

NURSING USER MANUAL

Version 4.0

April 1997
(Revised January 2000)

Department of Veterans Affairs
Technical Service
Clinical Applications Product Line

Preface

Nursing is a component of the Department of Veterans Affairs *VISTA* (Veterans Health Information Systems and Technology Architecture) program. It comprises software which is used to:

- 1) Plan and document nursing care provided to the veteran patient.
- 2) Support nursing administration by providing data/information for nursing organizational decision-making purposes.
- 3) Provide and summarize data for performance improvement.
- 4) Provide aggregate data/information for nursing research endeavors.
- 5) Support nurse educators by providing data/information for the tracking of mandatory programs and staff education.

The Nursing Focus Group and nursing application developers designed this manual to explain the functionality of the package to the nursing application coordinator(s), provide information to resolve any operational issues and elucidate the flexibility of the software package. This manual can also be used as reference to assist IRMS (Information Resource Management Service) staff in the technical support of the application.

Table of Contents

Section 1 Package Management

Introduction.....	1
Chapter 1 Implementation and Maintenance	1.1
Virgin Installation of software	1.1
Non-Virgin Installation of software.....	1.15
Site Configurable Files/Fields.....	1.15
Site Configurable Output	1.17
Resource Requirements	1.17
Technical Errors.....	1.18
Chapter 2 Maintenance of Administrative Site Files.....	2.1
Administrative Site File Functions	2.1
AMIS 1106 Acuity Edit.....	2.3
Privilege File Edit	2.6
Certification File, Edit	2.8
FTEE Service Budget (1106b) File, Edit.....	2.10
Load Grade/Step Codes	2.14
Nursing Location File, Edit.....	2.16
Print Existing Location File Entries.....	2.26
Service Position File, Edit.....	2.32
Tour of Duty File, Edit.....	2.36
Vacancy Reason File Edit.....	2.38
Site Parameter File.....	2.40
Clinical Background File, Edit	2.45
Product Line File Edit.....	2.47
Chapter 3 Maintenance of Clinical Site Files	3.1
Clinical Site File Functions.....	3.1
Standard Patient Plan of Care, Print	3.2
Patient Plan of Care, Site Configuration.....	3.19
Ward Activation Patient Update	3.32
Ward Deactivation Patient Update.....	3.34
Selected V/M Site File Functions	3.36
Enter/Edit Vitals Qualifiers	3.38
Change Default Qualifiers for Temp./Pulse	3.41
Display Vitals Category/Qualifier/Synonym Table	3.43
Configure I/O Files (ADP Coordinator Only)	3.46
Intake Type	3.48
Output Type	3.50
Output Subtype	3.52
Intake Items.....	3.54
IV Site.....	3.56
IV Solution.....	3.58
Shift Starting Hour and Other Parameters	3.60

IV Site Description	3.62
IV Catheter.....	3.64
IV DC'ed Reason.....	3.66
Chapter 4 Special Functions	4.1
Special Functions	4.1
Admit/Transfer Pt. (Nursing Pkg. Only)	4.3
Inactivate/Disch. Pt. (Nursing Pkg. Only)	4.5
Employee Activation/Separation Report	4.7
Manual Nursing Acuity/Separation Run.....	4.9
Unclassified AMIS 1106 Patients.....	4.11
Manhours Exception Print by Service	4.13
Unclassified Midnight Patients	4.15
Manhours Exception Print by Location	4.17
Position Control/Staff File Integrity Report	4.19
Chapter 5 Warnings and Messages	5.1
Classification Warning Message.....	5.1
Patient Not Admitted Due to Invalid MAS Ward.....	5.3
Patient Not Admitted With MAS.....	5.4
Patient Is Not Active In the Nursing System.....	5.5
Incomplete User/Person Data	5.6
Incomplete Nursing Data	5.7
Incomplete Service Position Data.....	5.8
Nursing Alerts.....	5.9
Chapter 6 IRMS Options	6.1
NURS Staff Experience Integrity Check/Fix.....	6.1
Classification File Purge	6.3
Chapter 7 Maintenance of Performance Improvement Site Files.....	7.1
QI Site Files	7.1
QI Summary Standards of Care/Practice File.....	7.2
QI Summary Frequency File.....	7.4
QI Summary Rationale File	7.6

Section 2 Administration

Chapter 1 Package Operation.....	1.1
Chapter 2 Staff Record.....	2.1
Staff Record Edit.....	2.1
Demographic Data	2.4
Personnel Data	2.9
Status and Position.....	2.11
License	2.20
Probationary Period/Promotion	2.22
Annual Review/NPSB	2.24
Professional Education.....	2.26
Professional Experience.....	2.28

National Certification.....	2.30
Military Status.....	2.32
Edit All Employee Data.....	2.35
Location Edit, Employee	2.36
Staff Record Report	2.38
Individual Staff Position/Location.....	2.44
Chapter 3 Administration Reports	3.1
Administrative Reports	3.1
Academic Degree Reports	3.5
Age Reports	3.18
Certification Reports.....	3.30
Gender Reports	3.39
Grade Reports	3.54
License Reports.....	3.70
Military Reports.....	3.76
NPSB Reports.....	3.90
Nursing Degree Reports.....	3.94
Proficiency Reports.....	3.107
Comb. Acad./Nurs. Degree Reports	3.110
Salary Reports.....	3.115
Salary Report For Entire Service	3.117
Individual Salary Report.....	3.119
Salary Report by Location/Svc. Category	3.121
Telephone Number Listings.....	3.124
Individual Phone Number	3.126
Phone (Home) Numbers by Location	3.128
Home Phone Number(s) For Entire Service	3.132
Chapter 4 Classification.....	4.1
Classification, Edit Patient.....	4.1
Classify Patients Individually	4.9
Classify Patients by Ward.....	4.11
Hemodialysis Patients, Classify/Count.....	4.14
Recovery Room Patients, Classify/Count.....	4.16
Unclassified Patients, Edit	4.18
Patient Care Data, Print.....	4.21
Classification Report.....	4.23
Current Unclassified Patient Print, by Location	4.25
Resource Management Reports	4.27
Current Unclassified Patient Print	4.29
Daily Patient Classification Summary By Ward	4.32
Individual Patient Classification Reports.....	4.35
Date/Time, Indiv. Classification Report By	4.37
Ward & Date/Time, Indiv. Classification Report By	4.39
Patient Category Totals-Midnight Acuity Reports	4.41

Chapter 5 AMIS.....	5.1
Manhours Edit, AMIS 1106a.....	5.1
Patient Category Totals-AMIS 1106 Reports.....	5.3
Manhours Print.....	5.8
FTEE Comparison (1106b) Report.....	5.13
Chapter 6 FTEE/Workload Reports.....	6.1
AMIS Workload Statistics Report.....	6.1
Workload Statistics Report (Current).....	6.7
FTEE Reports.....	6.11

Section 3 Clinical

Chapter 1 Patient/Ward Information.....	1.1
Location/Bed Section, Edit Nursing.....	1.1
Location of Individual Patient, Print.....	1.3
Ward Census, Print.....	1.5
Chapter 2 Patient Assignments.....	2.1
Patient Assignment Worksheet.....	2.1
Brief Assignment Worksheet.....	2.2
Complete Assignment Worksheet.....	2.4
Chapter 3 Patient Plan of Care.....	3.1
Patient Plan of Care, Edit.....	3.4
Evaluation/Target Date & Order Status Edit.....	3.24
Patient Plan of Care, Print.....	3.28
Patient Problems to be Evaluated.....	3.34
Chapter 4 Vitals/Measurements.....	4.1
Vitals/Measurements Data Entry Menu.....	4.1
Vitals/Measurement Data Entry.....	4.3
Edit a Vital/Measurement Entered in Error.....	4.24
Vitals/Measurements Results Reporting.....	4.28
Latest Vitals Display for a Patient.....	4.30
Latest Vitals by Location.....	4.32
Cumulative Vitals Report.....	4.34
Print Vitals Entered in Error for a Patient.....	4.38
V/M Graphic Reports.....	4.40

Introduction

Nursing is a component of the Department of Veterans Affairs *VISTA* program. It is comprised of multiple modules (i.e., Administration, Clinical, Education, Performance Improvement, and Research). The current software release has been approved by the Nursing Focus Group with the assistance of the Alpha/Beta test sites and the many colleagues who use the software on a daily basis.

Administration:

- 1) Personnel management information (demographic and professional data of nursing staff),
- 2) Resource management/analysis tracking for reports on budgeting DRGs, overtime usage, patient care hours, supply equipment projections, and staffing hours, and
- 3) Mandatory reports (i.e., AMIS 1106, AMIS 1106a, Annual Report).

Clinical:

- 1) Patient classification,
- 2) Patient assessment,
- 3) Nursing care plans which are system focused and contain both nursing problems and medical diagnoses,
- 4) Patient care assignments,
- 5) Clinical protocols/guidelines for care,
- 6) Patient education material,
- 7) Discharge planning, and
- 8) Other patient related medical record data.

Education:

- 1) Education reports (i.e., mandatory inservice attendance, continuing education attendance, authorized absence/funding analysis), and
- 2) Student affiliation information (i.e., scheduling of student clinical labs, affiliation agreements).

Performance Improvement:

- 1) QA problem tracking system,
- 2) Infection control trends,
- 3) Patient incident analysis,
- 4) Employee accident analysis,
- 5) Continuous care monitors (clinical data), and
- 6) Administrative monitors (e.g., safety equipment).

Research:

- 1) Resource listing of VA nurse researchers, and
- 2) Additional functionalities as defined by the Nursing Focus Group.

Prior to implementing the software, review appropriate sections of this manual for new applications and modifications to previous releases. Also, if the Nursing software is not on-line at your facility, the nursing ADP coordinator, and all nursing personnel responsible for supporting the package, should pay special attention to the chapter on Package Management in this manual.

Functional Description of Version 4.0:

The nursing software includes the following functionalities:

Administration:

- 1) Tracks staff information including: personal/demographic data, previous professional experience, work assignments, grade, licensure, certification, professional education, end of probationary period, and military reserve status.
- 2) Uses a Position Control file to monitor past, current, and future nursing positions, future vacancies, reason for vacancy, start/stop dates for the position, and the level of employee filling the position. When a registered nurse's assignment is changed, the professional experience in the staff record is automatically updated.
- 3) Generates management reports on employees including: academic and professional degrees, grade statistics, age trends, gender trends, license renewals, certification statistics, active reservist lists, LPN and RN NPSB tracking, and proficiency tracking.
- 4) Provides resource management reports on ward/service FTEE statistics as well as ward and bed section workload/variance reports. The option which prints current workload reports can generate data on both the current and next tours of duty. Future releases will contain turnover statistics and additional workload reports.
- 5) Accumulates daily statistics on the number of patients treated in the following bed sections: hemodialysis, drug/alcohol patients, recovery room and domiciliary.
- 6) Generates daily, monthly, quarterly, and yearly AMIS Reports: 1106b (FTEE Budgeted/Actual), 1106 (Patient Classification), and 1106a (Manhours).
- 7) Provides workload statistics based on AMIS data.
- 8) Provides a telephone list of employees by service or location.
- 9) Provides miscellaneous patient acuity reports.

Education:

- 1) Tracks employee continuing education data.

- 2) Prints an AA/Funding Requests Report which indicates money authorized for C.E. attendance by specified year.
- 3) Tracks mandatory inservice information for multiple years. Information on program attendance can be provided by last attendance date or for three full fiscal years. Deficiency reports are available for the current or past three fiscal years.

Clinical:

- 1) Contains a patient classification system which generates reports by bed section and ward.
- 2) Includes nationally developed standard nursing care plans for initiating patient care plan generation.
- 3) Allows nurses to generate a patient care plan based on patient problems, identified goals, and specified nursing interventions. The software accommodates evaluation and resolution dates for problems, identifies target and met dates for goals, and discontinuation dates for interventions/orders.
- 4) Produces two types of assignment worksheets for each patient (brief and complete). The brief worksheet does not display selected care plan information.
- 5) Contains an option for printing a ward census by room and provides information on current patient location.
- 6) Generates reports for unclassified patients and provides a function for classifying unclassified patients only.
- 7) Allows a staff nurse to update a patient's nursing ward location and/or nursing AMIS bed section to insure accurate patient classification entries.
- 8) Allows users to enter vital signs, height, and weight on patients. Cumulative reports by patient or ward can be generated as well as latest patient information. Graphic reports of patient vital signs, blood pressures, weights and pulse oximetry/respirations are also provided.
- 9) Allows users to generate Intake and Output reports, an End of Shift Report, and a Health Summary Report by patient or ward.

Performance Improvement:

- 1) Contains options for reviewing patient classification and tracking errors.
- 2) Allows nursing QA staff and ADP coordinators to revise erroneous AMIS data.
- 3) Tracks units with no manhours data.

Package Management:

- 1) Allows sites to modify data (e.g., service positions, salary, grade/step codes, mandatory inservices, certifications, nursing locations, tour of duty) in specified nursing files.
- 2) Accommodates additional site-specific standard care plans.
- 3) Provides special ADP Coordinator functions for executing nursing options which affect patient acuity, manhours, FTEE status, etc., when TaskMan is off-line.

- 4) Provides ADP Coordinator options for admitting/transferring/discharging patients within the Nursing system when the MAS System is off-line. This feature ensures that patient information will be updated and available to nursing providers. When the package is off-line due to the installation of a new version, the software will automatically update the patients in the Nursing system by admitting and discharging patients before the system is made available to the user.

For additional information refer to the Release Notes, Version 4.0.

Section 1 Package Management

Chapter 1 Implementation and Maintenance

Description:

The intent of this section is to outline a method for the nursing ADPAC to implement the application. It is important to read and fully understand this section before continuing.

Virgin Installation of Software:

The following steps should be followed when the Nursing software is installed in an environment where no previous installation of the Nursing application has taken place. If a previous version of the Nursing application has been installed, refer to the Non-Virgin Installation of Software instructions found later in this chapter.

Step 1: Setting up the software environment

The Information Resources Management Service staff must install the software using the installation notes in either a test environment or the production (VAH) directory. Data entered into the test environment CANNOT be transferred into the production environment.

Additional Information:

Nursing V. 4.0 requires that the following *VISTA* packages must be loaded in order to fully use the package:

- a. VA FileMan V. 21 or greater,
- b. Kernel V. 8.0 or greater,
- c. Kernel Toolkit V. 7.3 or greater,
- d. PIMS V. 5.3 or greater,
- e. PAID V. 4.0 or greater (optional),
- f. Dietetics V. 4.6 or greater (optional),
- g. Health Summary V. 2.7 or greater (optional),
- h. Intake and Output V. 4.0,
- i. Vitals/Measurements V. 4.0,
- j. Text Generator V. 3.0.

Recommendation:

A limited amount of data should be entered into the test directory so the users may become familiar with the application and to establish an acceptable training data base.

The following steps **MUST BE COMPLETED** before the Nursing software can become operational.

*****Steps 2 THRU 5 MUST BE COMPLETED IN EXACT ORDER*****

Step 2: Associating nursing units with MAS wards

A comparison listing of ALL nursing locations (units) and ALL MAS ward locations (i.e., MAS location contained in File #42, the Ward Location file) must be compiled. This information will be required by the nursing application coordinator when entering data in the NURS Location (#211.4) file (refer to the Nursing User Manual, Maintenance of Administrative Site Files chapter). Information on File #42 should be provided by either the PIMS application coordinator or the IRMS staff. The NURS Location file's data must account for all MAS ward names in File #42. The data in the NURS Location file establishes a cross-reference file which is accessed in all modules of the Nursing software.

Recommendation:

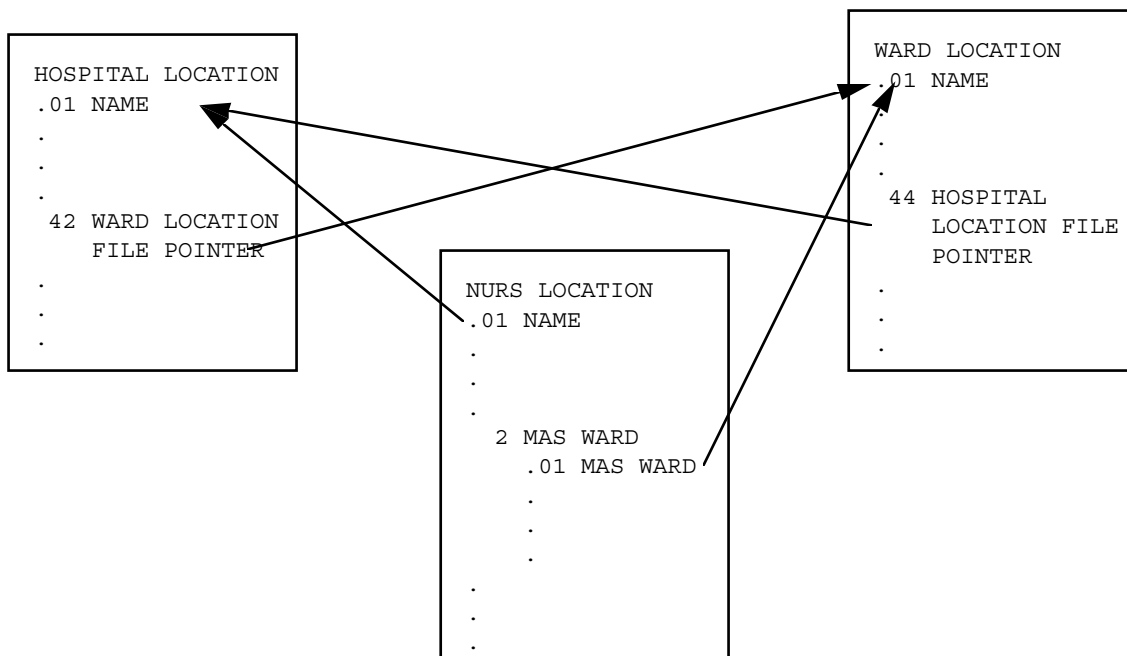

Create the following comparison table for all nursing units.

<u>Nursing Location</u>	<u>MAS Location</u>	<u>Explanation of Nursing and MAS Locations</u>
1E	1E	No discrepancy in nursing and MAS terminology.
1W	1W, 1NW, 1S	Nursing 1W is divided into multiple MAS locations.
ER		The ER is NOT a MAS ward location. It is a designated nursing assignment location only.
9S	9W	9W is considered a single MAS location but 9M is comprised of two (2) nursing locations.

Nursing Location	MAS Location	Explanation of Nursing and MAS Locations
MASONLY	HALL, ANNEX, MARS	<p>The MASONLY location is used for two (2) purposes:</p> <ol style="list-style-type: none"> 1) To associate all closed or inactive MAS wards with a nursing location. 2) To identify active MAS wards (with patients) where nursing has no patient care responsibility. <p>Note: All MAS wards in File #42 must be identified and associated with a nursing location in File #211.4. In both of the examples, the Patient Care Status field of the MASONLY unit should be "inactive" and the Ward Status field should be "active".</p>

Note: MASONLY is pronounced "M-A-S-ONLY".

Diagram: This schematic depicts the relationship between the NURS Location (211.4), the Hospital Location (#44) and the Ward Location (#42) files.

The NURS Location file points to entries in the Hospital Location file from its (.01) name field.

The entries in the Hospital Location file pointed to by the NURS Location file are not inserted by the PIMS software. They are added by the Nursing application, and have the characters NUR appended in front to identify them. Due to a special look up and output transform, the NUR characters do not appear to the user during VA FileMan look-ups on the NURS Location file. However, these characters will appear to the user on look-ups on the Hospital Location file. This pointer relationship has been built because of a decision made by the Data Base Integration Committee (DBIC) to reduce the number of free text location files.

The NURS Location file points to entries in the Ward Location file from the MAS Ward (#.01) subfield of the MAS Ward (#2) field. These entries are the normal Ward Location file entries. This pointer relationship is needed by the Nursing software to identify the appropriate nursing location of a patient when the patient is admitted through ADT (the admission, discharge, transfer module of PIMS).

The Hospital Location and Ward Location files point to each other via the Ward Location file pointer (#42) and Hospital Locations file pointer (#44) fields respectively. This pointer relationship was set up via a decision by the DBIC to relate these two files to each other.

Example: This example shows how this pointer relationship is used for a typical set of locations.

NURS LOCATION	HOSPITAL LOCATION	WARD LOCATION
3AS	NURS 3AS	3A
	3A	3S
	3S	

The nursing location of 3AS points to the hospital location NUR 3AS from the Name (#.01) field and the ward locations 3A and 3S from the MAS Ward (#2) field. The hospital location NUR 3AS does not point to the Ward Location file. The hospital location 3A points to the ward location 3A and vice versa. The hospital location 3S points to the ward location 3S and vice versa.

Step 3: Population of the NURS Parameters (#213.9) file.

This file is edited through the Site Parameter File option which is located in the Administrative Site File Functions Menu. Detailed information on this file is found in the chapter on Maintenance of Administrative Site Files in the Nursing User Manual. There are several specific issues that you need to address in the Parameter file before you enter data in the NURS Location file:

1. Define your facility as single vs. multi-divisional facility.

2. Identify that your facility has organized under a product line structure.
3. Enter the name of the CNO printer. The CNO printer is a device used to print specific tasked reports and should remain on-line at all times.
4. Enter a professional percentage value which will represent the default percentage of professional personnel assigned to a unit. This parameter is used for the calculation of workload required staffing when the professional percentage field is not defined for a specific NURS Location file entry.
5. Enter cutoff times for the day, evening, and night shift (preferably the end of each shift) which is used by the AMIS Acuity Batch Job as cutoff times for classification of patients for these shifts.

Additional IRMS related package management information is contained later in this chapter.

Step 4: Populate the Facility field of the NURS AMIS 1106B FTEE (#213.2) file.

Using the FTEE Service Budget (1106b) File, Edit option, update the Facility field of the NURS AMIS 1106B FTEE (#213.2) file by entering the names of the institutions (divisions) associated with your facility. The Administrative and Resource Management Reports use this file to display a list of institutions when a '?' is entered at the Facility prompt. At this time you do not have to enter the FTEE associated with each facility or institution.

Step 5: Add data to Product Line file through the Product Line File Edit option in the Administrative Site File Functions option. This file has been exported with one entry, Nursing, that may not be deleted by any user. The application coordinator must add additional entries to this file if management wants to assign staff and locations to product lines. Entries in this file may relate to true product lines (e.g., medicine, surgery, mental health, primary care), programs, or the traditional services (e.g., nursing, social work, pharmacy) to produce reports that are meaningful to the users.

Step 6: Population of the NURS Location file (#211.4)

This file is edited through the Nursing Location File, Edit option which is located in the Administrative Site File Functions Menu. The process for entering information into this file can be found in the Maintenance of Administrative Site Files chapter in the Nursing User Manual. When editing this file, consider the following:

1. Enter data into the NURS Location file from the list of nursing locations compiled in Step 2 above.

- a. If you are a multi-divisional facility, you must enter the name of the institution associated with the unit location. If you are a single facility, it is recommended that you enter the facility's name at the Institution prompt.
 - b. If management wants reports by product line, enter the product line associated with the unit. Remember that the product line prompt does not display unless you have entered 'yes' in the NURS Parameter file product line field.
 - c. The Patient Care Status field should be INACTIVE for all units until a decision is made to bring the Nursing software up (i.e., actively use the software) on an individual unit. Only then should the Patient Care Status field be changed to ACTIVE using the Ward Activation Patient Update option. Before activating the status of this field, please review the information on the Ward Activation Patient Update option in the Maintenance of Clinical Site Files chapter.
 - d. All units, regardless of patient care status, must be entered into the Nursing Location file.
2. When the NURS Location file is completed, enter the Ward Activation Patient Update option located in the Clinical Site File Functions menu. This option runs a background job which checks that all MAS wards have been: a) associated with a nursing locations(s), and b) cross-referenced. The software displays the message,

Checking to see if every MAS Ward has a corresponding NURSING unit,

and if no problem exists, the "Select UNIT:" prompt appears. The user may enter an up-arrow (^) here to exit the option until units are ready to be populated with patients (refer to Step 6 below). If this background job identifies non-associated MAS ward(s), it displays the ward name(s) and the user must identify a relationship with a nursing unit.

Step 7: Population of the NURS Service Position file (#211.3)

This file is edited through the Service Position File, Edit option which is located in the Administrative Site File Functions Menu. The process for entering information into this file can be found in the Maintenance of Administrative Site Files chapter in the Nursing User Manual. In setting up this file, the application coordinator should assign all none nursing employees to an appropriate product line and associate them with the service category of 'other'. Staff in traditional nursing roles, such as, registered nurse and nursing assistant, may be assigned to any product line but should be given the service category of registered nurse, licensed practical nurse and nursing assistant. Data in this file must be entered prior to entering names into the NURS Staff (#210) file.

Step 8: Population of the NURS Staff file (#210)

This file is edited through the Staff Record Edit option which is located in the Administration Records, Enter/Edit Menu. A detailed explanation for entering information into this file can be found in Section 2 of the Nursing User Manual. Before the process of entering nursing employee names into the NURS Staff (#210) file can begin, the names of all current employees must reside in the New Person (#200) file. There is a laygo parameter located in the NURS Site Parameter (#213.9) file (Nursing New Person File Access field) that can be turned on to permit the storing of new nursing staff names in File #200. It is suggested that if this feature is turned on, IRMS staff provide training to the nursing application coordinator on procedures for entering new names into File #200.

Step 9: Population of the NURS Patient file (#214)

1. Patients are admitted through the PIMS application, however, patients are not automatically admitted into the Nursing software until the following actions have been taken:
 - a. The editing of the NURS Location file (#211.4) has been completed (Step 3).
 - b. The Ward Activation Patient Update option has been run for a specific nursing location. This option kicks off a routine which automatically assigns patients to appropriate nursing units in the Nursing software. Once a unit has been activated, all subsequent hospital admissions and transfers to the activated unit(s) are updated in the nursing software.

Note: The Patient Care Status field in the NURS Location file is changed to ACTIVE by the action of the option's routine. The process of patient movement on that ward continues until the unit is inactivated or until 6.2. (below) occurs.

2. When either the nursing software or the PIMS software is down (unavailable to the user), patients are not triggered into the Nursing software. In these circumstances, a back up option, Admit/Transfer Patient (Nursing Package Only), has been provided. This option should be available to the nursing ADP coordinator and other key nursing staff on all tours of duty.

When the PIMS software goes back on-line, the nursing application coordinator should run the Ward Deactivation Patient Update and the Ward Activation Patient Update options (in that order) to validate the patient census on all nursing units.

3. When additional wards are added to the nursing application repeat the ward activation option. Multiple units may be activated at once.

4. In Multiple CPUs:
 - a. The routines NURSCPL, NURSMSG and NURSAWCK used in triggering the patient into the Nursing software, must reside in all CPUs using the PIMS software.
 - b. The UCI translation table (in each CPU) must contain the NUR* and GMR* Globals.
5. When patients are initially admitted to a newly activated unit the following steps should be taken:
 - a. A MAS bed census be printed.
 - b. A nursing bed census be printed through the Ward Census Print (NURSPP-LOCWRD) option.
 - c. A comparison be made of patients residing on the ward from both reports. If discrepancies are present, correct them using the Admit/Transfer Patient (Nursing Package Only) option.

Step 10: Populating other site configurable files

Review the following files. The edit/modify options associated with these files are located in the Administrative Site File Functions, Clinical Site File Functions, and QI Site Files menus of the Nursing application. The process and purpose for entering and editing data in these files is described later in this Package Management section. The specific edit option is listed with the file.

Administrative Site Files:

1. NURS Pay Scale (#211.1) file
Edit using the Load Grade/Step Codes option.
2. NURS Clinical Background (#211.5) file
Edit using the Clinical Background File, Edit option.
3. NURS Tour of Duty (#211.6) file
Edit using the Tour of Duty File, Edit option.
4. NURS AMIS 1106b FTEE (#213.2) file
Edit using the FTEE Service Budget (1106b) File, Edit option.
5. NURS Privilege (#212.6) file
Edit using the Privilege File Edit option.

6. NURS Vacancy/Transferred Reasons (#211.9) file
Edit using the Vacancy Reason File Edit option.
7. NURS Certification (#212.2) file
Edit using the Certification File, Edit option.

Clinical Site File Functions:

- ¹8. GMRV Vital Category (120.53) file
Display entries using the Display Vitals Category/Qualifier/Synonym Table option.
9. GMRV Vital Qualifier (#120.52) file
Edit using the Enter/Edit Vitals Qualifiers option.
10. GMRV Intake Items (#126.8) file
Edit using the Intake Items option.
11. GMRV Input Type (#126.56) file
Edit using the Intake Type option.
12. GMRV IV Catheter (#126.74) file
Edit using the IV Catheter option.
13. GMRV IV DC'ed Reason (#126.76) file
Edit using the IV DC'ed Reason option.
14. GMRV IV Site (#126.7) file
Edit using the IV Site option.
15. GMRV IV Site Description (#126.72) file
Edit using the IV Site Description option.
16. GMRV NUR IV Solution (#126.9) file
Edit using the IV Solution option.
17. GMRV Output Subtype (#126.6) file
Edit using the Output Subtype option.
18. GMRV Output Type (126.58) file
Edit using the Output Type option.
19. GMRV NUR Shift/Other (126.95) file
Edit using the Shift Starting Hour and Other Parameters option.

¹ Patch NUR*4*4 August 1997

20. Aggregate Term (#124.2) file
Edit using the Patient Plan of Care, Site Configuration option.

QI Site Files:

21. NURQ Standard of Care/Practice (#151) file
Edit using the QI Summary Standards of Care/Practice File option.
22. NURQ Frequency (#154) file
Edit using the QI Summary Frequency File option.
23. NURQ Rationale (#153) file
Edit using the QI Summary Rationale File option.

Step 11: Tasking required background jobs

Notify the Site Manager to QUEUE the following jobs via TaskMan:

1. The NURAAM-ACU (Nursing Acuity/Separation-Activation Run) option is queued to run daily after midnight as a background job requiring no device selection.

This option (NURAAM-ACU) must be queued to run after midnight, daily. This job totals acuity data for each unit for the night, day, and evening shifts and stores the data in the NURS 1106 Manhours (#213.4) file. This job also activates/ separates employees to/from active status based on the vacancy date in the NURS Position Control (#211.8) file. When this option fails to run to completion, an alert is sent to the NURS-ADP mail group and the option must be run manually from the Special Functions menu. Patient classification is no longer disabled when this option fails to run to completion. Night shift acuity totals are based on patient classifications entered between 00:01 and the cutoff time of the night shift as indicated in the NURS Parameter (#213.9) file. If no classifications are entered on the night shift, the latest classification for the patient's unit on the job run date is used. If there are no classifications on the patient's current unit, no acuity is counted for the night shift. Day shift acuity is based on classifications entered between 00:01 and 15:00 (3:00pm). If a patient is discharged/transferred between 14:45 and 15:00 (2:45 - 3:00pm) and has a current classification for the run date, the acuity is credited to the unit where the patient resided prior to the discharge or transfer. The evening shift acuity totals are based on patients in the hospital at midnight who have been classified any time during the day. When run manually, this job checks the last time it ran to completion and runs for all days between the last time it ran (noted in File #213.9) and the day before the current day. The data generated by this job is used for the following reports:

- AMIS workload statistics and summary reports
- patient category total reports (AMIS and midnight)

- separation/activation report
- unclassified patients report (AMIS and midnight)
- current unclassified patient reports

Data for the report, Workload Statistics Report (Current), is not dependent on the NURAAM-ACU option.

Note: When this job is run and there are MAS ward locations that do not have a matching nursing location, the user will get a mail message. The sender of the message will be the name of the person who queued the job to run.

2. The NURAMN-MANCK (Nursing Batch Job Status Check) option is queued to run daily at 06:00 hours as a background job requiring no device selection. If this option finds that the Nursing Acuity/Separation-Activation Run (NURAAM-ACU) did not run to completion, an alert is sent to the appropriate personnel in the NURS-ADP mail group. It is then necessary to run the Manual Nursing Acuity/Separation Run under the Special Functions menu.

Step 12: Tasking optional background jobs

The following optional reports may be queued (TO THE CNO PRINTER) at the discretion of the Nursing ADP Coordinator:

1. The NURAAM-UNCBAT (Batch Run of Unclassified AMIS 1106 Patients) option prints the unclassified AMIS 1106 patient list. To run this option manually, use the Unclassified AMIS 1106 Patients option under the Special Functions menu.
2. The NURAAM-MD-UNCBAT (Batch Run of Unclassified Midnight Patients) option prints the unclassified midnight patient list. To run this option manually, use the Unclassified Midnight Patients option under the Special Functions menu.
3. The NURAED-BATSEP-QUEUE (TaskManager Activation/Separation Report option prints daily position control changes on employees. The data for the reports (unclassified AMIS 1106 patients, unclassified midnight patient and position control changes) are generated by the Nursing Acuity/Separation-Activation Run (NURAAM-ACU) option. The NURAED-BATSEP-QUEUE option should be queued to run approximately two (2) hours after the NURAAM-ACU option is scheduled to ensure availability of the required data. To run this option manually, use the Employee Activation/Separation Report option under the Special Functions menu.

4. The NURAPR-RES-CURWKL-QUEUE (TaskManager Workload Statistic Report (Current) option prints current workload statistics information. To run this option manually, use the Workload Statistics Report (Current) option under the Resource Management Reports menu.
5. Add appropriate members to the NURS-ADP mail group. When setting up this mail group make sure the TYPE field is marked PUBLIC. The members of the group are notified when:
 - a. The alert, NURS-CLASSIFICATION, is forwarded to the mail group NURS-ADP if the Nursing Acuity/Separation-Activation Run did not run or aborted prior to completion.
 - b. The alert NURS SEPARATION/ACTIVATION is forwarded to the mail group NURS-ADP if the Nursing Acuity/Separation-Activation Run did not run or aborted prior to completion. The alerts are sent when appropriate by the option, NURAMN-MANCK.

Step 13: Printer issues

¹Users may print graphic reports on a dot matrix printer, but plotted data is not connected by lines. Linear graphic reports can be printed using the Kyocera F-800A laser printers; HP LaserJet III, LaserJet 4, LaserJet 5; and HP compatible printers. When using a programmable graphic laser printer the setups need to be checked, to insure the correct format on the printed page.

The following special printer setup is for Kyocera type printers:

- a. Ensure the existence of a Kyocera entry in the Terminal Type file. This device compresses print and has a margin width of 132 characters. This entry may be exported by Kernel, or you may have to set up your own entry.
 - 1) The Name (#.01) field should begin with the characters P-KYOCERA e.g., P-KYOCERA-P16. This is important as the software will not recognize the device as a Kyocera printer if this Terminal Type entry is not set up properly.
 - 2) The Right Margin (#1) field must be 132.
- b. Create a Device file entry for the Kyocera printer.
 - 1) The Name (#.01) field should contain the word KYOCERA. This isn't required, but will make selection of this device by users easier.

¹ Patch NUR*4*4 August 1997

- 2) Sub-Type (#3) field should point to a Terminal Type entry that fits the characteristics defined above in (a-1).
 - 3) Margin Width (#9) field should be 132.
- c. In the Kyocera printer, PRESCRIBE Macro Buffer Size (H0)=99.
To reprogram your printer,
- 1) Type: !R! RES; FRPO H0, 99; EXIT; on your terminal/input device.
 - 2) Print this code on your Kyocera printer (using appropriate print commands). This may be done through a mail message.
 - 3) Turn off the printer for a few seconds, then place the printer back on line (by turning it on). The printer will then be ready to print the linear graphic reports (e.g., SF511).

The following special printer setup is for HP LASERJET III, HP LASERJET 4 and HP LASERJET 5 printers:

- a. Ensure the existence of a HP LASERJET entry in the Terminal Type file. This device compresses print and has a margin width of 132 characters. This entry may be exported by Kernel, or you may have to set up your own entry.
 - 1) The Name (#.01) field should begin with the characters P-HPLASER e.g., P-HPLASER-L180. This is important as the Vitals/Measurements software will not recognize the device as an HP LASERJET printer if this Terminal Type entry is not set up properly.
 - 2) The Right Margin (#1) field must be 132.
- b. Create a Device file entry for the HP LASERJET printer.
 - 1) The Name (#.01) field should contain the word HPLASER. This isn't required, but will make selection of this device by users easier.
 - 2) Sub-Type (#3) field should point to a Terminal Type entry that fits the characteristics defined above in (b-1).
 - 3) Margin Width (#9) field should be 132.
 - 4) Suppress Form Feed at Close (#11.2) field should be set to YES.

Note: If the printer is not set up correctly, it will effect the printed output. KYOCERA and HPLASER are key words in the routine to identify which printer is being used, and IRMS must edit the Device file so the word KYOCERA or HPLASER appears in the name of the device (e.g., KYOCERA-PORT).

The IRMS staff should assign the CNO Printer in every CPU using the Nursing application. This printer is used to alert nursing management of unusual actions (e.g., NURSPATIENT3, TWO has not been admitted into the NURSING System by PIMS because the MAS ward does not have a corresponding NURSING LOCATION). The CNO Printer should be on-line and accessible at all times.

Step 14: Package Management/Special Security Measures

1. The nursing ADP coordinator(s) must be given the VA FileMan security code of "n". This access allows the application coordinator to view all nursing employee information.
2. Assign an appropriate PAID Education Tracking key (PRSE SUP and PRSE TRAIN) to nursing personnel. The PRSE SUP key should be given to any nursing educator/instructor. The PRSE TRAIN key should be assigned to nursing staff (exclusive of management staff) who have nursing unit staff education responsibilities. **Note:** Only assign one key to each nursing employee.
3. No additional security measures are required other than those implemented through Menu Manager and the package routines.
4. No additional licenses are necessary to run the software.
5. Confidentiality of staff and patient data and the monitoring of this confidentiality is no different than with any other paper reference.

Step 15: Operating in multiple CPUs

When operating the PIMS and nursing application in multiple CPUs refer to steps 6.4, 8, 9 and 10 above.

Step 16: Assigning menus

<u>Menu</u>	<u>Menu Text</u>	<u>Staff Position</u>
NURS-SYS-MGR	Nursing System Manager's Menu	Nursing ADP Coordinator
NURS-ADM	Administrator's Menu	Nursing Administration Staff
NURS-ED	Nursing Educator's Menu	Nursing Education Staff
NURS-QA	QA Coordinator's Menu	Q.A. Coordinator
NURS-HN	Head Nurse's Menu	All Head Nurses
NURS-RN	Staff Nurse Menu	All Staff Nurses

Non-Virgin Installation of software:

Follow steps 1 through 16 under Virgin Installation of software (refer to page 1 of this chapter) to complete the installation of Version 4.0.

Site Configurable Files/Fields

1. The NURS Parameters (#213.9) file.

The data elements in the NURS Parameters file can be modified by the site. Below is a list of these data elements.

Package Management

<u>Field</u>	<u>Name</u>	<u>Data contained</u>	<u>Purpose</u>
2	CNO PRINTER	name of the printer	Device receiving all exception reports for the Nursing package. This printer should remain on-line at all times.
3	NURSING OFFLINE/ ONLINE	switch stating whether Nursing System is: 1: OFF-LINE 0: ON-LINE	This field can be used to bring the Nursing system off-line if needed.
4	NURSING NEW PERSON FILE ACCESS	switch stating whether Nursing System has: 0: NO ACCESS TO THE NEW PERSON FILE 1: ACCESS TO THE NEW PERSON FILE	This field determines the Nursing system's access to the NEW PERSON File (#200).
7.1	DAY SHIFT ACUITY TIME	military time of 4 characters in length	Time at which the acuity totals are calculated for the day shift for the Workload Statistics Report (Current).
7.2	EVENING SHIFT ACUITY TIME	military time of 4 characters in length.	Time at which the acuity totals are calculated for the evening shift for the Workload Statistics Report (Current).
7.3	NIGHT SHIFT ACUITY TIME	military time of 4 characters in length.	Time at which the acuity totals are calculated for the night shift for the Workload Statistics Report (Current).
8	PROFESSIONAL PERCENTAGE	percentage from 1 to 100 with no decimal place	The percentage of professionals to non-professionals for a given nursing location. This value will be used if the corresponding field in the NURS Location File (#211.4) has no data.
11	PRODUCT LINE	Y=Yes N=No	Indicates whether or not FTEE data in the NURS Position Control file (#211.8) is associated with product lines besides Nursing.
12	MULTI-DIVISIONAL	Y=Yes N=No	Indicates whether or not the facility is multi-divisional.

2. Prime Document Enter/Edit.

The site may need to modify the content of the Nursing Care Plan (i.e., Patient Plan of Care) sent out with the Nursing package. To do this, the site would have to use the Patient Plan of Care, Site Configuration (NURCFE-CARE) option. The site will be able to make local modifications to the content of the prime document without having to worry about a subsequent release of that application overwriting them.

Site Configurable Output

There are no site configurable sort or print templates in Version 4.0 of the Nursing package. The sort and print templates in the package are not subject to modification. The nursing application coordinator has been given certain FileMan options, from which site specific outputs could be generated using Option 2 (PRINT FILE ENTRIES). Any additional templates created should be named with the following convention:

NURS-Site Number (3 digit code assigned to each site)-Choose (P for print templates, S for sort templates)-Template name

ex.	NURS-578-P-MANDATORY INSERVICE	(print template)
	NURS-578-S-STAFF SORT	(sort template)

Resource Requirements

The minimal hardware requirements for the Nursing software are two CRTs and one printer per nursing location. In addition to this, the following statistics regarding the disk storage requirements of the Nursing software were compiled by the Alpha/Beta test sites.

<u>Globals</u>	<u>Type of Data</u>	<u>Size</u>
DDs		340 blocks
NURSA	AMIS data classification	3-4 blocks/nursing location
NURC	Care plan data	2-12 blocks/patient
NURQ	QI Summary	1-18 blocks/patient
NURSF	Staff data	.86 blocks/staff
NURSF(213.1	Nursing pointer files	block size is dependent upon class of hospital: Class I - 296 Class II - 256 Class III - 111 Class V - 98
GMR	Patient data for the Vitals/Measurements, and Intake and Output Modules	50-75 blocks/patient
GMRD	Static data for the Vitals/Measurements, and Intake and Output Modules	1200-1400 blocks depending on the global efficiency
Routines		approx. 800k

Technical Errors

1. ADT Functions of MAS System abort with <NOSYS> error.
 - a. When the CPU containing the Nursing system is down, the MAS system aborts with a <NOSYS> error. To correct this problem:
 - 1) Take the Nursing system off-line using the Nursing Offline/Online Switch in the NURS Parameters (#213.9) file.

