patient is ventilator dependent, has a history of COPD, and has pneumonia. If the "PULMONARY:" prompt is answered **NO**, the software will place a **NO** response in all the fields of the Pulmonary group. The majority of the prompts in this option are designed to accept the letters **Y**, **N**, or **NS** for **YES**, **NO**, and **NO STUDY**.

After the information has been entered or edited, the terminal display screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data.

This functionality allows the nurse reviewer to duplicate preoperative information from an earlier operation within 60 days of the date of operation on the same patient.

Example 1: Enter/Edit Preoperative Information

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: PRE Preoperative Information  
(Enter/Edit)
```

```
This patient had a previous non-cardiac operation on APR 28,1998@09:00
```

```
Case #63592 CHOLEDOCHOTOMY
```

```
Do you want to duplicate the preoperative information from the earlier assessment in this  
assessment? YES// NO
```

Laboratory Test Results (Enter/Edit) [SROA LAB]

Use the *Laboratory Test Results (Enter/Edit)* option to enter or edit preoperative and postoperative lab information for an individual risk assessment. The option is divided into the three features listed below. The first two features allow the user to merge (also called “capture” or “load”) lab information into the risk assessment from the VistA software. The third feature provides a two-page summary of the lab profile and allows direct editing of the information.

1. Capture Preoperative Laboratory Information
2. Capture Postoperative Laboratory Information
3. Enter, Edit, or Review Laboratory Test Results

To “capture” preoperative lab data, the user must provide both the date and time the operation began. Likewise, to capture postoperative lab data, the user must provide both the date and time the operation was completed. If this information has already been entered, the system will not prompt for it again.

If assistance is needed while interacting with the software, entering one or two question marks (??) will access the on-line help.

Example 1: Capture Preoperative Laboratory Information

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: LAB Laboratory Test Results

Select Postoperative Laboratory Information to Edit:

Operation Information (Enter/Edit) [SROA OPERATION DATA]

The *Operation Information (Enter/Edit)* option is used to enter or edit information related to the operation. At the bottom of each page is a prompt to select one or more operative items to edit. If the user does not want to edit any items on the page, pressing the **<Enter>** key will exit the option. If they are not already there, it is important that the operation's beginning and ending times be entered so that the user can later enter postoperative information.

About the "Select Operative Information to Edit:" Prompt

The user should first enter the item number to edit at the "Select Operative Information to Edit:" prompt. To respond to every item on the page, the user should enter **A** for **ALL** or enter a range of numbers separated by a colon (:) to respond to a range of items.

After the information has been entered or edited, the display will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data. If information has been entered for the **OTHER PROCEDURES** field or the **CONCURRENT PROCEDURES** field, the summary will display *****INFORMATION ENTERED***** to the right of the items.

If assistance is needed while interacting with the software, the user should enter one or two question marks (??) to receive on-line help.

Patient Demographics (Enter/Edit) [SROA DEMOGRAPHICS]

The surgical clinical nurse reviewer uses the *Patient Demographics (Enter/Edit)* option to capture patient demographic information from the Patient Information Management System (PIMS) record. The nurse reviewer can also enter, edit, and review this information. The demographic fields captured from PIMS are Race, Ethnicity, Hospital Admission Date, Hospital Discharge Date, Admission/Transfer Date, Discharge/Transfer Date, Observation Admission Date, Observation Discharge Date, and Observation Treating Specialty. With this option, the nurse reviewer can also edit the length of postoperative hospital stay, hospital admission status, and transfer status.

The Race and Ethnicity information is displayed, but cannot be updated within this or any other Surgery package option.

Enter a New Intraoperative Occurrence: **CARDIAC ARREST REQUIRING CPR**

Definition Revised (2011): Indicate if there was any cardiac arrest requiring external or open cardiopulmonary resuscitation (CPR) occurring in the operating room, ICU, ward, or out-of-hospital after the chest had been completely closed and within 30 days of surgery. Patients with AICDs that fire but the patient does not lose consciousness should be excluded.

If patient had cardiac arrest requiring CPR, indicate whether the arrest occurred intraoperatively or postoperatively. Indicate the one appropriate response:

- intraoperatively: occurring while patient was in the operating room
- postoperatively: occurring after patient left the operating room.

Press RETURN to continue: **<Enter>**

Enter a New Postoperative Occurrence: **ACUTE RENAL FAILURE**

VASQIP Definition (2011):

Indicate if the patient developed new renal failure requiring renal replacement therapy or experienced an exacerbation of preoperative renal failure requiring initiation of renal replacement therapy (not on renal replacement therapy preoperatively) within 30 days postoperatively. Renal replacement therapy is defined as venous to venous hemodialysis [CVVHD], continuous venous to arterial hemodialysis [CVAHD], peritoneal dialysis, hemofiltration, hemodiafiltration or ultrafiltration.

TIP: If the patient refuses dialysis report as an occurrence because he/she did require dialysis.

## Update Assessment Status to 'Complete' [SROA COMPLETE ASSESSMENT]

Use the *Update Assessment Status to 'Complete'* option to upgrade the status of an assessment to Complete. A complete assessment has enough information for it to be transmitted to the centers where data are analyzed. Only complete assessments are transmitted. This option also notifies the user if procedure (CPT) and diagnosis (ICD) coding has not been completed.

After updating the status, the user can print the patient's entire Surgery Risk Assessment Report. This report can be copied to a screen or to a printer.

### Example : Update Assessment Status to COMPLETE

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: U Update Assessm
ent Status to 'COMPLETE'
```

```
This assessment is missing the following items:
```

```
1. Rest Pain/Gangrene (Y/N)
```

```
Do you want to enter the missing items at this time? NO// YES
FOREIGN BODY REMOVAL (Y/N): N NO
```

```
Are you sure you want to complete this assessment ? NO// YES
```

```
Updating the current status to 'COMPLETE'...
```

```
Do you want to print the completed assessment ? YES// NO
```

