## Introduction

#### Clinical Reminder UPDATE\_2\_0\_11 contains 1 Reminder Exchange entry: UPDATE\_2\_0\_11 BENZODIAZEPINE/OPIOID ORDER CHECK

The benzodiazepine/opioid combinations Clinical reminder Order Check (CROC) will display when a provider is adding an item in one of those drug classes onto a patient's medication profile that already has the other. In order to reduce alert fatigue, the order check does not trigger for a patient already receiving both a benzodiazepine and an opioid.

Below is an example of the order check:

Order Checking	
(1 of 1) Potential dangerous drug combination with an OPIOID Combination of Benzodiazepines and Opioids may result in potentially unsafe drug interactions; prescribing of Opioids and Benzodiazepines concurrently has been shown to have a 4-fold increased risk of OVERDOSE in the Veteran population (BMJ 2015;350:h2698).	
Co-prescribing opioid and benzodiazepines is particularly dangerous when patients have other risk factors for overdose or suicide. The Stratification Tool for Opioid Risk Mitigation (STORM) decision support tool provides estimates of adverse event risk, a summary of risk factors, and recommended risk mitigation interventions and treatment alternatives for patients. Review STORM by cutting and pasting this URL link into your browser: http://go.va.gov/ijob	4 III
Accept Order Cancel Order Drug Interaction Monograph	

Note: There is a web address in the clinical reminder order checks (CROC) that connects to the Stratification Tool for Opioid Risk Mitigation (STORM) decision support tool, <u>http://go.va.gov/ijob</u>. Due to the current functionality of CROCs, it is not possible for the user to click on the hyperlink directly within the order check text, they must copy and paste it into their web browser. If you would like, you can add this link to your CPRS toolbar or encourage your providers to save this website in their "favorites" to make it easier for them to access.

## **Install Details**

This update is being distributed as a web host file. The address for the host file is: http://vista.med.va.gov/reminders/UPDATE\_2\_0\_11.PRD

The following reminder content is included in this UPDATE:

#### **REMINDER DEFINITION**

VA-BENZODIAZEPINE (CN302) BUT NOT OPIOID (CN101) VA-OPIOID (CN101) BUT NOT BENZODIAZEPINE (CN302)

#### **REMINDER TERM**

VA-OPIOID DRUG CLASS (CN101) (TERM) VA-BENZODIAZEPINE DRUG CLASS (CN302) (TERM)

#### **REMINDER ORDER CHECK ITEMS GROUP**

VA-OPIOID DRUG CLASS (CN101) (GROUP) VA-BENZODIAZEPINE DRUG CLASS (CN302) (GROUP)

#### **REMINDER ORDER CHECK RULES**

VA-BENZODIAZEPINE DRUG CLASS (CN302) (RULE) VA-OPIOID DRUG CLASS (CN101) (RULE)

The file will be installed using Reminder Exchange, programmer access is not required.

Installation:

\_\_\_\_\_

This update can be loaded with users on the system. Installation will take less than five minutes.

## **Install Example**

In Reminder Exchange, use ACTION "LWH" to load the web host file and input URL <a href="http://vista.med.va.gov/reminders/UPDATE\_2\_0\_11.PRD">http://vista.med.va.gov/reminders/UPDATE\_2\_0\_11.PRD</a>

### **Post Install Instructions**

#### 1. Activate the Reminder Order Check Rules

The installation of CLINICAL REMINDER UPDATE\_2\_0\_11 will require the STATUS of the Reminder Order Check Rules "VA-BENZODIAZEPINE DRUG CLASS (CN302) (RULE)" and "VA-OPIOID DRUG CLASS (CN101) (RULE)" be changed to PROD. Shown below are the steps to make this change, <u>which should be done for both rules</u>.

The option represented here is Add/Edit Reminder Order Check Rule [PXRM ORDER CHECK RULE EDIT].

Select <u>Reminder Order Check Menu</u> Option: **RE** Add/Edit Reminder Order Check Rule Select Reminder Order Check Rule by: (N/R/T/Q): N// **N** ORDER CHECK RULE NAME Select Reminder Order Check Rule: VA-BENZODIAZEPINE DRUG CLASS (CN302) <u>RULE NAME</u>: VA-BENZODIAZEPINE DRUG CLASS (CN302) <u>DISPLAY NAME</u>: **Potential dangerous drug combination with a BENZODIAZEPINE** <u>STATUS</u>: **PROD** *^ change to PROD to activate Production Mode* 

<u>CLASS</u>: **NATIONAL** SPONSOR: REVIEW DATE:

I=INACTIVE, P=PRODUCTION, T=TESTING Save and Exit

Repeat for VA-OPIOID DRUG CLASS (CN101) (RULE) <u>RULE NAME</u>: VA-OPIOID DRUG CLASS (CN101) (RULE) <u>DISPLAY NAME</u>: Potential dangerous drug combination with an OPIOID <u>STATUS</u>: PROD ^ change to PROD to activate Production Mode

<u>CLASS</u>: **NATIONAL** SPONSOR: REVIEW DATE:

I=INACTIVE, P=PRODUCTION, T=TESTING Save and Exit

**NOTE**: the STATUS property is for a specific Clinical Reminder Order Check (CROC). This is separate from the setting of Enabled/Disabled for ALL CROCs which is shown below as 'Clinical Reminder Live' on the Order Checks Tab of the CPRS Options screen. Individual providers cannot enable or disable individual CROCs separately.

It is therefore recommended that these order checks are enabled for all users, and set to 'mandatory' by the Clinical Application Coordinator (CAC) using the option 'Set Order Checks to be Uneditable By Users [ORK EDITABLE BY USER]'. If there are users with the Clinical Reminder Live order check set to disabled when the setting is made mandatory/uneditable, the CAC can manually enable it for those users with option 'Enable/Disable an Order Check [ORK PROCESSING FLAG]'.