- 2) After the CPU is brought up again the Nursing system should be placed on-line, and all patient movements in MAS should be put into the Nursing system. The best way of updating the patient movements is to run the Ward Deactivation Patient Update (NURSPT-WRDINA) option followed by the Ward Activation Patient Update (NURSPT-WRDACT) option after placing the Nursing system on-line.
2. User gets a warning message that the Nursing Acuity/Separation-Activation Run (NURAAM-ACU) option has not run to completion.
 - a. Four fields in the NURS Parameters file (#213.9) exist to help in debugging and recovery of errors encountered by this task (see Site Configurable Files/Fields).
 - 1) Date AMIS Job Last Run Field (#6.1) - The date in this field is the date the Nursing Acuity/Separation-Activation Run (NURAAM-ACU) option last ran normally to completion.
 - 2) AMIS Job Completion Field (#6.4) - This is a set of codes that denotes whether the last running of the NURAAM-ACU option ran to completion. One denotes the job finished normally, and zero denotes that the job terminated abnormally.
 - 3) AMIS Ward Last Processed Field (#6.5) - This field contains an internal entry number in the NURS Location file (#211.4). This is the location that was last processed by the NURAAM-ACU option.
 - 4) AMIS Patient Last Processed Field (#6.6) - This is an internal entry number in the Patient file (#2). This is the patient that was last processed by the NURAAM-ACU option.
 - b. The first thing that should be attempted is to run the Manual Nursing Acuity/Separation Run (NURAAM-ACUMAN) option. The fields referenced above, will cause the NURAAM-ACUMAN option to begin processing from where the NURAAM-ACU option left off.
 - c. If while running the NURAAM-ACUMAN option an error occurs, the Site Manager should check the following global node:

\wedge DIC(213.9,1,"DATE")=A \wedge B \wedge 0 \wedge 0 \wedge C \wedge 0 \wedge 0 \wedge D \wedge E \wedge 0 \wedge 0 \wedge F

where:

A is the data in field 6.1 and should be equal to a FileMan date for today's date.

B is the data in field 6.4 and should be equal to the number 1.

C is the data in field 6.8 and should be equal to the number 1.

D is the data in field 6.92 and should be equal to the number 1.

E is the data in field 6.93 and should be equal to the number 1.

F is the data in field 56. If there is a value in this field it means the acuity job is currently running or possibly errored out before completion.

For example:

```
^DIC(213.9,1,"DATE") = 2970220^1^0^0^^1^0^0^1^1^0^0^
```

The problem probably lies in bad data or cross-references in the NURS Patient file (#214) or NURS Classification file (#214.6) and should be repaired on an individual basis.

3. Patients are not being automatically admitted to, or discharged in the Nursing package.
 - a. Check the ANURS cross-reference on field .1 of File 2. If it is not correctly defined, delete the erroneous data and correctly define the cross-reference using the following procedure in programmers mode:

```
>D KILLXREF^NURSCUTL
>D SETXREF^NURSCUTL
```

The xref should appear as follows:

```
^DD(2,.1,1,IEN,0) = 2^ANURS^MUMPS
^DD(2,.1,1,IEN,1) = S %X=X,X="NURSCPL" X ^%ZOSF("TEST") S   X=%X
  D:$T EN1^NURSCPL
^DD(2,.1,1,IEN,2) = S %X=X,X="NURSCPL" X ^%ZOSF("TEST") S   X=%X
  D:$T EN2^NURSCPL
```

Chapter 2 Maintenance of Administrative Site Files

NURSFL-MENU

Administrative Site File Functions

Description:

This menu is assigned to the nursing ADP coordinator. The menu contains options which edit site file information used primarily in the administration module. These site files contain information which is defined by individual medical centers.

Additional Information:

Information stored through the Nursing Location File, Edit and the Site Parameter File options are used in the clinical, education, and performance improvement modules.

Recommendations:

1. Prior to entering data into these files, the user needs to:
 - a. Identify the data which will populate the file.
 - b. Identify who will have the capability to edit the data.
2. The nursing ADPAC should limit the number of users having access to these options.

Menu Display:

Select Nursing System Manager's Menu Option: 5 Nursing Features (all options)

- | | |
|----|--|
| 1 | Administration Records, Enter/Edit ... |
| 2 | Administration Records, Print ... |
| 3 | Administrative Site File Functions ... |
| 4 | Nursing Education Reports, Print ... |
| 5 | Patient Care Data, Enter/Edit ... |
| 6 | Patient Care Data, Print ... |
| 7 | Clinical Site File Functions ... |
| 8 | QI Data, Enter/Edit ... |
| 9 | Quality Performance Reports ... |
| 10 | QI Site Files ... |
| 11 | Special Functions ... |

Maintenance of Administrative Site Files

Select Nursing Features (all options) Option: **3** Administrative Site File Functions

- 1 AMIS 1106 Acuity Edit
- 2 Privilege File Edit
- 3 Certification File, Edit
- 4 FTEE Service Budget (1106b) File, Edit
- 5 Load Grade/Step Codes
- 6 Nursing Location File, Edit
- 7 Print Existing Location File Entries
- 8 Service Position File, Edit
- 9 Tour of Duty File, Edit
- 10 Vacancy Reason File Edit
- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Menu Access:

The Administrative Site File Functions option is accessed through the Nursing Features (all options) menu.

NURAAM-ACUED**AMIS 1106 Acuity Edit****Description:**

This option permits editing of acuity totals stored in the NURS AMIS 1106 Manhours (#213.4) file for the Night, Day, and Evening Shifts. Editing of acuity may be required when the system is off-line, for omissions, etc.

Additional Information:

Data in NURS AMIS 1106 Manhours (#213.4) file is used to generate the patient category totals for the quarterly AMIS 1106 and the AMIS workload reports. When classification information is entered through this option, the required FTEE in the Workload Statistics Reports is automatically updated. The same formula is used whether it is original or edited data. The Batch Run of Unclassified AMIS 1106 Patients (NURAAM-UNCBAT) option is a report (maybe queued) which identifies patients who were not classified for the previous day. Only totals for bed sections and categories may be entered for a given location. Individual patients may not be classified retrospectively. The AMIS 1106 Acuity Edit option may be given to nurse managers to maintain unit specific acuity data. The NURS AMIS 1106 Manhours (#213.4) file points to the New Person (#200) file and the NUR AMIS Ward (#213.3) file.

Restrictions:

Classification totals can be edited for only the last 120 days. Data may only be entered into category levels specific to that bed section.

Menu Display:

Select Nursing Features (all options) Option: **3** Administrative Site File Functions

- 1 AMIS 1106 Acuity Edit
- 2 Privilege File Edit
- 3 Certification File, Edit
- 4 FTEE Service Budget (1106b) File, Edit
- 5 Load Grade/Step Codes
- 6 Nursing Location File, Edit
- 7 Print Existing Location File Entries
- 8 Service Position File, Edit
- 9 Tour of Duty File, Edit
- 10 Vacancy Reason File Edit

Maintenance of Administrative Site Files

- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Screen Prints:

Select Administrative Site File Functions Option: **1** AMIS 1106 Acuity Edit

Select DATE that patient was classified: **8/14/86** (AUG 14,1986)

Enter the classification date when the acuity was either entered in error or omitted.

Select Shifts(s) (Enter [N]ight [D]ay [E]vening or [A]ll Shifts): **A**

Answer with appropriate shifts.

Select UNIT that needs correction: **6W**

Enter the ward/unit name where the acuity needs correcting or new data should be entered.

Select NURSING BED SECTION that needs correction: SURGICAL// **<RET>**

Enter the name of the nursing AMIS bed section associated with the acuity. The following is a list of choices:

- ALCOHOL AND DRUG TREATMENT
- DOMICILIARY
- HEMODIALYSIS
- INTENSIVE CARE
- INTERMEDIATE CARE
- MEDICAL (EXCLUDE SCI)
- MEDICAL (SCI)
- NURSING HOME CARE UNIT
- PSYCHIATRIC
- RECOVERY ROOM
- SURGICAL

After the date, ward, shift(s) and Amis bed section is entered, four possible scenarios can result:

Example 1: The software looks for existing data and then displays the (totaled) information by category. The appropriate categories for the bed section display.

CATEGORY 1: 2// **<RET>** Type a whole number between 0 and 99999
CATEGORY 2: 0// **1**
CATEGORY 3: 15// **<RET>**
CATEGORY 4: 1// **2**

Example 2: If no data has been entered for a nursing unit with an AMIS bed section identified in the NURS Location file, the software displays prompts for the appropriate categories.

```
CATEGORY 1: 0// 3   Type a whole number between 0 and 99999
CATEGORY 2: 0// 1
CATEGORY 3: 0// 15
CATEGORY 4: 0// 2
```

Example 3: When classification data must be entered on a date for a nursing unit with an AMIS bed section which is not identified (with that unit) in the NURS Location file, the software will display:

```
...Editing (name of shift) for (name of ward)...
THIS COMBINATION YOU HAVE SELECTED DOES NOT EXIST,
WOULD YOU LIKE TO ADD THIS AS NEW DATA? Yes// <RET>
```

The appropriate categories for the bed section displays.

```
Category 1: 0// <RET>
Category 2: 0// 4
.
.
```

Example 4: When the NURAAM-ACU (Nursing Acuity/Separation Run) option does not run because TaskMan is down, the user will also see the display,

```
THIS COMBINATION YOU HAVE SELECTED DOES NOT EXIST,
WOULD YOU LIKE TO ADD THIS AS NEW DATA? Yes//
```

for all nursing units. You will not find any data for units which classified patients on the previous day. If TaskMan is down, you will then have to manually run the above option by selecting the Manual Nursing Acuity/Separation Run (NURAAM-ACUMAN) option found in the Special Functions (NURSSP-MENU) menu.

After you have finished entering omitted acuity information, you can exit this option by entering return at the following prompts.

```
Select UNIT that needs correction: <RET>
Select DATE that patient was classified: <RET>
```

Menu Access:

The AMIS 1106 Acuity Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NURSFL-PRIV

Privilege File Edit

Description:

This option allows the user to enter or edit the names of clinical privileges in the NURS Privilege (#212.6) file. This file is pointed to by the NURS Staff (#210) file.

To add or edit privileges for an individual staff member refer to the Status and Position (NURAED-STF-STAT/POS) option under the Staff Record, Edit option.

Additional Information:

Each site may set up a list of privileges to be used. A date granted is entered with an individual's staff record.

Menu Display:

Select Nursing Features (all options) Option: **3** Administrative Site File Functions

- 1 AMIS 1106 Acuity Edit
- 2 Privilege File Edit
- 3 Certification File, Edit
- 4 FTEE Service Budget (1106b) File, Edit
- 5 Load Grade/Step Codes
- 6 Nursing Location File, Edit
- 7 Print Existing Location File Entries
- 8 Service Position File, Edit
- 9 Tour of Duty File, Edit
- 10 Vacancy Reason File Edit
- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Screen Prints:

Select Administrative Site File Functions Option: **2** Privilege File Edit

Enter Privilege: **Requests consultation/referrals**

Are you adding 'Requests consultation/referrals' as
a new NURS PRIVILEGE (the 1ST)? No// **Y** (YES)

Enter a name of a privilege, a number associated with a privilege, or enter the name of a new privilege. Answer must be 3-50 characters in length.

Name: Requests consultation/referrals Replace <RET>

Enter Privilege:<RET>

You may enter another privilege.

Menu Access:

The Privilege File Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NUR AFL-CERT

Certification File, Edit

Description:

This option permits a service to enter and modify the NURS Certification (#212.2) file. A basic list of certifications is included in the software but as new certifications are recognized, that information may be added to this file. Certifications other than nursing selected certifications may be added to this file.

Additional Information:

For information on entering certifications into the employee records, refer to National Certification (NURAED-STF-CERT) under the Staff Record, Edit option. Certification information is printed on the Staff Record Report (NURAPR-STF) and the Certification Reports (NURAPR-CERTF). The NURS Staff (#210) file points to the NURS Certification (#212.2) file.

Menu Display:

Select Nursing Features (all options) Option: **3** Administrative Site File Functions

- 1 AMIS 1106 Acuity Edit
- 2 Privilege File Edit
- 3 Certification File, Edit
- 4 FTEE Service Budget (1106b) File, Edit
- 5 Load Grade/Step Codes
- 6 Nursing Location File, Edit
- 7 Print Existing Location File Entries
- 8 Service Position File, Edit
- 9 Tour of Duty File, Edit
- 10 Vacancy Reason File Edit
- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Screen Prints:

Select Administrative Site File Functions Option: **3** Certification File, Edit

Select Type of Certification: **RN,CNAA**

Are you adding 'RN,CNAA' as a new NURS CERTIFICATION (the 13TH)? No// **Y** (Yes)

An example of a listing of certifications exported in the file is displayed below.

1	RNC	ADULT NURSE PRACTITIONER	AMERICAN NURSES ASSOCIATION
2	RN,CS	C.S. IN MED/SURG NURSING	AMERICAN NURSES ASSOCIATION
3	RN,CS	C.S. IN ADULT PSYCH.& MENTAL HEALTH NSG.	AMERICAN NURSES ASSOCIATION
4	RNC	COMMUNITY HEALTH NURSE	AMERICAN NURSES ASSOCIATION
5	RNC	GERONTOLOGICAL NURSE	AMERICAN NURSES ASSOCIATION
6	RNC	GERONTOLOGICAL NURSE PRACT.	AMERICAN NURSES ASSOCIATION
7	RNC	MEDICAL-SURGICAL NURSE	AMERICAN NURSES ASSOCIATION
8	RNC	PSYCH. AND MENTAL HEALTH NURSE	AMERICAN NURSES ASSOCIATION
9	RN,CNA	NURSING ADMINISTRATION	AMERICAN NURSES ASSOCIATION
10	CRRN	CERTIFIED REHABILITATION R.N.	ASSOCIATION OF REHABILITATION NURSES
11	CIC	CERTIFIED INF. CONTROL PRACT.	ASSOCIATION OF PRACTITIONERS IN INFECTION CONTROL
12	CCRN	CRITICAL CARE NURSE	AMERICAN ASSOCIATION OF CRITICAL CARE NURSES ETC.

Additional certification names can be entered into the file. Names must be 2-8 characters in length. Initials (abbreviation) identify the type of certification.

ABBREVIATION: RN,CNAA// <RET>

You may edit the information at this prompt.

NAME OF CERTIFICATION: **NURSING ADMINISTRATION ADV.**

Enter the full name or type of certification. This must be 3-50 characters in length.

NAME OF CERTIFYING AGENCY: **AMERICAN NURSES ASSOCIATION**

This is the name of national organization granting certification and it is 1-50 characters in length.

ABBREVIATED NAME OF AGENCY: **ANA**

Enter the abbreviated name or initials of the certifying organization. The entry is 2-8 characters in length.

Select Type of Certification: <RET>

You may enter another type of certification.

Menu Access:

The Certification File, Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NUR AFL-BFU

FTEE Service Budget (1106b) File, Edit

Description:

This option permits a user to enter data on budgeted/ceiling FTEE for each of the twenty AMIS 1106b categories. FTEE data is stored by institution or division. The data in this file pertains to total Nursing FTEE and is not affected by medical center product lines.

Additional Information:

¹The facility and FTEE information in this file is used to print the AMIS 1106b (NURAPR-RES-FTEE) Report. Institution names are also used in every Nursing Administration Module report that sorts by facility or division. The NURS AMIS 1106B FTEE (#213.2) file points to the Institution (#4) file; no other file points to File #213.2. This file must contain complete and correct information to print accurate variance between budgeted and actual FTEE for each facility. At a multi-divisional hospital this option is intended to only be given to the ADPAC at the legacy site for that ADPAC to enter the budgeted data for the additional sites.

Recommendations:

The data in this file should be reviewed at least quarterly.

Menu Display:

Screen Prints:

Select Administrative Site File Functions Option: **4** FTEE Service Budget
(1106b) File, Edit

Note:

1. No up-arrow (^) is allowed during entry.
2. You are entering FTEE Ceiling Totals assigned by Management for Nursing Service Personnel Quarterly Report 10-1106b (AMIS).
3. The date displayed is the last date budgeted entries were made.
4. Enter the date of current budgeted entries.
5. All numeric entries must be between 0 and 99999.

This is an example of entering the name of a new facility and associated budgeted FTEE in to the NURS AMIS 1106 FTEE (#213.2) file.

You will be entering FTEE Ceiling Totals assigned by Management for Nursing Service Personnel Quarterly Report 10-1106b (AMIS)

Select FACILITY: **PERR**

1	PERRY POINT	MD	VAMC	641
2	PERRY POINT	MD	CIVH	641DM
3	PERRY POINT	MD	VCSFC	641DS
4	PERRY POINT	MD	USAH	6419AA
5	PERRY POINT, MD			641

CHOOSE 1-5: **1**

Are you adding 'PERRY POINT' as a new NURS AMIS 1106B FTEE (the 3RD)? No//
Y (Yes)

The facility prompt appears only if the Multi-Divisional field of the NURS Parameter (#213.9) file is marked 'Yes'. Answer with appropriate facility name (pointer to Institution file).

Date displayed is date of last budget entries.
Enter date of current budget entries.

DATE: JUNE 25, 1996// **<RET>** (JUNE 25, 1996)

This is the date associated with the following data.

(01) BUDGETED RN: **145**

Total number of (budgeted/ceiling) FTEE designated as RN positions.

(02) BUDGETED LPN: **60**

Total number of (budgeted/ceiling) FTEE designated as LPN/LVN positions.

Maintenance of Administrative Site Files

(03) BUDGETED NA: 100

Total number of (budgeted/ceiling) FTEE designated as NA positions.

(04) BUDGETED CLERICAL: 6

Total number of (budgeted/ceiling) FTEE designated as 'clerical' positions.

(05) BUDGETED ADMIN OFFICER: 0

Total number of (budgeted/ceiling) FTEE designated as 'administrative officer' positions.

(06) BUDGETED CLIN SPECIALIST: 3

Total number of RN (budgeted/ceiling) FTEE designated as 'clinical specialist' positions.

(07) BUDGETED RN PRACTITIONER: 4

Total number of RN (budgeted/ceiling) FTEE designated as 'nurse practitioner' positions.

(08) BUDGETED INFECT. CONTROL: 3

Total number of RN (budgeted/ceiling) FTEE designated as 'infection control' positions.

(09) BUDGETED PUBLIC HEALTH: 3

Total number of RN (budgeted/ceiling) FTEE designated as 'public health' positions.

(10) BUDGETED STAFF NURSE: 112

Total number of RN (budgeted/ceiling) FTEE designated as 'staff nurse' positions.

(11) BUDGETED CHIEF NURSE: 1

Total number of RN (budgeted/ceiling) FTEE designated as 'chief nurse' positions.

(12) BUDGETED ASST CHIEF NURSE: 3

Total number of RN (budgeted/ceiling) FTEE designated as 'asst chief nurse' positions.

(13) BUDGETED ASSOC CHIEF N.S.: 1

Total number of RN (budgeted/ceiling) FTEE designated as 'associate chief for N.S.' positions.

(14) BUDGETED SUPERVISOR: 2

Total number of RN (budgeted/ceiling) FTEE designated as 'supervisor' positions.

(15) BUDGETED HEAD NURSE: 5

Total number of RN (budgeted/ceiling) FTEE designated as 'head nurse' positions.

(16) BUDGETED OTHER NURSE: 2

Total number of RN (budgeted/ceiling) FTEE designated for special positions not identified in fields 6 thru 15 or 17 thru 20.

(17) BUDGETED NURSE RESHR: 1

Total number of RN (budgeted/ceiling) FTEE designated as 'nurse researcher' positions.

(18) BUDGETED ASSOC CHIEF/RESH: 1

Total number of RN (budgeted/ceiling) FTEE designated as 'associate chief/research' positions.

(19) BUDGETED ASSOC CHIEF/EDU: 1

Total number of RN (budgeted/ceiling) FTEE designated as 'associate chief/education' positions.

(20) BUDGETED INSTR/EDU: 3

Total number of RN (budgeted/ceiling) FTEE designated as 'instructor/education' positions.

Select FACILITY: <RET>

Note:

Fields 06-20 must total field 01. If the tally is incorrect, the following message will be displayed.

The number of RN's BUDGETED must equal the sum of categories 06 thru 20 (e.g. Clin Specialist, Nurse Practitioner, etc.)

Want the computer to enter the total FTEE (15) for categories 06 thru 20 into the Budgeted RN (01) field? YES// <RET>

The user can let the computer make the correction or can go back and edit the categories.

Menu Access:

The FTEE Service Budget (1106b) File, Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NUR AFL-GS-COD

Load Grade/Step Codes

Description:

This option permits the service to enter and modify the NURS Pay Scale (#211.1) file which contains grade/step codes used in Salary Reports (NURAPR-SAL) and the NURS Staff (#210) file. New grade/step codes must be entered into NURS Pay Scale (#211.1) file using the option Load Grade/Step Codes (NUR AFL-GS-COD).

Additional Information:

This information is printed in the Staff Record Report. The NURS Pay Scale (#211.1) file is pointed to by the NURS Staff (#210) file.

Menu Display:

Select Nursing Features (all options) Option: **3** Administrative Site File Functions

- 1 AMIS 1106 Acuity Edit
- 2 Privilege File Edit
- 3 Certification File, Edit
- 4 FTEE Service Budget (1106b) File, Edit
- 5 Load Grade/Step Codes
- 6 Nursing Location File, Edit
- 7 Print Existing Location File Entries
- 8 Service Position File, Edit
- 9 Tour of Duty File, Edit
- 10 Vacancy Reason File Edit
- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Screen Prints:

Select Administrative Site File Functions Option: **5** Load Grade/Step Codes

Select GRADE/STEP Code: **R/S1/1**

Are you adding 'R/S1/1' as a new NURS PAY SCALE (the 21ST)? **Y** (YES)

Enter Grade/Step Code.

examples:

R/E1/5 = Registered Nurse, ENTRY1, Step 5

N/4/7 = Nursing Assistant,GS4,Step 7

R/E1/5 = Registered Nurse, ENTRY1, Step 5

N/4/7 = Nursing Assistant,GS4,Step 7

The following is a list of choices:

1	R/E1/1	2	R/E1/2	3	R/E1/3
4	R/E1/4	5	R/E1/5	6	R/E1/6
7	R/E1/7	8	R/E1/8	9	R/E1/9
10	R/E1/10	11	R/E1/11	12	R/E1/12
13	N/A/3	14	R/A/4	15	R/A/5
16	R/A/6	17	R/A/7	18	R/A/8
19	R/A/9	20	R/A/10		

There is no specific pattern which you must follow to enter a grade/step code. It is suggested that the service decide upon a pattern, so interpretation of reports is easier. The code indicates the employee's service category, grade, and step level.

Example: R/E1/5; registered nurse/entry1 grade 1/step 5.

Service category abbreviations (exported with this package) are:

C = clerical,

R = registered nurse,

L = licensed practical nurse/licensed vocational nurse,

N = nursing assistant,

O = other category (i.e., trainee, etc.).

Refer to the glossary for more information on Service Category.

GRADE/STEP CODE: R/S1/1// <RET>

You may edit grade/step code.

Select GRADE/STEP Code: <RET>

You may enter another grade/step code.

Menu Access:

The Load Grade/Step Codes option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NURSFL-LOC

Nursing Location File, Edit

Description:

This option permits the entry of a new administration location or clinical unit and the editing of associated data. The file contains demographic and budgeted FTEE information for wards/units, clinics, and other nursing assignment locations. Data must be updated when budgeted/ceiling FTEE changes are made by nursing administration.

Additional Information:

¹Information in this file is used throughout the nursing software (e.g., classification, staff file, manhours, patient plan of care, vitals, census, location comparison FTEE reports). The NURS Location (#211.4) file is pointed to by: the NURS Staff (#210) file, the NURS Position Control (#211.8) file, the NURS AMIS Daily Exception Report (#213.5) file, the NURS Patient (#214) file, and the NURS Classification (#214.6) file. The NURS Location file points to the Hospital Location (#44), NURS Product Line (#212.7), NURS Clinical Background (#211.5), and the NURS AMIS Ward (#213.3) files.

Budgeted staff service positions, and their associated FTEE data, although entered through this option, are stored in the NURS Position Control (#211.8) file. This budgeted service position information is used to print the FTEE Comparison (1106b) Report. The budgeted Service Category data displayed in the FTEE Comparison (1106b) Report is calculated from the service position information.

It is important that the Product Line field be completed when FTEE is assigned to services other than Nursing. Upon installation of the software, each location's Product Line field is initialized with the service name of Nursing when no value is found stored in the field. The Product Line field is displayed only when the Product Line field of the NURS Parameter file contains a value of 'yes'. Inactivating the Patient Care Status field and/or the Ward status field does not affect the inclusion of data in the AMIS manhours, classifications and workload reports.

NOTE: The NURS Location (#211.4) file must contain a MASONLY entry that has a ward status of active and a patient care status of inactive. All MAS ward locations should be associated with an active nursing unit or MASONLY.

Select Administrative Site File Functions Option: **6** Nursing Location File, Edit

Example 1: Adding new information associated with an existing location.

Select NURSING UNIT NAME: **CCU**

Are you adding 'NUR CCU' as a new HOSPITAL LOCATION? No// **Y** (Yes)

The addition of 'NUR' is required in the Hospital Location File and is added automatically by the Nursing application.

HOSPITAL LOCATION INSTITUTION: **BAL**

1	BALTIMORE, MD	MD	512
2	BALTIMORE-RO	MD	313

CHOOSE 1-2: **1** NUR CCU

This field points to the Institution file. Answer with INSTITUTION NAME, or STATION NUMBER.

Are you adding 'CCU' as a new NURS LOCATION (the 37TH)? No// **Y** (Yes)

After entering the location as a new entry, the user may edit the above information.

NAME: CCU// **<RET>**

HOSPITAL LOCATION INSTITUTION: BALTIMORE, MD// **<RET>**

PRODUCT LINE: **MEDICINE**

¹ Answer with product line name that is found in the NURS Product Line (#212.7) file. The Product Line prompt displays when a user has entered 'yes' into the Product Line field in the NURS Parameter (#213.9) file. Data in this field is used to associate a location with a product line, service, or program. Administrative location reports use this field to sort by product line.

PATIENT CARE STATUS: **I** INACTIVE

¹ Patch NUR*4*2 October 1997

The following is an example of the on-line help.

Explanation of the Patient Care Flag/Status
Does Nursing provide patient care on this ward?

A Patient Care Status flag of "A" (ACTIVE) indicates that direct patient care is being provided on the Nursing location. This field will contain an "I" (Inactive) if no patient care activity is present or if the location is used for other Nursing education and administrative functions.

The Ward Activation (NURSPT-WRDACT) and Ward Deactivation (NURSPT-WRDINA) Options should be used to update this field. Editing of this field via any other means may cause the NURS Patient File to contain incorrect data.

For additional help on how this field should be set please type MORE.

RELATED HELP FRAME	KEYWORD

1 Additional Help on Setting Status Flags	MORE

* - Recently viewed help frame

Select HELP SYSTEM action or <return>:

Choose from:

A	ACTIVE
I	INACTIVE

NOTE:

Since this is a new ward, the user would enter an inactive (I) status because Patient Care Status should be activated through the Ward Activation Patient Update (NURSPT-WRDACT) option.

WARD STATUS: **A** ACTIVE

The following is an example of the on-line help.

Explanation of the ward status/inactive flag.
Is this location used by the Nursing package?

The Ward Status field indicates active and inactive locations in the Nursing System. To designate this field as "A" (ACTIVE), enter an "A" in the Ward Status field. If this location has been closed and all Nursing activities (e.g., patient care, Nursing education and administration functions) have ceased, then enter an "I" for "Inactive" in the Ward Status field.

For additional help on how this field should be set please type MORE.

RELATED HELP FRAME	KEYWORD

Other examples of editing entries for locations and MAS wards can be found at the end of this option's explanation.

PROFESSIONAL PERCENTAGE: 100

This number indicates the percentage of professional nursing personnel assigned to a unit.

¹The professional percentage for a location is calculated by dividing the budgeted RN positions into the total budgeted RN, LPN, NA positions.

$$\frac{\text{RN Budgeted FTEE}}{\text{Total Budgeted RN, LPN, NA}} = \text{Professional Percentage}$$

²Entering data here and not through the Site Parameter file makes this entry unit specific. The workload data is calculated using this value and not the value stored in the NURS Parameter file.

UNIT EXPERIENCE: **CARDIAC** INTENSIVE CARE

³This field contains the area of concentration, administrative or clinical, associated with this location. The data in this field is required for the batch run to adjust FTEE after Separation (NURAED-BATSEP) and Status and Position (NURAED-STF-STAT/POS) options to automatically trigger positions that are no longer active into the Experience field of the NURS Staff (#210) file.

Data is selected from the entries in the Clinical Background (#211.9) file. An example of entries which might be found in this file is found below.

CARDIAC INTENSIVE CARE

¹	AMIS Bed section	Associated MAS ward
1.	PSYCHIATRIC	3S

Would you like to (A)dd new AMIS bed sections, (D)eleate existing AMIS bed sections from the above listing, (E)dit the associated MAS ward relationship, or (B)ypass this prompt (A/D/E/B): B// **<RET>** BYPASS PROMPT

Example 7: Inactivation of a nursing location:

Select NURSING UNIT NAME: **2B**
 NAME: 2B// @

Deleting a Nursing Unit

A NURSING UNIT CANNOT BE DELETED!!

To simulate a deletion:

1. Run the WARD DEACTIVATION PATIENT UPDATE OPTION (NURSPT WRDINA) to:
 - a) remove patients from the unit of the simulated deletion and
 - ²b) set the PATIENT CARE STATUS field of this nursing location to inactive.

¹ Patch NUR*4*2 October 1997

² Patch NUR*4*2 October 1997

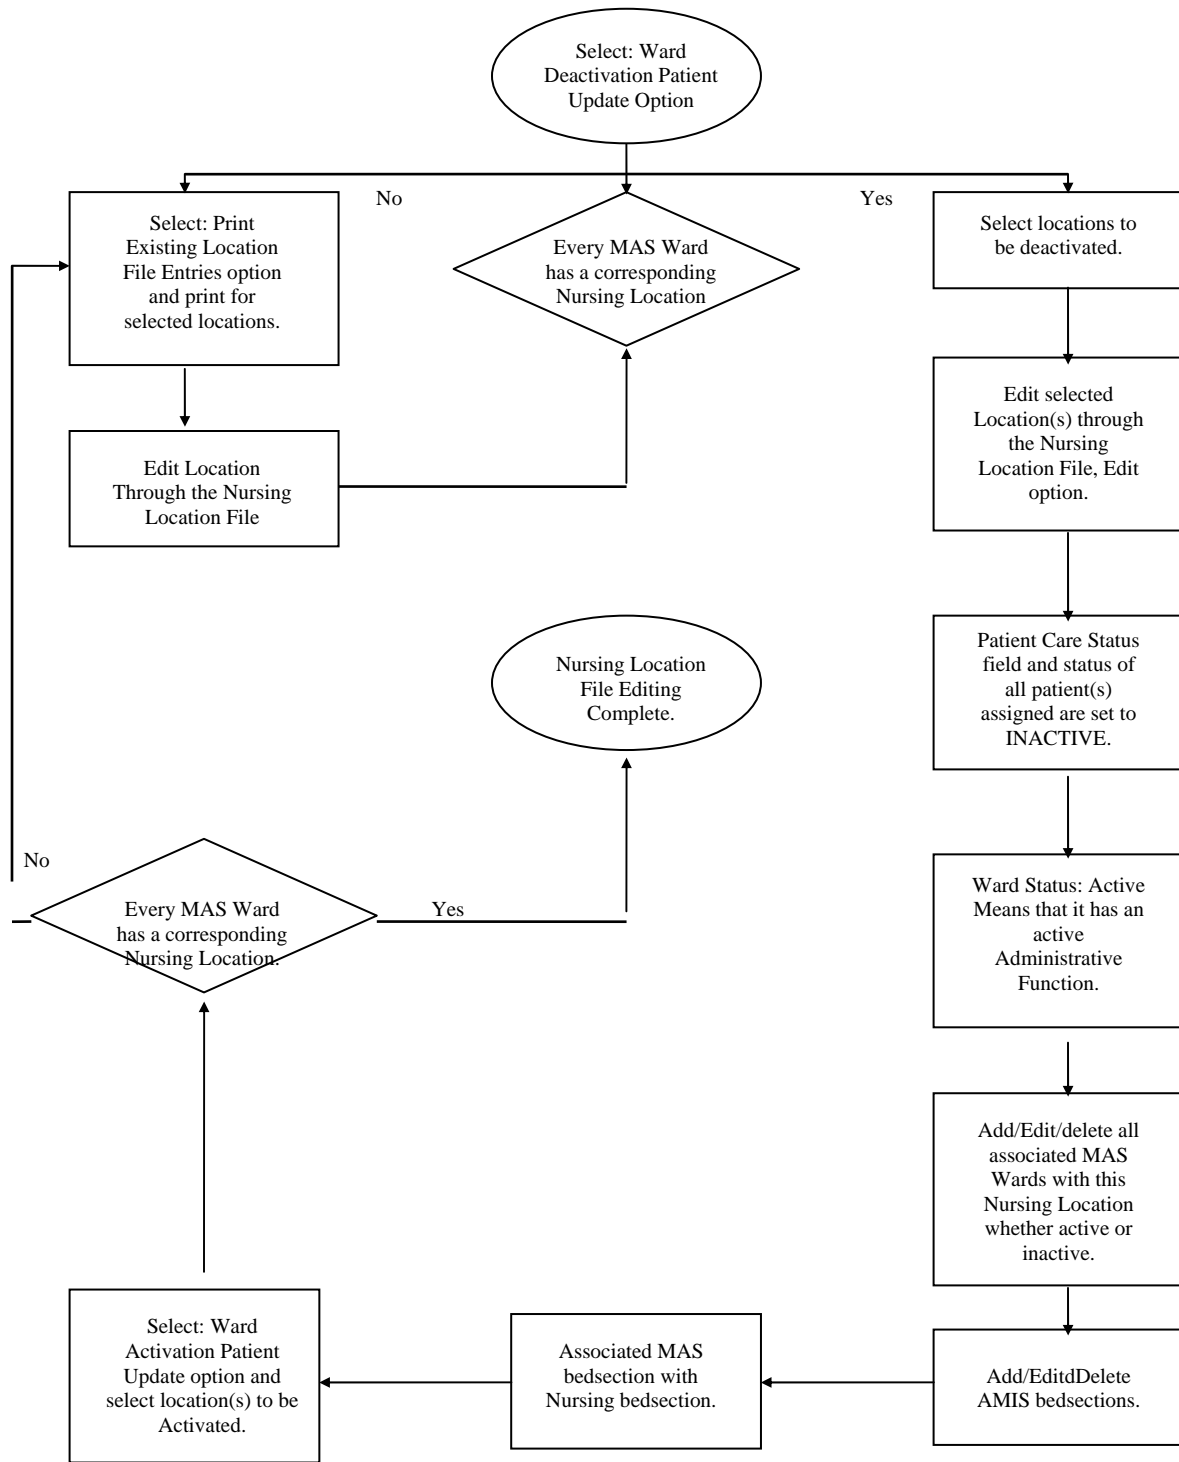

- ¹2. Set the WARD STATUS field of this nursing location to (I) inactive.
3. Assign the corresponding MAS location(s) for the inactivated unit to a new or existing nursing location. Please note that all MAS locations that cannot be associated with an active nursing unit, should be assigned to the active location of MASONLY.
4. Delete the MAS location entry(s) for the old/original nursing location being deactivated.
5. Deactivate nursing locations which are receiving the MAS location referenced in step 3 (except MASONLY). Reactivate these wards using the Ward Activation Patient Update option (NURSPT-WRDACT). This process will place all patients from the closed unit on their new locations in the Nursing System.

Menu Access:

The Nursing Location File, Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

¹ Patch NUR*4*2 October 1997

CLOSING/EDITING AN EXISTING NURSING LOCATION

NURSLO-PRINT

Print Existing Location File Entries

Description:

¹This option prints a report listing all information associated with a location stored in the NURS Location (#211.4) file. (e.g., ward and patient care status; corresponding MAS ward(s) and AMIS bedsection(s); and budgeted FTEE information).

Additional Information:

²This option prints 3 different reports:

- Status/bed section information
- Status/bed section report with budgeted FTEE
- Budgeted FTEE only

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

Data can be edited through the Nursing Location File, Edit option. Budgeted service position FTEE information is stored in the Position Control (#211.8) file. The budgeted service position FTEE and its associated service category (reflected in File 211.8) is used to calculate the total budgeted service category FTEE. This report indicates if staff entries in the NURS Position Control file are associated with a unit. This information is found under the Staff Flag heading.

This report may be used by the package ADPAC to identify erroneous location entries by comparing the printed information with other management records and discussing the data with management staff. Corrections are entered through the Nursing Location File, Edit (NURSFL-LOC) option.

Menu Access:

The Print Existing Location File Entries option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

¹ Patch NUR*4*2 October 1997

NUR AFL-SPO

Service Position File, Edit

Description:

¹This option allows users to enter and modify data in the NURS Service Position (#211.3) file. Information stored in this file includes the service position name and abbreviation, priority sequence number, (associated) product line, (associated) service category, and an AMIS position that is linked to registered nurse positions only.

Additional Information:

²This data is used in the Status and Position option of the Staff Record Edit and Staff Record Report, the Administrative Reports, and the Nursing Education Reports.

Service positions for non-nursing staff (i. e., personnel not generally associated with the traditional nursing service) are to be assigned a service category of 'Other'. This category type can be further defined in the Other Service Category field. Management may use this 'other service category' when printing selected administration reports for non-nursing staff. The Other Service Category field does not appear if the product line is nursing.

The NURS Staff (#210) file, the NURS Position Control (#211.8) file and the NURS AMIS Daily Exception Report (#213.5) file (where Employee Activation/Separation Report data is stored) points to the NURS Service Position (#211.3) file. This file points to the NURS AMIS Position (#211.7) file and the NURS Product Line (#212.7) file.

Menu Display:

Screen Prints:

Select Administrative Site File Functions Option: **8** Service Position File,
Edit

Select Service Position abbreviation: **HN**

Are you adding 'HN' as a new NURS SERVICE POSITION (the 68TH)? No// **Y**
(Yes)

Answer with appropriate service position abbreviation.

ABBREVIATION: HN

NAME: HEAD NURSE

PRIORITY SEQUENCE: 200

PRODUCT LINE: NURSING

SERVICE CATEGORY: RN REGISTERED NURSE

AMIS POSITION: 35 (HEAD NURSE)

Exit Save Refresh

Enter a command or '^' followed by a caption to jump to a specific field.

The following is an explanation for each prompt:

ABBREVIATION:

¹Enter an abbreviation for a service position.

NAME:

Answer with name of service position/title.

PRIORITY SEQUENCE:

This number will determine the order in which a service position will print out on a report. A service position with a priority sequence of 200 will sort and print before a service position with a priority sequence of 900. These numbers do not affect the data stored in the staff record.

¹ Patch NUR*4*2 October 1997

There are some restrictions on this numbering system:

1. Service positions with priority sequences of less than 100 will not print on reports. This is to enable the user to add a service position that is not desired in the prints.
2. No two service positions can have the same priority sequence.

PRODUCT LINE :

¹Enter the name of a service, program, or product line associated with the service position. The product line name may be associated with a traditional service name (e.g., nursing, chaplain, respiratory therapy), or a clinical center/product line (e.g., medicine, mental health). In some instances, a product line reference, of Patient Care Services is appropriate. This field is editable only when the product line in the NURS Parameter file contains an entry of 'yes'. When the Site Parameter file's product line contains a value of 'no', the field displays but the data cannot be edited.

SERVICE CATEGORY :

²This field stores the name of an appropriate 'service category' that is related to the 'service position'. The first six choices on the list below are categories of nursing personnel used to complete the FTEE Comparison (1106b) Report. The category 'other' is used when associating staff with other medical center product lines, fenced positions, etc.

The following is a list of choices:

R	RN	REGISTERED NURSE
L	LPN	LIC. PRACTICAL NURSE
N	NA	NURSING ASSISTANT
C	CK	CLERICAL
S	SE	SUMMER EMPLOYEE
A	AO	ADMIN. OFFICER
O	OT	OTHER

AMIS POSITION :

The following positions (from 26-40) are to be associated with a 'RN' service category only. Pointer to NURS AMIS POSITION FILE (#211.7).

The following is a list of choices:

26 (CLIN SPECIALIST)	CLINICAL SPECIALIST
27 (NURSE PRACTITIONER)	NURSE PRACTITIONER
28 (INFECTION CONTROL)	INFECTION CONTROL NURSE
29 (PUBLIC HEALTH)	PUBLIC HEALTH COORDINATOR
30 (STAFF NURSE)	STAFF NURSE
31 (CHIEF NURSE)	CHIEF NURSE
32 (ASST CHIEF NURSE)	ASST CHIEF NURSE
33 (ASSOC CHIEF N.S.)	ASSOC. CHIEF N.S.

¹ Patch NUR*4*2 October 1997

² Patch NUR*4*2 October 1997

34 (SUPERVISOR)	SUPERVISOR
35 (HEAD NURSE)	HEAD NURSE
36 (OTHER NURSE)	OTHER THAN STAFF NURSE
37 (NURSE RESHR)	NURSE RESEARCHER
38 (ASSOC CHIEF/RESHR)	ASSOC. CHIEF/RESEARCH
39 (ASSOC CHIEF/EDU)	ASSOC. CHIEF/EDUCATION
40 (INSTR/EDU)	INSTRUCTOR

Select Service Position abbreviation: <RET>

¹You may enter additional service position abbreviations as appropriate, to complete your entries.

Menu Access:

The Service Position File, Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

¹ Patch NUR*4*2 October 1997

NUR AFL-TOD

Tour of Duty File, Edit

Description:

¹This option allows users to enter and modify shift data stored in the NURS Tour of Duty (#211.6) file.

Additional Information:

²The data is used in the Status and Position (NURAED-STF-STAT/POS) option under the Staff Record Edit and reflected in the Staff Record Report. This file is pointed to by the NURS Position Control (#211.8) file, and the Seclusion/Restraint (#615.2) file.

¹ Patch NUR*4*2 October 1997

Enter Vacancy Reason Code: **UTR**

Are you adding 'UTR' as

a new NURS VACANCY/TRANSFERRED REASON FILE (the 11TH)? No// **Y**

This is an abbreviation or code for the vacancy/transferred reason. Entries in this field describe why the position is available/or unfilled.

The following is a list of choices:

COP CONTINUATION OF PAY
 EXL EXTENDED LEAVE
 LWO LEAVE WITHOUT PAY
 PTR POSITION TRANSFER
 RES RESIGNED
 RET RETIRED
 SUM SUMMER STUDENT
 TER TERMINATED
 TRA TRANSFERRED
 WOP LEAVE WITHOUT PAY-JOURNALIZED

DESCRIPTION: **UNIT TRANSFER**

¹The answer must be 3-30 characters in length. This is the free text description or meaning of the code for the vacancy transferred reason.

STATUS: **A**

²This field will help to build a relationship between statuses in the NURS Staff file, and vacancy reasons in the NURS Position Control file. The following is a list of choices:

A	ACTIVE	(active record)
I	INTERMITTENT	(active record)
R	INACTIVE	(closed record; inactive)

³When an employee's status in the NURS Position Control file is active, appropriate data in the employee's NURS Staff and NURS Position Control record are reflected in management reports.

Enter Vacancy Reason Code: **<RET>**

You may enter another vacancy reason.

Menu Access:

The Vacancy Reason File Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

¹ Patch NUR*4*2 October 1997

² Patch NUR*4*2 October 1997

³ Patch NUR*4*2 October 1997

NURSFL-SITE

Site Parameter File

Description:

This option allows the user to edit the NURS Parameters (#213.9) file which contains: 1) the name of the CNO printer, 2) a nursing-wide default value for the professional percentage used in determining required FTEE in the workload statistics reports, 3) the time of day when acuity is aggregated for the workload statistics reports, 4) a product line indicator that allows storage and printing of data in the Administration Module by product line, service, or specialty other than Nursing, 5) a multi-divisional indicator that allows storage and printing of data in the Administration Module by division or facility, 6) a switch to allow the site manager to bring the Nursing application off-line, and 7) a switch to allow the site manager to turn on/off access to the New Person file.