## Alert Coder Regarding Coding Issues [SROA CODE ISSUE]

This option allows the nurse reviewer to send an alert to the coder when there may be an issue with the CPT codes or the Postoperative Diagnosis codes for a Surgery case. When this option is selected, the nurse reviewer can enter a free-text message that will be sent to the coder on record, as well as to a pre-defined mail group identified in the Surgery Site Parameter titled CODE ISSUE MAIL GROUP. The message will not be sent if there is no coder, or if the mail group is not defined.

### Example : Alert Coder Regarding Coding Issues

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: CODE Alert Coder
Regarding Coding Issues
```

```
Select Patient: SURPATIENT, TWO 4-3-23 000451982 YES

# Cardiac Risk Assessment Information (Enter/Edit)

## [SROA CARDIAC ENTER/EDIT]

The Surgical Clinical Nurse Reviewer uses the options within the *Cardiac Risk Assessment Information (Enter/Edit)* menu to create a new risk assessment for a cardiac patient. Cardiac cases are evaluated differently from non-cardiac cases, and the prompts are different. This option is also used to make changes to an assessment that has already been entered.

The example below demonstrates how to create a new risk assessment for cardiac patients and get to the sub-option menu as follows.

| Shortcut | Option Name                                                  |
|----------|--------------------------------------------------------------|
| CLIN     | <i>Clinical Information (Enter/Edit)</i>                     |
| LAB      | <i>Laboratory Test Results (Enter/Edit)</i>                  |
| CATH     | <i>Enter Cardiac Catheterization &amp; Angiographic Data</i> |
| OP       | <i>Operative Risk Summary Data (Enter/Edit)</i>              |
| CARD     | <i>Cardiac Procedures Operative Data (Enter/Edit)</i>        |
| IO       | <i>Intraoperative Occurrences (Enter/Edit)</i>               |
| PO       | <i>Postoperative Occurrences (Enter/Edit)</i>                |
| R        | <i>Resource Data</i>                                         |
| U        | <i>Update Assessment Status to 'COMPLETE'</i>                |
| CODE     | <i>Alert Coder Regarding Coding Issues</i>                   |

These sub-options are used for entering more in-depth data for a case, and are described in this chapter.

## Creating a New Risk Assessment

1. Enter either the patient's name/patient ID (for example, SURPATIENT,NINETEEN) or the surgical case assessment number preceded by # (for example, #47063). If the patient has any previous assessments, they will be displayed. An asterisk (\*) indicates a cardiac case. The user can now choose to create a new assessment or edit one of the previously entered assessments.
2. After choosing an operation on which to report, the user should respond **YES** to the prompt "Are you sure that you want to create a Risk Assessment for this surgical case ?" The user must answer **YES** (or press the <Enter> key to accept the **YES** default) to get to any of the sub-options. If the answer given is **NO**, the case created in step 1 will not be considered an assessment, although it can appear on some lists, and the software will return the user to the "Select Patient:" prompt.
3. The screen will clear and present the sub-options menu. The user can select a sub-option now to enter more in-depth information for the case, or press the <Enter> key to return to the main menu.

### Example: Creating A New Risk Assessment (Cardiac)

Select Surgery Risk Assessment Menu Option: **C** Cardiac Risk Assessment Information (Enter/Edit)

Select Patient: **SURPATIENT,FORTY** 03-03-45 000777777 NSC VETERAN

SURPATIENT,FORTY 000-77-7777

1. ---- CREATE NEW ASSESSMENT

Select Surgical Case: **1**

SURPATIENT,FORTY 000-77-7777

1. 01-18-95 CORONARY ARTERY BYPASS (COMPLETED)

2. 06-18-93 INGUINAL HERNIA (COMPLETED)

Select Operation: **1**

Are you sure that you want to create a Risk Assessment for this surgical case ? YES// **<Enter>**

## Clinical Information (Enter/Edit) [SROA CLINICAL INFORMATION]

The *Clinical Information (Enter/Edit)* option is used to enter the clinical information required for a cardiac risk assessment. The software will present one page; at the bottom of the page is a prompt to select one or more items to edit. If the user does not want to edit any items on the page, pressing the <Enter> key will advance the user to another option.

### About the "Select Clinical Information to Edit:" Prompt

At the "Select Clinical Information to Edit:" prompt, the user should enter the item number to edit. The user can then enter an **A** for **ALL** to respond to every item on the page, or enter a range of numbers separated by a colon (:) to respond to a range of items.

After the information has been entered or edited, the terminal display screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data. If assistance is needed while interacting with the software, the user can enter one or two question marks (??) to receive on-line help.

### Example: Enter Clinical Information

## Laboratory Test Results (Enter/Edit) [SROA LAB-CARDIAC]

The *Laboratory Test Results (Edit/Edit)* option is used to enter or edit preoperative laboratory test results for an individual cardiac risk assessment. The option is divided into the two features listed below. The first feature allows the user to merge (also called “capture” or “load”) lab information into the risk assessment from the VistA software. The second feature provides a two-page summary of the lab profile and allows direct editing of the information.

1. Capture Laboratory Information
2. Enter, Edit, or Review Laboratory Test Results

To “capture” preoperative lab data, the user must provide both the date and time the operation began. If this information has already been entered, the system will not prompt for it again.

If assistance is needed while interacting with the software, entering one or two question marks (??) allows the user to access the on-line help.

### **About the "Select Laboratory Information to Edit:" Prompt**

At this prompt the user enters the item number to edit. Entering **A** for **ALL** allows the user to respond to every item on the page, or a range of numbers separated by a colon (:) can be entered to respond to a range of items.

After the information has been entered or edited, the terminal display screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data.

### **Example: Enter Laboratory Test Results**

## Operative Risk Summary Data (Enter/Edit) [SROA CARDIAC OPERATIVE RISK]

The *Operative Risk Summary Data (Enter/Edit)* option is used to enter or edit operative risk summary data for the cardiac surgery risk assessments. This option records the physician's subjective estimate of operative mortality. To avoid bias, this should be completed preoperatively. The software will present one page. At the bottom of the page is a prompt to select one or more items to edit. If the user does not want to edit any of the items, the <Enter> key can be pressed to proceed to another option.

### About the "Select Operative Risk Summary Information to Edit:" prompt

At this prompt the user enters the item number to edit. Entering **A** for **ALL** allows the user to respond to every item on the page, or a range of numbers separated by a colon (:) can be entered to respond to a range of items.

### Example: Operative Risk Summary Data

```
Select Cardiac Risk Assessment Information (Enter/Edit) Option: OP Operative Risk Summary Data (Enter/Edit)
```

```

```

Select Operative Risk Summary Information to Edit:
```

---

The Surgery software performs data checks on the following fields:

The Date/Time Collected field for Physician's Preoperative Estimate of Operative Mortality should be earlier than the Time Pat In OR field. This field is no longer auto-populated.

The Date/Time Collected field for Surgical Priority should be earlier than the Time Pat In OR field. This field is no longer auto-populated.

If the date entered does not conform to the specifications, then the Surgery software displays a warning at the bottom of the screen.

---

## Cardiac Procedures Operative Data (Enter/Edit) [SROA CARDIAC PROCEDURES]

The *Cardiac Procedures Operative Data (Enter/Edit)* option is used to enter or edit information related to cardiac procedures requiring cardiopulmonary bypass (CPB). The software will present two pages. At the bottom of the page is a prompt to select one or more items to edit. If the user does not want to edit any items on the page, pressing the <Enter> key will advance the user to another option.

### **About the "Select Operative Information to Edit:" prompt**

At this prompt, the user enters the item number to edit. Entering **A** for **ALL** allows the user to respond to every item on the page, or a range of numbers separated by a colon (:) can be entered to respond to a range of items. You can also use number-letter combinations, such as **11B**, to update a field within a group, such as VSD Repair.

Each prompt at the category level allows for an entry of **YES** or **NO**. If **NO** is entered, each item under that category will automatically be answered **NO**. On the other hand, responding **YES** at the category level allows the user to respond individually to each item under the main category.

After the information has been entered or edited, the terminal display screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data.

### **Example: Enter Cardiac Procedures Operative Data**

```

---

Select Resource Information to Edit:

---

The Surgery software performs data checks on the following fields:

The Date/Time Patient Extubated field should be later than the Time Patient Out OR field, and earlier than the Date/Time Discharged from ICU field.

The Date/Time Discharged from ICU field should be later than the Date/Time Patient Extubated field, and equal to or earlier than the Hospital Discharge Date field.

If the date entered does not conform to the specifications, then the Surgery software displays a warning at the bottom of the screen.

---

*(This page included for two-sided copying.)*

## Update Assessment Status to 'COMPLETE' [SROA COMPLETE ASSESSMENT]

The *Update Assessment Status to 'COMPLETE'* option is used to upgrade the status of an assessment to "Complete." A complete assessment has enough information for it to be transmitted to the centers where data are analyzed. Only complete assessments are transmitted. This option also notifies the user if procedure (CPT) and diagnosis (ICD) coding has not been completed.

After updating the status, the user can print the patient's entire Surgery Risk Assessment Report. This report can be copied to a screen or to a printer.