Additional Information:

The CNO printer is used to print a message stating that an inpatient cannot be entered into the Nursing application due to an invalid MAS ward. This usually happens when a cross-reference between the MAS ward and unit is lost (corrupted cross-reference) or because no unit is associated with the patient's MAS ward. The warning message that appears on the CNO printer contains the name of the patient and the following statement:

<Patient's Last name, First Name> has not been admitted into the Nursing System by MAS, because *<ward name>* (MAS ward) does not have a corresponding nursing location.

If the CNO printer is not defined, the user is notified that the patient is not in the system when classification is attempted. The CNO printer may also be used to print management reports that are queued to run daily as a TaskMan job.

The Professional Percentage field is a REQUIRED field; the application coordinator must enter a value. If the professional percentage field has no value and there is no entry associated with each unit in the NURS Location file's Professional Percentage field, the following message displays when a workload report is printed:

¹This field defaults the percentage of professional personnel assigned to a unit if the professional percentage field is not defined in the NURS Location file. This data is used in the calculation of unit workload statistics.

¹ Patch NUR*4*2 October 1997

The following prompt is presented.

PROFESSIONAL PERCENTAGE :

The user enters a percentage at the prompt and the value is stored in the NURS Parameter file.

Data stored in the Professional Percentage field calculates the FTEE number displayed under the REQ (required) columns in all workload statistics reports.

An entry in the Product line field is used to display (when the field value = yes) or hide (when field value = no) the, 'Select PRODUCT LINE (Press return for all product lines):' prompt in the Staff Record Report, Salary Reports, Telephone Number Listings, Nursing Education Reports, Administrative, and Resource Management reports. The following enter/edit options are also affected by the data in the Product Line field:

- Service Position File, Edit
- Nursing Location File, Edit
- Staff Record Edit
- Location Edit, Employee

The options, Service Position File, Edit and Nursing Location File, Edit allow users to associate product lines with service positions and units. Product line information is displayed through the Staff Record Edit and Location Edit, Employee options.

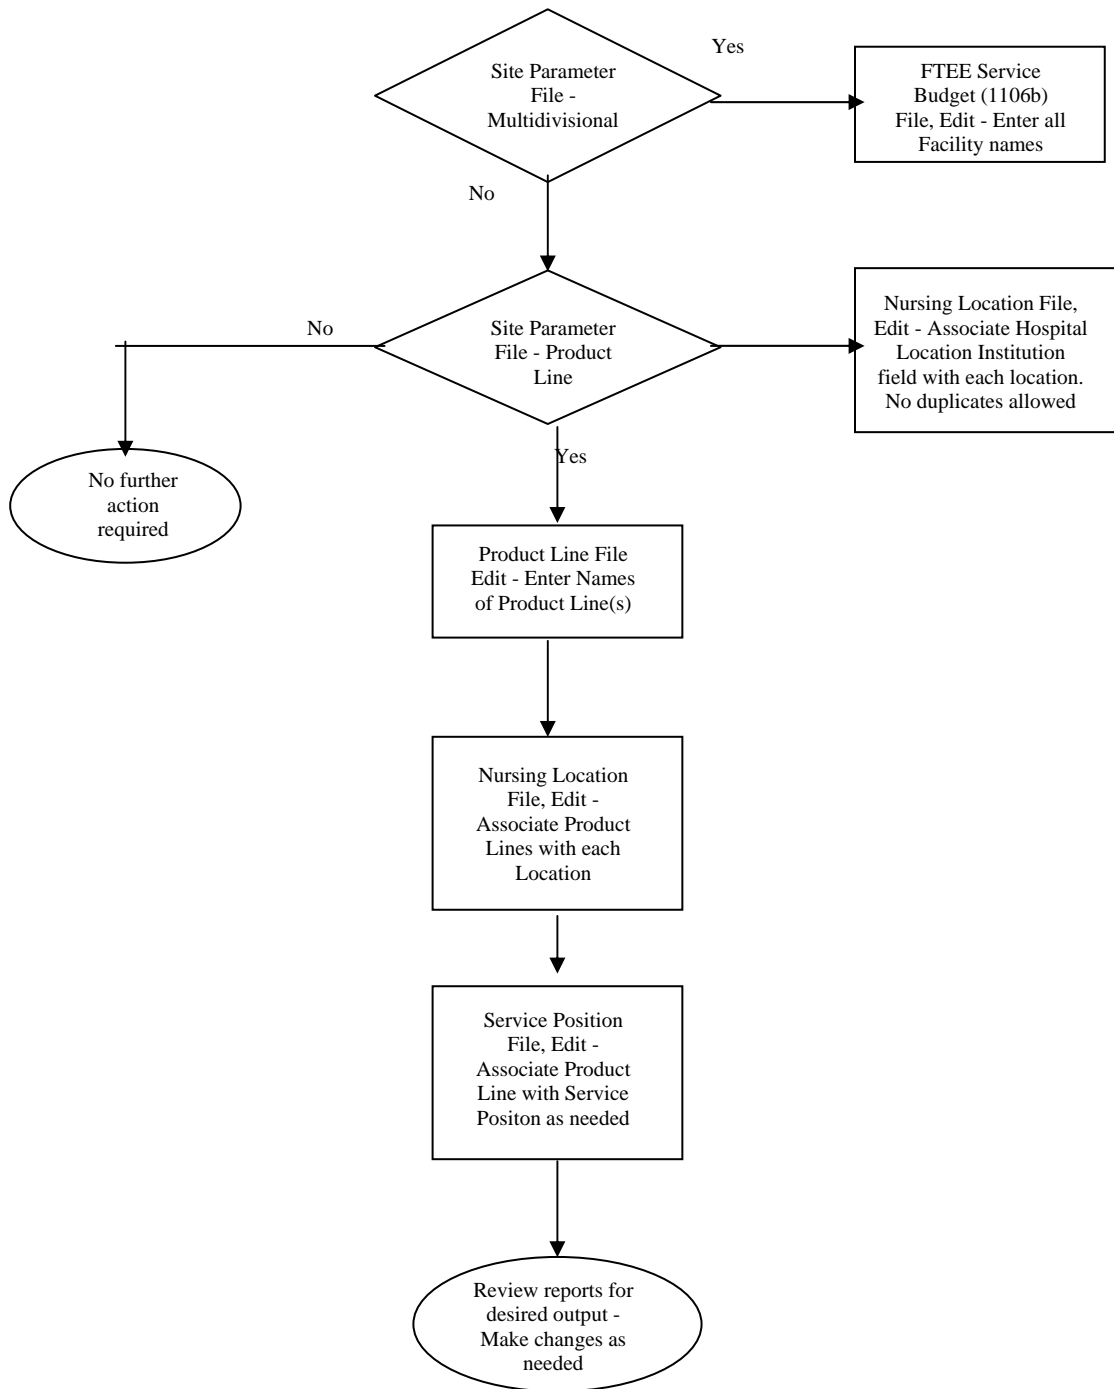

The Multi-Divisional field is used to display (when the field value = yes) or hide (when the field value = no) an institution or facility prompt in the Staff Record Report, Salary Reports, Telephone Number Listings, Nursing Education Reports, Administrative, and Resource Management reports. Also affected by the data in the Multi-Divisional field are the following enter/edit options:

- Nursing Location File, Edit
- FTEE Service Budget (1106b) File, Edit
- Staff Record Edit
- Location Edit, Employee

¹The Nursing Location File, Edit and FTEE Service Budget (1106b) File, Edit options allow users to associate a facility with a unit and service position budgeted FTEE information. Facility or division data is displayed in the Staff Record Edit and Location Edit, Employee options.

¹ Patch NUR*4*2 October 1997

¹The following is a flow chart to assist the user in setting up the Site Parameter File:

Menu Display:

Select Nursing Features (all options) Option: 3 Administrative Site File Functions

- 11 Site Parameter File
- 12 Clinical Background File, Edit
- 13 Product Line File Edit

Screen Prints:

Select Administrative Site File Functions Option: **11** Site Parameter File

CNO PRINTER: **121**

This field contains the name of the device used to print notices, exception reports, and selectively queued TaskMan reports. This printer should be on at all times.

PROFESSIONAL PERCENTAGE: 50// **<RET>**

This field indicates a ratio of professional staff (defined as registered nurses) to other care givers assigned to a unit when a similar field in the NURS Location file is not defined. It must be completed for the software to calculate the required FTEE in the workload statistics reports. A default of 50 is distributed with the software.

The next three fields identify the times the system calculates all current workload statistics and the AMIS night workload statistics reports. Time must be entered as 4 NUMBERS REPRESENTING MILITARY TIME (e.g., 08:00 or 15:00). It is suggested that the shift acuity time be a time at the end of the shift.

DAY SHIFT ACUITY TIME: **1530**

The time that the acuity totals are calculated for the day shift current workload statistics report.

EVENING SHIFT ACUITY TIME: **2330**

The time that the acuity totals are calculated for the evening shift current workload statistics report.

Maintenance of Administrative Site Files

NIGHT SHIFT ACUITY TIME: 0730

The time that the acuity totals are calculated for the night shift. Both AMIS and current workload statistics reports are based on the night shift acuity time.

PRODUCT LINE: YES// <RET>

¹This field should contain a value of 'Yes' when FTEE data in the NURS Position Control (#211.8) file is associated with multiple services/product lines. NO indicates that all FTEE is associated with Nursing Service.

MULTI-DIVISIONAL: YES// <RET>

This field should contain a value of 'Yes' when the facility/medical center is multi-divisional. NO indicates the facility is a single institution.

NURSING OFFLINE/ONLINE: ON-LINE// <RET>

²This switch allows the site manager to place the Nursing application off-line without bringing down the entire system. The user will see this prompt only if they have programmer access.

Choose from:

- 1 OFF-LINE
- 0 ON-LINE

NURSING NEW PERSON FILE ACCESS: ACCESS TO NEW PERSON FILE
// <RET>

³This field allows the Site Manager to turn on/off access to the New Person (#200) file. The user will see this prompt only if they have programmer access. When the field value is '1', the Demographic Data option of the Staff Record Edit option allows users to enter data into File #200.

Choose from:

- 1 ACCESS TO NEW PERSON FILE
- 0 NO ACCESS TO NEW PERSON FILE

Menu Access:

The Site Parameter File option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

Menu Access:

The Clinical Background File, Edit option is accessed through the Administrative Site File Functions option of the Nursing Features (all options) menu.

NUR AFL-PROD-LINE**Product Line File Edit****Description:**

¹This option allows the user to update the NURS Product Line (#212.7) file. The user can add new product lines, programs, or services, or edit existing entries. All entries, except for the nursing entry, are editable.

Additional Information:

²Entries in this file are used to complete the Product Line field of the NURS Location (#211.4) file and the NURS Service Position (#211.3) file. Data in the Product Line file may relate to product lines (e.g., medicine, surgery, mental health, primary care), programs, or the traditional services (e.g., nursing, social work, pharmacy). If a facility retains the traditional service organizational structure, nursing might be the only required entry in this file.

Since the Product Line file is pointed to by the NURS Location (#211.4) file, entries in the product line field of the NURS Location file can be used to associate a product line (e.g., mental health, nursing, patient care services) with a location. The NURS Service Position (#211.3) also is pointed to by the product line field in the NURS Service Position field, therefore, a product line (e.g., nursing, social work, chaplaincy, primary care, mental health) can be associated with a service position.

- 10 QI Site Files ...
- 11 Special Functions ...

Select Nursing Features (all options) Option: **7** Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Menu Access:

The Clinical Site File Functions option is accessed through the Nursing Features (all options) menu.

NURCFP-CARE

Standard Patient Plan of Care, Print

Description:

This option is part of the patient plan of care module and allows the user to view /print the data which makes up the patient plan of care guideline database (aggregate terms). This option enables the user to print any patient plan of care guideline within the database; data is stored in the Aggregate Term (#124.2) file.

Additional Information:

Guidelines can be accessed through the following pathways:

1. Medical Diagnostic Categories and medical diagnoses,
2. Health care and system deficits, and
3. Optional care plans based on:
 - a. frequently identified medical diagnosis/procedures,
 - b. nursing procedures,
 - c. nursing specialty areas, and
 - d. locally developed patient plans of care

If Medical Diagnoses are selected, the first level displays the Medical Diagnostic Categories (MDCs), the second level lists the associated medical diagnoses, and the third shows nursing problems and associated information (outcomes, interventions, related problems, defining characteristics, and related factors). When Nursing Problems are selected, the user can produce a list of health care and system deficits which access specific nursing problems and associated information (outcomes, interventions, related problems, defining characteristics, and related factors). When selecting Optional Care Plans, the user may see a combined list of medical diagnoses and nursing/medical procedures which leads directly to the care plan guidelines established through the clinical work group of the Nursing Focus Group.

Menu Display:

Select Nursing Features (all options) Option: 7 Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Screen Prints:

Select Clinical Site File Functions Option: 1 Standard Patient Plan of Care,
Print

Would you like to list the contents of:

1. Medical Diagnoses
2. Nursing Problems
3. Optional Care Plans

Enter action:

Example: Selection Short Cut.

This option contains an abbreviated approach for selecting from the lists contained in each section. When entering an action, you may select the entire list of MDCs, medical diagnoses, nursing problems, health care/system deficits, etc., before all the selections have displayed on the terminal. The user will be guided by the help prompt by entering a ? and following the action prompt indicating CHOOSE FROM by typing the number of entries listed. For example:

Enter action: 1

The user may select 1, or more, or all entries. At the next prompt type an ^ to stop the listing. The user views a minimal number of screens from which to select information rather than the entire listing.

...SORRY, I'M WORKING AS FAST AS I CAN...

The following is a list of the Medical Diagnostic Categories:

Would you like to list the contents of:

1. Cardiovascular
2. Endocrine
3. Gastrointestinal
4. GU/Renal
5. HEENT
6. Immune (Cancer,AIDS,Transplant,Arthritis)
7. Integument
8. Musculo-Skeletal/Orthopedic
9. Neurologic
10. Nutrition/Metabolic
11. Other
12. Plastic Surgery
13. Psychosocial
14. Pulmonary

Example: Printing specific MDC's and all related medical diagnoses.

16. Diabetes Mellitus
17. Digoxin Toxicity
18. Dysrhythmias
19. Endocarditis
20. Heart Failure
21. Hypertension

Enter action (<RET> to see more): **1,2**

The user may select limited medical diagnoses from the list of diagnoses associated with the MDCs.

Would you like to list the contents of:

22. Hyperthyroidism (Graves' Disease)
23. Hypothyroidism
24. Parathyroidectomy
25. Pericarditis
26. Peripheral Vascular Surgery Procedures
27. Pulmonary Embolus
28. Thrombophlebitis (DVT)
29. Thyroidectomy
30. Valvular Heart Disease
31. Vein Ligation and Stripping

Enter action: **<RET>**

...SORRY, THIS MAY TAKE A FEW MOMENTS...

Based on the above list, the user may print all nursing problems or select specific guidelines.

Clinical Site Files

Enter type of information you want printed:

1. All Nursing Problems in Selection
2. Selected Nursing Problems from Selection

Enter action: **2**

By entering 2, the user can then select specific nursing care guidelines.

...HMMM, THIS MAY TAKE A FEW MOMENTS...

Select from the following Problems:

1. Anxiety
 - Acute Myocardial Infarction

Notice that the parent for this problem displays here (Acute Myocardial Infarction). This happens for all parents that have the classification of Medical Diagnoses/Procedure.

2. Cardiac Output, Decreased (Electrical Factors)
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction
3. Cardiac Output, Decreased (Mechanical Factors)
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction
4. Coping, Ineffective Family
 - Acute Myocardial Infarction
5. Coping, Ineffective Individual
 - Acute Myocardial Infarction
6. Fear
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction
7. Fluid Volume Deficit (Actual/Potential)
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction
8. Fluid Volume Excess (Actual/Potential)
 - Acute Myocardial Infarction
9. Gas Exchange, Impaired

Enter action (<RET> to see more): **1,2**

Select from the following Problems:

- Abdominal Aortic Aneurysm Repair
10. Infection Potential
 - Abdominal Aortic Aneurysm Repair
11. Knowledge Deficit
 - Acute Myocardial Infarction
12. Knowledge Deficit [specify]
 - Abdominal Aortic Aneurysm Repair
13. Noncompliance/Nonadherence [specify]
 - Acute Myocardial Infarction
14. Pain, Chest
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction
15. Spiritual Distress
 - Acute Myocardial Infarction

16. Tissue Perfusion, Alteration In
 - Abdominal Aortic Aneurysm Repair
 - Acute Myocardial Infarction

Enter action: **<RET>**

...SORRY, LET ME PUT YOU ON 'HOLD' FOR A SECOND...

The user can then choose portions of the guidelines to be printed:

For each care plan, which data should be printed:

1. Nursing Problems/Outcomes
2. Nursing Problems/Interventions
3. Nursing Problems/Etiologies
4. Nursing Problems/Related Problems
5. Nursing Problems/Defining Characteristics
6. All of the above
7. Nursing Problems Only

Enter action: **1**

Only the associated patient outcomes are printed under the problem/guideline.

DEVICE: HOME//Enter appropriate response

The following is a customized report reflecting specific information. The user can generate various reports by simply changing the sort parameters within this option.

Cardiovascular

Abdominal Aortic Aneurysm Repair

Cardiac Output, Decreased (Electrical Factors)

Goals/Expected Outcomes

- avoids metabolic death
- avoids toxicity/allergic reactions to drugs
- limits myocardial infarction area
 - 12 lead EKG findings
 - Q waves [specify location]
 - ST segment elevation [specify location]
 - T wave depression [specify location]
 - level of energy
- maintains cardiac output
 - capillary filling WNL
 - lab data (e.g. BUN, creatinine) is normal or baseline
 - normal skin color
 - skin warm to touch
 - vital signs WNL or returns to baseline
- maintains therapeutic levels of antiarrhythmic agents
- returns to and maintains NSR or pacing rhythm
- [Extra Goal]

Acute Myocardial Infarction

Anxiety

Goals/Expected Outcomes

- identifies 3 precipitating events to anxiety
- identifies 3 signs and symptoms of anxiety
- identifies 3 sources of support
- reports decrease in signs/symptoms of anxiety
- sleeps for 4-5 hours without awakening
- verbalizes 3 activities that promote feelings of comfort
- [Extra Goal]

Cardiac Output, Decreased (Electrical Factors)

Goals/Expected Outcomes

- avoids metabolic death
- avoids toxicity/allergic reactions to drugs
- limits myocardial infarction area
 - 12 lead EKG findings
 - Q waves [specify location]
 - ST segment elevation [specify location]
 - T wave depression [specify location]
 - level of energy
- maintains cardiac output
 - lab data (e.g. BUN, creatinine) is normal or baseline
 - normal skin color
 - skin warm to touch
 - vital signs WNL or returns to baseline

maintains therapeutic levels of antiarrhythmic agents
 returns to and maintains NSR or pacing rhythm
 [Extra Goal]

Endocrine

2. Nursing Problems
3. Optional Care Plans

Enter action: **2**

...HMMM, LET ME THINK ABOUT THAT A MOMENT...

The following is a list of health care and system deficits:

Would you like to list the contents of:

1. Activities of Daily Living
2. Circulatory System
3. Cognitive-Sensory Area
4. Elimination
5. Health Management
6. Integumentary (Skin)
7. Musculoskeletal/Neurological
8. Nutrition-Metabolic Area
9. Psycho-Social Area
10. Respiratory System
11. Sexual Functioning/Reproductive System
12. Sleep/Rest
13. Spiritual Needs

Enter action: **1,2**

If the user wants all, enter 1-13.

...HMMM, THIS MAY TAKE A FEW MOMENTS...

Enter type of information you want printed:

1. All Nursing Problems in Selection
2. Selected Nursing Problems from Selection

Enter action: **2**

This will produce a combined listing of nursing problems for the selected health care and system deficits (Activities of Daily Living and Circulatory System). If the user selected all, no list would appear.

...HMMM, LET ME PUT YOU ON 'HOLD' FOR A SECOND...

Clinical Site Files

Select from the following Problems:

1. Activity Intolerance
2. Cardiac Output, Decreased (Electrical Factors)
3. Cardiac Output, Decreased (Mechanical Factors)
4. Coping, Ineffective Family
5. Fluid Volume Deficit (Actual/Potential)
6. Fluid Volume Excess (Actual/Potential)
7. Home Maintenance Management, Impaired
8. Hyperthermia
9. Hypothermia
10. Knowledge Deficit
11. Pain, Acute
12. Pain, Chest
13. Pain, Chronic
14. Self-Care Deficit [Specify]
15. Tissue Integrity, Impaired
16. Tissue Perfusion, Alteration In

Enter action: **1**

...SORRY, LET ME PUT YOU ON 'HOLD' FOR A SECOND...

Based on the above list, the user may then print all or any combination of data associated with the patient plan of care guidelines.

For each care plan, which data should be printed:

1. Nursing Problems/Outcomes
2. Nursing Problems/Interventions
3. Nursing Problems/Etiologies
4. Nursing Problems/Related Problems
5. Nursing Problems/Defining Characteristics
6. All of the above
7. Nursing Problems Only

Enter action: **6**

DEVICE: HOME//Enter appropriate device

Activities of Daily Living

Circulatory System

Activity Intolerance

Defining Characteristics

abnormal heart rate or BP response to activity
 ECG changes reflecting arrhythmias or ischemia
 exertional dyspnea
 verbal report of fatigue or weakness

Etiology/Related and/or Risk Factors

bed rest or immobility
 generalized weakness
 imbalance between oxygen supply and demand
 sedentary life-style

Goals/Expected Outcomes

demonstrates increased control of dyspnea with activity
 demonstrates increased independence for self-care
 hemodynamically stable during activity
 appropriate pulse rate for pt [specify range]
 B/P
 ear oximetry indicates oxygen saturation of 90% or greater
 skin color and temperature WNL for pt
 verbalizes/demonstrates decreased fatigue with activity
 verbalizes/demonstrates physical conditioning techniques
 [Extra Goal]

Nursing Intervention/Orders

administer bronchodilators as ordered
 administer oxygen/cannula at [specify]L/min or mask at []%
 assess for signs of fatigue and weakness
 deteriorating personal appearance
 exertional dyspnea
 inability to be independent for self-care
 sleep pattern
 weight loss or gain
 initiate muscle strengthening/conditioning as indicated
 passive/active ROM q[frequency]hrs.
 plan activities to maximized medication/treatment benefits
 provide [number of] minutes of rest between activities
 pulse q[frequency]hrs
 refer for appropriate consults

Enter type of information you want printed:

1. All Nursing Problems in Selection
2. Selected Nursing Problems from Selection

Enter action: **1**

...EXCUSE ME, HOLD ON...

For each care plan, which data should be printed:

1. Nursing Problems/Outcomes
2. Nursing Problems/Interventions
3. Nursing Problems/Etiologies
4. Nursing Problems/Related Problems
5. Nursing Problems/Defining Characteristics
6. All of the above
7. Nursing Problems Only

Enter action: **6**

The above generates a printed report for all care plan guidelines under the Optional Patient Plan of Care category.

Menu Access:

The Standard Patient Plan of Care Print option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCFE-CARE

Patient Plan of Care, Site Configuration

Description:

This option is part of the patient plan of care module and allows the nursing ADP Coordinator to add and modify entries to the Aggregate Term file. The aggregate terms are the strings of text which comprise the care plan guideline data base. Data is stored in the Aggregate Term (#124.2) file.

Additional Information:

The examples indicated in this section provide information about adding data to the standardized patient plans of care within the Aggregate Term file. All terms contained in the standard patient plans of care must contain specific/unique information for the purpose of adding a term in an existing plan or creating a new plan. The following is a glossary of terms which a user should review before attempting to modify the existing data.

Name: The name of the term (e.g., Coping, Ineffective Family, Goals/Interventions, blood gases [frequency]) entered in the file.

Term Definition: Used to differentiate between aggregate terms that have associated lower levels and those that do not.

Type of Term: Used to identify an aggregate term has a lower level associated with it.

Frame: A frame has two or more selectable terms related to it.

Term: A term is the lowest level in the hierarchy of the patient plan of care; there is nothing under a term to further describe or modify it.

Classification: These classifications distinguish the difference between aggregate terms.

Goal NURSC

Used to identify a goals/expected outcome frame or term which should have an associated date for review or met action.

Goals/Expected Outcomes NURSC

Used to identify a major level under a nursing problem or medical dx/procedure for categorizing measurable patient outcomes/goals.

Medical Dx/Procedure NURSC

Used to identify a major level under a medical section for identifying medically related patient problems.

Medical Section NURSC

Correlates to the nursing section within the care plan hierarchy; this level is immediately under a prime document and contains a listing of medical diagnoses/procedures.

Nursing Intervention NURSC

Identifies a nursing order or intervention.

Nursing Problem NURSC

Identifies a patient problem or NANDA term.

Nursing Section NURSC

Correlates to the medical section, or an area/system of nursing care.

Orderable NURSC

An intervention which has an associated date for tracking data in the system or discontinuing the order.

Prime Document GMRG

A classification type describing the highest level within the hierarchy.

Related Factor NURSC

Used to identify a major level under a nursing problem or medical dx/procedure for categorizing possible etiologies of the patient problem.

Related Problem NURSC

Used to identify a major level under a nursing problem or medical dx/procedure for indicating potentially related or influencing problems.

Lead Text: Text that will precede the text of this frame/document in displays.

Trail Text: Text that will follow the text of this frame/document in displays.

Max: The maximum number of selections allowed under this frame/document. A null entry means there is no maximum.

Min: The minimum allowable selections to be made under this frame/document. Null entry means zero.

Format of Output: The way the frame/document is displayed. Tabular and brief tabular display in an outline format. Tabular uses lead and trail text, and brief tabular does not. Sentence format creates paragraphs using lead and trail text, and ends sentences with periods.

CHOOSE FROM:

- S SENTENCE
- T TABULAR Patient plan of care uses this exclusively.
- B BRIEF TABULAR

ASK ADDITIONAL TEXT: A flag to determine whether Additional Text can be entered for an aggregate term.

CHOOSE FROM:

- 0 NO
- 1 YES

SUPPRESS MIN/MAX MESSAGE: This field determines whether the MIN and MAX messages should be suppressed for this frame. For example if the minimum number of selections for a frame is one, and no selections are picked on that frame, an error message indicating this will appear. This field will allow the site to prevent those messages from printing if desired.

CHOOSE FROM:

- 0 NO SUPPRESSION same as leaving field with no data
- 1 SUPPRESS MIN MESSAGE only code that needs to be used in Patient Plans of Care.
- 2 SUPPRESS MAX MESSAGE
- 3 SUPPRESS BOTH MESSAGES

Standard HELP Prompt:

Enter appropriate action, or type a '?' to see what you can do: ?
Edit choices

You may make the following choices at this prompt:

1. Enter 'A' to add more items for the correct term.
2. Enter 'T' to edit the information that is displayed in the header for the current term.
3. You may choose one of the items in the above list, and edit the information it contains by entering the item number from the list.
4. To delete a selection from the above list, enter a number followed by an '@'. E.g. 2@
5. Enter 'R' to redisplay the selection list.
6. You may change the display order of an item by entering the item number from the list followed by a 'D'. E.g. 1D will edit the display order of item number 1.

In discussing the details of this option, selective system prompts are omitted due to the redundancy of their presence (e.g., Are you adding 'XXX' as a new AGGREGATE TERM). Also, the Aggregate Term file is known as the 'file'.

The Patient Plan of Care, Site Configuration option should be given only to the ADP Coordinator or specific users who are responsible for adding and modifying the patient plan of care data base.

Future Plans:

Future enhancements to this portion of the patient plan of care module include reducing keystrokes for adding or editing to the aggregate term file.

Menu Display:

Select Nursing Features (all options) Option: 7 Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Screen Prints:

Select Clinical Site File Functions Option: 2 Patient Plan of Care, Site Configuration

Upon entering this option, the first thing the user is able to do is to enter/edit all of the site parameters that pertain to the Standard Patient Plan of Care print and edit options. The following will be displayed:

```
PATIENT PLAN OF CARE HEADER: Patient Plan of Care
PATIENT PROBLEM HEADER: Diagnosis
GOALS/EXPECTED OUTCOMES HEADER: Standards of Care
INTERVENTIONS/ORDERS HEADER: Standards of Practice
DEFAULT EVALUATION DATE: T+7
DEFAULT TARGET DATE: T+7
```

Do you wish to edit any of this data? NO// **YES**

If this question is answered NO, the user will not see the next six prompts.

PATIENT PLAN OF CARE HEADER: Patient Plan of Care// <RET>

The data in this field allows the site to change the title of the report generated by the Patient Plan of Care, Print (NURCPP-CARE) option from Patient Plan of Care to whatever is desired. E.g. Patient Care Plan.

PATIENT PROBLEM HEADER: Diagnosis// <RET>

The data in this field allows the site to change the header Patient Problem for the report generated by the Patient Plan of Care, Print (NURCPP-CARE) option to whatever is contained in this field. If this field has no data, the Patient Problem heading will still print.

GOALS/EXPECTED OUTCOMES HEADER: Standards of Care// <RET>

The data in this field allows the site to change the Goals/Expected Outcomes heading on the report generated by the Patient Plan of Care, Print (NURCPP-CARE) option to whatever is contained in this field. If this field has no data then the heading Goals/Expected Outcomes will be used.

INTERVENTIONS/ORDERS HEADER: Standards of Practice
Replace <RET>

The data in this field allows the site to change the Nursing Interventions/Orders heading of the report generated by the Standard Patient Plan of Care, Print (NURCPP-CARE) option to whatever is contained in this field. If this field has no data, then the Nursing Interventions/Orders heading will be used.

DEFAULT EVALUATION DATE: T+7// <RET>

The data in this field represents the default evaluation date that is seen during the Standard Patient Plan of Care, Edit (NURCPE-CARE) option when an evaluation date for a problem is edited.

DEFAULT TARGET DATE: T+7// <RET>

The data in this field represents the default target date that is seen during the Standard Patient Plan of Care, Edit (NURCPE-CARE) option when an target date for a goal is edited.

This is the end of the site parameters. From this point on the user is editing the content of the Patient Plan of Care data.

Nursing Care Plan

Classification: PRIME DOCUMENT Output Format: TABULAR

Type of Term: FRAME

Minimum number of selections: 1

1. Medical Diagnoses
2. Nursing Problems
3. Optional Care Plans

Classification, output format, type of term, and minimum number of selections, are fields within the file for the term, patient plan of care, which identify attributes for that term. For the user's convenience this data is displayed. At this point we want to go lower in the care plan hierarchy under nursing problems to modify data, therefore, enter the number 2.

Enter appropriate action, or type a '?' to see what you can do: 2

Nursing Problems

Output Format: TABULAR

Type of Term: FRAME

Minimum number of selections: 1

1. Activities of Daily Living
2. Circulatory System
3. Cognitive-Sensory Area
4. Elimination
5. Health Management
6. Integumentary (Skin)
7. Musculoskeletal/Neurological
8. Nutrition-Metabolic Area
9. Psycho-Social Area
10. Respiratory System
11. Sexual Functioning/Reproductive System
12. Sleep/Rest
13. Spiritual Needs

Enter appropriate action, or type a '?' to see what you can do: 1

Activities of Daily Living

Classification: NURSING SECTION Output Format: TABULAR

Type of Term: FRAME

Minimum number of selections: 1

1. Coping, Ineffective Family
2. Home Maintenance Management, Impaired
3. Self-Care Deficit [Specify]

Enter appropriate action, or type a '?' to see what you can do: 1

Coping, Ineffective Family

Classification: NURSING PROBLEM Output Format: TABULAR

Type of Term: FRAME

Minimum number of selections: 1

1. Defining Characteristics
2. Etiology/Related and/or Risk Factors
3. Goals/Expected Outcomes
4. Nursing Intervention/Orders
5. Related Problems

Remember the HELP Prompt?

Enter appropriate action, or type a '?' to see what you can do: ?

Edit choices

You may make the following choices at this prompt:

1. Enter 'A' to add more items for the correct term.
2. Enter 'T' to edit the information that is displayed in the header for the current term.
3. You may choose one of the items in the above list, and edit the information it contains by entering the item number from the list.
4. To delete a selection from the above list, enter a number followed by an '@'. E.g. 2@
5. Enter 'R' to redisplay the selection list.
6. You may change the display order of an item by entering the item number from the list followed by a 'D'. E.g. 1D will edit the display order of item number 1.

There are several methods which could be used to explain how terms are constructed within this file. It may be more meaningful to provide examples currently in the system, after which the user can apply them to site specific modifications. When adding new data to a level within the hierarchy, enter the letter A; to modify the attributes describing an existing term, enter the letter T. Since our purpose is to explain existing data, we will enter T.

Example 1: Reviewing attributes at the Nursing Problem level for an existing term.

```
Enter appropriate action, or type a '?' to see what you can do: T
NAME: Coping, Ineffective Family
      Replace <RET>
TERM DEFINITION:
  1>A usually supportive primary person (family member or close friend)
  2>is providing insufficient, ineffective, or compromised support,
  3>comfort, assistance, or encouragement that may be needed by the
  4>client to manage or master adaptive tasks related to the client's
  5>health challenge.
Edit? NO// <RET>
TYPE OF TERM: FRAME// <RET>
```

Since data is found under this problem, the type of term is 'frame'.

```
CLASSIFICATION: NURSING PROBLEM// <RET>
LEAD TEXT: <RET>
```

Will seldom be completed at the problem level.

```
TRAIL TEXT: <RET>
```

Will seldom be used at the problem level.

```
FORMAT OF OUTPUT: TABULAR// <RET>
```

Standard response for ALL care plan entries.

```
MIN: 1// <RET>
```

Always enter '1'.

MAX: <RET>

Leave blank.

SUPPRESS MIN/MAX MESSAGE: <RET>

Leave blank.

ASK ADDITIONAL TEXT: <RET>

Can be bypassed at this level.

Remember if there had not been a Coping, Ineffective Family term in the file, and you wanted to add it under the problem, Activities of Daily Living, then the following would have taken place:

Example 2: Adding Nursing Problems.

```
Activities of Daily Living
  Classification: NURSING SECTION   Output Format: TABULAR
  Type of Term: FRAME
  Minimum number of selections: 1
    1. Home Maintenance Management, Impaired
    2. Self-Care Deficit [Specify]
```

Enter appropriate action, or type a '?' to see what you can do: **A**

Select term to add: **Coping, Ineffective Family**

This entry would have been identified as not being in the system and you would have had to complete all field attributes as reviewed above. After completing the data entry the new term is displayed in alphabetical order. The list is automatically renumbered:

```
Activities of Daily Living
  Classification: NURSING SECTION   Output Format: TABULAR
  Type of Term: FRAME
  Minimum number of selections: 1
    1. Coping, Ineffective Family
    2. Home Maintenance Management, Impaired
    3. Self-Care Deficit [Specify]
```

Now that you have an understanding of the process for adding terms and their attributes to the file, the following examples describe the file attributes used for other segments of the patient plan of care.

Example 3: Adding Etiology/Related and/or Risk Factors.

In constructing a new patient problem, you will likely have to enter a new Etiology/Related and/or Risk Factors.

NAME: Etiology/Related and/or Risk Factors
 TERM DEFINITION:
 1> <RET>
 TYPE OF TERM: 2 FRAME
 CLASSIFICATION: **RELATED FACTOR**
 LEAD TEXT: <RET>
 TRAIL TEXT: <RET>
 FORMAT OF OUTPUT: **T** TABULAR
 MIN: 1
 MAX: <RET>
 SUPPRESS MIN/MAX MESSAGE: <RET>
 ASK ADDITIONAL TEXT: **YES**

Example 4: Adding Goals/Expected Outcomes.

In constructing a new patient problem, you will likely have to enter a new Goals/ Expected Outcomes.

NAME: **Goals/Expected Outcomes**
 TERM DEFINITION:
 1> <RET>
 TYPE OF TERM: 2 FRAME
 CLASSIFICATION: **GOALS/EXPECTED OUTCOMES**
 LEAD TEXT: <RET>
 TRAIL TEXT: <RET>
 FORMAT OF OUTPUT: **T** TABULAR
 MIN: 1
 MAX: <RET>
 SUPPRESS MIN/MAX MESSAGE: <RET>
 ASK ADDITIONAL TEXT: **YES**

Example 5: Adding Nursing Intervention/Orders.

In constructing a new patient problem, you will likely have to enter a new Nursing Intervention/Orders.

NAME: **Nursing Intervention/Orders**
 TERM DEFINITION:
 1> <RET>
 TYPE OF TERM: 2 FRAME
 CLASSIFICATION: **NURSING INTERVENTION**
 LEAD TEXT: <RET>
 TRAIL TEXT: <RET>
 FORMAT OF OUTPUT: **T** TABULAR
 MIN: 1
 MAX: <RET>
 SUPPRESS MIN/MAX MESSAGE: <RET>
 ASK ADDITIONAL TEXT: **YES**

Example 6: Adding Related Problems.

In constructing a new patient problem, you probably will have to enter a new Related Problems.

```
NAME: Related Problems
TERM DEFINITION:
  1> <RET>
TYPE OF TERM: FRAME// <RET>
CLASSIFICATION: RELATED PROBLEM// <RET>
LEAD TEXT: <RET>
TRAIL TEXT: see// <RET>
FORMAT OF OUTPUT: TABULAR// <RET>
MIN: 1// <RET>
MAX: <RET>
SUPPRESS MIN/MAX MESSAGE: <RET>
ASK ADDITIONAL TEXT: YES// <RET>
```

Example 7: Building terms with an associated date.

The user must "tell" the system that a date needs to be associated with a goal or an order. If a term does not need an associated date, then do NOT complete the Classification field (enter <RET> at the prompt).

GOAL EXAMPLE:

Within the patient plan of care, the following will appear as a list of goals on a particular Goals/Expected Outcomes frame:

```
Goals/Expected Outcomes
*****
      1. demonstrates realistic responses to stress           08/09/96(T)
      .
      .
```

To build a goal, add a new frame or term on the Goals/Expected Outcomes frame as described before, but make sure the Classification field equals GOAL. This will allow you to associate a target date with this goal.

```
NAME: demonstrates realistic responses to stress
TERM DEFINITION:
  1> <RET>
TYPE OF TERM: 3 TERM
CLASSIFICATION: GOAL
```

This classification should be used with every goal needing a target date.

LEAD TEXT: <RET>
 TRAIL TEXT: <RET>
 FORMAT OF OUTPUT: TABULAR// <RET>
 demonstrates realistic responses to stress
 Classification: GOAL Output format: TABULAR
 Type of Term: TERM

Enter appropriate action, or type a '?' to see what you can do: <RET>

Goals/Expected Outcomes
 Classification: GOALS/EXPECTED OUTCOMES Output Format: TABULAR
 Type of Term: FRAME Ask Additional Text: YES
 Minimum number of selections: 1
 Trail Text: family demonstrates
 1. demonstrates realistic responses to stress The date is associated
 with this term.
 2. effective decision making skills
 3. effective family coping skills
 4. effective problem solving

ORDERS EXAMPLE:

Within the patient plan of care, the following will appear as a list of interventions on a particular Nursing Intervention/Orders:

Nursing Intervention/Orders

 1. teach effective coping skills 08/09/90(T)
 .
 .

To build an intervention, add a new frame or term on the Nursing Intervention/ Orders frame as described before, but make sure the Classification field equals ORDERABLE. This will allow you to discontinue interventions as appropriate.

NAME: **teach effective coping skills**
 TERM DEFINITION:
 1> <RET>
 TYPE OF TERM: FRAME// <RET>
 CLASSIFICATION: ORDERABLE// <RET>
 LEAD TEXT: <RET>
 TRAIL TEXT: <RET>
 FORMAT OF OUTPUT: TABULAR// <RET>
 MIN: 1// <RET>
 MAX: <RET>
 SUPPRESS MIN/MAX MESSAGE: <RET>
 ASK ADDITIONAL TEXT: YES// <RET>

The resulting frame will look like the following:

teach effective coping skills

Clinical Site Files

```
Classification: ORDERABLE   Output Format: TABULAR
Type of Term: FRAME   Ask Additional Text: YES
Minimum number of selections: 1
  1. assertiveness
  2. help-seeking
  3. problem solving/decision making
```

Example 8: Lead text.

In printing data, you might want an outcome to display:

```
Goals/Expected Outcomes
  family demonstrates effective decision making skills
```

Within the file, you need to set the attributes to provide the lead text. The lead text does not display through the edit routine but on the printed patient plan of care. Your file attribute display should resemble:

```
NAME: effective decision making skills
      Replace <RET>
TERM DEFINITION:
  1> <RET>
TYPE OF TERM: TERM// <RET>
CLASSIFICATION: GOAL// <RET>
LEAD TEXT: family demonstrates
TRAIL TEXT: <RET>
FORMAT OF OUTPUT: TABULAR// <RET>
```

As you exit the entry, your finished display should appear as:

```
effective decision making skills
  Classification: GOAL
  Type of Term: TERM
  Lead Text: family demonstrates
```

The above principle can be used to display lead text for an etiology, related problem, or order. Trail text is the same as lead text with the exception that it appear at the end of the term for which it is defined and not the beginning.

Example 9: Adding selections which have no subselections.

This example adds a term to an order:

```
teach effective coping skills
  Classification: ORDERABLE   Output Format: TABULAR
  Type of Term: FRAME   Ask Additional Text: YES
  Minimum number of selections: 1
```

Enter appropriate action, or type a '?' to see what you can do: **A**

Select term to add: **assertiveness**

Are you adding 'assertiveness' as a new AGGREGATE TERM (the 6571ST)? **Y**

teach effective coping skills

Classification: ORDERABLE Output Format: TABULAR

Type of Term: FRAME Ask Additional Text: YES

Minimum number of selections: 1

1. assertiveness

Enter appropriate action, or type a '?' to see what you can do: **1**

assertiveness

Enter appropriate action, or type a '?' to see what you can do: **T**

NAME: assertiveness

Replace **<RET>**

TERM DEFINITION:

1**<RET>**

TYPE OF TERM: **3** TERM

CLASSIFICATION: **<RET>**

LEAD TEXT: **<RET>**

TRAIL TEXT: **<RET>**

Menu Access:

The Patient Plan of Care, Site Configuration option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURSPT-WRDACT

Ward Activation Patient Update

Description:

This option sets the patient care status field and the status of all patients assigned to the ward to ACTIVE. The activation of nursing wards should be done through this option; do NOT activate locations through the Nursing Location File, Edit (NURSFL-LOC) accessed through the Nursing Package Site File Function menu. Certain nursing options (e.g., classification edits and reports) will not function for a nursing location until it has been activated. This option should also be used when any MAS ward changes and nursing AMIS bed section changes are entered into the NURS Location (#211.4) file.

Additional Information:

Menu Display:

Select Nursing Features (all options) Option: 7 Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Screen Prints:

Select Nursing Package Site File Functions Option: 3 Ward Activation Patient Update

On entering this option a background routine performs a check to see if all MAS ward locations have been associated with a nursing location.

Checking to see if every MAS Ward has a corresponding NURSING Unit

If everything is ok, then the following prompt appears:

Select UNIT: 13

Enter the name of the unit you wish to activate. Each location name must be entered separately.

```
1 13E
2 13W
CHOOSE 1-2: 1
Select UNIT: <RET>
Ward Activation and Patient entry for the following Nursing Unit(s):

13E

Done ...
```

Note: If all MAS ward locations do not have a corresponding nursing location the following report displays on your screen:

```
The following MAS Wards do not have corresponding Nursing Locations:
51A
CCU
```

Press return to continue: <RET>

After the system displays those wards which are not associated with a nursing location the user will exit the option. The system will not allow any nursing ward locations to be activated until the problem is resolved. Obtain the report from the option, Print Existing Location File Entries (located in the Nursing Package Site File Function menu). This report indicates current nursing locations and MAS ward relationships. Editing of these relationships is done by using the Nursing Location File, Edit option.

Menu Access:

The Ward Activation Patient Update option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURSPR-WRDINA

Ward Deactivation Patient Update

Description:

This option sets the patient care status field and the status of all patients assigned to the ward to INACTIVE. The deactivation of nursing wards should be done through this option; do NOT deactivate locations through the Nursing Location File, Edit (NURSFL-LOC) option accessed through the Nursing Package Site File Function menu. This option should also be used when any MAS ward changes and nursing AMIS bed section changes are entered into the NURS Location (#211.4) file.

Menu Display:

Select Nursing Features (all options) Option: 7 Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Screen Prints:

Select Nursing Package Site File Functions Option: 4 Ward Deactivation Patient Update

On entering this option a background routine performs a check to see if all MAS ward locations have been associated with a nursing location.

Checking to see if every MAS Ward has a corresponding NURSING Unit

If everything is ok, then the following prompt will appear:

```
Select UNIT: 5E
Select UNIT: <RET>
```

Ward Deactivation and Patient entry for the following Nursing Unit(s):

```
5E
```

```
Done ...
```

Note: If all MAS ward locations do not have a corresponding nursing location, the following report displays on your screen:

Checking to see if every MAS Ward has a corresponding NURSING Unit

The following MAS Wards do not have corresponding NURSING Units:

4M

Press return to continue: <RET>

After the system displays those wards which are not associated with a nursing location, the user will exit the option. The system will not allow any nursing ward locations to be deactivated until the problem is resolved. Running the Print Existing Location File Entries option (located in the Nursing Package Site File Function menu) will assist you by indicating current nursing locations and MAS ward relationships. If editing is required, use the Nursing Location File, Edit option.

Menu Access:

The Ward Deactivation Patient Update option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-VIT FILECONF

Selected V/M Site File Functions

Description:

¹This menu option is assigned to appropriate application coordinators (e.g., Vitals/Measurements, Nursing) and contains options that define vitals/ measurement qualifiers and their synonyms. Files edited by these menu's options are the GMRV Vital Qualifier (#120.52) and GMRV Vital Category (#120.53) files.

Additional Information:

This menu lists options that give the flexibility to add a site, and a quality to the Detailed Blood Pressure option. Please refer to the examples in the following options to see how this function for documenting detailed blood pressure works.

The information edited in the above files is used in the following options:

1. Vitals/Measurement Data Entry
2. Vitals/Measurements Results Reporting
3. Edit a Vital/Measurement Entered in Error.

Which are located in specific Nursing application menu options.

Menu Display:

Select Selected V/M Site File Functions Option:

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Select Clinical Site File Functions Option: **5** Selected V/M Site File Functions

- 1 Enter/Edit Vitals Qualifiers
- 2 Change Default Qualifiers for Temp./Pulse
- ²3 Display Vitals Category/Qualifier/Synonym Table

¹ Patch NUR*4*4 August 1997

² Patch NUR*4*4 August 1997

Menu Access:

The Selected V/M Site File Functions option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-VIT VMSITE

Enter/Edit Vitals Qualifiers

Description:

¹This option is used by the application coordinator to create and edit hospital-wide qualifiers and synonyms associated with vital signs and other patient measurements captured in the Vitals/Measurements application. Data is stored in the GMRV Vital Qualifier (#120.52) file.

Additional Information:

²Qualifiers describe how patient vital signs and miscellaneous measurements were taken. These package qualifiers are categorized by location (e.g., right arm, left leg), position (e.g., lying, sitting, standing), method (e.g., cuff, Doppler, auscultate, assisted ventilator, T-piece), site (e.g., right, left), quality (e.g., actual, estimated), and cuff size (e.g., adult, small adult, pediatric). Synonyms are used as qualifier abbreviations and are appended to the measurement's numeric values on graphic reports. For your convenience, we have provided a report that lists the current vital types and their associated categories, qualifiers and synonyms found in the Vitals/Measurements application. This report can be printed by running the Display Vitals Category/Qualifier/Synonym Table option in the Vitals/Measurements Site Files Menu. Qualifier synonyms do not print on the Health Summary package reports.

Restrictions:

³A new qualifier category cannot be entered into the software by the package coordinator. Also, new qualifier categories cannot be associated with a different vital type without a software patch issued by the developer. Please note, that once a qualifier is associated with a category of a vital type, it cannot be deleted, ONLY edited.

¹ Patch NUR*4*4 August 1997

² Patch NUR*4*4 August 1997

³ Patch NUR*4*4 August 1997

Menu Display:

Select Vitals/Measurement Option: **4** Vitals/Measurements Site Files Menu

- 1 Edit Vitals Site Parameter File
- 2 Change Default Qualifiers for Temp./Pulse
- 3 Enter/Edit Vitals Qualifiers
- ¹4 Display Vitals Category/Qualifier/Synonym Table
- 5 Edit Administration Schedules File
- 6 Display Administration Schedule File
- 7 Create Vital Measurement Quick Order Protocol

Screen Prints:

Select Vitals/Measurements Site Files Menu Option: **3** Enter/Edit Vitals Qualifiers

Enter/Edit Vital qualifiers for:

- 1. B/P 2. Pulse 3. Resp. 4. Temp. 5. Weight 6. Circum/Girth
- 7. Pulse Ox. 8. Height

²The following is an example of setting up the software to identify and document that oxygen was administered when the pulse oximetry reading was taken. This is probably the most difficult relationship identified in the software. As you review other V/M entries, you will note that the category/qualifier and synonym relationships are more logically understood.

Select a number of vital type: **7** PULSE OXIMETRY

Enter the number of the vital type you wish to edit.

- 1. METHOD

Enter the number of the qualifier category you wish to enter/edit. Since only one category is listed, enter '1'.

Select the number of the qualifier category for PULSE OXIMETRY that you want to enter/edit: **1**

In this next step, the package coordinator associates the device (delivery method) used to administer the oxygen by typing the name of the vital qualifier, Venturi mask.

¹ Patch NUR*4*4 August 1997

² Patch NUR*4*4 August 1997

Clinical Site Files

PULSE OXIMETRY has the following METHOD qualifiers:

AEROSOL/HUMIDIFIED MASK
FACE TENT
MASK
NASAL CANNULA
NON RE-BREATHER
PARTIAL RE-BREATHER
T-PIECE
TRACHEOSTOMY COLLAR
VENTILATOR

Enter a Vital Qualifier: **VENTURI MASK**

Are you adding 'VENTURI MASK' as
a new GMRV VITAL QUALIFIER (the 66TH)? No// **Y** (Yes)
QUALIFIER: VENTURI MASK// **<RET>** PO2

¹Enter the appropriate synonym (1-3 characters) for the qualifier. Remember, that if you are unsure of the correctness of the qualifier to the category, answer 'No' at this prompt. When 'Yes' is entered to this question, the user can only change the stored entry, not delete it.

SYNONYM: **VM**

The list of all qualifiers associated with the method category for pulse oximetry is re-displayed.

PULSE OXIMETRY has the following METHOD qualifiers:

AEROSOL/HUMIDIFIED MASK
FACE TENT
MASK
NASAL CANNULA
NON RE-BREATHER
PARTIAL RE-BREATHER
T-PIECE
TRACHEOSTOMY COLLAR
VENTILATOR
VENTURI MASK

Enter a Vital Qualifier: **<RET>**

²At this prompt you may enter **<RET>** to return to the main menu, enter additional category (method) related qualifiers associated with the vital type, or edit existing qualifiers. Remember that no qualifiers may be deleted.

Menu Access:

The Enter/Edit Vitals Qualifiers option is accessed through the Selected V/M Site File Functions option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

¹ Patch NUR*4*4 August 1997

² Patch NUR*4*4 August 1997

NURCPE-VIT VMQUALTY

Change Default Qualifiers for Temp./Pulse

Description:

This option is for the ADP coordinator to change hospital-wide default qualifiers for temperature and pulse. The default information is stored in the GMRV Vital Category (#120.53) file.

Additional Information:

The exported default for temperature is oral and for pulse, the default is radial. In a future release, the Vitals/Measurements Focus Group has requested the defaults be location based (i.e., wards, nursing units, clinics).

Menu Display:

Select Clinical Site File Functions Option: **5** Selected V/M Site File Functions

- 1 Enter/Edit Vitals Qualifiers
- 2 Change Default Qualifiers for Temp./Pulse
- 3** Display Vitals Category/Qualifier/Synonym Table

Screen Prints:

Select V/M Site File Functions Option: **2** Change Default Qualifiers for Temp./Pulse

TEMPERATURE has the following location qualifiers:

- 1 AXILLARY
- 2 CORE
- 3 ORAL
- 4 RECTAL
- 5 SKIN
- 6 TYMPANIC

To change the temperature default from oral to tympanic, the coordinator enters the number '6' behind the //. If no change in the default is required, enter <RET> behind the //.

Enter a number for TEMPERATURE default qualifier
or ^ to quit or @ to delete: ORAL// **6** TYMPANIC

¹ Patch NUR*4*4 August 1997

Clinical Site Files

PULSE has the following location qualifiers:

- 1 APICAL
- 2 BILATERAL PERIPHERALS
- 3 BRACHIAL
- 4 CAROTID
- 5 DORSALIS PEDIS
- 6 FEMORAL
- 7 OTHER
- 8 PERIPHERAL
- 9 POPLITEAL
- 10 POSTERIOR TIBIAL
- 11 RADIAL
- 12 ULNAR

Enter an appropriate default qualifier for PULSE or <RET> to retain the present default.

Enter a number for PULSE default qualifier
or ^ to quit or @ to delete: RADIAL// <RET>

Menu Access:

The Change Default Qualifiers for Temp./Pulse option is accessed through the Selected V/M Site File Functions option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-VIT CAT/QUAL TABLE

¹Display Vitals Category/Qualifier/Synonym Table

Description:

²This option displays a list of categories, qualifiers and synonyms associated with individual vital types (e.g., blood pressure, temperature, pulse, respirations, weight, circumference/girth and pulse oximetry). Data comes from the GMRV Vital Qualifier (#120.52) file and the GMRV Vital Category (#120.53) file.

Additional Information:

³Qualifiers describe how patient vital signs and miscellaneous measurements were taken. These package qualifiers are categorized by location (e.g., right arm, left leg), position (e.g., lying, sitting, standing), method (e.g., cuff, Doppler, auscultate, assisted ventilator, T-piece), site (e.g., right, left), quality (e.g., actual, estimated), and cuff size (e.g., adult, small adult, pediatric). Synonyms are used as qualifier abbreviations appended to Vitals/Measurements numeric values on graphic reports. Qualifier synonyms do not print on the Health Summary package reports. Data displayed in this report can be updated by the application coordinator through the Enter/Edit Vitals Qualifiers option in the Vitals/Measurements Site Files Menu.

Menu Display:

Select Clinical Site File Functions Option: 5 Selected V/M Site File Functions

¹ Patch NUR*4*4 August 1997

NURCPE-I/O-FILE EDIT

Configure I/O Files (ADP Coordinator Only)

Description:

This menu is provided for the Nursing ADP Coordinator to configure the following file entries: Input Subtype (#126.5), Input Type (#126.56), Output Type (#126.58), Output Subtype (#126.6), IV Site (#126.7), Intake Items (#126.8), NUR IV Solution (#126.9), NUR Shift/Other (#126.95), IV Site Description (#126.72), IV Catheter (#126.74) and IV DC'ed Reason (#126.72).

Additional Information:

The first area of concern is to ensure that you have the appropriate entries in the site specific files to use the software at your hospital, ambulatory care facility, or other VHA facility. When the application is installed, all files have a few entries to assist you with initially running the software, but you will have to enter appropriate facility related data in the site configurable files. You may always edit file data if that data does not apply to a specific site.

Menu Display:

Select Nursing Features (all options) Option: 7 Clinical Site File Functions

- 1 Standard Patient Plan of Care Print
- 2 Patient Plan of Care, Site Configuration
- 3 Ward Activation Patient Update
- 4 Ward Deactivation Patient Update
- 5 Selected V/M Site File Functions ...
- 6 Configure I/O Files (ADP Coordinator Only) ...

Select Clinical Site File Functions Option: 6 Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

¹ Patch NUR*4*4 August 1997

Menu Access:

The Configure I/O Files (ADP Coordinator Only) option is accessed through the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-INPUT FILE1

Intake Type

Description:

This option is for the Nursing ADP Coordinator to configure the NON-IV intake type entries for the Input Type (#126.56) file. For example, PO, TUBE FEEDING, and OTHER are input types.

Additional Information:

This information is used in the following options:

- Enter/Edit Patient Intake
- Print I/O Summary by Patient (by Shift & Day(s))
- Print I/O Summary (Midnight to Present)
- Print I/O Summary (48 Hrs)
- 24 Hours Itemized Shift Report

The entries of the GMRY Input Type Name prompt cannot be deleted except by IRMS staff. A user may change the entry name by editing the information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **1** Intake Type

Select GMRY INPUT TYPE NAME: **GAVAGE**

Are you adding 'GAVAGE' as a new GMRY INPUT TYPE (the 5TH)? No// **Y** (YES)

Enter appropriate input type name. The following is an example of possible choices associated with this field:

IRRIGATION 3
OTHER 4
PO 1
TUBE FEEDING 2

NAME: GAVAGE//<RET>

ORDER: 5

This field holds the listing order for the patient intake/output reports.

Select GMRY INPUT TYPE NAME: <RET>

Menu Access:

The Intake Type option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-OUTPUT FILE1

Output Type

Description:

This option is provided for the ADP Coordinator to configure the entries for the GMRY Output Type (#126.58) file. URINE, STOOL and DRAINS, for example, are major output types.

Additional Information:

This information is used in the following options:

- Enter/Edit Patient Output
- Print I/O Summary by Patient (by Shift & Day(s))
- Print I/O Summary (Midnight to Present)
- Print I/O Summary (48 Hrs)
- 24 Hours Itemized Shift Report

The entries of the GMRY Output Type Name prompt cannot be deleted except by IRMS staff. A user may change the entry name by editing the information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **2** Output Type

Select GMRY OUTPUT TYPE: **OTHER**

Are you adding 'OTHER' as a new GMRY OUTPUT TYPE (the 6TH)? No// **Y** (YES)

Answer with the appropriate output type. The following is an example of possible choices found in this field:

DRAINAGE 4
EMESIS 3
FECES 5
N/G 2
URINE 1

OUTPUT TYPE: OTHER//<RET>

ORDER: 6

This field holds the listing order for the patient intake/output reports.

Select GMRY OUTPUT TYPE:<RET>

Menu Access:

The Output Type option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-OUTPUT FILE2

Output Subtype

Description:

This option allows the ADP Coordinator to enter the entries for the GMRY Output Subtype (#126.6) file pointed to by the GMRY Patient I/O File (#126). VOID, FOLEY and STRAIGHT CATH, for example, are subtypes of URINE. This file allows package coordinators to identify specific types or methods of output type collection.

Additional Information:

This information is used in the following options:

- Enter/Edit Patient Output
- 24 Hours Itemized Shift Report

The entries of the GMRY Output Subtype prompt cannot be deleted except by IRMS staff. A user may change the entry name by editing the information.

Restrictions:

Only URINE and DRAINAGE output types should have associated output subtypes.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **3** Output Subtype

Select GMRY OUTPUT SUBTYPE: **CHEST TUBE,LEFT**

Are you adding 'CHEST TUBE,LEFT' as a new GMRY OUTPUT SUBTYPE (the 6TH)?
No// **Y** (YES)

Answer with appropriate output subtype. The following is an example of possible choices found in the field:

CHEST TUBE,RIGHT DRAINAGE
FOLEY URINE
SHEATH CATH URINE
STRAIGHT CATH URINE
VOID URINE

GMRY OUTPUT SUBTYPE OUTPUT TYPE: **DRAINAGE**
OUTPUT SUBTYPE: CHEST TUBE,LEFT//<RET>
OUTPUT TYPE: DRAINAGE//<RET>

Select GMRY OUTPUT SUBTYPE:<RET>

Menu Access:

The Output Subtype option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-INTAKE ITEMS

Intake Items

Description:

This option allows the ADP Coordinator to enter items into the GMRY Intake Items (#126.8) file pointed to by the GMRY Patient I/O File (#126). The entries in the 126.8 file are used to identify specific fluid intake items associated with detailed oral fluids, tube feeding preparations, irrigation solution, etc. The information collected is the name of the intake item (e.g., water), the volume of the fluid's container, and the input type associated with the intake item's name (e.g., po, irrigation).

Additional Information:

This information is used in the following options:

- Enter/Edit Patient Intake
- 24 Hours Itemized Shift Report

The entries of the GMRY Intake Items Name prompt cannot be deleted except by IRMS staff. A user may change the entry name by editing the information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **4** Intake Items

Select GMRV INTAKE ITEMS NAME: **SODA**

Are you adding 'SODA' as a new GMRV INTAKE ITEMS (the 14TH)? No// **Y** (YES)

Enter appropriate intake item.

NAME: SODA//<RET>

VOLUME: **360**

Enter amount of intake item.

Select INPUT TYPE: **PO**

Are you adding 'PO' as a new INPUT TYPE (the 1ST for this GMRV INTAKE ITEMS)? No// **Y** (YES)

Enter appropriate input type.

Select INPUT TYPE:<RET>

Select GMRV INTAKE ITEMS NAME:<RET>

Menu Access:

The Intake Items option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-IV SITE

IV Site

Description:

This option allows the ADP Coordinator to enter IV sites into the GMRY IV Site (#126.7) file. The entries are names of anatomical sites such as right wrist, left hand, etc..

Additional Information:

This information is used to track the IV insertion site and assist with documentation of the site's status and surrounding skin integrity. Deletion of file data does not affect existing patient information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **5** IV Site

Select GMRY IV SITE: **WRIST,RT**

Are you adding 'WRIST,RT' as a new GMRY IV SITE (the 12TH)? No// **Y** (YES)

Enter appropriate IV site.

IV SITE: WRIST,RT//<RET>

Select GMRY IV SITE:<RET>

Menu Access:

The IV Site option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-IV SOL

IV Solution

Description:

This option allows the ADP Coordinator to enter IV solutions into the GMRY NUR IV Solution (#126.9) file. There are three fields associated with this option that store information on the IV solution: name, the type of solution (hyperal, piggyback, admixture, blood/blood products, and intralipids), and the volume of the solution.

Additional Information:

The IV solutions added to this file include admixtures, hyperals, intralipids, piggybacks and blood/blood products. This data is used only when the Pharmacy IV module interface is not available, when patient IV orders have not been entered into OE/RR and processed by pharmacy, or if an API (Application Program Interface) has not been written for a specific package (e.g., Blood Bank). Deletion of file data does not affect existing patient I/O information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **6** IV Solution

Select GMRY NUR IV SOLUTION NAME: **D10W (1000)**

Are you adding 'D10W (1000)' as a new GMRY NUR IV SOLUTION (the 31ST)? No//
Y (YES)

Enter the name of an appropriate IV solution.

GMRY NUR IV SOLUTION TYPE: **A** ADMIXTURE

Enter appropriate IV solution type. The following is a list of choices:

H	HYPERAL
P	PIGGYBACK
A	ADMIXTURE
B	BLOOD/BLOOD PRODUCT
I	INTRALIPIDS

NAME: D10W (1000)//<RET>

TYPE: ADMIXTURE//<RET>

VOLUME: **1000**

Enter amount of IV solution.

Select GMRY NUR IV SOLUTION NAME:<RET>

Note: The IV module can accommodate multiple types of IV solutions. Additives added to the bag can be treated as an independent solution. Therefore, you can add the additive solution into the IV SOLUTION file. For example: enter KCL 20 meq at the NAME prompt, ADMIXTURE at the TYPE prompt and 10 at the VOLUME prompt.

Menu Access:

The IV Solution option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-NURSHIFT

Shift Starting Hour and Other Parameters

Description:

This option allows the application coordinator to edit specific Intake and Output parameters that are stored in the GMRY NUR Shift/Other (#126.95) file. These parameters include the starting hours for the night, day, and evening shift (tour of duty) which is used to calculate a patient's total intake and output for a specific time span. A default volume for heparin and saline locks is also stored in this file.

Additional Information:

In this version of Intake and Output, the application can only assign shift start times for the entire hospital. In a future version, the application's functionality will be modified to accommodate unique shift times for specific wards or units. Also, the displaying of data for units with two tours of duty within a 24 hour time frame will be explored. The data type for the shift start hours is entered in military time (e.g., 0800, 1600, and 2400). The default volume for the heparin or saline locks and ports is also a hospital-wide value in this version.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **7** Shift Starting Hour and Other Parameters

Select GMRY NUR SHIFT/OTHER NAME: **HOSPITAL**

The data selected at this prompt cannot be edited.

NIGHT: 2400

Enter start time of night shift. Use military time.

DAY: 0700

Enter start time of day shift. Use military time.

EVENING: 330??

Enter start time of evening shift. Use military time.

Note: The program did not accept this entry as valid. Only military time is accepted.

EVENING: 1530

ML'S FLUSH: 2//<RET>

Enter the amount of fluid required to flush the heparin lock or port.

Select GMRY NUR SHIFT NAME/OTHER:<RET>

Menu Access:

The Shift Starting Hour and Other Parameters option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-SITE DESCRP

IV Site Description

Description:

This option allows the ADP Coordinator to enter IV site descriptions into the GMRY IV Site Description (#126.72) file. This information describes the condition of the skin around the insertion site of the IV catheter, needle, etc.

Additional Information:

This information is used for documenting site maintenance. Information is printed on the 24 Hours Itemized Shift Report, the Intravenous Infusion Flow Sheet, and the Nursing application's End of Shift Report. Deleting information from the file does not affect existing patient I/O information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **8** IV Site Description

Select GMRY IV SITE DESCRIPTION: **WARM**

Are you adding 'WARM' as a new GMRY IV SITE DESCRIPTION (the 8TH)? No// **Y**
(YES)

Answer with IV site description. The following is a list of choices:

DRAINAGE
NO REDNESS/PAIN/SWELLING
NON TENDER
RED
SLOUGH
SWOLLEN
TENDER

DESCRIPTION: WARM//<RET>

Select GMRV IV SITE DESCRIPTION:<RET>

Menu Access:

The IV Site Description option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-IV CATH

IV Catheter

Description:

This option allows the ADP Coordinator to enter different types of IV catheters, needles, etc. into the GMR Y IV Catheter (#126.74) file.

Additional Information:

This file contains a list of IV Instrumentation (i.e., needles, catheters, locks, butterflys, etc.) that might be used by clinicians to establish an IV infusion (continuous or intermittent) of fluids or drugs. Both the type of catheter and it's size should be contained in the IV catheter name (when appropriate). Refer to the example illustrated under Screen Prints. Deleting of data in this file does not affect existing patient I/O information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **9** IV Catheter

Select GMR Y IV CATHETER IV CATHETER TYPE/SIZE: **BUTTERFLY-20**

Are you adding 'BUTTERFLY-20' as a new GMR Y IV CATHETER (the 11TH)? No// **Y**
(YES)

Answer with IV catheter name. The following is a list of choices:

ANGIO CATH-14
 ANGIO CATH-16
 ANGIO CATH-18
 ANGIO CATH-20
 ANGIO CATH-22
 BUTTERFLY-16
 BUTTERFLY-18
 NEEDLE 1 1/4 IN-14
 NEEDLE 1 1/4 IN-16
 NEEDLE 1 1/4 IN-18

Note: In this file when you configure the entries, FileMan will order either numerically or alphabetically depending on your entries. For instance if you enter catheter size first, such as 18 and the user selects 18, then all the 18 catheters will be displayed for the user to select from.

IV CATHETER TYPE/SIZE: BUTTERFLY-20//<RET>

Select GMRY IV CATHETER IV CATHETER TYPE/SIZE:<RET>

Menu Access:

The IV Catheter option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

NURCPE-I/O-DC REASON

IV DC'ed Reason

Description:

This option allows the ADP Coordinator to enter and edit reasons for discontinuing an IV into the GMRY IV DC'ed Reason (#126.76) file.

Additional Information:

The information in this file can be edited (name change and data deleted) through this option. Editing of information will not affect existing patient I/O information.

Menu Display:

Select Clinical Site File Functions Option: **6** Configure I/O Files (ADP Coordinator Only)

- 1 Intake Type
- 2 Output Type
- 3 Output Subtype
- 4 Intake Items
- 5 IV Site
- 6 IV Solution
- 7 Shift Starting Hour and Other Parameters
- 8 IV Site Description
- 9 IV Catheter
- 10 IV DC'ed Reason

Screen Prints:

Select Configure I/O Files (ADP Coordinator Only) Option: **10** IV DC'ed Reason

Select GMRY IV DC'ED REASON NAME: **WRONG PATIENT**

Are you adding 'WRONG PATIENT' as a new GMRY IV DC'ED REASON (the 8TH)?
No// **Y** (YES)

Answer with IV DC'ed reason name. The following is a list of choices:

ACCIDENTALLY D/C'D

CLOTTED

COMPLETE A BOTTLE

INFUSED Note: INFUSED is the default.

IV INFILTRATED

ORDER EXPIRED/DC'D

SITE CONDITION

NAME: WRONG PATIENT//<RET>

Select GMRY IV DC'ED REASON NAME:<RET>

Menu Access:

The IV DC'ed Reason option is accessed through the Configure I/O Files (ADP Coordinator Only) option of the Clinical Site File Functions option of the Nursing Features (all options) menu.

Chapter 4 Special Functions

NURSSP-MENU

Special Functions

Description:

This is the main menu used to run backup routines, add/delete patients, etc., in the nursing software. Data used in these options is obtained from the following files:

- NURS Patient (#214) file
- NURS AMIS Daily Exception Report (#213.5) file
- NURS AMIS 1106 Manhours (#213.4) file
- NURS Location (#211.4) file
- NURS Staff (#210) file
- NURS Position Control (#211.8) file

Additional Information:

This group of options should be assigned to the nursing ADP Coordinator and other individuals responsible for the operation of the nursing application.

Menu Display:

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

- 1 Administration Records, Enter/Edit ...
- 2 Administration Records, Print ...
- 3 Administrative Site File Functions ...
- 4 Nursing Education Reports, Print ...
- 5 Patient Care Data, Enter/Edit ...
- 6 Patient Care Data, Print ...
- 7 Clinical Site File Functions ...
- 8 QI Data, Enter/Edit ...
- 9 Quality Performance Reports ...
- 10 QI Site Files ...
- 11 Special Functions ...

Select Nursing Features (all options) Option: **11** Special Functions

Special Functions

- 1 Admit/Transfer Pt. (Nursing Pkg. Only)
- 2 Inactivate/Disch. Pt. (Nursing Pkg. Only)
- 3 Employee Activation/Separation Report
- 4 Manual Nursing Acuity/Separation Run
- 5 Unclassified AMIS 1106 Patients
- 6 Manhours Exception Print by Service
- 7 Unclassified Midnight Patients
- 8 Manhours Exception Print by Location
- 9 Position Control/Staff File Integrity Report

Menu Access:

The Special Functions option is accessed through the Nursing Features (all options) menu.

NURSPT-ACT**Admit/Transfer Pt. (Nursing Pkg. Only)****Description:**

This option can directly admit a patient into the VISTA Nursing System. It is to be used only in the event that the MAS software does not automatically admit a patient into the Nursing System. This option does not replace the MAS ADT function. When MAS ADT software is down the admission and transferring of patients does not occur. Nursing Staff, assigned this option enter patient(s) and their locations into the Nursing System for the purpose of classifying, AMIS tracking, and so on. When MAS ADT software comes back on-line and the patient movements have been entered, an MAS background job updates entries as needed. Data is obtained from the NURS Patient (#214) file.

Additional Information:

The patient entered must be in the Patient (#2) file, however, this patient does not have to be active (an in-patient) in MAS.

Menu Display:

Select Nursing Features (all options) Option: **11** Special Functions

- 1 Admit/Transfer Pt. (Nursing Pkg. Only)
- 2 Inactivate/Disch. Pt. (Nursing Pkg. Only)
- 3 Employee Activation/Separation Report
- 4 Manual Nursing Acuity/Separation Run
- 5 Unclassified AMIS 1106 Patients
- 6 Manhours Exception Print by Service
- 7 Unclassified Midnight Patients
- 8 Manhours Exception Print by Location
- 9 Position Control/Staff File Integrity Report

Screen Prints:

Select Special Functions Option: **1** Admit/Transfer Pt. (Nursing Pkg. Only)

Select PATIENT NAME: **NURSPATIENT**,ONE 12-28-44 000522146
SC VETERAN

Enter patient name.

NURSPATIENT, ONE has been admitted into the NURSING SYSTEM.

Special Functions

NURSING LOCATION: NUR 10E// **3E**

Enter appropriate nursing location.

NURSING BED SECTION: SURGICAL// **<RET>**

Enter appropriate bedsection.

Example: If the patient has no previous entry in the Patient file then the following occurs:

Select PATIENT NAME: **NURSPATIENT,TWO**

Patient not admitted with MAS -- notify MAS

Note:

Patients entered in error through this option may be discharged through the Inactivate/Disch. Pt. (Nursing Pkg. Only) (NURSPT-INAC) option.

Menu Access:

The Admit/Transfer Pt. (Nursing Pkg. Only) option is accessed through the Special Functions option of the Nursing Features (all options) menu.

NURSPT-INAC**Inactivate/Disch. Pt. (Nursing Pkg. Only)****Description:**

This option inactivates a patient's record from the Nursing System and tracks discharge time from the ward. It does not replace the ADT (MAS) function but is to be used when the MAS ADT software is not running. When patients are discharged through this option, they will not appear in either the AMIS or midnight unclassified patients report. The discharge date and time can be edited through this option. Data is obtained from the NURS Patient (#214) file.

Menu Display:

Select Nursing Features (all options) Option: **11** Special Functions

- 1 Admit/Transfer Pt. (Nursing Pkg. Only)
- 2 Inactivate/Disch. Pt. (Nursing Pkg. Only)
- 3 Employee Activation/Separation Report
- 4 Manual Nursing Acuity/Separation Run
- 5 Unclassified AMIS 1106 Patients
- 6 Manhours Exception Print by Service
- 7 Unclassified Midnight Patients
- 8 Manhours Exception Print by Location
- 9 Position Control/Staff File Integrity Report

Screen Prints:

Select Special Functions Option: **2** Inactivate/Disch. Pt. (Nursing Pkg. Only)

Select PATIENT NAME: **NURSPATIENT, THREE** 03-19-41 000320231 SC
VETERAN

Enter patient name.

DATE/TIME DISCHARGED: NOW// **<RET>** (AUG 22,1986 14:18)

Enter date/time patient was discharged.

NURSPATIENT, THREE is discharged from the Nursing System.

Example:

If the patient's discharge date/time (from the nursing location) were incorrectly entered, the following prompts would allow the user to edit the data. The date and time does not have to be identical with that stored by MAS.

Special Functions

Select PATIENT NAME: **NURSPATIENT,FOUR** 01-27-49 000788766 SC
VETERAN

PATIENT HAS ALREADY BEEN DISCHARGED FROM THE NURSING SYSTEM.
DO YOU WANT TO CHANGE THE DISCHARGE DATE? NO// **Y** (YES)
DATE/TIME DISCHARGED: OCT 1,1986// **10/02** (OCT 2,1986)

Time is optional.

If for any reason the patient's discharge was canceled, the patient can be readmitted through the option, Admit/Transfer Pt. (Nursing Pkg. Only). This option is held by selected users (as identified by the nursing ADP Coordinator).

Select PATIENT NAME: **<RET>**

Menu Access:

The Inactivate/Disch. Pt. (Nursing Pkg. Only) option is accessed through the Special Functions option of the Nursing Features (all options) menu.

NURAED-BATSEP**Employee Activation/Separation Report****Description:**

¹This report prints a staff activation/separation listing on demand or when queued for a specific date by a user. A report by day may be printed for any of the last 30 days. Data comes from the NURS AMIS Daily Exception Report (#213.5) file.

Additional Information:

Employee activation/separation data is entered through the Staff Record Edit option. This report is dependent upon whether the Nursing Acuity/Separation Batch Job has run to completion. The Employee Activation/Separation Report can be queued to print daily through the TaskManager Activation/Separation Report (NURAED-BATSEP-QUEUE) option.

Future Plans:

This report will print for a specified date range.

Menu Display:

Select Nursing Features (all options) Option: **11** Special Functions

- 1 Admit/Transfer Pt. (Nursing Pkg. Only)
- 2 Inactivate/Disch. Pt. (Nursing Pkg. Only)
- 3 Employee Activation/Separation Report
- 4 Manual Nursing Acuity/Separation Run
- 5 Unclassified AMIS 1106 Patients
- 6 Manhours Exception Print by Service
- 7 Unclassified Midnight Patients
- 8 Manhours Exception Print by Location
- 9 Position Control/Staff File Integrity Report

Screen Prints:

Select Special Functions Option: **3** Employee Activation/Separation Report

Select Date of Staff Activation/Separation Report: T-1// **<RET>** (JAN 29, 1992)

Enter appropriate date.

¹ Patch NUR*4*38 January 2003

Special Functions

Select FACILITY (Press return for all facilities): <RET>

Enter appropriate facility.

DEVICE: HOME//Enter appropriate response

ON THE REPORT DATE, ASSIGNMENTS FOR THE FOLLOWING EMPLOYEES WERE ACTIVATED/SEPARATED. THE STATUS INDICATORS WERE MODIFIED APPROPRIATELY:

HINES						
EMPLOYEE ACTIVATION/SEPARATION REPORT JAN 29, 1992						
NAME	ACT/SEP	LOCATION	ST/VAC DT	POSITION	REASON	
NURSNURSE, ONE	ACT	3AM	JAN 29, 1992	RN		
NURSNURSE, TWO	ACT	3S	JAN 29, 1992	RN		
NURSNURSE, THREE	SEP	MED 4I	JAN 29, 1992	LPN 3	TRANSFERRED	
NURSNURSE, FOUR	ACT	3AM	JAN 29, 1992	RN		

TOTAL EMPLOYEES SEPARATED/ACTIVATED: 4

The above report indicates that three employees were assigned to new locations (two to 3AM and one to 3S) on 1/29/92 and all assumed staff nurse positions. Another action shows that an LPN left the MED 4I ward on 1/29/92 for another assignment.

If no employee assignment or position changes were processed then the following report would print:

HINES						
EMPLOYEE ACTIVATION/SEPARATION REPORT JAN 29, 1992						
NAME	ACT/SEP	LOCATION	ST/VAC DT	POSITION	REASON	
NO EMPLOYEES SEPARATED/ACTIVATED ON JAN 29, 1992						

Menu Access:

The Employee Activation/Separation Report option is accessed through the Special Functions option of the Nursing Features (all options) menu.

NURAAM-ACUMAN**Manual Nursing Acuity/Separation Run****Description:**

This option compiles the Patient Category Totals-AMIS 1106, Patient Category Totals-Midnight Acuity, manhour AMIS workload totals for the day and evening shifts, and Employee Activation/Separation Reports when TaskMan is down. It is a back-up for NURAAM-ACU (Nursing Acuity/Separation Run) option. This option should be run when members of the NURS-ADP mail group receive an alert stating that the batch job did not run or aborted prior to completion. Be sure that all appropriate staff are added to the NURS-ADP mail group (i.e., IRMS support staff, ADPAC, backup). Data comes from the NURS AMIS 1106 Manhours (#213.4) file, and the NURS Location (#211.4) file.

Additional Information:

Lost nursing acuity/separation data may be entered though the AMIS 1106 Acuity Edit option. This option should be assigned to appropriate supervisory staff.

Restrictions:

This option recovers classification totals from the date the last nursing acuity/separation batch job was run.

Menu Display:

NURAAM-UNC**Unclassified AMIS 1106 Patients****Description:**

¹This option prints a daily listing of patients not classified by 3 pm, based on the patient's MAS location and date/time of admission, transfer, and discharge.

Additional Information:

²Patients in this report are not included in the Patient Category Totals-AMIS 1106 Reports. This option is a manual back-up to the NURAAM-UNCBAT (Batch Run of Unclassified AMIS 1106 Patients) option which is the TaskMan job that queues the unclassified listing to the CNO printer. The report is produced by the information generated from the NURAAM-ACU (Nursing Acuity/Separation Run) option or the NURAAM-ACUMAN (Manual Nursing Acuity/Separation Run) option. Unlike the NURAAM-UNCBAT option which only prints data from the last batch run, data for a specified date (through this option) can be retrieved for no more than the last 30 days. Data is stored in the NURS AMIS Daily Exception Report (#213.5) file.

This report is dependent upon whether the Nursing Acuity/Separation Batch Job has run to completion, and will not print until the batch job has finished its run. Location data is sorted in alphabetical order.

Menu Display:

Select Nursing Features (all options) Option: **11** Special Functions

NURAMN-STA**Manhours Exception Print by Service****Description:**

This option provides a report of all wards by shift that have no manhours data entered for a specific date or date range, by service. Information listed assists the service in correcting the omitted manhours. Data comes from the NURS AMIS 1106 Manhours (#213.4) file, and the NURS Location (#211.4) file.

Additional Information:

Manhours data can be entered through the option, Manhours Edit, AMIS 1106 (NURAMN-MANED).

Menu Display:

NURS-COMP**Position Control/Staff File Integrity Report****Description:**

¹This option is an exception report that identifies discrepancies between the NURS Staff (#210) file and the NURS Position Control (#211.8) file, which could affect the accuracy of many of the administrative reports. The following is a list of discrepancies that are identified by this report and the corrective action that may be taken to correct the discrepancies:

- a. Staff record has no corresponding New Person (#200) file entry.
IRM should repoint the record in question to the appropriate New Person (#200) file entry, or delete the record through FileMan (^DIK), or delete the record through the FileMan Enter/Edit Option.
- b. Staff record contains missing/invalid data in the Name field .01.
IRM should enter a valid New Person (#200) file pointer in the staff record, or delete the record through FileMan (^DIK), or delete the record through the FileMan Enter/Edit Option.
- c. Staff record has missing/invalid Status data in field 5.5.
The user should enter status data in the staff record using the Status/Position [NURAED-STF-STAT/POS] option of the Staff Record Edit [NURAED-STF-MENU] menu.
- d. Staff record is missing the 'B' index entry.
IRM should set the 'B' index for the record in question using EN1^DIK.
- e. Staff Employee has 'ACTIVE' status and no active file 211.8 assignment(s).
User should inactivate staff record, or enter an assignment for the employee in question using the Status/Position option of the Staff Record Edit.
- f. Staff Record has 'B' index entry and no data on zeroth node.
IRM should kill the erroneous 'B' index entry using the KILL command.
- g. File (#211.8) contains duplicate assignment entries for an employee.
IRM should identify the inappropriate assignments and inactivate them by entering a vacancy date via the global edit utility, or delete the assignments with the KILL command from programmer mode.

¹ Patch NUR*4*6 January 1998

- ¹h. File (#211.8) contains assignments with no corresponding staff record.
IRM should enter the data for the staff record using the Status and Position option of the Staff Record Edit, or delete the assignments from the position control file using the KILL command from programmer mode.
- i. File (#211.8) contains active assignments for inactive nursing locations.
The user should inactivate the assignments using the Status and Position option of the Staff Record Edit.

After correction of the aforementioned discrepancies this report should be re-run until the message 'No discrepancies were found between the 210 and 211.8 files.' is generated.

Additional Information:

SPECIAL NOTE: NEVER delete a duplicate entry in the New Person file but modify the employee's name by entering a ZZ or X as leading characters before the last name. FileMan cannot guarantee that pointers will be correctly updated.

¹ Patch NUR*4*6 January 1998

Patient Not Admitted Due to Invalid MAS Ward

If the relationship (cross-reference) between the MAS ward and nursing location is lost or does not exist in the NURS Location (#211.4) file, the following message appears.

```
NURSPATIENT2, ONE has not been admitted into the Nursing System by  
MAS, because 3E (MAS ward) does not have a corresponding nursing  
unit.
```

If the CNO printer field in the NURS Parameters file exists the above message will be printed on the CNO printer. If the CNO printer field is not defined, Nursing staff will be notified that the patient is not in the system when classification is attempted.

Refer to Package Management chapter of the User Manual or the Technical Manual for further information regarding the CNO printer.

Action: Determine if the Nursing Location file should be modified. Refer to Maintenance of Administrative Site files chapter.

Patient Not Admitted With MAS

The following message is displayed when the patient's name has not been entered in the Patient (#2) file:

```
Select PATIENT NAME: NURSPATIENT2, TWO
```

```
Patient not admitted with MAS -- notify MAS
```

Action: Notify MAS that the patient has not been entered in the Patient (#2) file.

Patient Is Not Active In The Nursing System

The following message is displayed when a patient does not have an active status in the Nursing System. Either MAS has not admitted the patient into the MAS System, or there was a problem with the MAS Nursing System interface.

```
Select PATIENT NAME: NURSPATIENT2, THREE    02-25-36    000334455
```

```
Patient is not active in the Nursing system -- notify Nursing ADP  
Coordinator
```

Action: Notify MAS if the patient has not been admitted through their package. Admission into the nursing software will be automatic at the time of the MAS admission. If the MAS software is down or admission into the nursing software must be expedited, the nursing ADP Coordinator may enter the patient into the nursing software through the Admit/Transfer Pt. (Nursing Pkg. Only) option (refer to Special Functions chapter).

Incomplete User/Person Data

The following message may appear while attempting to run a report which contains nursing personnel data:

```
****INCOMPLETE USER/NEW PERSON DATA--NOTIFY NURSING ADP COORDINATOR****
```

Action: The Nursing ADP Coordinator must contact IRMS to have the New Person entries for the employee reviewed for missing information.

Incomplete Nursing Data

The following message may appear while attempting to run a report which contains nursing employee data:

```
****INCOMPLETE NURSING DATA--NOTIFY NURSING ADP COORDINATOR****
```

Action:

- a. The Nursing ADP coordinator or designee must create or modify the Staff Record of the person who had this problem. Enter the Staff Record, Enter/ Edit option and verify that the employee has a record, primary position, and location.
- b. If the employee's record is complete (i.e., service position and primary location are present), then ask an IRMS staff member to check the New Person (#200) file for the existence of a duplicate entry.

SPECIAL NOTE: NEVER delete a duplicate entry in the New Person file but modify the employee's name by entering a ZZ or X as leading characters before the last name. FileMan cannot guarantee that pointers will be correctly updated.

Incomplete Service Position Data

The following message may appear while attempting to run a report which contains personnel data:

```
****INCOMPLETE SERVICE POSITION DATA--NOTIFY ADP COORDINATOR****
```

Action: The Nursing ADP Coordinator must check the NURS Service Position File (#211.3) to establish if all the data fields describing the service position have been completed. In most cases the AMIS position field will be lacking the appropriate information to run the report. Refer to Maintenance of Administrative Site Files chapter for additional information.