### Example: Update Assessment Status to COMPLETE

```
Select Cardiac Risk Assessment Information (Enter/Edit) Option: U Update Assess
ment Status to 'COMPLETE'
```

```
This assessment is missing the following items:
```

```
1. Foreign Body Removal (Y/N)
```

```
Do you want to enter the missing items at this time? NO// YES
```

```
FOREIGN BODY REMOVAL (Y/N): N NO
```

```
Are you sure you want to complete this assessment ? NO// YES
```

```
Updating the current status to 'COMPLETE'...
```

```
Do you want to print the completed assessment ? YES// NO
```

## Alert Coder Regarding Coding Issues [SROA CODE ISSUE]

This option allows the nurse reviewer to send an alert to the coder when there may be an issue with the CPT codes or the Postoperative Diagnosis codes for a Surgery case. When this option is selected, the nurse reviewer can enter a free-text message that will be sent to the coder on record, as well as to a pre-defined mail group identified in the Surgery Site Parameter titled CODE ISSUE MAIL GROUP. The message will not be sent if there is no coder, or if the mail group is not defined.

### Example : Alert Coder Regarding Coding Issues

```

# Print a Surgery Risk Assessment

## [SROA PRINT ASSESSMENT]

The *Print a Surgery Risk Assessment* option prints an entire Surgery Risk Assessment Report for an individual patient. This report can be displayed temporarily on a screen. As the report fills the screen, the user will be prompted to press the **<Enter>** key to go to the next page. A permanent record can be made by copying the report to a printer. When using a printer, the report is formatted slightly differently from the way it displays on the terminal.

### Example 1: Print Surgery Risk Assessment for a Non-Cardiac Case

```

# Update Assessment Completed/Transmitted in Error

## [SROA TRANSMITTED IN ERROR]

The *Update Assessment Completed/Transmitted in Error* option is used to change the status of a completed or transmitted assessment that contains errors or has been entered in error. The status will change from Completed or Transmitted to Incomplete so that the user can edit the assessment. Transmitted assessments will be re-transmitted if they are re-completed within 14 days of the original transmission date.

### Example: Update Assessment Completed/Transmitted in Error

```
Select Surgery Risk Assessment Menu Option: U Update Assessment Completed/Transmitted in Error
```

```
Select Patient: SURPATIENT,NINETEEN 03-03-30 000287354 SC VETERAN
```

```
SURPATIENT,NINETEEN 000-28-7354
```

1. 02-08-95 CORONARY ARTERY BYPASS (INCOMPLETE)
2. 01-25-95 PULMONARY LOBECTOMY (TRANSMITTED)

```
Select Surgical Case: 2
```

```
Are you sure that you want to change the status of this assessment
from 'TRANSMITTED' to 'INCOMPLETE' ? YES// <Enter>
```

```
The Assessment Status has been changed to 'INCOMPLETE'.
```

```
Press <Enter> to continue
```

*(This page included for two-sided copying.)*

# List of Surgery Risk Assessments

## [SROA ASSESSMENT LIST]

The *List of Surgery Risk Assessments* option is used to print lists of assessments within a date range. Lists of assessments in different phases of completion (for example, incomplete, completed, or transmitted) or a list of all surgical cases entered in the Surgery Risk Assessment software can be printed. The user can also request that the list be sorted by surgical service. The software will prompt for a beginning date and an ending date. The examples in this section illustrate printing assessments in the following formats.

1. List of Incomplete Assessments
2. List of Completed Assessments
3. List of Transmitted Assessments
4. List of Non-Assessed Major Surgical Cases
5. List of All Major Surgical Cases
6. List of All Surgical Cases
7. List of Completed/Transmitted Assessments Missing Information
8. List of 1-Liner Cases Missing Information
9. List of Eligible Cases
10. List of Cases With No CPT Codes
11. Summary List of Assessed Cases

### Example 1: List of Incomplete Assessments

# Print 30 Day Follow-up Letters

## [SROA REPRINT LETTERS]

The Surgical Clinical Nurse Reviewer uses the *Print 30 Day Follow-up Letters* option to automatically print a letter, or a batch of letters, addressed to a specific patient or patients.

### **About the "Do you want to print the letter for a specific assessment?" Prompt**

The user responds **YES** to this prompt in order to print a follow-up letter for a single assessment. The software will ask the user to select the patient and case for which the letter will be printed. See Example 1 below.

The user responds **NO** to this prompt if he or she wants to print a batch of follow-up letters for surgical cases within a data range. The software will ask for the beginning and ending dates of the date range for which the letters will be printed. See Example 2 on the following pages.

If the patient has died, the software notifies the user of the death, and will not print the letter. Also, if a patient has not been discharged, the follow up letter will not print.