Nursing Alerts

Two alerts have been added to alert members of the NURS-ADP mail group that the manhours or AMIS classification batch job did not run or aborted prior to completion. The alerts appear as follows:

- a. *The AMIS Acuity-Sep/Act Batch job for MAY 3, 1995** was not completed.
- b. *The Nursing Sep/Act batch job for MAY 3, 1995** was not completed.

* Data in italics is representative of the information displayed in the alerts.

Chapter 6 IRMS Options

NURS-EXP

NURS Staff Experience Integrity Check/Fix

Description:

This option checks, cleans and re-crossreferences the Nurstaff Experience Sub-File.

Additional Information:

This option can only be invoked by IRMS staff. Before running this option the user must stop journaling of the ^NURS(210, global, make a backup of the NURS Staff (#210) file, and turn the Nursing Package off-line. This option does the following:

1. Clean NURS Staff 210 sub-file 22.5.
2. Change pointer code on zero node to freetext.
3. Delete zero nodes that have no entries or cross-references.
4. Populate missing .01 fields that have a cross-reference.
5. Convert pointers in .01 fields to freetext.
6. Convert lower case entries to upper case.
7. Delete experiences that are not in the Experience File.
8. Match up entries and cross-references, eliminating duplicate cross-references.
9. Re-crossreference sub-file 22.5.

Menu Display:

This option can only be invoked by IRMS staff.

Screen Prints:

```
>D ^NURSEXP  NURS Staff Experience Integrity Check/Fix
```

This option checks the integrity of the NURS Staff File's Experience sub-file in field 22.5, and makes the following error corrections when necessary:

IRM Options

- a. Converts pointer values in the Name field to free text values.
- b. Removes records with no data or cross-references.
- c. Rebuilds missing Name entries that have a valid 'B' index entry.
- d. Converts lower case Name entries to upper case.
- e. Deletes experience entries missing from the NURS Clinical Background File.
- f. Deletes duplicate cross-references.

Enter RETURN to continue or '^' to exit: <RET>

Checking Experience sub-file for deficiencies, fixing where necessary.

.....

Done...

Enter RETURN to continue or '^' to exit:

Menu Access:

This option can only be invoked by IRMS staff.

NURS-PURG

Classification File Purge

Description:

This option deletes or purges data, from the NURS Classification (#214.6) and NURS Review Classification (#214.7) classification globals, for a user specified date not later than six months. The nursing ADP Coordinator or IRMS (after conferring with nursing) can invoke this option to free computer disc space. Once it has been run the data is erased from Files #214.6 (NURS Classification) and #214.7 (NURS Review Classification). The Nursing Focus Group recommends that six months of data be retained, but this may be modified by IRMS based on the service/medical center policy. This purge function does not delete data from the 213.1 or 213.4 files which store acuity totals for quarterly AMIS and workload statistics reports. Data comes from the NURS Staff (#210) file, and the NURS Position Control (#211.8) file.

Additional Information:

This option can only be invoked by IRMS staff.

Menu Display:

This option can only be invoked by IRMS staff.

Screen Prints:

```
>D EN1^NURSADEL  Classification File Purge
```

```
Has Nursing been contacted before purging data from files 214.6 and 214.7?
YES// <RET>
```

```
Has journaling of ^NURSA global been stopped? YES// <RET>
```

Note: Journaling keeps a record of every set and kill. This information is unnecessary and does not need to be stored as it consumes disc space. Therefore, IRMS should be notified to turn off journaling.

```
Start With: DEC 22, 1996// <RET> (DEC 22, 1996)
```

```
Are you sure you want to delete data older than DEC 22, 1996? YES// <RET>
(YES)
```

a new NURQ STANDARDS OF CARE/PRACTICE (the 8TH)? No// **Y** (YES)

Answer with name of standard of care or practice.

NAME OF STANDARD: THE PATIENT WILL NOT HAVE ANY COMPLICATIONS// **<RET>**

You may edit name of standard.

TYPE OF STANDARD: **CARE**

Identify the standard as a standard of Care or Practice.
Enter "c" for CARE or "p" for PRACTICE.

SERVICE: **NURSING** SERVICE

Enter the service associated with this standard.

Menu Access:

The QI Summary Standards of Care/Practice File option is accessed through the QI Site Files option of the Nursing Features (all options) menu.

NURQA-PT-FRE

QI Summary Frequency File

Description:

This option allows the user to edit data in the NURQ Frequency (#217.3) file. The frequency data describes the time frame used to collect and report QI Summary report information.

Additional Information:

This information is used in creating and editing a QI Summary record. Refer to Section 5 for additional information..

Menu Display:

Select Nursing Features (all options) Option: **10** QI Site Files

- 1 QI Summary Standards of Care/Practice File
- 2 QI Summary Frequency File
- 3 QI Summary Rationale File

Screen Prints:

Select QI Site Files Option: **2** QI Summary Frequency File

Select NURQ FREQUENCY: **BIWEEKLY**

Are you adding 'BIWEEKLY' as a new NURQ FREQUENCY (the 8TH)? No// **Y** (YES)

Answer with appropriate frequency.

The following is a list of choices:

ANNUALLY
BIMONTHLY
DAILY
MONTHLY
QUARTERLY
SEMIANNUALLY
WEEKLY

FREQUENCY: BIWEEKLY// **<RET>**

You may edit frequency.

Menu Access:

The QI Summary Frequency File option is accessed through the QI Site Files option of the Nursing Features (all options) menu.

NURQA-PT-RAT

QI Summary Rationale File

Description:

This option allows the user to edit data in the NURQ Rationale (#217.2) file. The rationale data describes the rationale used to collect and report QI Summary report information.

Additional Information:

This information is used in creating and editing a QI Summary record. Refer to Section 5 for additional information..

Menu Display:

Select Nursing Features (all options) Option: **10** QI Site Files

- 1 QI Summary Standards of Care/Practice File
- 2 QI Summary Frequency File
- 3 QI Summary Rationale File

Screen Prints:

```
Select QI Site Files Option: 3 QI Summary Rationale File
Select NURQ RATIONALE: HIGH COST
Are you adding 'HIGH COST' as a new NURQ RATIONALE (the 4TH)? No// Y
(YES)
```

Answer with appropriate rationale.

The following is a list of choices:

HIGH RISK
HIGH VOLUME
PROBLEM PRONE

```
RATIONALE: HIGH COST// <RET>
```

You may edit rationale.

Menu Access:

The QI Summary Rationale File option is accessed through the QI Site Files option of the Nursing Features (all options) menu.

Section 2 Administration

Chapter 1 Package Operation

Having completed the instructions for implementing the software as indicated in the Package Management section, you are now ready to use the options. The content contained in the following sections provides information on all software options which can be assigned to nursing personnel. This information includes the name, description or purpose of the option, screen prints, menu access, and other information that supports the use of the options.

Remember that on-line help is available when questions arise. The user can type ? or ??, after any prompt to get a help message that generally tells the user what to do. In some instances, a specific list of possible responses is displayed. All field names in the Nursing application have descriptions associated with them. Help is also available at the menu level by typing a ??, ???, or ?OPTION.

For the purpose of summarizing multiple types of reports and their sort sequences we have modified the display of the reports in this manual. After a sample report is displayed (e.g., certification reports by location and service category), the manual then displays another example (e.g., certification reports by service and service category). What is not displayed is the user's exit from the report and the return back to the menu.

Chapter 2 Staff Record

NURAED-STF-MENU

Staff Record Edit

Description:

The Staff Record Edit option allows the service to track employee data by storing demographic, service related and professional information in an individual's electronic record. Staff data comes from the NURS Staff (#210) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file.

Additional Information:

This information is used to compile hospital nursing reports, AMIS 1106b reports, and other VACO nursing reports. Refer to the Staff Record Report, Administration Reports, AMIS, FTEE/Workload Reports for additional information. The Employee Location Edit option edits selected nursing position control information in the Staff Record.

These options should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and other key nursing personnel identified by the Chief, Nursing Service.

Menu Display:

Select Nursing Features (all options) Option: **1** Administration Records,
Enter/Edit

Location Edit, Employee
Manhours Edit, AMIS 1106a
Staff Record Edit ...

Screen Prints:

Select Administration Records, Enter/Edit Option: **S**taff Record Edit

Select Nursing Service Staff Name: **NURSNURSE, ONE**

If your IRMS allows you to add new personnel to the New Person file then the following prompt is displayed:

Staff Record

Are you adding 'NURSNURSE, ONE' as a new NEW PERSON? Y (Yes)

A "Soundex" cross-reference checks for potential duplicates. This helps to avoid duplicate entries.

Checking SOUNDEX for matches.

NURSNURSE2, ONE

Do you still want to add this entry: NO// Y (Yes)

NEW PERSON SSN: 000607942

Enter SSN of employee. Answer must be 9 numerics in length.

The following data is entered in a new employee's NURS Staff file record. You must complete all prompts. If the data is not entered, you may receive the message,

****INCOMPLETE NURSING DATA--NOTIFY NURSING ADP COORDINATOR****

when running certain reports. Before the reports can be printed, the employee's record(s) must be completed.

If the employee has already been entered into the New Person file, then only the following prompts are displayed:

Are you adding 'NURSNURSE, ONE' as a new NURS STAFF (the 172ND)? No// Y (YES)

PRIMARY POSITION START DATE: T (JAN 04, 1991)

Enter starting date for the primary position.

PRIMARY DUTY LOCATION: NHCU ACTIVE

Enter NURS location name.

PRIMARY SERVICE POSITION: RN STAFF NURSE

Enter NURS service position abbreviation, name, or priority sequence.

After entering the above data, the employee's appointment status and FTEE must be entered through the Status and Position option of the Staff Record Edit menu. Refer to the Status and Position option for additional information.

The Staff Record Edit menu below, allows the user to enter employee information by subject area.

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position
- 4 License
- 5 Probationary Period/Promotion
- 6 Annual Review/NPSB
- 7 Professional Education
- 8 Professional Experience
- 9 National Certification
- 10 Military Status
- ALL Edit All Employee Data

On the following pages, the entry of status and position data into the staff record is reviewed.

NURAED-STF-DEMO

Demographic Data

Description:

This option allows editing of the employee's demographic data (i.e., name, address, SSN, phone). Data is stored in the NURS Staff (#210) file.

Additional Information:

This information is reflected in the Staff Record Report, Gender Reports, and telephone listings. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, nurse managers and others as identified by the Chief, Nursing Service.

Menu Display:

```
1      Demographic Data
2      Personnel Data
3      Status and Position
4      License
5      Probationary Period/Promotion
6      Annual Review/NPSB
7      Professional Education
8      Professional Experience
9      National Certification
10     Military Status
ALL   Edit All Employee Data
```

Screen Prints:

Select Staff Record Edit Option: 1 Demographic Data

EMPLOYEE: NURSNURSE, ONE RN

SSN: If the SSN had not been previously entered then this field would remain blank until the information is entered.

Nursing Employee Demographic Data Edit.

NAME: NURSNURSE, ONE// <RET>

Enter name of employee. Answer must be 3-30 characters in length.

SEX: **F** FEMALE

Enter gender of employee.

DOB: **6/6/61** (JUN 6,1961)

Enter date of birth of employee.

SSN: **000607942** NURSNURSE, ONE

Enter SSN of employee. Answer must be 9 numerics in length.

The next set of prompts pertains to home address. Based on the information in the record you have to make one of the following choices:

1. If home address information has not previously been entered you are prompted to enter the address data.
2. If information has been previously entered, the address is displayed with the prompt.

Do you wish to edit the home address (Y/N) **Y**

Based on the user response, you may bypass the editing of the address field by answering N (NO), or edit the data (see below) by answering Y (YES).

STREET ADDRESS 1: **6234 STEWART DRIVE**

Enter first line of street address. Answer must be 2-50 characters in length.

STREET ADDRESS 2 AND 3 can be used at the discretion of the user.

STREET ADDRESS 2: **<RET>**

Enter second line of street address. Answer must be 2-50 characters in length.

STREET ADDRESS 3: **<RET>**

Enter third line of street address. Answer must be 2-50 characters in length.

CITY: **WILLOWBROOK**

Enter employee's city. Answer must be 2-30 characters in length.

STATE: **ILLINOIS**

Enter employee's state.

ZIP CODE: **45634**

Enter employee's ZIP CODE or ZIP+4.

The next group of prompts pertain to the mailing address:

1. If mailing address information has not previously been entered, then you are prompted with:

Do you want the mailing address the same as the home address? NO//

If you answer Y (Yes) then the home address is automatically entered in the file.

2. If N (NO) was entered as the response, the user receives prompts to enter mailing address.

3. If mailing address information has been previously entered,

Do you wish to edit the mailing address (Y/N) Y

(for yes) is displayed as the default . If you enter N (NO), the mailing address prompts are not displayed until you reenter the option. If you answer Y, then the following fields are displayed:

MAILING ADDRESS: **P.O. BOX 456**

Enter first line of mailing address. Answer must be 2-50 characters in length.

MAILING ADDRESS 2 AND 3 can be used at the discretion of the user.

MAILING ADDRESS 2: **<RET>**

Enter second line of mailing address. Answer must be 2-50 characters in length.

MAILING ADDRESS 3: **<RET>**

Enter third line of mailing address. Answer must be 2-50 characters in length.

MAILING CITY: **WILLOWBROOK**

Enter city of mailing address. Answer must be 2-30 characters in length.

MAILING STATE: **ILLINOIS**

Enter state where mailing address is located.

MAILING ZIP CODE: **35423-4567**

Enter ZIP CODE or ZIP+4 of mailing address.

The next section displays prompts for telephone number:

Select TELEPHONE NUMBER: **555-6543**

Enter employee's telephone number.

OWNER OF TELEPHONE NUMBER: **S** SELF

Indicates owner of the phone number (i.e., self, relative, neighbor or other). The following is a list of choices:

S	Self
R	Relative
N	Neighbor
O	Other

Select TELEPHONE NUMBER: **<RET>**

You may enter another telephone number.

Example: Editing Telephone Number

The telephone number is a multiple field; only the most recent entry displays. The entry of a new phone number at the 'Select TELEPHONE NUMBER' prompt (refer to prompt below) does not delete the telephone number displayed. Enter a ? (question mark) to see the individual's phone numbers and select the number you want deleted. When that phone number displays, enter an @ to delete the entry (see below).

Select TELEPHONE NUMBER: 555-6081// **<RET>**

Enter telephone number.

TELEPHONE NUMBER: 555-6081// @
 SURE YOU WANT TO DELETE THE ENTIRE '555-6081' TELEPHONE NUMBER? **Y**
 Select TELEPHONE NUMBER: **<RET>**

The last section in this option identifies people to contact if an emergent situation arises:

Select NAME OF EMERGENCY CONTACT: **NURSSPOUSE, ONE**

Enter name of 'emergency contact'.

RELATIONSHIP TO STAFF MEMBER: **HUSBAND**

Indicates relationship of 'emergency contact' to employee.

E-ADDRESS: **6021 STEWART DRIVE**

Enter street number and street name of 'emergency contact'.

E-CITY: **WILLOWBROOK**

Enter city of 'emergency contact'.

Staff Record

E-STATE: **ILLINOIS**

Enter state of 'emergency contact'.

E-ZIP CODE: **45634**

Enter zip code of 'emergency contact'.

E-TELEPHONE NUMBER: **555-1234**

Enter telephone number of 'emergency contact'.

Select NAME OF EMERGENCY CONTACT: **<RET>**

You may enter another 'emergency contact'.

NURAED-STF-PER**Personnel Data****Description:**

This option allows the service to track minimal employee personnel data (e.g., VA start date, computation date). Data is stored in the NURS Staff (#210) file.

Additional Information:

Currently this section does not point to a personnel package and data must be entered by nursing. Information is printed in the Staff Record Report. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

```

1      Demographic Data

5      Probationary Period/Promotion
6      Annual Review/NPSB
7      Professional Education
8      Professional Experience
9      National Certification
10     Military Status
ALL    Edit All Employee Data

```

Screen Prints:

Select Staff Record Edit Option: **2** Personnel Data

```

EMPLOYEE: NURSNURSE, ONE   RN
SSN: 000607942

```

Employee Personnel Data.

¹SERVICE COMPUTATION DATE: MAY 5,1980 (NO EDITING)

This uneditable field contains the 'service computation date' for this employee. Service Computation Date includes all federal and military service time.

¹ Patch NUR*4*22 March 1999

Staff Record

VA EMPLOYMENT STARTING DATE: **5/5/80** (MAY 5, 1980)

Enter the employee's VA employment starting date.

STATION ENTRY ON DUTY DATE: **5/5/80** (MAY 5, 1980)

Enter the employee's EOD (entry on duty) date for this facility, (i.e., VAMC, OPC etc.) EOD date within the VA system.

VETERAN PREFERENCE: **1** NONE

Enter the Employee Veteran Preference code. A number 0 - 6. The following is a list of choices:

- | | | |
|---|-----------------|--------------------------------------|
| 0 | NO SERVICE | (no military service) |
| 1 | NONE | (military experience; no preference) |
| 2 | 5 PT. | |
| 3 | 10 PT. DISAB. | |
| 4 | 10 PT. COMP | |
| 5 | 10 PT. OTHER | |
| 6 | 10 PT./30% COMP | |

NURAED-STF-STAT/POS**Status and Position****Description:**

This option contains a position control function which allows nursing management to track employees' past, present, and future positions. Data is stored in the NURS Staff (#210) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file.

Additional Information:

This option doesn't allow duplicate assignments. The information is currently reflected in the AMIS 1106b Reports, FTEE Reports, Grade Reports, and the Staff Record Report. Facilities can, through VA FileMan, generate a turnover report. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Future Plans:

A future version of the nursing software will contain management turnover reports.

Menu Display:

```

1      Demographic Data
2      Personnel Data
3      Status and Position
4      License
5      Probationary Period/Promotion

```

Screen Prints:

Select Staff Record Edit Option: 3 Status and Position

```

EMPLOYEE: NURSNURSE, ONE RN
SSN: 000607942

```

Staff Record

Employee's Status and Position.

STATUS: **A** ACTIVE

Enter employee's status. The following is a list of choices:

A	ACTIVE	(active/open record)
I	INTERMITTENT	(active/open record)
R	INACTIVE	(inactive/closed record)

This field indicates if an employee holds a present position in Nursing Service and "flags" the staff record as being opened. If the record is active/open, current employee information is used in all appropriate Nursing Service reports.

Prior to editing the position of the employee, the software allows the user to display assignments stored in the employee's record. By selecting (C), current and future positions are displayed; (P) displays past positions. When the record contains no data, a prompt indicates that information is not available.

Example: Current Assignment Listing for an Employee

Would you like to see this employee's (C)urrent or (P)ast positions: C// <RET>

Enter a 'C' to see current positions, or a 'P' to see past positions.

LOCATION/ PRODUCT LINE	POSITION/ PRODUCT LINE	DUTY TOUR	START DATE	VACANCY DATE	FTEE
¹ 1 SICU	RN	11:00PM-7:30AM	11/19/91		.2
NURSING	NURSING				
2 (P) 9E	RN	6:00A-2:30	02/05/91		.5
NURSING	NURSING				
STATUS: ACTIVE					
PRIMARY SERVICE POSITION: STAFF NURSE					
PRIMARY SVC. POS. PRODUCT LINE: NURSING					
PRIMARY LOCATION PRODUCT LINE: NURSING					
PRIMARY FACILITY: HINES					
TOTAL ASSIGNMENT FTEE: .7					

The current positions/assignment listing shows:

1. The location of all current positions/assignments and flags the primary assignment location.
2. The corresponding service position for each assignment.
3. The FTEE.
4. The tour of duty.
5. The starting date of the position.
6. The vacancy or closing date of the position.

¹ Patch NUR*4*3 January 1998

¹At the bottom of the assignment listing, another display shows the employee's status, primary service position and the total FTEE for all currently held, open, positions. If the Product Line and Multi-Divisional fields in the NURS Parameters (#213.9) file are set to 'Yes', the product lines for the employee's primary unit and the product line for the employee's primary service position as well as the employee's primary facility are displayed.

After the assignments and positions are displayed, the following prompt indicates that you can enter new positions, delete errors, and close existing assignments.

Enter selection or type ? for help: ?

Display of help Information:

Selecting Assignments

WHEN MAKING SELECTIONS, A RANGE OF NUMBERS CAN BE SELECTED BY USING A HYPHEN AND MULTIPLE SELECTIONS CAN BE MADE BY SEPARATING THEM BY COMMAS.

E.G. 1 1-2 1,3 1-2,4-5 1,3-4
ARE EXAMPLES OF VALID SELECTIONS.

TO EDIT POSITIONS, SELECT THE NUMBER(S) OF THE ASSIGNMENT(S) TO BE EDITED. THE EXAMPLE ABOVE SHOWS VALID SELECTIONS.

TO DELETE POSITIONS, SELECT THE NUMBER(S) OF THE ASSIGNMENT(S) TO BE DELETED AND FOLLOW THAT SELECTION BY AN @.

E.G. 1@ 1-2@ 1@,3@ 1-2@,4-5@ 1@,3-4@
ARE EXAMPLES OF VALID SELECTIONS.

TO ADD NEW POSITIONS ENTER AN 'N' INTO THE SELECTION LIST.

EDITING, DELETING AND ADDING POSITIONS CAN BE DONE THE SAME IN SELECTION.

E.G. 1@,2,N 1-2,3@ 1,N 2@,N
ARE EXAMPLES OF VALID SELECTIONS.

Press return to continue or "^" to exit <RET>

²When entering new positions or editing data, you are asked to identify if the position is a primary assignment. There must be one primary assignment or position per employee; supervisory responsibility is associated with this primary position. Other information tracked is the location of the position, service position, starting and vacancy dates, tour of duty for each assignment, the FTEE, and a vacancy reason if the vacancy date is completed.

Example: Entering a New Position

Enter selection or type ? for help: N

Would you like to add a new assignment? YES// <RET> (YES)

Indicate if you would like to enter a new assignment.

¹ Patch NUR*4*3 January 1998

² Patch NUR*4*3 January 1998

Staff Record

Is this a primary assignment? NO// **Y** (YES)

Indicate if this is a primary assignment by answering yes or no.

LOCATION: **SICU**

Associate a nursing location with this position.

¹DATE PROFICIENCY IS DUE: **1-1-92** (JAN 1,1992)

Enter date on which registered nurse's proficiency/annual narrative is due.

NAME OF EVALUATOR: **NURSEVAL, ONE**

Enter name of person evaluating this proficiency. The Name of Evaluator points to the NEW PERSON (#200) file.

SERVICE POSITION: **RN** STAFF NURSE

Enter a service position for this employee. Service position is a required field.

STARTING DATE: **T+1** (NOV 19,1991)

Enter starting date for employee.

ASSIGN TOUR OF DUTY: **8:00AM-4:00PM**

Enter appropriate tour of duty for this position.

FTEE: **1**

Enter the amount of FTEE assigned to this employee for this position. Type a number between 0 and 1, 3 decimal digits.

VACANCY DATE: **<RET>**

Enter the appropriate date for closing this position; it cannot be a date older than the start date.

Would you like to add a new assignment? NO// **<RET>** (NO)

²You have the option to add another position for this employee. If you do not wish to make another entry, press return. A summary is displayed of all current positions (i.e., the location of the new position; the service position (a primary assignment position); the FTEE; tour of duty, and the start and vacancy date of the assignment). At the bottom of the assignment listing, another display shows employee's status, primary service position and the total FTEE for all present positions (not future positions). If the Product Line and Multi-Divisional fields in the NURS Parameters (#213.9) file are set to 'Yes', the product lines for the employee's primary unit and the product line for the employee's primary service position as well as the employee's primary facility are displayed. When editing the total FTEE for any staff member, it cannot exceed 1. If new positions are entered and the total FTEE exceeds 1, the system displays:

¹ Patch NUR*4*28 August 1999

² Patch NUR*4*3 January 1998

DUE TO CHANGES THAT HAVE BEEN MADE, THE TOTAL FTEE WOULD BE GREATER THAN 1 FOR THIS EMPLOYEE. PLEASE RETRY THE CHANGE.

¹You can not have duplicate service positions on the same location. If a new position is entered and it has a duplicate service position for the same location, the system displays:

DUE TO CHANGES THAT HAVE BEEN MADE, DUPLICATE SERVICE POSITIONS ON THE SAME LOCATION EXIST FOR THIS EMPLOYEE. PLEASE RETRY THE CHANGE.

You can not have duplicate duty tours on the same location. If a new position is entered and it has a duplicate duty tour for the same location, the system displays:

DUE TO CHANGES THAT HAVE BEEN MADE, DUPLICATE DUTY TOURS ON THE SAME LOCATION EXIST FOR THIS EMPLOYEE. PLEASE RETRY THE CHANGE.

All newly added positions are invalidated. The positions must be reentered and the FTEE correctly adjusted.

Making changes now - hold a minute

LOCATION/ PRODUCT LINE	POSITION/ PRODUCT LINE	DUTY TOUR	START DATE	VACANCY DATE	FTEE
² 1 SICU NURSING	RN NURSING	8:00AM-4:00PM	11/19/91		.2

TOTAL ASSIGNMENT FTEE: 1

Enter selection or type ? for help: 1

EDITING POSITION 1

Is this a primary assignment? NO// <RET> (NO)

Enter 'Yes' if this is a primary assignment, or 'No' if this is not a primary assignment.

LOCATION: 3S// <RET>

Enter appropriate location.

²DATE PROFICIENCY IS DUE: JAN 1,1992// <RET>

Enter date on which registered nurse's proficiency/annual narrative is due.

NAME OF EVALUATOR: NURSEVAL, ONE// <RET>

Enter name of person evaluating this proficiency. The Name of Evaluator points to the NEW PERSON (#200) file.

SERVICE POSITION: RN// <RET>

Enter appropriate service position.

STARTING DATE: FEB 5, 1991// <RET>

Enter starting date.

ASSIGN TOUR OF DUTY: 6:00A-2:30// <RET>

Enter the employee's assigned tour of duty.

¹ Patch NUR*4*3 January 1998

² Patch NUR*4*28 August 1999

FTEE: .5// <RET>

Enter amount of FTEE for this employee for this position.

VACANCY DATE: 1/15/92 (JAN 15, 1992)

Enter vacancy date for this position.

VACANCY REASON: PTR POSITION TRANSFER

Enter reason why position is vacant or why employee transferred.

¹The reason must be an entry in the Vacancy/Transferred Reasons file. New vacancy reasons may be added using the Vacancy Reason File Edit option in the Administrative Site File Functions menu. A status of active or inactive is linked to each vacancy reason and updates the Staff file appropriately when the batch job runs after midnight.

The following is a list of choices:

- COP Continuation of Pay
- EXL Extended Leave
- LWO Leave Without Pay
- PTR Position Transfer
- RES Resigned
- RET Retired
- SUM Summer Student
- TER Terminated
- TRA Transferred
- UTR Unit Transfer
- WOP Leave Without Pay-Journalized

Making changes now - hold a minute

After the vacancy date is entered the system stores the information in the staff record and the changes are printed for the user's review.

LOCATION/ PRODUCT LINE	POSITION/ PRODUCT LINE	DUTY TOUR	START DATE	VACANCY DATE	FTEE

¹ Patch NUR*4*3 January 1998

² Patch NUR*4*3 January 1998

Staff Record

Enter selection or type ? for help: <RET>

You may then exit from the position control file by entering <RET>, add a new position for the employee by entering N, or edit an existing position by entering a number.

Example: Past Position Function

To review past positions held by the employee, select P. The display indicates the location, the service position of each assignment, the primary assignment, the FTEE of each position, tour of duty, the start and vacancy dates.

Would you like to see this employee's (C)urrent or (P)ast positions: C// P

From what date would you like to list the positions: MAR 23, 1966// <RET>
(MAR 23, 1966)

Enter a date which is greater than or equal to the Station Entry on Duty date.

¹The default information provided by the system is the Station Entry On Duty Date (refer to the Personnel Data option of the Staff Record, Edit).

LOCATION/ PRODUCT LINE	POSITION/ PRODUCT LINE	DUTY TOUR	START DATE	VACANCY DATE	FTEE
1 MED 4I	RN		03/02/91	03/22/91	.2
NURSING	NURSING				
2 (P) NHCU	RN		07/17/90	01/30/91	1
NURSING	NURSING				

The following information displays the employee's present position:

STATUS: ACTIVE
PRIMARY SERVICE POSITION: STAFF NURSE
PRIMARY SVC. POS. PRODUCT LINE: NURSING
PRIMARY LOCATION PRODUCT LINE: NURSING
PRIMARY FACILITY: HINES

After the past positions are displayed on the screen, the user may edit and delete past positions through the past position pathway. The user cannot enter a new or reactivate a past position at this level. New past assignments can be put into the system by entering the current pathway only.

This section identifies miscellaneous information:

Edit/Modify Grade Step Code: Use the Load Grade/Step Codes option in the Administrative Site File Functions menu to edit grade/step codes.

¹ Patch NUR*4*3 January 1998

MI REVIEW GROUP: RN
 HOSPITAL (NO EDITING)

SALARY: 45995.00 (-NO EDITING)

MI Review Group and Salary are uneditable: The MI review group data comes from the PAID Education Tracking module, and salary data also comes from PAID. Users are not permitted to change this data through this option.

GRADE/STEP CODE: R/N1/2

Enter an appropriate grade/step code. The following are examples of Grade/Step Codes:

- ¹R/N1/5 = Registered Nurse, Nurse Intermediate, Level 1, Step 5
- N/4/7 = Nursing Assistant, GS4, Step 7

UNIFORM ALLOWANCE: Y (YES)

Indicate whether or not an employee is receiving a uniform allowance.

Select PRIVILEGES: Orders routine blood work

Are you adding 'Orders routine blood work' as a new PRIVILEGES (the 1ST for this NURS STAFF)? No// Y (YES)

Enter appropriate Nurs privilege name. The following is a list of choices:

- Orders EKG, non invasive x-rays
- Requests consultation/referral

Additional privileges can be added to the Privilege file through the Privilege File Edit option in the Administrative Site File Functions menu.

DATE GRANTED: 1/8/91 (JAN 08, 1991)

Enter date this privilege was granted.

¹ Patch NUR*4*3 January 1998

NURAED-STF-LIC

License

Description:

This option tracks license data for an employee. It is used to supplement the license information provided by the Human Resources Management Service. Data is stored in the NURS Staff (#210) file.

Additional Information:

The information is reflected in the Staff Record Report, and the License Reports. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position
- 4 License
- 5 Probationary Period/Promotion
- 6 Annual Review/NPSB
- 7 Professional Education
- 8 Professional Experience
- 9 National Certification
- 10 Military Status
- ALL Edit All Employee Data

Screen Prints:

Select Employee's Staff Record Edit Option: **4** License

EMPLOYEE: NURSNURSE, ONE RN
SSN: 000607942

License.

Select STATE ISSUING LICENSE: **WYOMING**

Enter name of state issuing license. License is a multiple field. An employee may have more than one license entered.

PROFESSIONAL LICENSE NUMBER: **33322**

Enter license number printed on the individual's professional license.

EXPIRATION DATE OF LICENSE: **4/4/87** (APR 04,1987)

Enter expiration date of license.

VERIFIED BY: **NURSUSER, ONE**

Enter the person's name who verified the license.

Select STATE ISSUING LICENSE: **KANSAS**

You may make another entry.

NURAED-STF-PROB

Probationary Period/Promotion

Description:

This option edits the employee's data regarding probationary periods and promotions. Data is stored in the NURS Staff (#210) file.

Additional Information:

This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position

Are you adding 'MAY 5, 1986' as
a new DATE PROFICIENCY IS DUE (the 1ST for this NURS STAFF)? No// **Y**
(YES)

Enter date on which registered nurse's proficiency/annual narrative is due. The DATE PROFICIENCY IS DUE is a multiple field and may have multiple dates entered. For example: 4 month and 9 month evaluations during orientation or any other date for tracking of evaluations may be entered.

NAME OF EVALUATOR: **NURSEVAL, TWO**

Enter name of person evaluating this proficiency. The Name of Evaluator points to the NEW PERSON (#200) file.

TENTATIVE DATE FOR BOARD ACTION: **5-5-86** (MAY 05, 1986)

Enter the targeted date the employee is scheduled for review by the Nurse Professional Standards Board.

DATE WORK COPY SENT OUT: **5-6-86** (MAY 06, 1986)

Enter the date the work copy/notice for the nurse's proficiency or annual narrative is sent to the evaluator.

DATE PROF RETURNED FOR TYPING: **5-9-86** (MAY 09, 1986)

Enter the date on which the nurse's written proficiency/annual narrative is returned by the evaluator for typing.

ACTUAL DATE OF BOARD ACTION: **5/12/86** (MAY 12,1986)

Enter date on which the standards board actually reviewed the employee.

¹DATE OF NEXT BOARD ACTION: **5/12/87** (MAY 12,1987)

Enter the next date on which the standards board will review the employee.

Select DATE PROFICIENCY IS DUE: **<RET>**

You may enter another proficiency date.

¹ Patch NUR*4*21 January 1999

NURAED-STF-EDUC

Professional Education

Description:

This option edits the employee's professional education data. Data comes from the NURS Staff (#210) file.

Additional Information:

The information is reflected in the Staff Record Report, Academic Degree and Nursing Degree Reports. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position
- 4 License
- 5 Probationary Period/Promotion
- 6 Annual Review/NPSB
- 7 Professional Education
- 8 Professional Experience
- 9 National Certification
- 10 Military Status
- ALL Edit All Employee Data

Screen Prints:

Select Staff Record Edit Option: 7 Professional Education

EMPLOYEE: NURSNURSE, ONE RN
SSN: 000607942

Employee's Professional Education.

Select PROFESSIONAL EDUCATION: 4 Bachelor's degree in Nursing BSN

Enter name of degree. The following is a list of choices:

- 1 Nursing diploma DIP
- 2 Associate degree in Nursing AD
- 3 Associate degree AA
- 4 Bachelor's degree in Nursing BSN
- 5 Bachelor's degree BA

6	Master's degree in Nursing	MSN
7	Master's degree	MA
8	Doctoral degree in Nursing	DNSC
9	Doctoral degree	PHD

Professional Education field points to NURS EDUCATION file (#212.1).

MAJOR: NURSING

When a nursing degree is entered in the PROFESSIONAL EDUCATION field, NURSING is automatically entered as the major. However, if a non-nursing degree is entered you may select from the 50-entry NURS COLLEGE MAJOR list. See second example of professional education entry below.

Major is a pointer to the NURS COLLEGE MAJOR (#212.3) file.

COLLEGE/UNIVERSITY: **U. OF MINNESOTA**

Enter name of the college/university granting the degree.

YEAR: 1976 (1976)

Enter year the degree was obtained.

You may make another professional education entry.

Select PROFESSIONAL EDUCATION: **<RET>**

FACULTY: **N** NO

This field documents that the employee is a faculty member at a college, university, or other educational facility. Enter a yes or no. If yes is entered, the following prompt displays:

Select TYPE OF APPOINTMENT:

NURAED-STF-EXP

Professional Experience

Description:

This option edits the employee's professional experience data. The professional experience field may contain both non VA experience and station experience. Data is stored the NURS Staff (#210) file.

Additional Information:

Data describing non VA experience can be directly entered through this option. As the Status and Position option of the Staff Record closes a position by passing the vacancy date, the information is automatically stored in the NURS Staff file provided the tasked option, NURAAM-ACU, completes its daily run. If the NURAAM-ACU (Nursing Acuity/ Separation Run) option does not run to completion, the data will be stored when the NURAAM-ACUMAN (Manual Nursing Acuity/ Separation Run) option is selected by the nursing application coordinator.

Information can be accessed through the Staff Record Report. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position
- 4 License
- 5 Probationary Period/Promotion
- 6 Annual Review/NPSB
- 7 Professional Education
- 8 Professional Experience
- 9 National Certification
- 10 Military Status
- ALL Edit All Employee Data

Screen Prints:

Select Staff Record Edit Option: **8** Professional Experience

EMPLOYEE: NURSNURSE, ONE RN
SSN: 000607942

Professional Experience.

Select PROFESSIONAL EXPERIENCE: **Psychiatry**

Enter professional experience. All professional experience. Pointer to NURS CLINICAL BACKGROUND file (#211.5).

Note: The entry of additional NURS CLINICAL BACKGROUNDS (professional experience) is done using the Clinical Background File, Edit option in the Administrative Site File menu. LAYGO access is not allowed. The following is a list of choices:

- CCU
- Drug Dependency
- MICU
- Medical
- ETC.

LAST ASSIGNMENT LOCATION: **DOCTOR'S HOSPITAL**

Enter name of facility, agency, or unit which employed individual.

TITLE/POSITION: **RN** STAFF NURSE

Enter name of title/position held during this period of employment. Pointer to NURS SERVICE POSITION file (#211.3). The following is a list of choices:

- ACGNS/LTC ACNS FOR NURSING HOME CARE
- ACNS ASSOC CHIEF, NURSING SERVICE
- ACNS SEC ACNS SECRETARY
- ACNS/E SEC ACNS/E SECRETARY
- ETC.

The entry of additional SERVICE POSITIONS must be done through the Service Position File, Edit option of the Nursing Package Site File menu. LAYGO access is not allowed.

DATE STARTED: **5/1/80** (MAY 01, 1980)

Enter beginning date of employee's assignment.

DATE ENDED: **5/1/83** (MAY 01, 1983)

Enter ending date of employee's assignment.

Professional Experience is a multiple field. In order to enter a duplicate professional experience " " must be entered around the professional experience. See example below.

Select PROFESSIONAL EXPERIENCE: **"Psychiatry"**

You may enter another professional experience entry.

NURAED-STF-CERT

National Certification

Description:

This option edits the employee's national certification information including expiration date. Data is stored in the NURS Staff (#210) file and the Certification (#212.2) file.

Additional Information:

Information is reflected in the Staff Record Report and the Certification Reports. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

```
1      Demographic Data
2      Personnel Data
3      Status and Position
4      License
5      Probationary Period/Promotion

SSN: 000607942
```

Employee's National Certification.

National Certification is a multiple field. Since there are numerous certifications with the same abbreviation of RNC. Use the "RNC" entry to force a duplicate entry.

Select NATIONAL CERTIFICATION: **RNC**

1	RNC	ADULT NURSE PRACTITIONER	AMERICAN NURSES ASSOCIATION
2	RNC	COMMUNITY HEALTH NURSE	AMERICAN NURSES ASSOCIATION
3	RNC	GERONTOLOGICAL NURSE	AMERICAN NURSES ASSOCIATION
4	RNC	MEDICAL-SURGICAL NURSE	AMERICAN NURSES ASSOCIATION

TYPE "^" TO STOP, OR
CHOOSE 1-5: **4**

Enter the employee's certification abbreviation, then select the appropriate certification entry if more than one entry is displayed.

ORIGINAL CERTIFICATION DATE: **2/2/85** (FEB 2,1985)

Enter the date of initial certification.

DATE CERTIFICATION EXPIRES: **2/2/88** (FEB 2,1988)

Enter the expiration date. This is not a multiple field, the date must be changed upon employee recertification.

Select NATIONAL CERTIFICATION: **<RET>**

You may make another national certification entry.

NURAED-STF-MIL

Military Status

Description:

This option tracks the employee's previous military experience. The Branch of Service (#23) file containing service names is pointed to through this option. Data is stored in the NURS Staff (#210) file.

Additional Information:

Information is used in the Staff Record Report and Military Reports. This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

```
1      Demographic Data
2      Personnel Data
3      Status and Position
4      License
5      Probationary Period/Promotion
6      Annual Review/NPSB
7      Professional Education
8      Professional Experience
9      National Certification
10     Military Status
ALL   Edit All Employee Data
```

Screen Prints:

Select Staff Record Edit Option: **10** Military Status

```
EMPLOYEE: NURSNURSE, ONE   RN
SSN: 000607942
```

Employee's Military Status.

One of several possibilities may occur:

1. If veteran preference (previously entered in the Personnel Data option) is no service the following is displayed:

NO MILITARY EXPERIENCE, THEREFORE NO FURTHER UPDATING REQUIRED

Press return to continue

2. If no previous veteran preference information was entered, the following is displayed:

MILITARY EXPERIENCE? Answer YES or NO

- a. If the question is answered NO then no service is automatically entered.
- b. If the question is answered YES then the following is displayed:

VETERAN PREFERENCE: **1** NONE

Enter the veterans preference. The following is a list of choices:

- 0 NO SERVICE (no military service)
- 1 NONE (military experience; no preference)
- 2 5 PT.
- 3 10 PT. DISAB.
- 4 10 PT. COMP
- 5 10 PT. OTHER
- 6 10 PT./30% COMP

The next prompt is military status and indicates if the employee is an active reservist or retired from the military.

Select MILITARY STATUS: **R** RETIRED/DISCHARGED

Enter military status. The following is a list of choices:

- R** RETIRED/DISCHARGED
- A** ACTIVE RESERVE
- IRR** INDIVIDUAL READY RESERVE
- IMA** INDIVIDUAL MOBILIZATION AUGMENTEE

3. If the veteran preference indicates a level of preference then the following appears:

Select MILITARY STATUS: **A** (ACTIVE RESERVE)

BRANCH OF SERVICE: **NAVY**

Enter name of 'service branch' if active-reservist. Pointer to BRANCH OF SERVICE file (#23). The following is a list of choices:

- 1 ARMY
- 2 AIR FORCE
- 3 NAVY
- 4 MARINE CORPS
- 5 COAST GUARD
- 6 OTHER
- 7 MERCHANT SEAMAN
- 8 B.E.C.
- 9 USPHS
- 10 NOAA

Select MILITARY STATUS: <RET> You may enter another military status.

NURAED-STF-ALL**Edit All Employee Data****Description:**

This function allows the user to enter/edit employee data in the Staff Record without returning to the menu between major sections. Data comes from the NURS Staff (#210) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file.

Additional Information:

This option should be restricted to select users such as the nursing ADP Coordinator, nurse recruiter, nursing office staff, and others as identified by the Chief, Nursing Service.

Menu Display:

- 1 Demographic Data
- 2 Personnel Data
- 3 Status and Position
- 4 License
- 5 Probationary Period/Promotion

If the Product Line and Multi-Divisional fields in the NURS Parameters (#213.9) file are set to 'Yes', the Primary Product Line and Primary Facility for the position will appear at the bottom of the report also.

You may exit at this prompt by entering <RET> or add a new position, edit or delete an existing position.

No other prompts found in the Status and Position option of the Staff File Edit appear through this option.

Menu Access:

The Location Edit, Employee option is accessed through the Administration Records, Enter/Edit option of the Nursing Features (all options) menu, and the Administrator's Menu.

¹ Patch NUR*4*3 January 1998

NURAPR-STF

Staff Record Report

Description:

This option prints a staff record report (demographic, service related, and professional information) for an individual nursing employee. Data comes from the NURS Staff (#210) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file.

Additional Information:

¹If the Product Line and Multi-Divisional fields in the NURS Parameters (#213.9) file are set to 'Yes', the Primary Product Line for location and service position, and Primary Facility for the position will appear in the report. Editing of this data is accomplished using the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Security:

Security has been provided on the Staff Record Report. This security screens data and displays prompts that can be viewed by Nursing employees based on their AMIS Position:

- a. The Chief, Nursing Service and the Nursing ADP Coordinators can access all data.
- b. The Associate/Assistant Chief(s) and Supervisors can access data of personnel subordinate to their position.
- c. Head Nurses have access only to data specific to their ward.
- d. Everyone else can only view their own data.

One exception to the above security is phone number data. Head Nurses and higher can see all phone numbers.

Menu Display:

Select Nursing Features (all options) Option: **2** Administration Records,

Menu Access:

The Individual Staff Position/Location option is accessed through the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu.

Staff Record

Chapter 3 Administration Reports

NURAPR-LOC-SER

Administrative Reports

Description:

The Administrative Reports option prints the location, service, and specific individual reports, such as age, grade, and nursing degree, which are generated based on the information in the NURS Staff (#210) file. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. The specifications for these reports were provided by the Nursing Focus Group and test sites.

Additional Information:

Some reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

The following totals are categorized by Product Line and/or Facility when appropriate.

Total Number of Assignments - This is the total number of positions/ assignments in Nursing Service.

Total Number of Personnel - This is the total number of employees holding positions/assignments in Nursing Service.

Subtotal = Total of FTEE

Subcount = Number of staff

$$\text{Submean} = \frac{\text{Subtotal}}{\text{Subcount}}$$

Many of the report options offer the 4 print options listed below.

1. Location and Service Category
2. Location and Service Position
3. Service and Service Category
4. Service and Service Position

Location reports allow the user to request one or more nursing units at a time or all units by pressing return. If the user enters a specific unit, the 'Another Nursing Unit' prompt appears. When the user selects all units for inclusion in the report, only active locations print.

When printing a report sorted by location, each unit is printed on a separate page.

- A. Use the ? (question mark) to identify the sort capabilities within each of these print options.
- B. The following legend shows which reports provide summary information, such as 'total number of assignments' and 'total number of personnel', and which reports only exit to the menu:

1	+ Academic Degree Reports
2	- Age Reports
3	* Certification Reports
4	+ Gender Reports
5	+ Grade Reports
6	* License Reports
7	+ Military Reports
8	* NPSB Reports
9	+ Nursing Degree Reports
10	* Proficiency Reports
11	* Comb. Acad./Nurs. Degree Reports

- * Reports with no summary information, typing an "^" returns to menu.
- + Reports with summary information and message "Press return to continue, 'T' for totals, or '^' to exit" at the bottom of each screen.
 - Typing a "T" shows you summary information at the point you exit the report.
 - Typing an "^" exits to the menu.
- Age report has summary information, typing an "^" shows summary information at the point you exit the report and then returns you to the menu.

Security:

Security has been provided on the Administration Reports. This security screens data and displays prompts that can be viewed by nursing employees based on their AMIS Position:

- a. The Chief, Nursing Service and the Nursing ADP Coordinators can access all data.
- b. The Associate/Assistant Chief(s) and Supervisors can access data of personnel subordinate to their position.

- c. Head Nurses have access only to data specific to their unit.
- d. Everyone else can only view their own data.

One exception to the above security is phone number data. Head Nurses and higher can see all phone numbers.

Menu Display:

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

Select Administrative Reports Option:

Menu Access:

The Administrative Reports option is accessed through the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-ADGREE**Academic Degree Reports****Description:**

This option allows the user to generate location and service reports summarizing the highest academic degree held by nursing personnel. Data may be sorted by facility, product line, service category or service position. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Editing of data is accomplished using the Staff Record Edit option in Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-AGE

Age Reports

Description:

This option prints location and service reports which provide a count of nursing personnel within specified age groups (age 18 and older). Data may be sorted by facility, product line, service category or service position. The age is determined by the date of birth field in the New Person (#200) file. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Editing of data is accomplished using the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-CERTF

Certification Reports

Description:

This option prints location and service reports reflecting the national certifications held by registered nurses, the agency granting the certification, and the date of its expiration. Data may be sorted by facility, product line, service category or service position. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Editing of staff certification information is accomplished using the Staff Record Edit option in the Administration Records, Enter/Edit menu. Basis certification data (e.g., name of certification sponsoring agency) is edited using the Certification File, Edit option in the Administrative Site File Functions menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

Menu Access:

The Certification Reports option is accessed through the Administrative Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-GENDER**Gender Reports****Description:**

This option prints location and service reports which provide a count of employees by gender. Data may be sorted by facility, product line, service category or service position. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Editing of data is accomplished using the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

Menu Display:

Select Nursing Features (all options) Option: **2** Administration Records, Print

Menu Access:

The Gender Reports option is accessed through the Administrative Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-GRADE

Grade Reports

Description:

This option prints location and service reports which summarize the number of employees within all grade levels. Data may be sorted by facility, product line, service category or service position. Staff data reflecting assignment location, service position, and service category is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Editing of grade/step codes is accomplished for an individual employee through the Staff Record Edit option in the Administration Records, Enter/Edit menu. Salary comes from the PAID Employee (#450) file, and cannot be edited through the nursing software.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

Menu Display:

Select Nursing Features (all options) Option: **2** Administration Records,
Print

Menu Access:

The Grade Reports option is accessed through the Administrative Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-LICENSE

License Reports

Description:

This option prints location and service reports, which summarize information on state licenses held by employees. Information includes employee name, social security number, expiration date of license, state issuing license, and professional license number. Data may be sorted by facility, product line and state. Staff informatino reflecting assignment location is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

Licenses aren't associated with the category of personnel, therefore, all licenses will show on the report for an employee with an active status. For example, if a current RN holds a current RN license, and previously held an LPN license, both licenses appear on the report.

Editing of data for an individual is accomplished through the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

Menu Display:

This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

NURAPR-NPSB

NPSB Reports

Description:

This option prints location, service, and individual reports of NPSB actions on RN/LPN/LVN employees. Data may be sorted by facility and product line. Staff data reflecting assignment location is found in the NURS Position Control (#211.8) file. All other data is found in the NURS Staff (#210) file.

Additional Information:

This report is 132 columns. Editing of data is accomplished for an individual employee through the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contains the value of 'yes'.

¹The reports sorted by service and location contain the latest proficiency and NPSB information for each RN and LPN. All assignment locations for these employees are printed in the service and location report. The individual report contains historical as well as the latest proficiency and NPSB information for the individual. Only the primary assignment location is reflected in the individual report.

### Menu Access:

The Comb. Acad./Nurs. Degree Reports option is accessed through the Administrative Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Administrative Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

**NURAPR-SAL****Salary Reports****Description:**

The Salary Reports menu contains options for printing salary related reports. Data may be sorted by facility and product line. Salary data is obtained from the PAID Employee (#450) file. All other information on these reports is found in the NURS Staff (#210) file.

**Additional Information:**

When some of these reports are printed to the SCREEN (HOME) at the bottom of each page there may be a message:

1. "Press return to continue or "^" to exit"
  - a. Continue - provides the next page of report, or exits to menu at end of report.
  - b. ^ - will exit to the menu if not at the end of the report.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

**Security:**

Security has been provided on the Salary Reports. This security screens data and displays prompts that can be viewed by Nursing employees based on their AMIS Position:

- a. The Chief, Nursing Service and the Nursing ADP Coordinators can access all data.
- b. The Associate/Assistant Chief(s) and Supervisors can access data of personnel subordinate to their position.
- c. Head Nurses have access only to data specific to their ward.
- d. Everyone else can only view their own data.

One exception to the above security is phone number data. Head Nurses and higher can see all phone numbers.

## Administration Reports

### Menu Access:

The Salary Report by Location/Svc. Category option is accessed through the Salary Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu.

<sup>1</sup> Patch NUR\*4\*21 January 1999

## **NURAPR-PHONE**

### **Telephone Number Listings**

#### **Description:**

The Telephone Number Listings menu contains options for printing phone number reports. Data may be sorted by facility and product line. The phone number data is obtained from the NURS Staff (#210) file.

#### **Additional Information:**

Editing of data is accomplished for an individual employee through the Staff Record Edit option in the Administration Records, Enter/Edit menu.

When some of these reports are printed to the SCREEN (HOME) at the bottom of each page there may be a message:

1. "Press return to continue or "^" to exit"
  - a. Continue - provides the next page of report, or exits to menu at end of report.
  - b. ^ - will exit to the menu if not at the end of the report.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

#### **Security:**

Security has been provided on the Telephone Number Listings Reports. This security screens data and displays prompts that can be viewed by Nursing employees based on their AMIS Position:

- a. The Chief, Nursing Service and the Nursing ADP Coordinators can access all data.
- b. The Associate/Assistant Chief(s) and Supervisors can access data of personnel subordinate to their position.
- c. Everyone else can only view their own data.

One exception to the above security is phone number data. Head Nurses can see all phone numbers.

**Menu Display:**

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

- 1 Administration Records, Enter/Edit ...
- 2 Administration Records, Print ...

TELEPHONE NUMBERS OF NURSING EMPLOYEES

MAR 14, 1986

PAGE: 1

| EMPLOYEE<br>NAME  | SERVICE<br>POSITION | TELEPHONE<br>NUMBER          | OWNER OF<br>PHONE NO. |
|-------------------|---------------------|------------------------------|-----------------------|
| NURSNURSE10, FOUR | RN                  | 555-555-5634<br>555-555-1222 | SELF<br>NURSUSER, TWO |

Enter RETURN to continue or '^' to exit: &lt;RET&gt;

**Menu Access:**

The Individual Phone Number option is accessed through the Telephone Number Listings option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Telephone Number Listings option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

## NURAPR-PHONE-LOC

### Phone (Home) Numbers by Location

#### Description:

This option prints a listing of employee home phone numbers by unit/location. Data may be sorted by facility, service position, and product line. The phone number data is obtained from the NURS Staff (#210) file. The unit/location data is contained in the NURS Position Control (#211.8) file.

#### Additional Information:

Editing of data is accomplished using the Staff Record Edit option in the Administration Records, Enter/Edit menu.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

#### Menu Display:

Select Nursing Features (all options) Option: **2** Administration Records, Print

- 1 Administrative Reports ...
- 2 Resource Management Reports ...
- 3 Salary Reports ...
- 4 Staff Record Report
- 5 Telephone Number Listings ...
- 6 Individual Staff Position/Location

Select Administration Records, Print Option: **5** Telephone Number Listings

- 1 Individual Phone Number
- 2 Phone (Home) Numbers by Location
- 3 Home Phone Number(s) For Entire Service

#### Screen Prints:

Select Telephone Number Listings Option: **2** Phone (Home) Numbers by Location

Select FACILITY (Press return for all facilities): <RET>

Select appropriate facility or press return for all facilities.

Select PRODUCT LINE (Press return for all product lines): <RET>

Select appropriate product line(s) or press return for all product lines.

Select NURSING UNIT (Enter return for all units) : <RET>

Select the name of an active nursing unit as defined by the Ward Status field of the NURS Location File, Edit option. You may also enter <RET> for all nursing units in the facility.

Select SERVICE POSITION (Press return for all service positions): <RET>

Enter appropriate service position, or press return for all service positions.

# Chapter 4 Classification

## NURAPC-MENU

### Classification, Edit Patient

#### Description:

The Classification, Edit Patient option displays additional options for adding and editing patient classifications. Data is stored in the NURS Classification (#214.6) and the NURS Review Classification (#214.7) file until the Classification File Update (NURS-PURG) option is invoked. The Nursing Focus Group suggests that a minimum of six months of data be retained but this may be modified based on the service/medical center policy. Check with your Decision Support System (DSS) Site Manager prior to deleting classification data.

#### Additional Information:

The classifications or acuities are used in generating the Patient Category Totals-AMIS 1106 Reports and the AMIS and Current Workload Statistics Reports. Individual patient(s) AMIS classification cannot be edited but totals for a location and bedsection may. This is accomplished using the AMIS 1106 Acuity Edit option located in the Administrative Site File Functions menu. Classifications may be edited for the last 120 days.

General Information on Patient Classification.

#### 1. Explanation of terms:

|                              |                                                                                                                                                                                                                                                                      |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Absence                      | A field in both the current unclassified and unclassified AMIS 1106 reports which indicates if a patient is on leave (LOA, pass, etc.), AWOL (absent without leave), Oth. Fac (patient is at another facility), and N/A (field does not apply; patient in hospital). |
| Admission Date               | The patient's last admission date to the facility; obtained from MAS data.                                                                                                                                                                                           |
| Bed Section                  | The patient's current nursing AMIS bed section. The bed section for a patient may be edited using the Location/Bed Section, Edit Nursing option located in the Patient Care Data, Enter/Edit menu.                                                                   |
| Comments                     | The R.N.'s justification for changing the computed classification.                                                                                                                                                                                                   |
| (COMPUTER) or (USER) display | Indicates if the computer or user determined the patient's classification based on the factors selected.                                                                                                                                                             |

## Classification

|                           |                                                                                                                                                                                              |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Current Classification    | The classification is a number depending upon the classification pattern used.                                                                                                               |
| Factors                   | Factors are selected by the R.N. when classifying a patient.                                                                                                                                 |
| Last Date/Time Classified | The most recent date and time the patient was classified. This is automatically entered by the computer.                                                                                     |
| Last User to classify     | Name of the R.N. classifier; automatically entered by the computer.                                                                                                                          |
| Patient                   | Patient's name is obtained from MAS data.                                                                                                                                                    |
| Room/Bed                  | Current room/bed number is obtained from MAS data.                                                                                                                                           |
| SSN                       | Patient's social security number is obtained from MAS data.                                                                                                                                  |
| Ward                      | The patient's current nursing location. The ward/location of a patient may be edited using the Location/ Bed Section, Edit Nursing option located in the Patient Care Data, Enter Edit menu. |

## 2. Warning messages:

- a. Patient not admitted with MAS -- notify MAS:  
Occurs if the patient's name is not in the MAS Patient file or if there is no active admission in the MAS "Patient File".
- b. Patient is not active in the Nursing System -- notify Nursing ADP Coordinator:  
Displayed if the patient was not entered into the Nursing System through MAS. If the MAS System is "down", contact the nursing ADP Coordinator or designee (refer to option "Admit/Transfer Pt. (Nursing Pkg. Only)" for additional information).
- c. THIS PATIENT'S CLASSIFICATION HAS NOT BEEN UPDATED. :  
Occurs if an ^ was entered previous to completing data entry.
- d. THIS PATIENT IS ON LEAVE, DO YOU STILL WISH TO CLASSIFY? NO//  
Displayed if the patient is on leave, AWOL or in another facility. Patients on pass are not counted in AMIS data and classifying is not necessary.
- e. \*\*\* BAD ENTRY - TRY AGAIN \*\*\*:  
Indicates unacceptable character entry such as an alphanumeric character, symbol, or space.

- f. \*\*\* FACTORS X,Y, or Z CANNOT BE USED TOGETHER \*\*\*:  
Inappropriate combination of factors used to classify a patient.
- g. \*\*\* WHEN CHANGING THE CLASSIFICATION, COMMENTS MUST BE FILLED IN \*\*\*:  
Displays when the user tries to bypass the comment field after changing the classification calculated by the computer.
- h. \*\*\* YOU MUST PICK ONE OF THE FACTORS ....\*\*\*:  
Indicates data is missing and identifies missing entry.
- i. \*\*\*\* NO FACTORS ENTERED - CLASSIFICATION NOT UPDATED \*\*\*\*:  
Displayed when a R.N. tries to bypass the "Enter Factors:" prompt of a patient never before classified.
- j. \*\*\*\* ROUTINE FINISHED \*\*\*\*\*:  
Displayed when an ^ is entered or a time out occurs prior to completing classification; also prints after classifying a series of patients.
- k. Classification Cannot Be Run  
A message is displayed on the terminal when a user wishes to classify a patient and the tasked background batch job, NURAAM-ACU (NURSING ACUITY/SEPARATION RUN), has not run. The warning is shown when the user enters any classification edit. This does not affect the options associated with hemodialysis and recovery room counts. The following is an example of the warning displayed when classifying by ward:

```
Select Classification, Edit Patient Option: 2 Classify Patients by Ward
ENTER UNIT YOU WANT TO SEARCH: 3S
```

The classification routine begins to display the names of the patients on the unit/ward.

Begin updating patient classifications.

```
NURSNURSE1,FOUR OK? YES// <RET>
```

The software then completes a check on the background job. If the job does not run to completion, the warning displays.

Enter Factors: <RET>

\*\*\*\* NO FACTORS ENTERED - CLASSIFICATION NOT UPDATED \*\*\*\*

PATIENT: NURSPATIENT2,FOUR SSN: 000-07-1694

ENTER FACTORS:

The prompt is again displayed for data entry. R.N.s may exit this program without classifying the patient by entering an ^.

#### 4. Example: Editing a classification:

##### PATIENT CLASSIFICATION NURSING HOME CARE UNIT

Patient: NURSPATIENT2,FOUR SSN: 000-07-1697 Admission Date: 06/19/84

Ward: 1B Room/Bed: 322-3 Bed Section: NURSING HOME CARE UNIT

FACTORS:

- |                                                                                                                                                                          |                                                                                                            |

Current Classification: 3 Factors: B,E,I,K,O (USER)

Computer's Classification for Factors would have been: 2

Comments: Special Test

Last user to classify: NURSUSER,THREE

Last date/time classified: 07/26/86@15:30

Do you wish to retain this as the current classification? YES// <RET>

(YES)

The previous classification remains unchanged; only the name of the R.N. classifying the patient, and the date/time classified is updated.

If the response had been:

Do you wish to retain this as the current classification? YES// N (NO)

PATIENT: NURSPATIENT2,FOUR SSN: 000-07-1694

Choose one factor from each group separated by a comma. Factors are selected with or without commas.

Enter Factors: B,E,I,K,O// A,D,H,K,M

Enter Classification: 1// <RET>

R.N. classifying patient accepts computed classification.

## Classification

If the R.N. wants to change the computed classification:

Enter Classification: 1// 2

Enter Comments: **Special Test**

### Note:

The justification must be entered. If an ^ is entered after the prompt, \*\*\*\* THIS PATIENT'S CLASSIFICATION HAS NOT BEEN UPDATED \*\*\*\* would display).

If an ^ is entered at any of the following prompts, the patient's classification is not updated and a warning message will appear:

Do you wish to retain this as the current classification? YES// ^  
This patient's classification has not been updated.

or

Enter Factors: B,E,I,K,O// ^  
THIS PATIENT'S CLASSIFICATION HAS NOT BEEN UPDATED.

or

Enter Classification: 1// ^  
THIS PATIENT'S CLASSIFICATION HAS NOT BEEN UPDATED.

or

Comments: ^  
THIS PATIENT'S CLASSIFICATION HAS NOT BEEN UPDATED.

## 5. Example: Patients classified under "Alcohol and drug treatment":

### Note:

The classification scale for Alcohol and Drug Treatment is a number between 1 and 4 and is based on your local classification system.

#### PATIENT CLASSIFICATION ALCOHOL AND DRUG TREATMENT

Patient: NURSPATIENT2,FIVE                      SSN: 000337867                      Admission Date: 10-20-86

Ward: 53E                      Room/Bed: 5310-E                      Bed Section: ALCOHOL AND DRUG TREATMENT

Current Classification: 2 (USER)

Last user to classify: NURSUSER,TEN

Last date/time classified: NOV 19,1986@08:14

Do you wish to retain this as the current classification? YES// **N** (NO)

Enter Classification: 2// **<RET>**

## 6. Statistics for domiciliary:

Clients are automatically tabulated at midnight and entered into the AMIS count as a category 1.

## 7. Example: Spinal cord injury, classification display:

Select PATIENT NAME: NURSPATIENT2,SIX      09-05-50      000555555 NSC  
VETERAN

## PATIENT CLASSIFICATION MEDICAL (SCI)

Patient: NURSPATIENT2,SIX      SSN: 000-55-5555      Admission Date: 10/27/87  
Ward: SCI 4M      Room/Bed: 403-2      Bed Section: MEDICAL (SCI)

## FACTORS:

- A. Activity, Independent
- B. Bath/Shower, Set up, partial assist
- C. Bath/Shower, Complete assist
- D. Position/Transfer, Set up, standby or partial assist
- E. Position/Transfer, Complete assist
- F. Diet, Set-up, standby or partial assist
- G. Diet, Complete assist
- H. Bowel Care, Set up, standby or partial assist
- I. Bowel Care, Complete assist
- J. Monitor/Observe/Teach, 15-25 Min/Hr
- K. Monitor/Observe/Teach, 30-45 Min/Hr
- L. Constant Monitoring

Current Classification: 5      Factors: B,L (COMPUTER)

## Comments:

Last user to classify: NURSUSER,FOUR

Last date/time classified: JUL 20, 1996@07:42

Do you wish to retain this as the current classification? YES// <RET>

## 8. Examples of classification patterns:

The pattern is identified with correlating AMIS bed section and page number is indicated.

| Pattern                    | AMIS Bed Section                                   | Page |
|----------------------------|----------------------------------------------------|------|
| Alcohol and Drug Treatment | Alcohol and Drug Treatment                         | 4.6  |
| Critical Care Patients     | Intensive Care                                     | 4.10 |
| Extended Care Patients     | Intermediate Care OR<br>Nursing Home Care Unit)    | 4.12 |
| Medical/Surgical Patients  | Medical (Excluding SCI) OR<br>Surgical Bed Section | 4.4  |
| Spinal Cord Injury         | Medical (SCI)                                      | 4.7  |

## NURAPC-INDPT

### Classify Patients Individually

#### Description:

The Classify Patients Individually option allows a registered nurse to classify a single patient. Data is stored in the NURS Classification (#214.6) file.

#### Additional Information:

The only way to edit/correct an individual patient's classification is to reclassify that patient at the time the mistake is made. An individual patient cannot be retrospectively classified for a specific date/time. However, the acuity totals for a location, bedsection, date, and shift may be edited using the AMIS 1106 Acuity Edit option located in the Administrative Site File Functions menu for the past 120 days.

#### Menu Display:

Select Nursing Features (all options) Option: **5** Patient Care Data,  
Enter/Edit

```

Classification, Edit Patient ...
Evaluation/Target Date & Order Status Edit
Intake/Output Data Entry Menu ...
Location/Bed Section, Edit Nursing
Patient Plan of Care, Edit

### Menu Access:

The Classify Patients by Ward option is accessed through the Classification, Edit Patient option of the Patient Care Data, Enter/Edit option of the Nursing Features (all options) menu, Head Nurse's Menu, and the Staff Nurse Menu.

## NURAPC-HEM

### Hemodialysis Patients, Classify/Count

#### Description:

The Hemodialysis Patients, Classify/Count option allows a R.N. to enter a patient's dialysis treatment (Inpatient or Outpatient) into the AMIS count. There is no classification for this category of patient. This information appears as a classification 1 and a count on the Patient Category Totals - AMIS 1106 Report, and AMIS Workload Statistics Report. Data is stored in the NURS Classification (#214.6) file.

#### Additional Information:

This count can be edited by using the AMIS 1106 Acuity Edit (NURAAM-ACUEDT) option in the Administrative Site File Functions menu for the past 120 days.

#### Menu Display:

Select Nursing Features (all options) Option: 5 Patient Care Data,  
Enter/Edit

```
Classification, Edit Patient ...
Evaluation/Target Date & Order Status Edit
Intake/Output Data Entry Menu ...
Location/Bed Section, Edit Nursing
Patient Plan of Care, Edit

## NURAPC-RECRM

### Recovery Room Patients, Classify/Count

#### Description:

The Recovery Room Patients, Classify/Count option allows the R.N. to enter names of patients present in the Recovery Room (or in a designated post anesthesia area/bed) at midnight into the AMIS count. This information appears as a classification 1 on all AMIS Classification Reports, however, it is a COUNT of the patient(s) at midnight. Data is stored in the NURS Classification (#214.6) file.

#### Additional Information:

This count can be edited by using the AMIS 1106 Acuity Edit option in the Administrative Site File Functions menu for the past 120 days.

#### Menu Display:

Select Nursing Features (all options) Option: **5** Patient Care Data,  
Enter/Edit

NURSPATIENT3,THREE HAS BEEN ADDED TO THE RECOVERY ROOM COUNT.

Select PATIENT NAME: **<RET>**

**Menu Access:**

The Recovery Room Patients, Classify/Count option is accessed through the Classification, Edit Patient option of the Patient Care Data, Enter/Edit option of the Nursing Features (all options) menu, Head Nurse's Menu, and the Staff Nurse Menu.

## NURAPC-UNCWRD

### Unclassified Patients, Edit

#### Description:

The Unclassified Patients, Edit option allows the R.N. to classify all unclassified patients residing on a specific ward on a given day. The program displays all patients on the ward who have not been classified for the date entered. Data is stored in the NURS Classification (#214.6) file.

#### Additional Information:

Individual patient(s) AMIS classification cannot be edited but totals for a location and bedsection may. This is accomplished using the AMIS 1106 Acuity Edit option located in the Administrative Site File Functions menu. Classifications may be edited for the last 120 days.

#### Menu Display:

Select Nursing Features (all options) Option: 5 Patient Care Data,  
Enter/Edit

<sup>2</sup> Patch NUR\*4\*22 March 1999

**NURAPP-UNCLOC****Current Unclassified Patient Print, by Location****Description:**

Current Unclassified Patient Print, by Location prints a report of all unclassified patients on a specific ward for a given day. Data is obtained from the NURS Classification (#214.6) file, and the NURS Patient (#214) file.

**Additional Information:**

Data can be entered through any of the Classification edits. The Current Unclassified Patient Print, by Location report has codes entered in the ABSENCE column. Below is a list of the definitions for the codes used.

1. N/A - (Not Applicable) Patient is not on leave.
2. LEAVE - Patient is on leave therefore cannot be classified.
3. ERROR - Either (a) Patient is admitted to unit through the Nursing package but not through MAS or (b) Nursing Package is down (off-line) when patient is discharged through MAS.

This report is dependent upon whether the Nursing Acuity/Separation Batch Job has run to completion.

**NURAPR-RES-MDPC****Patient Category Totals-Midnight Acuity Reports****Description:**

This report summarizes midnight patient category totals. The acuity statistics are reflective of the patient classification on the unit/ward at midnight. Reports can be generated for a daily, monthly, quarterly, or annual period. Data is obtained from the NURS Classification (#214.6) file and stored in the NURS AMIS 1106 Manhours (#213.4) file by the Nursing Acuity/Separation Run option.

**Additional Information:**

The acuity information is entered through the appropriate Classification, Edit Patient option. This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'.

**Restrictions:**

Data can be printed for daily, monthly, quarterly, and annual reports but only for a limited time. Data is purged by the tasked option NURAAM-ACU (Nursing Acuity/Separation-Activation Run). The restricted window for printing reports is summarized below:

Daily totals - 120 days  
 Monthly totals - 4 months  
 Quarterly totals - 5 quarters  
 Annual totals - 3 fiscal years

This report cannot be printed for the current day.

## NURAMN-MANED

### Manhours Edit, AMIS 1106a

#### Description:

The Manhours Edit, AMIS 1106a option allows a nurse to enter daily RN, LPN, and NA manhours. Data is stored in the NURS AMIS 1106 Manhours (#213.4) file.

#### Additional Information:

Manhours may be entered retrospectively or prospectively. This information is reflected in the Manhours Print report.

#### Restrictions:

Only Manhours "worked" in direct patient care may be entered.

#### Future Plans:

Manhours for "OTHER" Category will be incorporated in future versions.

#### Menu Display:

## **NURAPR-RES-PC**

### **Patient Category Totals-AMIS 1106 Reports**

#### **Description:**

Patient Category Totals-AMIS 1106 Reports option allows administrative nursing personnel to print location and service reports which summarize patient category totals. Data is aggregated from the NURS Classification (#214.6) file and the classification totals are stored in the NURS AMIS 1106 Manhours (#213.4) file.

#### **Additional Information:**

AMIS Patient category totals are based on the patient's location at 3:00 pm as indicated by the MAS package. When patients are transferred between 2:45 pm and 3:00 pm, classifications are assigned to the unit from where she/he is transferred. The acuity information is entered through the appropriate Classification, Edit Patient option. If nursing admitted the patient through the nursing software and classified the patient, MAS must indicate that the patient was on a location by 3:00 pm. This report is dependent upon whether the Nursing Acuity/ Separation-Activation Run option has completed.

This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'.

#### **Restrictions:**

Data can be printed for daily, monthly, quarterly, and annual reports but only for a limited time. Data is purged by the tasked option NURAAM-ACU (Nursing Acuity/Separation-Activation Run). The restricted window for printing reports is summarized below:

- Daily totals - 120 days
- Monthly totals - 4 months
- Quarterly totals - 5 quarters
- Annual totals - 3 fiscal years

This report cannot be printed for the current day.

Would you like to run another report? NO// <RET>

**Menu Access:**

The Patient Category Totals-AMIS 1106 Reports option is accessed through the Resource Management Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Resource Management Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

**NURAPR-RES-MANHR****Manhours Print****Description:**

This option allows the user to print reports which summarize the total RN, LPN, and NA patient care manhours worked. Reports can be generated for a daily, monthly, quarterly, or annual period for an indefinite period of time. The information is stored in the NURS AMIS 1106 Manhours (#213.4) file.

**Additional Information:**

1. On printed reports, the following information is printed in sequence:
  - a. Manhours data for nursing units with no acuity data is printed first.
  - b. If classification data is missing, the manhours data for those specific days are totaled and displayed at the top of the report. Refer to example below:

```
OCT 26, 1996 Service Manhours Quarterly Report for 1996 Qtr. #4 PAGE: 1

 RN LPN NA

TOTAL MANHOURS WHEN NO ACUITY DATA IS PRESENT:
 3AM 16.00 8.00 16.00
 3S 140.00 0.00 0.00
 OR 24.50 16.20 0.00
 SICU 190.00 0.00 0.00

SUBTOTAL 370.50 24.20 16.00
```

2. If acuity is present and no manhours data was entered for a specific unit, the report reflects this in this format "0.00". Refer to example below:

```
BEDSECTION: ALCOHOL AND DRUG TREATMENT
 AS 0.00 0.00 0.00

SUBTOTAL 0.00 0.00 0.00
```

3. On units/wards with split bedsections, manhours are calculated based on acuity ratios. The manhours on units with split bedsections are calculated at the time the manhours reports are printed.

4. If manhours data has not been entered for units that classify patients based on the AMIS bed section in File 211.4, nursing can print the dates of the missing entries through the following Special Functions options:

Manhours Exception Print by Service [NURAMN-STA]  
 Manhours Exception Print by Location [NURAMN-STA-LOC]

Units not associated with an AMIS bed section have their missing manhours data identified through the Manhours Print report [NURAPR-RES-MANHR].

The user can enter the missing information through the Manhours Edit, AMIS 1106a option.

This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'. This option can be run for past, current and future dates.

### Future Plans:

This module will be continually enhanced in later versions to meet the AMIS reporting requirements.

---

<sup>1</sup> Patch NUR\*4\*2 October 1997

**NURAPR-RES-FTEEC****FTEE Comparison (1106b) Report****Description:**

<sup>1</sup>This option allows administrative nursing personnel to print an FTEE Comparison (1106b) Report which indicates ceiling (FTEE), positions (FTEE) filled, and a variance.

**Additional Information:**

<sup>2</sup>Data under the ACTUAL column is aggregated, for both service and location reports, from the (active) staff positions in the NURS Position Control (#211.8) file. Budgeted FTEE in the service reports is obtained from the NURS AMIS 1106B FTEE (#213.2) file. In the location reports, budgeted FTEE data is obtained from the NURS Position Control (#211.8) file.

You may enter current employee information through the Staff Record Edit option and the Location Edit, Employee option. Information on budgeted FTEE printed in the service report, is entered through the FTEE Service Budget (1106b) File, Edit option. Budgeted FTEE information printed in the location reports, is entered through the NURS Location File, Edit option into the service position and associated budgeted FTEE fields for each location. Budgeted service position FTEE and its associated service category(s) (reflected in File #211.3) is used to calculate the total budgeted service category FTEE. If data is completely missing when running the service report, the following message displays:

```
*** YOU ARE MISSING DATA IN THE (FACILITY NAME)
 AMIS 1106B FTEE (213.2) FILE ENTRY.
 CONTACT THE NURSING APPLICATION COORDINATOR.
```

The report will then print for a facility or division having budgeted data. This report is sorted by facility only when the multi-divisional field in the NURS Parameter file contains the value of 'yes'.

<sup>3</sup>Effective with June 1997 data, AMIS Segment 202 was discontinued per TWX (Subject: Discontinuance of AMIS Segment 202 Nursing Service Code, VA Form 10-1106B (AMIS) and Report EMI2, RCS 10-0034). The data is no longer required by the AMIS system. Cancellation of Section 203.00 Chapter 2, MP-6, Part VI, Supp. No. 1.2 will be forthcoming.

**Menu Display:**

**Menu Access:**

The FTEE Comparison (1106b) Report option is accessed through the Resource Management Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Resource Management Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

# Chapter 6 FTEE/Workload Reports

## NURAPR-RES-AMISWKL

### AMIS Workload Statistics Report

#### Description:

The AMIS Workload Statistics Report option prints location and service reports that utilize manhours and acuity data from the NURS AMIS 1106 Manhours (#213.4) file.

#### Additional Information:

Information is entered through the Classification, Edit Patient option and the Manhours Edit, AMIS 1106a option.

This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'.

This report is dependent on whether the Nursing Acuity/Separation Batch Job has run to completion. The acuity data is calculated by the Nursing Acuity/Separation-Activation batch job which runs after midnight to accumulate totals for the previous day. The totals are based on classifications that are entered before the cutoff time designated for the Night/Day/ Evening Shift in the NURS Parameter File. For example we will use 0700 for Nights, 1500 for Days and 2300 for Evenings as the cutoff times.

- a. For the night shift, any classification entered for an active patient before 0700 will be counted. Since this cutoff time is before 1500, if the patient's classification has not been updated by 0700, the previous classification for the current unit is used. If no previous classification for that unit is available the patient will not be counted.
- b. For the day shift, the latest classification entered before 1500 (3pm) will be counted in the official AMIS totals. If there is no classification before 1500 on the run date the patient is not counted in the official AMIS totals and will appear on the unclassified patient report. Any changes (discharge, transfer, death, etc.) that occurs after the day shift cutoff time will have no effect on the day shift totals.
- c. For the evening shift, the latest classification that occurs before midnight will be counted. If the patient has not been classified on their current unit on the run date, that patient will not be counted in the evening shift acuity totals and will be reflected as unclassified on the Unclassified Midnight Patient's report. Changes that occur after 1500 will be reflected in these and subsequent totals.

The Classification File Purge option, found under the Nursing System Manager's Menu, permanently deletes data from the NURS Classification #214.6 and the NURS Review Classification #214.7 files. It is recommended that a minimum of 6 months of data remain in these files. Refer to the Package Management section for additional information on the Classification File Purge option. Contact the DSS Site Manager prior to any purging of classification data.

AMIS/Current Workload Statistics Definitions:

1. Unit - Patient care location.
2. Bed Sect - AMIS bed section.
3. RN FTEE/LPN FTEE/NA FTEE
  - a. (Req.) - Required.
    1. Required RN's defined by either the Professional Percentage in the Nursing Location File for each location or in the Site Parameter File as a default for the service.
    2. Required LPN/NA, the remaining percentage from RN is divided equally between LPN's and NA's.
  - b. SOD - Staff on duty taken from manhours entered for specific unit, shift and service category.
  - c. VAR - Variance of FTEE between required staff and staff on duty.
  - d. PT/PRO - Percent productivity calculated by:

|                                     |       |          |                                           |       |
|-------------------------------------|-------|----------|-------------------------------------------|-------|
| Required SOD<br>-----<br>Actual SOD | = 120 | Example: | 5 Staff Required<br>-----<br>4 Actual SOD | = 120 |
|-------------------------------------|-------|----------|-------------------------------------------|-------|

A percentage greater than 100 means understaffed.  
 A percentage less than 100 means overstaffed.

- e. Patient Category - Total number of patients classified per patient category.
- f. PTOT - Patient category totals includes only patients classified, not necessarily the patient census.
- g. Data is reported by:
  1. Shift
  2. Bed section
  3. Unit
  4. Hospital

**Menu Display:**

<sup>1</sup> Patch NUR\*4\*20 November 1998

**Menu Access:**

The AMIS Workload Statistics Report option is accessed through the Resource Management Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Resource Management Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

**NURAPR-RES-CURWKL****Workload Statistics Report (Current)****Description:**

This option allows nursing management to print current and projected workload statistics reports for locations and the entire service. Projected reports may be printed for the next two shifts from the current tour of duty. This report uses data from the NURS AMIS 1106 Manhours (#213.4) file to calculate the current acuity and generate workload statistics.

**Additional Information:**

Information is entered through the Classification, Edit Patient option and the Manhours Edit, AMIS1106a option. This report is based on the total number of patients classified on a location for a current date/time. The PTOT (patient total) column is being calculated on the fly as the report is run. Using this option, the required staffing for the next two shifts can be forecasted based on the current acuity. The time frame for the current and future shift(s) is calculated on the information entered into the Day, Evening, and Night Shift Acuity Time fields in the NURS Parameter (#213.9) file. The current workload statistics report can be automatically queued to run daily through the NURAPR-RES-CURWKL-QUEUE (TaskManager Workload Statistic Report (Current)) option.

This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'.

**Future Plans:**

This module is under continuous enhancement to satisfy site specific requirements.

**Menu Display:**

Select Nursing Features (all options) Option: **2** Administration Records,  
Print

- 1 Administrative Reports ...
- 2 Resource Management Reports ...
- 3 Salary Reports ...
- 4 Staff Record Report

**Menu Access:**

The Workload Statistics Report (Current) option is accessed through the Resource Management Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Resource Management Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

<sup>1</sup> Patch NUR\*4\*20 November 1998

**NURAPR-FTEE****FTEE Reports****Description:**

This option allows administrative nursing personnel to print statistical reports which summarize FTEE information. Data may be sorted by service category or service position. Data comes from the NURS Position Control (#211.8) file.

**Additional Information:**

Information is entered through the Staff Record, Edit and the Location Edit, Employee options. This report is sorted by facility when the multi-divisional field in the NURS Parameter (#213.9) file contains the value of 'yes'.

**Note:** Two asterisks found before the service category of an employee indicates that an active employee has a "0" FTEE.

**Menu Display:**

Select Nursing Features (all options) Option: **2** Administration Records,  
Print

- 1 Administrative Reports ...
- 2 Resource Management Reports ...
- 3 Salary Reports ...
- 4 Staff Record Report
- 5 Telephone Number Listings ...
- 6 Individual Staff Position/Location

Select Administration Print Option: **2** Resource Management Reports

- 1 Current Unclassified Patient Print
- 2 Daily Patient Classification Summary By Ward
- 3 Individual Patient Classification Reports
- 4 Patient Category Totals-AMIS 1106 Reports
- 5 Manhours Print
- 6 AMIS Workload Statistics Report
- 7 Workload Statistics Report (Current)
- 8 Patient Category Totals-Midnight Acuity Reports
- 9 FTEE Comparison (1106b) Report
- 10 FTEE Reports

**Screen Prints:**

Select Resource Management Reports Option: **10** FTEE Reports

Sort by:

1. Location and Service Category
2. Location and Service Position
3. Service and Service Category
4. Service and Service Position

Choose a sort parameter set between 1 and 4: **1** Location and Service Category

Select FACILITY (Press return for all facilities): **HINES** IL 499

Select appropriate facility or press return for all facilities.

Select PRODUCT LINE (Press return for all product lines): **NURSING**

Select appropriate product line(s) or press return for all product lines.

Select NURSING UNIT (Enter return for all units) : **<RET>**

Select the name of an active nursing unit as defined by the Ward Status field of the NURS Location File, Edit option. You may also enter <RET> for all nursing units in the facility.

NURSING Service Categories

-----

1. R (RN-REGISTERED NURSE)
2. L (LPN-LIC. PRACTICAL NURSE)
3. N (NA-NURSING ASSISTANT)
4. C (CK-CLERICAL)
5. S (SE-SUMMER EMPLOYEE)
6. A (AO-ADMIN. OFFICER)
7. O (OT-OTHER)

OTHER Service Categories

-----

8. OTHER VOLUNTEER
9. RD
10. STUDENT NURSE
11. ALL

Select SERVICE CATEGORY: **11**

Enter appropriate service categories. You may select one or more service categories to sort by.

Select FTEE (Press return for all FTEE): **<RET>**

Enter appropriate FTEE, or press return for all FTEE.

DEVICE: HOME//Enter appropriate response

**Menu Access:**

The FTEE Reports option is accessed through the Resource Management Reports option of the Administration Records, Print option of the Nursing Features (all options) menu, and the Administrator's Menu. This option is also accessed through the Resource Management Reports option of the Administration Reports (Head Nurse) option of the Head Nurse's Menu.

## Section 3 Clinical

# Chapter 1 Patient/Ward Information

## NURSPE-LOC/BED

### Location/Bed Section, Edit Nursing

#### Description:

The Location/Bed Section, Edit Nursing option permits the user to correct the patient's nursing ward location and nursing AMIS bed section. The patient's nursing AMIS bed section determines the classification tool used to classify the patient via the Edit Patient Classification Menu options.

#### Additional Information:

All patient transfers are initiated through the Admission, Discharge, and Transfer (ADT) option. The registered nurse may need this option if the following conditions are present:

1. ADT is down.
2. The nursing location must be changed because the NURS Location (#211.4) file cannot complete the association between the MAS ward and the nursing location. This condition occurs when an MAS ward is associated with two nursing units.
3. A patient is temporarily housed on a nursing unit and is intentionally not admitted through the ADT option. For example, when a lodger and day surgery patient might be entered in the nursing software for the purpose of tracking workload.
4. A change in the patient's nursing unit (i.e., a patient movement) that has not been entered through the ADT option due to human resource constraints, lack of written orders, etc.
5. The MAS location to which the patient is assigned is associated with a nursing location that does not contain the patient's appropriate bed section.

**NOTE:** The change in the nursing AMIS bed section is temporary. The staff nurse might have to update the patient's bed section on a daily basis when the new nursing AMIS bed section is not found in the NURS Location (#211.4) file. It is recommended that the nursing application coordinator associate the bed section with the nursing unit until the patient is transferred (or it can remain as a permanent entry).

Only active nursing unit names, as defined by the Patient Care Status field in the NURS Location (#211.4) file, can be selected by the user.

## Menu Display:

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

Intake/Output Data Entry Menu ...  
Location/Bed Section, Edit Nursing  
Patient Plan of Care, Edit  
Vitals/Measurements Data Entry Menu ...

## Screen Prints:

Select Patient Care Data, Enter/Edit Option: **Location/Bed Section, Edit Nursing**

Select PATIENT NAME: **NURSPATIENT4,FIVE**  
Select Nursing Unit: **NUR 9// 9A**

Enter <RET> if the correct ward is displayed, or change the nursing unit to the correct name by entering the name of an active nursing unit. This will not affect the MAS location.

Nursing BED SECTION: **SURGICAL// <RET>**

This is the name of the nursing AMIS bed section associated with the patient. The patient's nursing AMIS bed section determines the classification tool used to classify the patient via the Edit Patient Classification menu options. This field points to the NURS AMIS Ward (#213.3) file. You may either select the default or enter the correct nursing bed section.

## Menu Access:

This option is accessed through the Patient Care Data, Enter/Edit option of the Staff Nurse Menu, Head Nurse's Menu, and Nursing Features (all options) menu.

**NURSPP-LOCIND****Location of Individual Patient, Print****Description:**

The Location of Individual Patient, Print option displays the nursing unit, room/bed number, hospital leave status, bed section, and the acuity of an individual patient. Information is obtained from the following files or applications: nursing unit and (nursing) bed section is retrieved from the NURS Patient (#214) file, the room/bed number and hospital leave status are obtained through the ADT application, and acuity is stored in the NURS Classification (#214.6) file.