### **Example 1: Print a Single Follow-up Letter**

```
Select Surgery Risk Assessment Menu Option: F Print 30 Day Follow-up Letters
```

```

NINETEEN SURPATIENT

JUL 18, 2006  
Operation Date: 06/18/06  
Specialty: GENERAL SURGERY

Dear Mr. Surpatient,

One month ago, you had an operation at the VA Medical Center. We are interested in how you feel. Have you had any health problems since your operation? We would like to hear from you. Please take a few minutes to answer these questions and return this letter in the self-addressed stamped envelope.

Have you been to a hospital or seen a doctor for any reason since your operation?  Yes  No

If you answered NO, you do not need to answer any more questions. Please return this sheet in the self-addressed stamped envelope.

If you have answered YES, please answer the following questions.

1) Have you been seen in an outpatient clinic or doctor's office?  
 Yes  No

Why did you go to the clinic or doctor's office? \_\_\_\_\_

Where? (name and location) \_\_\_\_\_ Date? \_\_\_\_\_

Who was your doctor? \_\_\_\_\_

2) Were you admitted to a hospital?  Yes  No

Why did you go to the hospital? \_\_\_\_\_

Where? (name and location) \_\_\_\_\_ Date? \_\_\_\_\_

Who was your doctor? \_\_\_\_\_

Please return this letter whether or not you have had any medical problems. Your health and opinion are important to us. Thank you.

Sincerely,

Surgical Clinical Nurse Reviewer

## Example 2: Print Letters Within a Date Range

Select Surgery Risk Assessment Menu Option: **P** Print 30 Day Follow-up Letters

Do you want to print the letter for a specific assessment ? YES// **N**

This option will allow you to reprint the 30 day follow up letters for the date that they were originally printed. When printed automatically, the letters print 25 days after the date of operation.

Print letters for BEGINNING date: TODAY// **6/1/07** (JUN 01, 2007)

Print letters for ENDING date: TODAY// **<Enter>** (JUN 02, 2007)

Print 30 Day Letters on which Device: **[Select Print Device]**

# Monthly Surgical Case Workload Report

## [SROA MONTHLY WORKLOAD REPORT]

The *Monthly Surgical Case Workload Report* option generates the Monthly Surgical Case Workload Report that may be printed and/or transmitted to the VASQIP national database. The report can be printed for a specific month, or for a range of months.

### Example: Monthly Surgical Case Workload Report – Single Month

```
Select Surgery Risk Assessment Menu Option: M Monthly Surgical Case Workload Report
```

```
Report of Monthly Case Workload Totals
```

```
Print which report?
```

1. Report for Single Month
2. Report for Range of Months

```
Select Number (1 or 2): 1// <Enter>
```

```
This option provides a report of the monthly risk assessment surgical case workload totals which include the following categories:
```

1. All cases performed
2. Eligible cases
3. Eligible cases meeting exclusion criteria
4. Assessed cases
5. Not logged eligible cases
6. Cardiac cases
7. Non-cardiac cases
8. Assessed cases per day (based on 20 days/month)

```
The second part of this report provides the total number of incomplete assessments remaining for the month selected and the prior 12 months.
```

```
Compile workload totals for which month and year? MAY 2007// <Enter>
```

```
Do you want to print all divisions? YES// <Enter>
```

```
This report may be printed and/or transmitted to the national database.
```

```
Do you want this report to be transmitted to the central database? NO// <Enter>
```

```
Print report on which Device: [Select Print Device]
```

# M&M Verification Report

## [SRO M&M VERIFICATION REPORT]

The *M&M Verification Report* option produces the M&M Verification Report, which may be useful for:

- reviewing occurrences and their assignment to operations
- reviewing death unrelated/related assignments to operations

The full report includes all patients who had operations within the selected date range who experienced intraoperative occurrences, postoperative occurrences or death within 90 days of surgery. The pre-transmission report is similar but includes operations with completed risk assessments that have not yet transmitted to the national database.

### Full Report

Information is printed by patient, listing all operations for the patient that occurred during the selected date range, plus any operations that may have occurred within 30 days prior to any postoperative occurrences or within 90 days prior to death. Therefore, this report may include some operations that were performed prior to the selected date range and, if printed by specialty, may include operations performed by other specialties. For every operation listed, the intraoperative and postoperative occurrences are listed. The report indicates if the operation was flagged as unrelated or related to death and the risk assessment type and status. The report may be printed for a selected list of surgical specialties.

### Pre-Transmission Report

Information is printed in a format similar to the full report. This report lists all completed risk assessed operations that have not yet transmitted to the national database and that have intraoperative occurrences, postoperative occurrences, or death within 90 days of surgery. The report includes any operations that may have occurred within 30 days prior to any postoperative occurrences or within 90 days prior to death. Therefore, this report may include some operations that may or may not be risk assessed, and, if risk assessed, may have a status other than 'complete'. However, every patient listed on this report will have at least one operation with a risk assessment status of 'complete'.

### Example 1: Generate an M&M Verification Report (Full Report)

Select Surgery Risk Assessment Menu Option: ▼ M&M Verification Report

#### M&M Verification Report

The M&M Verification Report is a tool to assist in the review of occurrences and their assignment to operations and in the review of death unrelated or related assignments to operations.

>>> Comments:

Patient complained of chest pain and shortness of breath. Heparin was administered immediately by IV.  
Date of Death: 03/10/07@14:50  
Review of Death Comments: Patient expired from large pulmonary embolus before anticoagulant treatment could take effect.  
Patient's obesity and prolonged immobilization were likely contributing factors.

# Update 1-Liner Case

## [SROA ONE-LINER UPDATE]

The *Update 1-Liner* option may be used to enter missing data for the 1-liner cases (major cases marked for exclusion from assessment, minor cases, and cardiac-assessed cases that transmit to the VASQIP database as a single line or two of data). Cases edited with this option will be queued for transmission to the VASQIP database at Chicago.

### Example: Update 1-Liner Case

```
Select Surgery Risk Assessment Menu Option: Update 1-Liner Case
Select Patient: SURPATIENT, TWELVE 02-12-28 000418719 YES
SC VETERAN
```

```
SURPATIENT, TWELVE 000-41-8719
1. 08-07-04 REPAIR DIAPHRAGMATIC HERNIA (COMPLETED)
2. 02-18-99 TRACHEOSTOMY, BRONCHOSCOPY, ESOPHAGOSCOPY (COMPLETED)
3. 09-04-97 CHOLECYSTECTOMY (COMPLETED)
Select Case: 1
```

```
SURPATIENT, TWELVE (000-41-8719) Case #142
Transmission Status: QUEUED TO TRANSMIT >> Coding Complete <<
AUG 7, 2004 REPAIR DIAPHRAGMATIC HERNIA (CPT Code: 39540)

1. Hospital Admission Status: SAME DAY
2. Surgical Specialty: GENERAL (OR WHEN NOT DEFINED BELOW)
3. Surgical Priority: STANDBY
4. Attending/Res Sup Code: LEVEL A. ATTENDING DOING THE OPERATION
5. ASA Class: 2-MILD DISTURB.
6. Wound Classification:
7. Principal Anesthesia Technique: GENERAL
8. CPT Codes (view only): 39540
9. Other Procedures: ***NONE ENTERED***

Select number of item to edit: 6
Wound Classification: C CLEAN
```

```
SURPATIENT, TWELVE (000-41-8719) Case #142
Transmission Status: QUEUED TO TRANSMIT >> Coding Complete <<
AUG 7, 2004 REPAIR DIAPHRAGMATIC HERNIA (CPT Code: 39540)

1. Hospital Admission Status: SAME DAY
2. Surgical Specialty: GENERAL (OR WHEN NOT DEFINED BELOW)
3. Surgical Priority: STANDBY
4. Attending/Res Sup Code: LEVEL A. ATTENDING DOING THE OPERATION

# Queue Assessment Transmissions

## [SROA TRANSMIT ASSESSMENTS]

The *Queue Assessment Transmissions* option may be used to manually queue the VASQIP transmission process to run at a selected time. The VASQIP transmission process is a part of the nightly maintenance and cleanup process.

### Example: Queue Assessment Transmissions

```
Select Surgery Risk Assessment Menu Option: T Queue Assessment Transmissions
Transmit Surgery Risk Assessments
Requested Start Time: NOW// <Enter>
Queued as task #2651700
Press RETURN to continue
```

*(This page included for two-sided copying.)*

# Alert Coder Regarding Coding Issues

## [SROA CODE ISSUE]

This option allows the nurse reviewer to send an alert to the coder when there may be an issue with the CPT codes or the Postoperative Diagnosis codes for a Surgery case. When this option is selected, the nurse reviewer can enter a free-text message that will be sent to the coder on record, as well as to a pre-defined mail group identified in the Surgery Site Parameter titled CODE ISSUE MAIL GROUP. The message will not be sent if there is no coder, or if the mail group is not defined.

### Example : Alert Coder Regarding Coding Issues

```
Select Surgery Risk Assessment Menu Option: CODE Alert Coder Regarding Coding Issues
```

```
Select Patient: SURPATIENT, TWELVE 02-12-28 000418719 YES
SC VETERAN
```

```
SURPATIENT, TWELVE 000-41-8719
```

1. 08-07-04 REPAIR DIAPHRAGMATIC HERNIA (COMPLETED)
2. 02-18-99 TRACHEOSTOMY, BRONCHOSCOPY, ESOPHAGOSCOPY (COMPLETED)
3. 09-04-97 CHOLECYSTECTOMY (COMPLETED)

```
Select Operation: 1
```

```
SURPATIENT, TWELVE (000-41-8719) Case #142
AUG 7, 2004 REPAIR DIAPHRAGMATIC HERNIA
```

-----

The following "final" codes have been entered for the case.

Principal CPT Code: 39540 REPAIR DIAPHRAGMATIC HERNIA  
Other CPT Codes: NOT ENTERED  
Postop Diagnosis Code (ICD-10): 551.3 DIAPHRAGM HERNIA W GANGR (w C/C)

If you believe that the information coded is not correct and would like to alert the coders of the potential issue, enter a brief description of your concern below.

Do you want to alert the coders (Y/N)? YES// **<Enter>**

```
==[WRAP]==[INSERT]====< Coding Discrepancy Comments >====[<PF1>H=Help]====
I have reviewed this case for VASQIP. The final Principal CPT Code entered
is 39540. I would like to talk to you regarding the code. I think the code
should be 39541. Please call me at X2545.

# Risk Model Lab Test

## [SROA LAB TEST EDIT]

In order to assist the nurse reviewer, in the *Surgery Risk Assessment Menu* is the *Risk Model Lab Test (Enter/Edit)* option, which allows the nurse to map VASQIP data in the RISK MODEL LAB TEST file (#139.2). The option synonym is ERM.

```
Risk Model Lab Test (Enter/Edit)
Select Surgery Risk Assessment Menu Option: Risk Model Lab Test (Enter/Edit)
```

```

Risk Model Lab Test (Enter/Edit)

Select item to edit from list below:

1. ALBUMIN 14. INR
2. ALKALINE PHOSPHATASE 15. LDL
3. ANION GAP 16. PLATELET COUNT
4. B-TYPE NATRIURETIC PEPTIDE 17. POTASSIUM
5. BUN 18. PT
6. CHOLESTEROL 19. PTT
7. CPK 20. SGOT
8. CPK-MB 21. SODIUM
9. CREATININE 22. TOTAL BILIRUBIN
10. HDL 23. TRIGLYCERIDE
11. HEMATOCRIT 24. TROPONIN I
12. HEMOGLOBIN 25. TROPONIN T
13. HEMOGLOBIN A1C 26. WHITE BLOOD COUNT

Enter number (1-25): 6
```

```

Risk Model Lab Test (Enter/Edit)

Test Name: CHOLESTEROL

Laboratory Data Name(s): NONE ENTERED

Specimen: SERUM

Do you want to edit this test ? NO// YES

Select LABORATORY DATA NAME: CHOLESTEROL
 1 CHOLESTEROL
 2 CHOLESTEROL CRYSTALS
CHOOSE 1-2: 1 CHOLESTEROL
Select LABORATORY DATA NAME: <Enter>
Specimen: SERUM// <Enter>

*(This page included for two-sided copying.)*

## Chapter Seven: Code Set Versioning

---

The Code Set Versioning enhancement to the Surgery package ensures that only CPT codes, CPT modifiers, and ICD codes that are active for the operation or procedure date will be available for selection by the user, regardless of when the CPT entry or edit is made. Also, when a future operation or procedure date is entered, only active codes will be available.

It is possible that a new code set will be loaded between the time that an operation or procedure is scheduled and the time the operation or procedure occurs. Re-validation of the codes and modifiers occurs when the date and time that a patient enters the operating room is entered in the Surgery package. If the code (CPT or ICD) or CPT modifier is invalid — inactive for the date of operation or procedure — the inactive codes or modifiers will be deleted. Then, these two actions transpire:

1. A warning message displays on the screen, corresponding to the specific code or modifier that is inactive.
2. A MailMan message is sent to the surgeon (or provider), attending surgeon of record, and to the user who edited the record. The MailMan message contains the patient's name, date of operation, case number, free-text operation or procedure name, CPT or ICD codes, CPT modifiers deleted (if any), and the reason for deletion.

The first sample warning message shows an inactive CPT code, its modifiers, and ICD-10 codes, and the second warning message is for a Non-O.R. procedure.

### Example: Warning Message to Surgeon

```
The following codes are no longer active and will be deleted for case # 45715.
```

```
PRIN DIAGNOSIS CODE (ICD10): H54.0
```

```
New active codes must be re-entered. A MailMan message will be sent to the surgeon and attending surgeon of record and to the user who edited the record with case details for follow-up.
```

### Example: Warning Message to Provider

```
The following codes are no longer active and will be deleted for case #:242
```

```
PRINCIPAL CPT CODE: 00869
CPT MODIFIER: 23 UNUSUAL ANESTHESIA
```

```
New active codes must be re-entered. A MailMan message will be sent to the provider and attending provider of record and to the user who edited the record with case details for follow-up.
```

The following sample MailMan message is sent to the surgeon, attending surgeon of record, and to the user who edited the record. The sample shows ICD codes, CPT codes, and CPT modifiers that are inactive.

### Example: MailMan Message to Surgeon ICD-9 Code

```
Subj: ICD-9 OR CPT CODE DELETION [#208145] 05/06/14@09:56 11 lines
From: SURGERY PACKAGE In 'IN' basket. Page 1 *New*
```

```

Patient: SRPATIENTA,ONE Case #: 45804
Operation Date: MAY 06, 2014@11:11 OBS
The following codes are no longer active and were deleted for this
case when the Time Patient in OR was entered.
```

```
PRIN DIAGNOSIS CODE (ICD9): 600.01
```

New active codes must be re-entered.

### Example: MailMan Message to Surgeon ICD-10 Code

```
Subj: ICD OR CPT CODE DELETION [#207963] 04/18/14@16:21 11 lines
From: SURGERY PACKAGE In 'IN' basket. Page 1
```

```

Patient: SRPATIENTB,TWO Case #: 45715
Operation Date: JAN 01, 2012@13:33 KIDNEY PROBLEMS
```

The following codes are no longer active and were deleted for this case when the Time Patient in OR was entered.

```
PRIN DIAGNOSIS CODE (ICD10): H54.0
```

New active codes must be re-entered.

Enter message action (in IN basket): Ignore//

For Non-O.R. procedures, the MailMan message is sent to the provider and attending provider.

### Example: MailMan Message to Provider

```
Subj: ICD OR CPT CODE DELETION [#88073] 06/26/03@12:32 12 lines
From: SURGERY PACKAGE In 'IN' basket. Page 1 *New*
```

```

Patient: SURPATIENT,ONE CASE #: 242
OPERATION DATE: JUN 26, 2003 STELLATE NERVE BLOCK
The following codes are no longer active and were deleted for this
case when the Time Procedure Began was entered.
```

```
PRINCIPAL CPT CODE: 00869
CPT MODIFIER: 23 UNUSUAL ANESTHESIA
```

New active codes must be re-entered.

Enter message action (in IN basket): Ignore//

The following options allow for re-validation of the ICD and CPT codes and modifiers when the TIME PAT IN OR field or TIME PROCEDURE BEGAN field is entered.

- *Operation*
- *Operation (Short Screen)*
- *Edit Non-O.R. Procedure*
- *Operation Information (Enter/Edit)*
- *Resource Data*

Pages 527-547 have been deleted. The *Transplant Assessment Menu* has been removed with patch SR\*3\*184.

## Chapter Nine: Glossary

The following table contains terms that are used throughout the *Surgery V.3.0 User Manual*, and will aid the user in understanding the use of the Surgery package.

| Term                      | Definition                                                                                                                                                                                                                                                                               |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aborted                   | Case status indicating the case was cancelled after the patient entered the operating room. The Cases shall be considered “ABORTED” if the TIME PAT OUT OR field (#.205) and/or TIME PAT IN OR field (#.232) and CANCEL DATE field (#17), and the CASE ABORTED field entered with “YES”. |
| ASA Class                 | This is the American Society of Anesthesiologists classification relating to the patient’s physiologic status. Numbers followed by an 'E' indicate an emergency.                                                                                                                         |
| Attending Code            | Code that corresponds to the highest level of supervision provided by the attending staff surgeon during the procedure.                                                                                                                                                                  |
| Blockout Graph            | Graph showing the availability of operating rooms.                                                                                                                                                                                                                                       |
| Cancelled Case            | Case status indicating that an entry has been made in the CANCEL DATE field, CANCELLATION TIMEFRAME and/or the PRIMARY CANCEL REASON field without the patient entering the operating room.                                                                                              |
| CCSHS                     | VA Center for Cooperative Studies in Health Services located at Hines, Illinois.                                                                                                                                                                                                         |
| CICSP                     | Continuous Improvement in Cardiac Surgery Program.                                                                                                                                                                                                                                       |
| Completed Case            | Case status indicating that an entry has been made in the TIME PAT OUT OR field.                                                                                                                                                                                                         |
| Concurrent Case           | A patient undergoing two operations by different surgical specialties at the same time, or back to back, in the same operating room.                                                                                                                                                     |
| CPT Code                  | Also called Operation Code. CPT stands for Current Procedural Terminology.                                                                                                                                                                                                               |
| CRT                       | Cathode ray tube display. A display device that uses a cathode ray tube.                                                                                                                                                                                                                 |
| Intraoperative Occurrence | Perioperative occurrence during the procedure.                                                                                                                                                                                                                                           |
| Major                     | Any operation performed under general, spinal, or epidural anesthesia plus all inguinal herniorrhaphies and carotid endarterectomies regardless of anesthesia administered.                                                                                                              |
| Minor                     | All operations not designated as Major.                                                                                                                                                                                                                                                  |
| New Surgical Case         | A surgical case that has not been previously requested or scheduled such as an emergency case. A surgical case entered in the records without being booked through scheduling will not appear on the Schedule of Operations or as an operative request.                                  |
| Non-Operative Occurrence  | Occurrence that develops before a surgical procedure is performed.                                                                                                                                                                                                                       |
| Not Complete              | Case status indicating one of the following two situations with no entry in the TIME PAT OUT OR field (#.232).<br><br>1) Case has entry in TIME PAT IN OR field (#.205).<br>2) Case has not been requested or scheduled.                                                                 |
| NSQIP                     | National Surgical Quality Improvement Program.                                                                                                                                                                                                                                           |

|                          |                                                                                                                                                                                                                                                                                                                             |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Operation Code           | Identifying code for reporting medical services and procedures performed by physicians. See CPT Code.                                                                                                                                                                                                                       |
| PACU                     | Post Anesthesia Care Unit.                                                                                                                                                                                                                                                                                                  |
| Postoperative Occurrence | Perioperative occurrence following the procedure.                                                                                                                                                                                                                                                                           |
| Procedure Occurrence     | Occurrence related to a non-O.R. procedure.                                                                                                                                                                                                                                                                                 |
| Requested                | Operation has been slotted for a particular day but the time and operating room are not yet firm.                                                                                                                                                                                                                           |
| Risk Assessment          | Part of the Surgery software that provides medical centers a mechanism to track information related to surgical risk and operative mortality. Completed assessments are transmitted to the VASQIP national database for statistical analysis.                                                                               |
| Scheduled                | Operation has both an operating room and a scheduled starting time, but the operation has not yet begun.                                                                                                                                                                                                                    |
| Screen Server            | A format for displaying data on a cathode ray tube display. Screen Server is designed specifically for the Surgery Package.                                                                                                                                                                                                 |
| Screen Server Function   | The Screen Server prompt for data entry.                                                                                                                                                                                                                                                                                    |
| Service Blockouts        | The reservation of an operating room for a particular service on a recurring basis. The reservation is charted on a blackout graph.                                                                                                                                                                                         |
| Transplant Assessments   | Part of the Surgery software that provides medical centers a mechanism to track information related to transplant risk and operative mortality. Completed assessments are transmitted to the VASQIP national database for statistical analysis. The <i>Transplant Assessment Menu</i> has been removed with patch SR*3*184. |
| VASQIP                   | Veterans Affairs Surgery Quality Improvement Program.                                                                                                                                                                                                                                                                       |