**Additional Information:**

This option displays the patient information on a (terminal or monitor) screen. The user cannot send the patient information to a printer.

**Menu Display:**

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

<sup>1</sup> Patch NUR\*4\*22 March 1999

# Chapter 2 Patient Assignments

## NURCPP-ASSWRK

### Patient Assignment Worksheet

#### Description:

This option prints a patient assignment worksheet containing information that assists nursing staff in providing patient care. The information is printed in two formats, brief and complete (see below for additional information). Patient data is obtained from multiple *VISTA* applications including the Patient Information Management System (PIMS), Adverse Reactions Tracking (ART), and Nursing applications. Data comes from the NURS Classification (#214.6) file, and the NURS AMIS Ward (#213.3) file.

#### Additional Information:

The user has the ability to print multiple copies of the patient assignment work-sheet. In this version, the patient assignment worksheet is not interfaced with Order Entry/Results Reporting. Admitting diagnosis is a free text field in the MAS software which is generally entered at the time of admission.

#### Future Version:

In a future version of the nursing software, additional information such as patient diet and orders for vitals, treatments, and patient intake and output will be automatically displayed. This information will be obtained from multiple *VISTA* applications including Order Entry/Results Reporting.

#### Menu Display

```
Select Nursing System Manager's Menu Option: 5 Nursing Features (all options)
```

## Patient Assignments

- 1 Administration Records, Enter/Edit ...
- 2 Administration Records, Print ...
- 3 Administrative Site File Functions ...
- 4 Nursing Education Reports, Print ...
- 5 Patient Care Data, Enter/Edit ...
- 6 Patient Care Data, Print ...
- 7 Clinical Site File Functions ...
- 8 QI Data, Enter/Edit ...
- 9 Quality Performance Reports ...
- 10 QI Site Files ...
- 11 Special Functions ...

Select Nursing Features (all options) Option: **6** Patient Care Data, Print

- 1 Classification Report
- 2 Location of Individual Patient, Print
- 3 Patient Assignment Worksheet
- 4 Ward Census, Print
- 5 Current Unclassified Patient Print, by Location
- 6 Patient Plan of Care, Print
- 7 Vitals/Measurements Results Reporting ...
- 8 Intake/Output Results Reporting ...
- 9 End of Shift Report
- 10 Health Summary Report
- 11 V/M Graphic Reports
- 12 Patient Problems to be Evaluated

### Example: Brief Assignment Worksheet

The brief assignment worksheet displays minimal information on the patient and provides an area to enter written notes on patient care such as activity, TPR, etc. Patient information obtained from the MAS software includes SSN, admitting date, room/bed number, admitting diagnosis, and physician name.

### Screen Prints:

Select Patient Care Data, Print Option: **3** Patient Assignment Worksheet

Do you want to:

1. Print Brief Assignment Worksheet(s)
2. Print Complete Assignment Worksheet(s)

Select 1 or 2: **1**

Assignment Sheet by (U)nit, (S)elected ward rooms, or (P)atient? **U**

You may print this report by ward, selected ward rooms, or by patient.

Select Unit: **3AM**

## Patient Assignments

If you had chosen (S)electd ward rooms, then the user would be prompted with a list of rooms for a specific location e.g.:

Ward 3AM has the following rooms:

| NUMBER | ROOM |
|--------|------|
| 1.     | 301  |
| 2.     | 302  |

Select the NUMBER(S) of the rooms:

Enter appropriate response and then send your report to a printer. If you had chosen (P)atients then you would be able to print an abbreviated assignment worksheet for any patient.

### **Example: Complete Assignment Worksheet**

The complete assignment worksheet prints patient problems and interventions identified through the patient plan of care while retaining the brief assignment worksheet display. For additional information on Patient Plan of Care. Refer to Section 3.

Do you want to:

1. Print Brief Assignment Worksheet(s)
2. Print Complete Assignment Worksheet(s)

Select 1 or 2: **2**

Assignment Sheet by (U)nit, (S)electd ward rooms, or (P)atient? **P**

You may print this report by ward, selected ward rooms, or by patient.

Select PATIENT NAME: NURSPATIENT3, THREE                      08-04-18                      000848807  
SC VETERAN

How many copies of this report are required? 1// **<RET>**

Enter the number of copies you wish to print.

DEVICE: HOME//Enter appropriate response

# Chapter 3 Patient Plan of Care

## **Description:**

The Patient Plan of Care module is used to create, edit, and print patient plans of care. It resides in the GMRG namespace and utilizes the Text Generator utility. The files used in the patient plan of care module include:

Aggregate Term (#124.2) - This file includes all the terms or strings of text used, and includes entries such as problem, goals, and orders. Each entry within the file is referred to as an aggregate term.

GMR Text (#124.3) - This file stores selected hierarchy/text for a patient.

New Person (#200) - This file is pointed to for the user who evaluated, entered, and modified the patient plan of care.

NURS Care Plan (#216.8) - This file stores all the patient plan of care data.

## **Additional Information:**

A computerized patient plan of care is created in a manner similar to a handwritten patient plan of care. The user initially determines if the plan is to be built on identified nursing problems, medical diagnoses, or optional patient plans of care. All paths yield similar plans. After choosing the type of patient problem, the user continues selecting additional problems from frames or screens until all of the patient problems have been selected. Having identified a particular problem, the user is given a secondary frame with the following categories for selections:

1. Defining Characteristics
2. Etiology/Related and/or Risk Factors
3. Goals/Expected Outcomes
4. Intervention/Orders
5. Related Problems

Although the above is the standard list, some problems may not include selections for defining characteristics and related problems. For every item chosen from the Goals/Expected Outcomes frame, a target date must be assigned. As each outcome is reviewed, the software prompts for an updated target date that indicates when a particular goal should be reviewed or met. The next major screen is the Intervention/Orders frame which identifies potential or previously identified patient related orders. Upon exiting this screen, the user is asked if any of the orders are to be discontinued. If the user answers yes, then a listing of active orders for potential discontinuation are displayed. From that list, interventions can be selected and discontinued.

After completing the elements for a patient problem, the status of the problem is queried. Completion of this status field is required for the application to display an evaluation date field. A problem can either have the status of evaluate, resolved, suspended or unresolved at discharge. Associated with the status field is an evaluation date which has been established for reevaluating the problem and associated data. When the problem is resolved, suspended, or unresolved at discharge it is removed from the patient's CURRENT patient plan of care listing. The data can then be printed through a separate option. This information is accessible through a separate option and a COMPLETE patient plan of care is printed.

The patient plan of care module uses six options which will be explained briefly below:

Patient Plan of Care, Edit [NURCPE-CARE] - This option allows the user to create/modify a patient's plan of care.

Evaluation/Target Date & Order Status Edit [NURCPE-EVAL] - This option allows the user to modify existing problems in the patient's plan of care.

Patient Plan of Care, Print [NURCPP-CARE] - This option allows the user to print a patient's plan of care.

Patient Problems to be Evaluated [NURCPP-EVAL] - This options allows the user to print a list of those problems requiring evaluation in a patient's plan of care.

Standard Patient Plan of Care Print [NURCFP-CARE] - This option is found under the Clinical Site File Functions option and is used to print plan of care data from the Aggregate Term file.

Patient Plan of Care, Site Configuration [NURCFE-CARE] - This option is found under the Clinical Site File Functions option and is used to add/ modify entries in the Aggregate Term file. These entries build the screens used to create the patient's individualized plan of care through the Patient Plan of Care Edit, and the Evaluation/Target Date and Order Status Editoptions. This option also allows the application coordinator to change specific site parameters (patient plan of care header, patient problem header, goals/expected outcomes header and the interventions/orders header) used in printing the patient's plan of care through the Patient Plan of Care, Print option. Both the evaluation date and target date defaults used in the two edit options, may be changed through this option.

The ADP coordinator should have access to all six of the patient plan of care module options listed above. The end users should have the following options:

```
Patient Plan of Care, Edit
Evaluation/Target Date & Order Status Edit
Patient Plan of Care, Print
Patient Problems to be Evaluated
```

The Patient Plan of Care Site Configuration option is restricted to the package coordinator or certain individuals who are responsible for creating and modifying standard terms used in the Patient Plan of Care, Edit option.

There are additional features and symbols used in displays that will be explained later in this chapter. Several of these features are summarized below.

A plus (+) printed in screen displays indicates an additional level of screen selections is associated with the text.

Double asterisk's (\*\*) in screen displays denote that terms has been previously selected.

A user may review the developed plan of care during it's development by entering a ^P at a selection prompt.

Commas entered after the last number at the 'Select at least 1:' prompt, prevent the review of selection screens. This is called a 'trailing comma'.

At a selection prompt following any list that includes the term, Additional Text, the user may enter an 'A' to add additional selections (e.g., outcomes, interventions) to the frame's list of terms.

Text within [ ] (otherwise known as Internal Text) allows users to enter additional information to clarify the outcome, order or other term.

Appended text is additional information added to the end of a specific outcome or intervention.

### **Future Plans:**

In a future version of the patient plan of care module, the program will be enhanced to facilitate ease of use in creating, editing, and printing patient and site specific patient plans of care. Also, critical pathways will be incorporated into the software's functionality.

## NURCPE-CARE

### Patient Plan of Care, Edit

#### Description:

The Patient Plan of Care, Edit option allows a user to create or modify a patient's plan of care.

#### Additional Information:

This information is retrieved through the Patient Plan of Care, Print option. Editing of screen displays in this option is accomplished through the Patient Plan of Care Site Configuration option.

#### Menu Display:

Select Nursing Features (all options) Option: 4 Patient Care Data, Enter/Edit

Classification, Edit Patient ...  
Evaluation/Target Date & Order Status Edit  
Intake/Output Data Entry Menu ...  
Location/Bed Section, Edit Nursing  
Patient Plan of Care, Edit  
Vitals/Measurements Data Entry Menu ...

#### Example: Creating a Patient Plan of Care

Select PATIENT NAME: NURSPATIENT5 ,TEN 12-01-57 000222333 NSC  
VETERAN

There is no previous Nursing Care Plan for this patient.  
Would you like to add one? YES// <RET> (YES)  
Let me create a new record...

#### Sample of a frame displaying major or primary categories of patient problems

\*\*\*\*\*  
NURSPATIENT5 ,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1

Nursing Care Plan

\*\*\*\*\*

- + 1. Medical Diagnoses
- + 2. Nursing Problems
- + 3. Optional Care Plans

The user selects a pathway from which to build the plan of care.

Select at least 1: 2

The next frame lists areas of health care patterns used to categorize nursing problems.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1

Nursing Problems

\*\*\*\*\*

- + 1. Activities of Daily Living
- + 2. Circulatory System
- + 3. Cognitive-Sensory Area
- + 4. Elimination
- + 5. Health Management
- + 6. Integumentary (Skin)
- + 7. Musculoskeletal/Neurological
- + 8. Nutrition-Metabolic Area
- + 9. Psycho-Social Area
- +10. Respiratory System
- +11. Sexual Functioning/Reproductive System
- +12. Sleep/Rest
- +13. Spiritual Needs

Select at least 1: 7

This frame lists specific patient problems associated with the above health care areas.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1

Musculoskeletal/Neurological

\*\*\*\*\*

- + 1. Disuse Syndrome, Potential For
- + 2. Injury Potential
- + 3. Mobility, Impaired Physical
- + 4. Skin Integrity, Impairment Of (Potential)

Select at least 1: 2

The next frame is a primary display following a patient problem frame. At this level a user can begin to plan specific goals, interventions, etc. for a patient.

The user has decided to document related problems, risk factors, outcomes, and interventions.

Patient Plan of Care

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1

Injury Potential

\*\*\*\*\*

- + 1. Defining Characteristics
- + 2. Etiology/Related and/or Risk Factors
- + 3. Goals/Expected Outcomes
- + 4. Nursing Intervention/Orders
- + 5. Related Problems

Select at least 1: **2-4**

The documentation process begins with the etiology and risk factors.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1  
PATIENT PROBLEM: Injury Potential

Etiology/Related and/or Risk Factors

\*\*\*\*\*

- 1. adverse effects of chemicals/drugs
- 2. biological
- 3. chemical
- 4. clothing
- 5. cognitive deficit
- 6. developmental
- 7. individual/environment conditions which impose a risk
- 8. infestation
- 9. knowledge deficit [specify]
- 10. loss of motor ability from disease/injury/aging/restraints
- 11. medical protocols
- 12. nonadherence/noncompliance
- 13. people provider

Please make the appropriate selections from this screen before continuing onto the next screen. Select at least 1: **11**

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 2  
PATIENT PROBLEM: Injury Potential

Etiology/Related and/or Risk Factors

\*\*\*\*\*

14. perceptual deficit
  15. physical restraints/barriers
  16. physiologic
  17. psychological perception
  18. self-mutilation
  19. sensory loss from disease/injury/aging/restraints
  20. unfamiliar setting
- Additional Text:

Select at least 1: **<RET>** (Since the selection was made in previous screen, the user enters **<RET>** and continues to the goal/outcome frame).

The following frame displays goals which have been entered in the standard patient plan of care data base for this problem. Please note that the ADP coordinator will be able to modify this list through the Patient Plan of Care, Site Configuration option provided within the package.

```

NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1
PATIENT PROBLEM: Injury Potential
```

Goals/Expected Outcomes

```

```

1. remains free from injuries
2. verbalizes how to prevent injury
3. [Extra Goal]

Select at least 1: **1**

'remains free from injuries'  
has no target date information.

Enter a date which is greater than or equal to today's date.

TARGET DATE: T+5// **<RET>** (JUL 01, 1996)

As noted above in the screen display, for every goal selected, the user is prompted to select an associated target date.

The next screen reviews the patient plan of care selections as the user leaves the frames connected with goals. Previously selected goals are highlighted and preceded by a double asterisk (\*\*). This applies to all previously selected choices in the patient plan of care screen displays.

Patient Plan of Care

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1  
PATIENT PROBLEM: Injury Potential

Goals/Expected Outcomes

\*\*\*\*\*

- \*\* 1. remains free from injuries 07/01/96  
(T)
- 2. verbalizes how to prevent injury
- 3. [Extra Goal]

Select at least 1: <RET>

The following frame lists associated interventions. Again, this data can be modified by the ADP coordinator through a site file option. Note selection 6 and 8 in this frame have a plus sign (+) before them. The plus sign indicates that another screen of selections displays to further define this aggregate term.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1  
PATIENT PROBLEM: Injury Potential

Nursing Intervention/Orders

\*\*\*\*\*

- 1. assure understanding of informed consent
- 2. identify and eliminate potential sources of injury
- 3. inspect for external factors which produce injury q [freq.]
- 4. observe for adverse effects of chemical agents/treatments
- 5. protect with restraints [specify]
- + 6. provide physically safe environment
- 7. provide restraint care q[frequency]
- + 8. refer for appropriate consults
- 9. teach patient regarding health maintenance
- 10. teach S/O regarding potential for injury
- 11. [Extra Order]

Select at least 1: 6-7,9-10

The following screen displays additional information from previous screens as indicated by the + sign and allows the user to further define the patient plan of care intervention, "provide a physically safe environment". An example of appended and additional text is also shown.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1  
PATIENT PROBLEM: Injury Potential

provide physically safe environment

\*\*\*\*\*

- 1. bedrails
- 2. call light
- 3. eliminate source of infestation
- 4. isolation
- 5. night light
- 6. prosthetic devices
- 7. remove constrictive clothing
- 8. safety restraints

Additional Text:

Select at least 1: **1;UP AT NIGHT,5,A**

Text was appended to the term, bedrails, by entering a semicolon (;) to the number associated with the selection and then previous to entering another intervention, a comma (,) was inserted after the text, 'UP AT NIGHT'.

ADDITIONAL TEXT  
\*\*\*\*\*

Additional Text for 'provide physically safe environment': **Remove clutter around patient environment**

The additional text is typed in as a free text entry.

\*\*\*\*\*  
NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1  
PATIENT PROBLEM: Injury Potential

provide physically safe environment

\*\*\*\*\*

- \*\* 1. bedrails UP AT NIGHT
- 2. call light
- 3. eliminate source of infestation
- 4. isolation
- \*\* 5. night light
- 6. prosthetic devices
- 7. remove constrictive clothing
- 8. safety restraints

Additional Text: Remove clutter around patient environment

Select at least 1: **<RET>**

The following prompt (selection 7 on the Nursing Intervention/Orders screen) queries the user to enter a time frame for restraint care.

Patient Plan of Care

INTERNAL TEXT for 'provide restraint care [frequency]'  
Internal Text Number 1: frequency// **2h**

Internal text or text within [ ] is typed in as a free text entry.

Once again, the interventions are reviewed as the user leaves the orders frame(s). The user can see that selections 6, 7, 9, and 10 are asterisked and that restraint care should be provided every 2 hours.

```

NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1
PATIENT PROBLEM: Injury Potential
```

Intervention/Orders

```

```

- 1. assure understanding of informed consent
- 2. identify and eliminate potential sources of injury
- 3. inspect for external factors which produce injury q [freq.]
- 4. observe for adverse effects of chemical agents/treatments
- 5. protect with restraints [specify]
- \*\* + 6. provide physically safe environment
- \*\* + 7. provide restraint care q [2h]
- + 8. refer for appropriate consults
- \*\* + 9. teach patient regarding health maintenance
- \*\* + 10. teach S/O regarding potential for injury
- 11. [Extra Order]

Select at least 1: **<RET>**

Do you wish to discontinue any order(s)? NO// **<RET>**

This prompt always displays when leaving intervention/order screens so that a user can select orders to be discontinued.

If Yes was entered, active orders for discontinuation would have been listed.

Upon returning to this level of the patient plan of care the user is preparing to exit this patient problem and establish an evaluation date.

```

NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1
```

Injury Potential

```

```

- + 1. Defining Characteristics
- \*\* + 2. Etiology/Related and/or Risk Factors
- \*\* + 3. Goals/Expected Outcomes
- \*\* + 4. Nursing Intervention/Orders
- + 5. Related Problems

Select at least 1: <RET>

Since this is a new problem, the user is asked to enter: 1) a status and 2) an evaluation date for this problem.

'Injury Potential'  
has no previous evaluation.

The following are codes and definitions used in documenting the problem's current status:

- A if problem is still ACTIVE
- R if problem is RESOLVED
- S if problem has been SUSPENDED (a problem is still an issue but not currently being addressed)
- U if problem was UNRESOLVED @ DISCHARGE

PROBLEM STATUS: Active// <RET>

A reevaluation due date is entered for the problem.

DATE PROBLEM TO BE RE-EVALUATED: T+5// <RET> (JUL 01, 1996)

The next three screens are displayed in review as a user exits the plan of care module.

```

NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1
```

```
Musculoskeletal/Neurological

```

NURSPATIENT5,TEN 000-22-2333 DEC 1,1957 (31) PAGE: 1
```

## Nursing Care Plan

```

```

- + 1. Medical Diagnoses
- \*\* + 2. Nursing Problems
- + 3. Optional Care Plans

Select at least 1: <RET>

As a final step, the user is asked if a printed copy of the patient plan of care just edited should be generated. At any point in creating/editing a patient plan of care, the user can enter a caret P (^P) to print a current [C] patient plan of care without exiting.

Would you like to print a copy of this Nursing Care Plan? YES// <RET>

DEVICE: HOME//Enter appropriate response

The above information is only a cursory overview of the steps taken to develop a patient plan of care. Read the accompanying documentation for further details. The user should pay particular attention to the editing of text (i.e., appended, internal, and additional text).

## Selecting a Patient plan of care to Edit

There are two ways to edit an existing patient plan of care.

### Example: Adding a new plan for a patient with no previous plans.

```
Select PATIENT NAME: NURSPATIENT6,ONE 04-30-41 000432192 NSC
VETERAN
```

There is no previous Patient Plan of Care for this patient.  
 Would you like to add one? YES// <RET> (YES)  
 Let me create a new record...

```

NURSPATIENT6,ONE 000-43-2192 APR 30,1941 (48)
PAGE: 1
```

#### Nursing Care Plan

```

```

- + 1. Medical Diagnoses
- + 2. Nursing Problems
- + 3. Optional Care Plans

Select at least 1:

#### **Example: Choosing a previously developed patient plan of care.**

The second possibility is the patient may have one or more plans already in the system. In this case a list of those patient plans of care (the date/time they were created, and who created them) is displayed.

The following is an example of a multiple and single plan of care selection display:

The following is a list of previous Nursing Care Plans

1. JUN 23, 1996@07:57:39 NURSNURSE14,EIGHT
2. JUN 21, 1996@08:03:34 NURSNURSE14,NINE

OR

The following is a list of previous Nursing Care Plans

1. JUN 21, 1996@08:03:34 NURSNURSE14,NINE

If the user does not want to use one of the listed patient plans of care, a new one can be added. Although it is strongly suggested that only one plan of care be developed for a patient.

#### **Example: Adding a new plan with plans already in existence.**

```
Select PATIENT NAME: NURSPATIENT6,ONE 04-30-41 000432192 NSC
VETERAN
```

The following is a list of previous Nursing Care Plans

1. JUN 21, 1996@08:03:34 NURSNURSE14,NINE

Enter Selection: ?

```
ENTER THE NUMBER OF THE SELECTION TO BE CHOSEN,
OR THE NUMBER FOLLOWED BY AN '@' TO DELETE A SELECTION,
OR THE LETTER 'N' TO ADD A NEW Nursing Care Plan.
```

## Patient Plan of Care

Enter Selection: **N**  
Let me create a new record...

```

PAGE: 1
```

### Nursing Care Plan

```

```

- \*\* + 1. Medical Diagnoses
- + 2. Nursing Problems
- + 3. Optional Care Plans

Select at least 1:

The user continues the process by entering appropriate responses.

### Example: Selecting an existing plan to edit.

```
Select PATIENT NAME: NURSPATIENT6,ONE 04-30-41 000432192 NSC
VETERAN
```

The following is a list of previous Nursing Care Plans

1. JUN 23, 1996@07:57:39 NURSNURSE14,EIGHT
2. JUN 21, 1995@08:03:34 NURSNURSE14,NINE

Enter selection: **2**

```

NURSPATIENT6,ONE 000-43-2192 APR 30,1941 (48)
PAGE: 1
```

### Nursing Care Plan

```

```

- + 1. Medical Diagnoses
- \*\* + 2. Nursing Problems
- + 3. Optional Care Plans

Select at least 1:

Enter a number and proceed as previously described.

### Example: Bypassing Screens/Trailing Comma

This feature facilitates quicker editing of nursing care plan data, and when consistently used, the user is not "backed out" of the option, frame by frame as previously shown in the example, Creating a Patient Plan of Care. If a user types a comma at the end of a list of choices, referred to as a trailing comma, the review screen does not re-display after the choices are processed. The trailing comma is used at any level as demonstrated in this section.

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1

Nursing Care Plan

\*\*\*\*\*

- + 1. Medical Diagnoses
- \*\* + 2. Nursing Problems
- + 3. Optional Care Plans

Select at least 1: 2

\*\*\*\*\*

- + 9. Psycho-Social Area
- +10. Respiratory System
- +11. Sexual Functioning/Reproductive System
- +12. Sleep/Rest
- +13. Spiritual Needs

Select at least 1: 1,

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1

Activities of Daily Living

\*\*\*\*\*

- + 1. Coping, Ineffective Family
- + 2. Home Maintenance Management, Impaired
- + 3. Self-Care Deficit [Specify]

Select at least 1: 1

Note that a trailing comma was not used here. The effect of this is displayed later in the example.

Patient Plan of Care

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1

Coping, Ineffective Family

\*\*\*\*\*

- + 1. Defining Characteristics
- + 2. Etiology/Related and/or Risk Factors
- + 3. Goals/Expected Outcomes
- + 4. Intervention/Orders
- + 5. Related Problems

Select at least 1: **3,4,**

A trailing comma is used here, and this screen is not reviewed after Goals and Interventions are added into the patient plan of care.

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1  
PATIENT PROBLEM: Coping, Ineffective Family

Goals/Expected Outcomes

\*\*\*\*\*

- 1. demonstrates realistic responses to stress
- 2. effective client coping skills
- 3. effective decision making skills
- 4. effective problem solving
- 5. [Extra Goal]

Select at least 1: **1,2,**

'demonstrates realistic responses to stress'  
has no target date information.  
TARGET DATE: T+5// <RET> (FEB 12, 1997)

'effective client coping skills'  
has no target date information.  
TARGET DATE: T+5// <RET> (FEB 12, 1997)

Since the trailing comma was entered in selection 3 from the Coping, Ineffective Family frame, the next entry processed will be selection 4. The Interventions/ Orders frame is displayed next.

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1  
PATIENT PROBLEM: Coping, Ineffective Family

Nursing Intervention/Orders

\*\*\*\*\*

1. assess family's coping response
2. assist family to appraise stressors
3. assist family to develop plan to cope with stressors
- + 4. refer for appropriate consults
- + 5. teach effective coping skills
6. [Extra Order]

Select at least 1: **1,2,**

Do you wish to discontinue any order(s)? NO// **<RET>** (NO)

Trailing comma is used again, and therefore no other selection is processed for the Coping, Ineffective Family frame. The prompt for the evaluation date for Coping, Ineffective Family is asked as if we just entered **<RET>** at the Coping, Ineffective Family frame.

'Coping, Ineffective Family'  
has no previous evaluation.

PROBLEM STATUS: Active// **<RET>**  
DATE PROBLEM TO BE RE-EVALUATED: T+5// **<RET>** (FEB 12, 1997)

Since the user did not type a trailing comma on the Activities of Daily Living frame, it is reviewed or re-displayed upon exiting the option.

\*\*\*\*\*  
NURSPATIENT6,TWO 000-13-0991 DEC 24,1922 (69) PAGE: 1

Activities of Daily Living  
\*\*\*\*\*

- \*\* + 1. Coping, Ineffective Family 02/12/97 (E)  
+ 2. Home Maintenance Management, Impaired  
+ 3. Self-Care Deficit [Specify]

Select at least 1: **<RET>**

Since a trailing comma was entered on the problems frame, it is not reviewed, and the Nursing Care Plan frame comes up for review. The trailing comma supports an efficient process for documenting plans of care.

**Example: Updating the Problems, Goals, and Orders Status**

If a problem is resolved while editing a plan of care, all orders selected for that problem are discontinued and goals are met. These functions automatically occur when the problems are resolved.

In the following excerpt, the user resolves the problem, Coping, Ineffective Family.

Patient Plan of Care

**Example: Patient Plan of Care Entered in Error**

If for some reason a patient plan of care should not have been entered into the system, it can be entered in error from the Patient Plan of Care, Edit option. Patient plans of care that have been entered in error can be viewed via the Patient Plan of Care, Print option.

Select PATIENT NAME: NURSPATIENT6 ,TWO 12-24-22 000130991 SC  
VETERAN

Enter the number of the selection to be chosen, or the number followed by an '@' to delete a selection, or the letter 'N' to add a new Nursing Care Plan.

The following is a list of previous Nursing Care Plans

- 1. FEB 6, 1997@07:37:47 NURSNURSE14,TEN
- 2. JAN 11, 1997@13:27:14 NURSNURSE14,TEN

Enter Selection: 1@

ARE YOU SURE YOU WANT TO ENTER THIS Nursing Care Plan IN ERROR? Y (YES)

The following is a list of previous Nursing Care Plans

- 1. JAN 11, 1997@13:27:14 NURSNURSE14,TEN

Enter Selection: <RET>

Notice that the Feb 6, 1997@07:37:47 entry is no longer selectable.

**Menu Access:**

The Patient Plan of Care, Edit option can be accessed through the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

## NURCPE-EVAL

### Evaluation/Target Date & Order Status Edit

#### Description:

This option provides an efficient method for updating specific patient plans of care such as status and evaluation dates of patient problems, status and target dates of goals, and the status of orders.

#### Additional Information:

This data can be retrieved through the Patient Plan of Care, Print option.

#### Menu Display:

Select Nursing Features (all options) Option: **5** Patient Care Data,  
Enter/Edit

```
Classification, Edit Patient ...
Evaluation/Target Date & Order Status Edit

Location/Bed Section, Edit Nursing
Patient Plan of Care, Edit
Vitals/Measurements Data Entry Menu ...
```

#### Screen Prints:

Select Patient Care Data, Enter/Edit Option: **EVALU**ation/Target Date & Order  
Status Edit

```
Select PATIENT NAME: NURSPATIENT6,THREE 01-19-25 000767111 NSC
VETERAN
```

A list of all active patient problems in the database appears. The list shows when the plan for that problem was developed, and its last evaluation date.

| PROBLEM                                     | DATE/TIME<br>DEVELOPED | EVALUATION<br>DATE |
|---------------------------------------------|------------------------|--------------------|
| 1 Activity Intolerance (Circulatory System) | APR 11, 1996@16:01     | JUL 06, 1996       |
| 2 Airway Clearance, Ineffective             | APR 11, 1996@16:01     | MAY 02, 1996       |
| 3 Coping, Ineffective Family                | APR 11, 1996@16:01     | MAY 02, 1996       |
| 4 Fluid Volume Deficit (Actual/Potential)   | MAR 6, 1996@09:54      | APR 16, 1996       |
| 5 Self-Care Deficit [EATING]                | MAR 6, 1996@09:54      | APR 16, 1996       |

ENTER THE PROBLEM(S) (BY NUMBER) TO BE EDITED (1-7): **1,4**

This response must be a list or range, e.g., 1,3,5 OR 2-4,8.  
Enter RD to redisplay this list of selections.

Response should be no less than 1 and no greater than 7.

The only problem that needs to be evaluated today (7/6/96), and one that was not resolved in 1996, that continues to appear on the list for this patient.

**Example: Documenting a 'MET' goal and adding a new goal.**

Activity Intolerance (Circulatory System)

Last evaluation for 'Activity Intolerance (Circulatory System)'  
Evaluation Date: JUL 6, 1996

PROBLEM STATUS: Active// <RET>  
DATE PROBLEM TO BE RE-EVALUATED: T+7// <RET> (JUL 13, 1996)

Goals/Expected Outcomes

\*\*\*\*\*

- \*\* 1. demonstrates increased control of dyspnea with activity 07/06/93(T)
- 2. demonstrates increased independence for self-care
- + 3. hemodynamically stable during activity
- 4. verbalized/demonstrates decreased fatigue with activity
- \*\* 5. verbalizes/demonstrates physical conditioning techniques 07/06/93(T)
- 6. [Extra Goal]

Select at least 1: **1,5,2**

The first goal was met, while the second goal has a new target date of one week from today and we will be adding a new goal.

For 'demonstrates increased control of dyspnea with activity'  
the most current target date is:  
TARGET DATE: JUL 13, 1996  
TARGET DATE: JUL 13, 1996//T (JUL 06, 1996)

If today's date is entered, the software asks the user if the goal is met.

Has this goal been met? NO// **Y** (YES)

'demonstrates increased independence for self-care'  
has no target date information.  
TARGET DATE: T+7// <RET> (JUL 13, 1996)

**Example: Extending a target date:**

For 'verbalizes/demonstrates physical conditioning techniques'  
the most current target date is:

TARGET DATE: JUL 6, 1996  
TARGET DATE: T+7// <RET> (JUL 13, 1996)

NURSPATIENT6,THREE 000-63-2111 JAN 19,1925 (68) PAGE: 2

Intervention/Orders

\*\*\*\*\*

14. [Extra Order]

Select at least 1: <RET>

Do you wish to discontinue any order(s)? NO// Y (YES)

The orders are listed by number. The user selects the number of the order to be D/c'd.

**Example: Changing the status of a problem.**

The second problem 'Fluid Volume Deficit (Actual/Potential)' was a part of an earlier plan but was not resolved at the patient's discharge. It is selected to show an example of changing a status to Unresolved at Discharge.

Fluid Volume Deficit (Actual/Potential)

Last evaluation for 'Fluid Volume Deficit (Actual/Potential)'  
Evaluation Date: APR 16, 1996

PROBLEM STATUS: Active// Unresolved @ Discharge

No further information is edited for this problem. The same would be true if the status is changed to Suspended or Resolved.

**Menu Access:**

The Evaluation/Target Date & Order Status Edit option is accessed through the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

## **NURCPP-CARE**

### **Patient Plan of Care, Print**

#### **Description:**

This option displays either current (active) patient problems or all problems associated with a particular patient. A current patient plan of care does not display resolved problems, met goals and discontinued orders, etc. A complete patient plan of care includes all information entered for a specific patient plan of care regardless of the status of the entries.

#### **Additional Information:**

The header on this report is site configurable through the Patient Plan of Care, Site Configuration option under the Clinical Site Files menu. This data is edited through the Patient Plan of Care, Edit, and the Evaluation/Target Date and Order Status Edit options.

#### **Report formats:**

A user has the option to print several reports:

1. A 80 column report can be printed on all ward printers.
2. A 132 portrait or landscaped (KARDEX style) patient plan of care can be generated if a laser or ink jet printer is available.

#### **Definitions:**

In reviewing the patient plan of care, please note the following:

1. Dates, not followed by parentheses, indicate when the problem, goal, or order, was initially entered.
2. Date (E) - a date established for re-evaluation for a problem.
3. Date (R) - resolution date for a problem or order reinstated.
4. Date (S) - date a problem was suspended.
5. Date (U) - date a problem was marked as unresolved at discharge.
6. Date (T) - a target date established for attaining and/or re-evaluating a goal.

7. Date (M) - a date on which a goal was met.
8. Date (@) - a date on which a problem, goal or order was removed from the patient plan of care; it is meant to indicate an error.
9. Date (DC) - date on which an intervention was discontinued or a goal was identified as unattainable.

### Menu Display:

Select Nursing Features (all options) Option: **6** Patient Care Data, Print

## NURCPP-EVAL

### Patient Problems to be Evaluated

#### Description:

This option displays a list of active patient problems that need reviewing. The list may contain active patient problems from previous admissions. These problems can be obtained for a single patient, all patients in selected rooms, or all patients on a particular location.

#### Additional Information:

Data can be edited through the Patient Plan of Care, Edit option.

#### Menu Display:

Select Nursing Features (all options) Option: **8** Patient Care Data, Print

- 1 Classification Report
- 2 Location of Individual Patient, Print

# Chapter 4 Vitals/Measurements

## NURSPE-VIT-MENU

### Vitals/Measurements Data Entry Menu

#### Description:

This menu contains options which permit users to enter vitals/measurements or to correct errors in vitals/measurements. Data comes from the GMRV Vital Measurement (#120.5) file.

#### Additional Information:

Data can be retrieved through any of the Vitals/Measurements Results Reporting options.

#### Menu Display:

Select Nursing System Manager's Menu Option: **5** Nursing Features (all options)

- Vitals/Measurements Data Entry Menu ...

Select Patient Care Data, Enter/Edit Option: **Vitals/Measurements Data Entry Menu**

## Vitals/Measurements

Vitals/Measurements Data Entry ...  
Edit a Vital/Measurement Entered in Error

### **Menu Access:**

The Vitals/Measurements Data Entry Menu option is accessed through the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

**NURCPE-VIT-EDIT****Vitals/Measurement Data Entry****Description:**

This option permits users to enter different types of patient vitals signs and selected measurements into the clinical patient record system. Vitals/Measurements data is stored in the GMRV Vital Measurement (#120.5) file.

**Additional Information:**

<sup>1</sup>Various vitals and other measurement data can be retrieved through any of the Vitals/Measurements Results Reporting menu options. If data was entered in error, the user can correct the misinformation through the Edit a Vitals/Measurements Entered in Error option.

Patient vital signs can be entered by patient, selected room and bed and by ward location (i.e., Hospital Location (#44) file). When vitals are entered, both a date and a time are required as well as hospital location. Vital signs and other patient measurements are documented in the specific order indicated by the vital type (temperature, weight, pulse oximetry). Data representing each vital type entry is also separated by a hyphen: Temp-Pulse-Resp-B/P-Height-Weight. To omit entering a vital/measurement reading:

Enter 'N' or 'n' for the value when NOT documenting a reason for omission.

Enter an \* for the specific value when documenting the reason for omission.

Enter a single \* to document that all measurements were omitted and the reason for omission.

The software supports the documentation of measurement omissions by displaying three reasons (i.e., unavailable, pass, and refused) when an '\*' is entered for a measurement value.

<sup>2</sup>Pain tracking is included in the software, where a user can document the level of pain that the patient is experiencing by using the following pain scale:

0 No pain

1 (Minimal discomfort/pain) through 10 (worst imaginable pain)

99 Unable to respond

<sup>3</sup>Pedal Pulse can be entered for a patient as a 1 (pulse present) or a 0 (pulse absent). The pedal pulse is displayed on the Cumulative Vitals Report, the Print Vitals Entered in Error for a Patient, and the table portion of the Vital Signs Record.

<sup>1</sup> Patch NUR\*4\*4 August 1997

<sup>2</sup> Patch NUR\*4\*23 February 1999

<sup>3</sup> Patch NUR\*4\*27 June 1999

<sup>1</sup>Users may enter just the systolic value of Blood Pressure, (e.g., 120/, 120/D, or 120/P) for doppler and palpated methods. If no qualifier is entered, palpated is the default.

<sup>2</sup>Qualifiers (alpha characters appended to the measurement's numeric value) are used to provide additional information about the vital sign(s) and measurements taken by the clinician. Qualifiers are grouped by categories such as: location (e.g., right arm, left leg), position (e.g., lying, sitting, standing), method (e.g., cuff, Doppler, auscultate, assisted ventilator, T-piece), site (e.g., right, left), quality (e.g., actual, estimated), and cuff size (e.g., adult, small adult, pediatric). Vital types can be printed by category with their associated qualifiers and synonyms through the Display Vitals Category/Qualifier/Synonym Table option. When documenting patient vital signs and measurements, the user may see a listing of valid qualifiers by entering a '?' or '??'. The application coordinator has the ability to add qualifiers and change other software parameters through the Vitals/Measurements Site Files Menu option.

Note: After entering vitals/measurements information for a patient, the software displays this data and asks you, "Is this correct? YES//". The user must answer YES to store the data after it is verified correct. If the user enters an '^' at the prompt, the application does NOT store the data and displays 'DATA DELETED' on the screen. Of course, if NO is entered after the prompt, patient information is NOT stored and all vitals/measurements data must be re-entered.

Defaults: The software has defaults for each vital/measurement except for blood pressure. These defaults are displayed when the clinician validates the measurements entered. The following list summarizes the software's defaults:

- Temperature - Oral
- Pulse - Radial
- Respirations - Spontaneous
- Height - Actual
- Weight - Actual

<sup>3</sup>An application coordinator can change the temperature and pulse defaults through the Change Default Qualifiers for Temp./Pulse option.

Asterisks have two different meanings in the software.

- <sup>4</sup>1. When entering vitals/measurements information, the user may enter the \* to prompt the software to display reasons for not documenting a measurement. The user then selects the most appropriate entry.
2. When an \* appears in a report appended to a vitals/ measurement entry, the value of the measurement is either higher or lower than the acceptable value defined in the GMRV Vitals Parameters (#120.57) file. These file values can be edited by the package coordinator through the Edit Vitals Site Parameter File option.

---

<sup>1</sup> Patch NUR\*4\*27 June 1999

<sup>2</sup> Patch NUR\*4\*4 August 1997

<sup>3</sup> Patch NUR\*4\*4 August 1997

<sup>4</sup> Patch NUR\*4\*4 August 1997

All patient measurements are stored in the U.S. Customary System in File #120.5 and displayed in both U.S. customary units and metric equivalents. Small discrepancies between the entering and displaying of data is due to the conversion between scales.

Temperature scales are automatically defined by the software when a user does not append a 'F' or a 'C' to the numeric entry. A number that is larger than or equal to 45 will be considered as a Fahrenheit temperature, and any number less than 45 will be considered as a Centigrade temperature.

<sup>1</sup>The scales for weight and height cannot be automatically determined. Therefore, the user must enter the scale (U.S. customary unit or metric equivalent) associated with the weight and height.

### Screen Prints:

```
Select Vitals/Measurements Data Entry Menu Option: Vitals/Measurements Data
Entry
ENTER DATE (TIME Required) VITALS WERE TAKEN: T@8 (APR 04, 1993@08:00)
```

<sup>2</sup>The first prompt is a system parameter used to identify the date and time the vitals/measurements were taken; time is required. The date/time is stamped on every vital/measurement that is entered into the system. The Change Date/Time Taken option allows the user to identify a new date/time the measurements were taken, a different vital type, or a new selection of patients without leaving the Vitals/ Measurement Data Entry menu. This Change Date/Time Taken option is further explained later in this chapter.

(P)atient? **P**

Example: Process for entering vitals for an individual patient:

Enter patient name.

Select PATIENT NAME: **NURSPATIENT3,THREE** -- 500-1 YES  
SC VETERAN

Enter appropriate hospital location.

Select Hospital Location: 4E// **<RET>**

<sup>4</sup>To omit entering a vital/measurement reading:  
Enter 'N' or 'n' for the value when NOT documenting a reason for omission.  
Enter an \* for the specific value when documenting the reason for omission.  
Enter a single \* to document that all measurements were omitted and the  
reason for omission.

<sup>5</sup>The temp-pulse-resp-pain are entered at this prompt.

Temp-Pulse-Resp-Pain: **102.1-70-24-2**

The following is representative of the software's on-line help:

\*\* Temperature: a number + a location qualifier(optional), e.g., 99.6A  
or 99.6AX (F AXILLARY) or 37R (C RECTAL).  
Default: ORAL  
AXILLARY, CORE, ORAL, RECTAL, SKIN, TYMPANIC

---

<sup>1</sup> Patch NUR\*4\*25 May 1999

<sup>2</sup> Patch NUR\*4\*23 February 1999

<sup>3</sup> Patch NUR\*4\*25 May 1999

<sup>4</sup> Patch NUR\*4\*4 August 1997

<sup>5</sup> Patch NUR\*4\*25 May 1999

\*\* Pulse: a number + a location qualifier(optional), e.g., 70A or 70AP  
(70 APICAL).

Default: RADIAL

APICAL, BILATERAL PERIPHERALS, BRACHIAL, CAROTID, DORSALIS PEDIS,  
FEMORAL, OTHER, PERIPHERAL, POPLITEAL, POSTERIOR TIBIAL, RADIAL, ULNAR

\*\* Respiration: a number(0-99 with no decimal places) + method qualifier  
(optional) e.g., 40C or 40c.

Default: SPONTANEOUS

ASSISTED VENTILATOR, CONTROLLED VENTILATOR, SPONTANEOUS

The entry should be in the following format:

TTT.T-PPP-RR

To omit entering a vital/measurement reading:

Enter 'N' or 'n' for the value when NOT documenting a reason for omission.

Enter an \* for the specific value when documenting the reason for omission.

Enter a single \* to document that all measurements were omitted and the reason for omission.

The data entry is one single string of alphanumeric characters with each measurement separated by a hyphen (-). The software redisplay the data as:

```
Temp.: 102.1 F (38.9 C)* ORAL
Pulse: 70 RADIAL
Resp.: 24 SPONTANEOUS
1Pain: 2
```

Note the asterisk (\*) following the value for temperature. An asterisk (\*) following data indicates that the value is higher or lower than the acceptable values which are defined in the site configurable file GMRV Vitals Parameters (#120.57).

Is this correct? YES// <RET>

At this point the user can reject or accept the entry. This is the last chance to change any possible errors during data entry. The user is able to correct errors at a later time using the error correction option (Edit a Vital/Measurement Entered in Error) which will be discussed later in this chapter.

Do you want to enter other V/M data for this patient? No// <RET> (No)

Select PATIENT NAME: <RET>

This option also supports entering patient vital signs and measurements for all patients on a ward or unit and by selected hospital rooms on a unit. Navigating through the software to document measurements for all patients on a unit is described next.

<sup>3</sup>To omit entering a vital/measurement reading:

Enter 'N' or 'n' for the value when NOT documenting a reason for omission.  
Enter an \* for the specific value when documenting the reason for omission.  
Enter a single \* to document that all measurements were omitted and the reason for omission.

BP-Pulse: **120/70-60**

---

<sup>1</sup> Patch NUR\*4\*25 May 1999

<sup>2</sup> Patch NUR\*4\*23 February 1999

<sup>3</sup> Patch NUR\*4\*4 August 1997

<sup>1</sup>The software displays selections for documenting detailed blood pressures. When a blood pressure is entered with a qualifier for doppler or palpated and no diastolic reading, (e.g., 120/d), the method does not display and will not be editable. Each qualifier must be separated by a comma. The user is not required to enter qualifiers to proceed to the next prompt.

Qualifiers for BLOOD PRESSURE:

| LOCATION | POSITION   | METHOD          | CUFF SIZE    |
|----------|------------|-----------------|--------------|
| 1 L ARM  | 5 LYING    | 8 CUFF          | 13 ADULT     |
| 2 L LEG  | 6 SITTING  | 9 DOPPLER       | 14 LG ADULT  |
| 3 R ARM  | 7 STANDING | 10 INVASIVE     | 15 PEDIATRIC |
| 4 R LEG  |            | 11 NON-INVASIVE | 16 SM ADULT  |
|          |            | 12 PALPATED     | 17 THIGH     |

Select a number under each category (optional).

<sup>2</sup>Separate the numbers with ',': **1,6,8**  
L ARM SITTING CUFF

The software displays selections for documenting detailed pulse.

Qualifiers for PULSE:

| SITE    | METHOD       | POSITION   |
|---------|--------------|------------|
| 1 LEFT  | 3 AUSCULTATE | 6 LYING    |
| 2 RIGHT | 4 DOPPLER    | 7 SITTING  |
|         | 5 PALPATED   | 8 STANDING |

Select a number under each category (optional).

<sup>3</sup>Separate the numbers with ',': **1**  
LEFT

B/P: 120/70 L ARM SITTING CUFF  
Pulse: 60\* RADIAL LEFT  
Is this correct? YES// **<RET>**

<sup>4</sup>After reviewing the entry, a user can reject or accept the data. This is the last chance to change any possible errors during data entry. The user is able to correct errors at a later time using the error correction option, Edit a Vital/Measurement Entered in Error, which will be discussed later in this chapter.

Enter another B/P? NO// **<RET>**

If YES is entered, the user can enter another B/P and pulse under the same time for a different position, location, etc..

<sup>1</sup> Patch NUR\*4\*27 June 1999

<sup>2</sup> Patch NUR\*4\*4 August 1997

<sup>3</sup> Patch NUR\*4\*4 August 1997

<sup>4</sup> Patch NUR\*4\*4 August 1997

## Vitals/Measurements

- <sup>1</sup>1 TPR Pain
- 2 TPR B/P Pain
- 3 TPR B/P Ht. Wt. and Pain
- 4 TPR B/P Wt. and Pain
- 5 Temp, Detailed PR and B/P
- 6 Detailed B/P and Associated Pulse
- 7 Pulse
- 8 Weight
- 9 Circumference/Girth
- 10 Pulse Oximetry
- 11 CVP (Central Venous Pressure)
- 12 User Configurable Combination
- 13 Change Date/Time Taken
- <sup>2</sup>14 Pain

### Example: Girth measurement.

Select Vitals/Measurement Data Entry Option: **9** Circumference/Girth  
Vitals by (A)ll patients on a unit, (S)elected Rooms on unit, or  
(P)atient? **P**  
Select PATIENT NAME: **NURSPATIENT3,THREE** -- 500-1  
YES  
SC VETERAN

Select Hospital Location: 4E// **<RET>**

<sup>3</sup>To omit entering a vital/measurement reading:  
Enter 'N' or 'n' for the value when NOT documenting a reason for omission.  
Enter an \* for the specific value when documenting the reason for omission.  
Enter a single \* to document that all measurements were omitted and the  
reason for omission.

The following is representative of the software's on-line help:

\*\* Circumference: a number + 'I' or 'C' (2 decimals allowed)

For example: 72.25I (inches) 147C (centimeters)

The entry should be in the following format:

NNN.NN

Circumference/Girth: **32.25I**

---

<sup>1</sup> Patch NUR\*4\*25 May 1999

<sup>2</sup> Patch NUR\*4\*23 February 1999

<sup>3</sup> Patch NUR\*4\*4 August 1997

Qualifiers for CIRCUMFERENCE/GIRTH:

| LOCATION    | SITE     |
|-------------|----------|
| 1 ABDOMINAL | 10 LEFT  |
| 2 ANKLE     | 11 RIGHT |
| 3 CALF      |          |
| 4 HEAD      |          |
| 5 LOWER ARM |          |
| 6 OTHER     |          |
| 7 THIGH     |          |
| 8 UPPER ARM |          |
| 9 WRIST     |          |

The user identifies the type of circumference.

Enter a number under each category, separate numbers with a ','  
DO NOT select SITE if this is a HEAD/ABDOMINAL girth measurement: **1**  
ABDOMINAL

Circumference/Girth: 32.25 IN (81.92 CM) ABDOMINAL  
Is this correct? YES// **Y**

Example: Circumference of left lower arm.

<sup>1</sup>To omit entering a vital/measurement reading:  
Enter 'N' or 'n' for the value when NOT documenting a reason for omission.  
Enter an \* for the specific value when documenting the reason for omission.  
Enter a single \* to document that all measurements were omitted and the reason for omission.

Circumference/Girth: **12.25I**

Qualifiers for CIRCUMFERENCE/GIRTH:

| LOCATION    | SITE     |
|-------------|----------|
| 1 ABDOMINAL | 10 LEFT  |
| 2 ANKLE     | 11 RIGHT |
| 3 CALF      |          |
| 4 HEAD      |          |
| 5 LOWER ARM |          |
| 6 OTHER     |          |
| 7 THIGH     |          |
| 8 UPPER ARM |          |
| 9 WRIST     |          |

Enter a number under each category, separate numbers with a ','  
DO NOT select SITE if this is a HEAD/ABDOMINAL girth measurement: **5,10**  
LOWER ARM LEFT

---

<sup>1</sup> Patch NUR\*4\*4 August 1997

### Example: Pulse Oximetry.

Select Vitals/Measurement Data Entry Option: **10** Pulse Oximetry  
Vitals by (A)ll patients on a unit, (S)electd Rooms on unit, or  
(P)atient? **P**  
Select PATIENT NAME: **NURSPATIENT3,THREE** -- 500-1  
YES  
SC VETERAN

Answer with patient name.

Select Hospital Location: 4E// <RET> 4E

Enter appropriate hospital location.

<sup>3</sup>To omit entering a vital/measurement reading:  
Enter 'N' or 'n' for the value when NOT documenting a reason for omission.  
Enter an \* for the specific value when documenting the reason for omission.  
Enter a single \* to document that all measurements were omitted and the  
reason for omission.

The following is representative of the software's on-line help:

\*\* Pulse Oximetry: Enter the numeric value of the patients O2 saturation obtained via pulse oximetry. The value will be interpreted as a percentage.

The entry should be in the following format:

NNN

---

<sup>1</sup> Patch NUR\*4\*25 May 1999

<sup>2</sup> Patch NUR\*4\*23 February 1999

<sup>3</sup> Patch NUR\*4\*4 August 1997

PO2: 89

At this prompt the user may indicate that patient was receiving oxygen at the time the pulse oximetry reading was taken. If YES is entered, additional information on the flow rate, O2 concentration, and method of O2 administration can be entered.

Is the patient on supplemental oxygen? Yes// <RET> (Yes)

Enter a number between 0.5-20 for liters/minute, and/or 21-100 for percent of oxygen concentration. If you wish to enter both rates, separate the values with a ','.

Enter the numeric value(s) for amount of supplemental oxygen provided  
 |<sup>1</sup>(Separate values with a ','): 3.5,40

Oxygen is supplied by

- 1 AEROSOL/HUMIDIFIED MASK
- 2 FACE TENT
- 3 MASK
- 4 NASAL CANNULA
- 5 NON RE-BREATHING
- 6 PARTIAL RE-BREATHING
- 7 T-PIECE
- 8 TRACHEOSTOMY COLLAR
- 9 VENTILATOR
- 10 VENTURI MASK

Enter a number: 1

Pulse Ox.: 89 % with supplemental O2 40% 3.5 l/min  
 via AEROSOL/HUMIDIFIED MASK

Is this correct? YES// <RET>

Do you want to enter other V/M data for this patient? No// <RET> (No)

## **NURCPE-VIT-ERROR**

### **Edit a Vital/Measurement Entered in Error**

#### **Description:**

This option allows users to correct errors in vitals/measurements. When data is edited, a new record is created, and the old record is marked entered in error. Vitals/measurements data is stored in the GMRV Vital Measurement (#120.5) file.

#### **Additional Information:**

Vitals/measurements data can be retrieved through the Print Vitals Entered in Error for a Patient option. The information entered through this option is also reflected in the Cumulative Vitals Report.

#### **Menu Display:**

Select Nursing Features (all options) Option: **5** Patient Care Data,  
Enter/Edit

```
Classification, Edit Patient ...
Evaluation/Target Date & Order Status Edit
Intake/Output Data Entry Menu ...
Location/Bed Section, Edit Nursing
Patient Plan of Care, Edit
Vitals/Measurements Data Entry Menu ...
```

Select Patient Care Data, Enter/Edit Option: **Vitals/Measurements Data Entry**  
Menu

```
Vitals/Measurements Data Entry ...
Edit a Vital/Measurement Entered in Error
```

#### **Screen Prints:**

Select Vitals/Measurements Data Entry Menu Option: **Edit a Vital/Measurement**  
Entered in Error

```
Select PATIENT NAME: NURSPATIENT3,THREE 08-04-18 000848807
SC VETERAN
```

Answer with patient name.

Select DATE (TIME optional) of this error: **T** (APR 04, 1993)

Enter an appropriate date. When the exact time is not remembered, the user may enter the date, and all entries for that date display.

CHOOSE FROM:

- 1 APR 4, 1993@08:00  
BP: 120/80 (R ARM/LYING)  
T: 102.1 F (38.9 C)\* (ORAL)

- 2 APR 4, 1993@08:01  
BP: 130/85 (L ARM/LYING)

Select VITAL/MEASUREMENT from the above list: **1**

Enter the number of the measurement or group of measurements you want to enter in error.

A detailed summary of the data is provided.

```
*** DATA TO BE ENTERED IN ERROR ***
APR 4, 1993@08:00
BP: 120/80 R ARM/LYING
T: 102.1 F (38.9 C)* ORAL
R: 24 (SPONTANEOUS)
P: 70 RADIAL
```

<sup>1</sup>Select a VITAL type record, or press return to correct DATE/TIME, PATIENT or set INVALID for the record: **RESPIRATION**

In this example, the respirations were incorrectly documented. The user must select an appropriate reason(s) from 1-4.

In this case, the invalid record selection (4) cannot be used in combination with 1, 2, or 3. The user receives the following prompt.

- 1 INCORRECT DATE/TIME
- 2 INCORRECT READING
- 3 INCORRECT PATIENT
- 4 INVALID VITAL/RECORD

The INVALID RECORD reason cannot be used in combination with any other selections.

The following are examples of identifying incorrect patient data using the above four selections:

**INCORRECT DATE/TIME:** changes the date/time that a vital measurement was taken for a patient.

---

<sup>1</sup> Patch NUR\*4\*23 February 1999

## Vitals/Measurements

Select the reason(s) for entering this vital/measurement in error: **1**  
Enter new date/time vitals were taken: **9A** (APR 04, 1993@09:00)

**INCORRECT READING:** changes the data for a vital/measurement that was taken for a patient. The following prompt displays only if a single/specific vital has been identified for editing.

Select the reason(s) for entering this vital/measurement in error: **2**

NEW RESPIRATION: **20A**

..

The corrected information is entered.

**INCORRECT PATIENT:** changes the patient for a particular vital measurement (e.g., the data was entered for the wrong patient).

Select the reason(s) for entering this vital/measurement in error: **3**  
Select the NEW Patient's name: **NURSPATIENT6 ,THREE** 01-19-25 000632111  
NSC VETERAN

<sup>1</sup>**INVALID VITAL/RECORD:** deletes the record without adding any new data. In actuality, the bad record is still in the computer, but is not a part of the current patient data.

Select the reason(s) for entering this vital/measurement in error: **4**

If a combination of the above applies, choices can be selected at one time as described below.

Select PATIENT NAME: **NURSPATIENT6 ,SIX** 03-22-22 000969342 NSC

## NURSPP-VIT-MENU

### Vitals/Measurements Results Reporting

#### Description:

This menu contains options which allow the users to print various types of vitals/ measurements reports. Data printed on these reports is stored in the GMRV Vital Measurement (#120.5) file.

#### Additional Information:

<sup>1</sup>Data printed in these reports was entered through the Vitals/Measurement Data Entry option, or the Edit a Vital/Measurement Entered in Error option. All abnormal patient values are identified on the vitals/measurements reports by an asterisk (\*). Patient vital signs and measurements can be printed by patient, selected room and bed and by ward location (i.e., entry in the Hospital Location (#44) file). All vitals/measurements data for a patient is reflected on the Cumulative Vitals Report and the Vital Signs Record (SF 511) graphic report. The division name is obtained from the Hospital Location (#44) file.

## NURCPP-VIT-SF511

### V/M Graphic Reports

#### Description:

<sup>1</sup>This option provides the user with 5 different reports, the first is a report simulating the Standard Form 511 - Vital Signs Record (Vital Flow Sheet), second is a B/P Plotting Chart, third is a Weight Chart, fourth is a Pulse Oximetry/ Respiratory Graph, and last is a Pain Chart. Patient information contained in this report is stored in the GMRV Vital Measurement (#120.5) file, and the GMRY Patient I/O (#126) file.

#### Additional Information:

<sup>2</sup>The information printed in this report was entered through the Vitals/ Measurements and the GMRY Intake and Output applications. All 24 hour intake and output totals are in cubic centimeters (i.e., milliliters). Reports can be printed by selected patient, for all patients on a ward, and for patients in a specific hospital room/bed. Refer to Printer Issues in the Package Management section for additional information on setting up Kyocera F-800A and Hewlett-Packard LaserJet printers for printing linear graphic reports. Users may print the graphic reports using a dot matrix printer, data plotted is not connected by lines. Only radial, brachial, and apical pulses are plotted on the graph, all pulses appear on the table below the graph in the Vital Signs Record. The reason for omission will display on all the graphic reports.

<sup>2</sup>The B/P Plotting Chart, Weight Chart, Pulse Oximetry/Respiratory Graph, and Pain Chart have basically the same appearance with different data. When printing these graphic reports to a Kyocera F-800A or a Hewlett-Packard LaserJet printer, the data on the graph will be connected with lines.

**Menu Access:**

The V/M Graphic Reports option is accessed through the Patient Care Data, Print option of the Administrator's Menu, Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

# Chapter 5 Intake and Output

## NURCPE-I/O-EDIT

### Intake/Output Data Entry Menu

#### Description:

This is the main menu for the Intake and Output (I&O) application. It contains options for: (1) documenting patient intake and output, (2) starting and discontinuing IV lines and fluids, (3) documenting IV care, and (4) printing various intake and output reports. Data is stored in the GMRY Patient I/O (#126) file.

#### Additional Information:

The options found in this menu should be assigned to appropriate nursing personnel in accordance with Nursing Service policy.

This information is used in the following options:

- Print I/O Summary by Patient (by Shift & Day(s))
- Print I/O Summary (Midnight to Present)
- Print I/O Summary (48 Hrs)
- 24 Hours Itemized Shift Report
- Intravenous Infusion Flow Sheet
- End of Shift Report

#### Menu Display:

Select Nursing System Manager's Menu Option: 5 Nursing Features (all options)

- 1 Administration Records, Enter/Edit ...
- 2 Administration Records, Print ...
- 3 Administrative Site File Functions ...
- 4 Nursing Education Reports, Print ...
- 5 Patient Care Data, Enter/Edit ...
- 6 Patient Care Data, Print ...
- 7 Clinical Site File Functions ...
- 8 QI Data, Enter/Edit ...
- 9 Quality Performance Reports ...
- 10 QI Site Files ...
- 11 Special Functions ...

## Intake and Output

Select Nursing Features (all options) Option: 5 Patient Care Data,  
Enter/Edit

Classification, Edit Patient ...  
Evaluation/Target Date & Order Status Edit  
Intake/Output Data Entry Menu ...  
Location/Bed Section, Edit Nursing  
Patient Plan of Care, Edit  
Vitals/Measurements Data Entry Menu ...

Select Patient Care Data, Enter/Edit Option: Intake/Output Data Entry Menu

- 1 Enter/Edit Patient Intake
- 2 Enter/Edit Patient Output
- 3 Start/Add/DC IV and Maintenance

### **Menu Access:**

The Intake/Output Data Entry Menu option is accessed through the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

## NURCPE-I/O-INTAKE

### Enter/Edit Patient Intake

#### Description:

This option allows the user to enter or edit patient intake records (e.g., oral, IV, and nasogastric). Data is stored in the GMRY Patient I/O (#126) file. Refer to Chapter 2, Maintenance of Site Files for editing associated files.

#### Additional Information:

Enter/Edit Patient Intake is the primary option used to enter patient intake. You will note that two (2) columns display after the patient's hospital location or patient's name is entered:

|   |              | Detailed input from 6 to 9 |              |
|---|--------------|----------------------------|--------------|
| 1 | PO           | 6                          | PO           |
| 2 | IV Access    | 7                          | Tube Feeding |
| 3 | Tube Feeding | 8                          | Irrigation   |
| 4 | Irrigation   | 9                          | Other        |
| 5 | Other        |                            |              |

The column on the left side of the screen, permits a user to document only the total intake (in milliliters) associated with a specific intake type (PO, IV, etc.). The column on the right allows users to document the names of specific liquids, fluids, solutions, etc. associated with an intake type. The documenting of specific IV fluids is accomplished through the Start/Add/DC IV and Maintenance option explained later in this chapter. If a user does not document that an IV has been started on a patient through the Start/Add/DC IV and Maintenance option, the software will not allow the user to chart an IV intake amount through this option.

The Intake and Output application does NOT automatically calculate the IV intake totals; this data must be manually entered. Although the intake amount could be calculated based on the date/time the IV solution was hung, the variables adversely affecting the flow rate and producing an erroneous IV intake, counter indicate the automatic calculation of the intravenous intake.

The Enter/Edit Patient Intake option prompts you after you have entered the intake, to enter the patient's output. This was done to simplify the I&O process and save time. The prompt's response is defaulted to YES but you can answer N (for NO) if there is no output at this time.

This software does not prevent intake and output measurements from being entered for patients on leave status, (e.g., authorized, unauthorized) or those that are deceased. When the date and time the data was collected is later than the date/time the patient died or was placed on leave, the software displays a reminder. Following this message, the user may continue entering data.

## Intake and Output

A patient's I&O information is printed on the following reports:

- Print I/O Summary by Patient (by Shift & Day(s))
- Print I/O Summary (Midnight to Present)
- Print I/O Summary (48 Hrs)
- 24 Hours Itemized Shift Report

Information on a patient's detailed intake is printed on the 24 Hours Itemized Shift Report.

### Restrictions:

Data can only be edited for the previous 48 hour period. Future data cannot be entered.

### Menu Display:

Select Patient Care Data, Enter/Edit Option: Intake/Output Data Entry Menu

- 1 Enter/Edit Patient Intake
- 2 Enter/Edit Patient Output
- 3 Start/Add/DC IV and Maintenance

### Screen Prints:

Select Intake/Output Data Entry Menu Option: **1** Enter/Edit Patient Intake  
by (A)ll patients on a unit, (S)electd Rooms on unit, or (P)atient? **P**

Select PATIENT NAME: **NURSPATIENT6,THREE** 01-19-25 000632111 NSC  
VETERAN

Enter patient name.

Select HOSPITAL LOCATION: If the patient is an outpatient, the hospital location prompt displays.

The following example demonstrates the use of the left column for documenting ingested items. More than one (1) entry can be entered by separating numbers by a comma (',') or a hyphen ('-') for a range of numbers.

Note: The following screen display can be edited through the Intake Type option (refer to Chapter 2).

|   |              |                            |
|---|--------------|----------------------------|
|   |              | Detailed input from 6 to 9 |
| 1 | PO           | 6 PO                       |
| 2 | IV ACCESS    | 7 TUBE FEEDING             |
| 3 | TUBE FEEDING | 8 IRRIGATION               |
| 4 | IRRIGATION   | 9 OTHER                    |
| 5 | OTHER        |                            |

Select from 1 to 9 (enter 1,3-5 etc.) or "^" to quit: **1**  
Enter intake: PO

No records in the database within the last 48 hours

Note: The system alerts the user when no information for this intake type has been recorded in the previous 48 hours. If entries are present the program displays data entered within the last 48 hours and a prompt which allows the user to edit, delete and add a new entry, (i.e., Select a number (i.e., 1 to edit; 1@ to delete or N to add; ^ to quit selection) 6).

Please enter a new DATE/TIME: **T@0902** (DEC 28,1992@09:02:00)

Enter appropriate date/time.

Enter PO dated DEC 28,1992@09:02  
Unit ml is not required.

TOTAL AMOUNT: **560**

Enter the intake volume. MI does not have to be entered after the volume.

Total PO intake for this time: 560 mls

Do you want to enter OUTPUT? Yes// **<RET>** (Yes)

Enter 'N' to exit if there is no output for this patient.

|   |          |
|---|----------|
| 1 | URINE    |
| 2 | N/G      |
| 3 | EMESIS   |
| 4 | DRAINAGE |
| 5 | FECES    |
| 6 | OTHER    |

Select from 1 to 6 (enter 1,3-5 etc.) or "^" to quit: URINE//**<RET>**

Note: The above screen display can be changed/edited through the Output Type option.

Enter output: URINE

Urine is the default, but the user may enter another output type from the above list.

No records in the database within the last 48 hours

## Intake and Output

Note: The system alerts the user when no information for this output type has been documented in the previous 48 hours. If entries are present the program displays those entered within the last 48 hours.

Please enter a new DATE/TIME: **N** (DEC 28,1996@09:05:04)

Enter appropriate date/time.

Enter URINE dated DEC 28,1996@09:05  
Unit ml is not required

1. VOIDED
2. FOLEY CATHETER
3. SUPRAPUBIC CATHETER

Note: The above screen display of urine subtypes can be adjusted by editing the Output Subtype file through the Configure I/O Files (ADP Coordinator Only) option.

You may document how the output was obtained by entering a urine output subtype (i.e., voided, foley catheter, suprapubic catheter). If you do not wish to enter a subtype, enter <RET>. The user is then asked to enter an amount that is a numeric entry; you do not have to enter cc/ml. If the actual amount cannot be determined, an estimated amount using S = small, M = medium, and L = large may also be entered.

Select a number for the URINE SUBTYPE(optional): **2**  
FOLEY CATHETER

Enter appropriate subtype.

Enter numeric value for measured output in cc/ml or enter S(mall), M(edium) or L(arge) for estimated output.

OUTPUT AMOUNT: **340**

The following example demonstrates patient intake using specific entries (right column). This display can be changed by editing the intake type data through the Intake Type option (refer to chapter 2).

Select Patient Intake/Output Menu Option: **1** Enter/Edit Patient Intake  
by (A)ll patients on a unit, (S)electd Rooms on unit, or (P)atient? **P**

Select PATIENT NAME: **NURSPATIENT6,THREE** 01-19-25 000632111 NSC  
VETERAN

| Detailed input from 6 to 9 |              |   |              |
|----------------------------|--------------|---|--------------|
| 1                          | PO           | 6 | PO           |
| 2                          | IV ACCESS    | 7 | TUBE FEEDING |
| 3                          | TUBE FEEDING | 8 | IRRIGATION   |
| 4                          | IRRIGATION   | 9 | OTHER        |
| 5                          | OTHER        |   |              |

Select from 1 to 9 (enter 1,3-5 etc.) or "^" to quit: **6,7**  
 Enter intake: PO  
 1. DEC 28,1996@09:02 Total: 560 mls

In this example, the software displays the previous oral intake (documented within the last 48 hours).

Select a number(i.e., 1 to edit; 1@ to delete or N to add; ^ to quit selection): **N**

You can edit the previous entry, delete the entry or enter 'N' for a new entry.

Please enter a new DATE/TIME: **T@1115** (DEC 28,1996@11:15)

Enter appropriate date/time. Time can be entered for the past 48 hours or the present, but cannot be entered in the future.

A list of items from the Intake Items file is displayed.

|           |         |
|-----------|---------|
| SOUP      | 120 mls |
| ICE CREAM | 50 mls  |
| JELLO     | 75 mls  |
| MILK      | 240 mls |
| TEA       | 150 mls |
| WATER     | 125 mls |
| COFFEE    | 150 mls |
| JUICE     | 125 mls |
| SODA      | 360 mls |

Intake items are specific to the facility. The ADP coordinator is responsible for maintaining the Intake Items file through the Configure I/O Files (ADP Coordinator Only) option.

Enter PO dated DEC 28,1996@11:15  
 Unit ml is not required.

Select INTAKE ITEM: **SOUP**

Enter appropriate intake item.

VOLUME: 120// **150**

Enter amount ingested. The user may either accept the default by entering <RET> or enter a different amount.

Select INTAKE ITEM: **MILK**  
 VOLUME: 240//<RET>  
 Select INTAKE ITEM:<RET>

## Intake and Output

The software displays a total intake volume associated with this oral intake type.

Total PO intake for this time: 390 mls

Enter intake: TUBE FEEDING

No records in the database within the last 48 hours  
Please enter a new DATE/TIME: **N** (DEC 28,1996@11:15:20)

Enter appropriate date/time.

A list of items found in the Intake Items file is displayed.

|          |         |
|----------|---------|
| MILK     | 240 mls |
| WATER    | 125 mls |
| SOUP     | 180 mls |
| SUSTACAL | 240 mls |

You may have more or less items listed, depending on what the ADP coordinator entered into the Intake Items file through the Configure I/O Files (ADP Coordinator Only) option.

Enter TUBE FEEDING dated DEC 28,1996@11:15  
Unit ml is not required.  
Select INTAKE ITEM: **SOUP**

Enter the tube feeding product.

VOLUME: 180// **300**

Enter amount ingested.

Select INTAKE ITEM: **WATER**  
VOLUME: 125// **60**  
Select INTAKE ITEM: **<RET>**

Total TUBE FEEDING intake for this time: 360 mls

Do you want to enter OUTPUT? Yes// **N** (No)

## IV Access.

Under this option, the user is able to enter the amount of the IV solution left in the container at the end of the shift or at any time an IV intake total must be entered. The Start/Add/DC IV and Maintenance option does not automatically calculate an accurate amount of absorbed solution per shift.

Select Patient Intake/Output Menu Option: **1** Enter/Edit Patient Intake  
by (A)ll patients on a unit, (S)elected Rooms on unit, or (P)atient? **P**

Select PATIENT NAME: **NURSPATIENT6,THREE** 01-19-25 000632111 NSC  
VETERAN

|   |              |                            |              |
|---|--------------|----------------------------|--------------|
|   |              | Detailed input from 6 to 9 |              |
| 1 | PO           | 6                          | PO           |
| 2 | IV ACCESS    | 7                          | TUBE FEEDING |
| 3 | TUBE FEEDING | 8                          | IRRIGATION   |
| 4 | IRRIGATION   | 9                          | OTHER        |
| 5 | OTHER        |                            |              |

Select from 1 to 9 (enter 1,3-5 etc.) or "^" to quit: **2**  
Enter intake: IV ACCESS

1. D5W 1000 mls 1000 mls (A) LEFT HAND Started on FEB 11,1996@10:39

The software displays a list of the patient's IVs that were entered through the Start/Add/DC IV and Maintenance option.

Enter the number of the IV you wish to enter/edit INTAKE: **1**  
Enter IV INTAKE for D5W 1000 mls A LEFT HAND 1000 mls  
Started @FEB 11,1996@10:39  
Total amount absorbed: 0 mls

The software indicates the total IV intake previously documented through the option and associated with this IV.

No intake records for this IV line within the last 48 hours

If no IV intake was entered, the display appears on the screen.

Please enter a new DATE/TIME: **@1500** (FEB 11, 1996@15:00:00)

Enter ADMIXTURE intake dated FEB 11,1996@15:00  
Enter \* for AMOUNT LEFT if amount of solution absorbed is unknown.  
Unit mls is not required.

AMOUNT LEFT: **600**

This is the amount of the IV solution left at 1500 hours or 3pm.

Intake for this period: 400 mls ? Yes//<RET> (Yes)

This is the amount of IV fluid absorbed from the 1000 ml bag from the time it was started at 10:39am this morning..

Do you want to enter OUTPUT? Yes// **N** (No)

### Menu Access:

The Enter/Edit Patient Intake option is accessed through the Intake/Output Data Entry Menu option of the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

## **NURCPE-I/O-OUTPUT**

### **Enter/Edit Patient Output**

#### **Description:**

This option allows user to enter or edit patient output records only. Patient data is stored in the GMRY Patient I/O (#126) file.

#### **Additional Information:**

This option only permits entry of OUTPUT. URINE and DRAINAGE are the only output types with associated output subtypes, (e.g., foley, voided), but entering data for these subtypes is optional.

Patient output information is printed in the following options:

- Print I/O Summary by Patient (by Shift & Day(s))
- Print I/O Summary (Midnight to Present)
- Print I/O Summary (48 Hrs)
- 24 Hours Itemized Shift Report

A report of a patient's detailed output is found on the 24 Hours Itemized Shift Report.

#### **Restrictions:**

Data can only be edited for the previous 48 hour period. Future data cannot be entered.

#### **Menu Display:**

Select Patient Care Data, Enter/Edit Option: Intake/Output Data Entry Menu

- 1 Enter/Edit Patient Intake
- 2 Enter/Edit Patient Output
- 3 Start/Add/DC IV and Maintenance

#### **Screen Prints:**

Select Intake/Output Data Entry Menu Option: **2** Enter/Edit Patient Output  
by (A)ll patients on a unit, (S)electd Rooms on unit, or (P)atient? **P**

Select PATIENT NAME: **NURSPATIENT6,EIGHT** 04-25-38 000222111

If the patient is an outpatient and/or placed on a ward for 23 hour observation, the hospital location prompt displays.

Select HOSPITAL LOCATION: **1 EAST**

- 1 URINE
- 2 N/G
- 3 EMESIS
- 4 DRAINAGE
- 5 FECES
- 6 OTHER

Select from 1 to 6 (enter 1,3-5 etc.) or "^" to quit: URINE//<RET>

Enter output: URINE

|    |                  |         |                     |
|----|------------------|---------|---------------------|
| 1. | FEB 2,1996@08:00 | 245 mls | VOIDED              |
| 2. | FEB 1,1996@14:24 | 455 mls | FOLEY CATHETER      |
| 3. | FEB 1,1996@09:49 | 100 mls | SUPRAPUBIC CATHETER |

Select a number(i.e., 1 to edit; 1@ to delete or N to add; ^ to quit selection): **N**

Please enter a new DATE/TIME: **@0845** (FEB 02, 1996@08:45:00)

Enter date/time of output.

Enter URINE dated FEB 2,1996@08:45

Unit ml is not required

- 1. VOIDED
- 2. FOLEY CATHETER
- 3. SUPRAPUBIC CATHETER

Select a number for the URINE SUBTYPE(optional): **1**

Enter numeric value for measured output in cc/ml or enter S(mall), M(edium) or L(arge) for estimated output.

OUTPUT AMOUNT: S// **240**

DELETING ERRORS: The entry number, followed by an @ deletes the entry as shown below.

Select Patient Intake/Output Menu Option: **2** Enter/Edit Patient Output by (A)ll patients on a unit, (S)elected Rooms on unit, or (P)atient? **P**

Select PATIENT NAME: **NURSPATIENT6,EIGHT** 04-25-38 000222111

If the patient is an outpatient, the hospital location prompt displays.

Select HOSPITAL LOCATION: **1 EAST**

## Intake and Output

- 1 URINE
- 2 N/G
- 3 EMESIS
- 4 DRAINAGE
- 5 FECES
- 6 OTHER

Select from 1 to 6 (enter 1,3-5 etc.) or "^" to quit: URINE//<RET>

Urine is the software's default response.

Enter output: URINE

|    |                  |         |                     |
|----|------------------|---------|---------------------|
| 1. | FEB 2,1996@08:45 | 240 mls | VOIDED              |
| 2. | FEB 2,1996@08:00 | 245 mls | VOIDED              |
| 3. | FEB 1,1996@14:24 | 455 mls | FOLEY CATHETER      |
| 4. | FEB 1,1996@09:49 | 100 mls | SUPRAPUBIC CATHETER |

Select a number(i.e., 1 to edit; 1@ to delete or N to add; ^ to quit selection): 2@

Select the entry to be deleted.

Are you sure you want to delete this record? Yes// <RET> (Yes)

URINE Entered on FEB 2,1996@08:00 has been deleted!!!

The user can reenter the date/time and enter the correct amount if appropriate.

### Menu Access:

The Enter/Edit Patient Output option is accessed through the Intake/Output Data Entry Menu option of the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

## **NURCPE-I/O-IV CARE**

### **Start/Add/DC IV and Maintenance**

#### **Description:**

This option contains seven protocols associated with intravenous therapy:

1. Start IV - Start a new IV line or heparin/saline lock/port.
2. Solution: Replace/DC/Convert/Finish Solution - DC current solution then replace a new solution to the selected IV line or convert the IV according to the user's choice.
3. Replace Same Solution - Replace the same solution to a selected IV.
4. D/C IV Lock/Port and Site - Remove IV/lock/port from a selected IV site.
5. Care/Maintenance/Flush - Check site condition, dressing change, tube change and flush.
6. Add Additional Solutions(s) - Add additional solution(s) without discontinuing an existing one.
7. Restart DC'd IV - Restart an IV which was DC'd due to infiltration or other reasons.
8. Adjust Infusion Rate - Adjust infusion rate for a selected IV.
9. Flush - Flush all IV line(s) for a selected infusion site.

Information on a patient's IV line, solutions hung and absorbed, IV site care, etc., are stored in the GMRY Patient I/O (#126) file.

#### **Additional Information:**

A patient's IV intake cannot be documented through the Enter/Edit Patient Intake option (IV ACCESS) until an IV has been started through the Start IV option. This software option does not automatically calculate the amount of fluid absorbed during a specific 8 hour shift. There are multiple variables influencing the fluid's absorption rate (such as positioning, pathway, etc.), therefore, the total IV volume absorbed per shift must be manually entered through the Enter/Edit Patient Intake option (IV ACCESS). When the intake of an IV is unknown, the nurse may document this unknown amount by entering an asterisk (\*).

The patient data entered through this option is reflected in the following reports:

- 24 Hours Itemized Shift Report
- Intravenous Infusion Flow Sheet

#### **Restrictions:**

Data can only be edited for the previous 48 hour period. Future data cannot be entered.

## Intake and Output

### Menu Display:

Select Patient Care Data, Enter/Edit Option: Intake/Output Data Entry Menu

- 1 Enter/Edit Patient Intake
- 2 Enter/Edit Patient Output
- 3 Start/Add/DC IV and Maintenance

### Screen Prints:

The following pages contain separate examples of each option's use. There is no continuity in IV displays between individual examples.

```
Select Intake/Output Data Entry Menu Option: 3 Start/Add/DC IV and
Maintenance
Select PATIENT NAME: NURSPATIENT6,THREE 11-04-85 000334443
500-3 NO NSC VETERAN
```

When the patient is an outpatient, a Hospital Location prompt appears and the patient's clinic or ward should be entered. If the patient is an inpatient, the location prompt does not appear.

1. Start IV
2. Solution: Replace/DC/Convert/Finish Solution
3. Replace Same Solution
4. DC IV/Lock/Port and Site
5. Care/Maintenance/Flush
6. Add Additional Solution(s)
7. Restart DC'd IV
8. Adjust Infusion Rate
9. Flush

#### 1a. Start IV using a single lumen catheter.

```
Select from 1 to 9 (enter 1,3-5 etc.) or <RET> to exit: 1
*** START IV ***
```

There is no IV running for this patient.

Start new IV

```
Please enter a new DATE/TIME: N (FEB 14, 1997@14:39:34)
Select from the following IV sites
```

- |                 |               |
|-----------------|---------------|
| 1. HAND         | 7. JUGULAR    |
| 2. WRIST        | 8. ANKLE/FOOT |
| 3. LOWER ARM    | 9. LEG        |
| 4. UPPER ARM    | 10. FEMORAL   |
| 5. ANTECUBITTAL | 11. UMBILICAL |
| 6. SUBCLAVIAN   | 12. PEDAL     |

Enter a number with a qualifier L for LEFT/R for RIGHT, default (L)eft.  
 (e.g., 2R for RIGHT WRIST; 2 or 2L for LEFT WRIST): **3**  
 LEFT LOWER ARM

The ADP coordinator can add entries to the display list through the Configure I/O Files option, specifically the IV Site option.

Select from the following IV CATHs

- |                        |                             |
|------------------------|-----------------------------|
| 1. ANGIO CATH-14       | 12. TRIPLE LUMEN CVP        |
| 2. ANGIO CATH-16       | 13. RA-PA CATH              |
| 3. ANGIO CATH-18       | 14. VENOUS INTRODUCER       |
| 4. ANGIO CATH-20       | 15. HICKMAN LOCK            |
| 5. ANGIO CATH-22       | 16. DOUBLE LUMEN PERIPHERAL |
| 6. BUTTERFLY-16        | 17. SUBCLAVIAN              |
| 7. BUTTERFLY-18        | 18. DOUBLE LUMEN SUBCLAVIAN |

Enter a number/name for your selection,  
Enter additional vitamins/electrolytes using a ; to separate,  
for example, 4;multivits): **13**

The ADP coordinator can add entries to the display list through the Configure I/O Files option, specifically the IV Solution option.

Amount of solution in mls in the container: 1000// **<RET>**  
Enter a number for infusion rate (Example: 125 = 125 ml/hr): **50**  
D5W.2%NS (1000) admixture 1000 mls 50 ml/hr Is it correct ? Yes// **<RET>**  
(Yes)  
D5W.2%NS (1000) (A) 1000 mls (02/14/97@14:39)  
Do you want to add another solution to this line? No// **Y** (Yes)  
Select one of the IV types listed below  
A - admixture  
B - blood/blood product  
H - hyperal  
I - intralipid  
P - piggyback  
L - locks/ports  
Please enter a character: **P** piggyback  
No pharmacy active IV order for this patient

Select a(n) piggyback from the following Nursing Solution file listing

- |                    |                        |
|--------------------|------------------------|
| 1. OTHER 0 mls     | 3. MANNITOL 500 mls    |
| 2. D5W (50) 50 mls | 4. NS.9% (100) 100 mls |

If you select 1 for OTHER, you are asked to enter the name of an IV solution. For example:

Enter a number/name for your selection,  
Enter additional vitamins/electrolytes using a ; to separate,  
for example, 4;multivits): **1**

Please SPECIFY the name of the solution  
(maximum 75 characters): **AMPICILLIN 1GM in NS.9%**

The user may type in the name of any solution or blood/blood product that is not longer than 75 characters.

AMPICILLIN 1GM in NS.9% ? Yes// **<RET>** (Yes)  
 Amount of solution in mls in the container: 0// **50**  
 Enter a number for infusion rate (Example: 125 = 125 ml/hr): **100**  
 AMPICILLIN 1GM in NS.9% piggyback 50 mls 100 ml/hr Is it correct ?  
 Yes// **<RET>** (Yes)  
 D5W.2%NS (1000) (A) 1000 mls (02/14/97@14:39)  
 AMPICILLIN 1GM in NS.9% (P) 50 mls (02/14/97@14:39)  
 Do you want to add another solution to this line? No// **<RET>** (No)

If you entered YES, you can enter more solutions to the same IV site.

1. Start IV
2. Solution: Replace/DC/Convert/Finish Solution
3. Replace Same Solution
4. DC IV/Lock/Port and Site
5. Care/Maintenance/Flush
6. Add Additional Solution(s)
7. Restart DC'd IV
8. Adjust Infusion Rate
9. Flush

### 1b. Start IV using a multi-lumen catheter.

Select from 1 to 9 (enter 1,3-5 etc.) or <RET> to exit: **1**

\*\*\* START IV \*\*\*

Current IV(s):

1000 mls (02/14/97@14:44)

Do you want to add another solution to MEDIAL port? No// **<RET>** (No)

- 1 DISTAL
- 2 MEDIAL
- 3 PROXIMAL

Select the port number used for medication infusion or ^ to quit: ^

Since the user wishes to exit, an ^ is entered.

1. Start IV
2. Solution: Replace/DC/Convert/Finish Solution
3. Replace Same Solution
4. DC IV/Lock/Port and Site
5. Care/Maintenance/Flush
6. Add Additional Solution(s)
7. Restart DC'd IV
8. Adjust Infusion Rate
9. Flush

#### 7. Restart DC'd IV.

Select from 1 to 9 (enter 1,3-5 etc.) or <RET> to exit: 7

\*\*\* RESTART DC'd IV \*\*\*

Select one of the following IV(s) to restart

1. 5% DEXTROSE;HEPARIN 1,000 U/ML .05 UNITS;AMPHOTERICIN-B 50MG... (A) 1000 ml 100 ml/hr  
 started on FEB 14,1997@14:44  
 DC'd on FEB 14,1997@15:03 250 ml left  
 DC reason: ORDER CHANGED
2. D5W.2%NS (1000) (A) 1000 ml 50 ml/hr  
 started on FEB 14,1997@14:39  
 DC'd on FEB 14,1997@14:59 900 ml left  
 DC reason: ORDER CHANGED

Note: An IV can't be restarted for one or more of the following reasons:

1. The specific item has been running over 24 hrs.
2. The solution has been discontinued for over 8 hrs.
3. The remaining solution is under 5 mls.
4. The reason for discontinuation is 'INFUSED'.

Please enter your choice: 2

After the IV solution is selected, the user must validate the information displayed.

Amount of solution in mls in the container: 900// <RET>  
 Enter a number for infusion rate (Example: 125 = 125 ml/hr): 50// <RET>  
 D5W.2%NS (1000) admixture 900 mls 50 ml/hr Is it correct ? Yes// <RET>  
 (Yes)

## Intake and Output

The software then prompts for IV site and catheter information to complete the restart cycle.

Please enter a new DATE/TIME: **n** (FEB 14, 1997@15:15:47)

Select from the following IV sites

- |                 |               |
|-----------------|---------------|
| 1. HAND         | 7. JUGULAR    |
| 2. WRIST        | 8. ANKLE/FOOT |
| 3. LOWER ARM    | 9. LEG        |
| 4. UPPER ARM    | 10. FEMORAL   |
| 5. ANTECUBITTAL | 11. UMBILICAL |
| 6. SUBCLAVIAN   | 12. PEDAL     |

Enter a number with a qualifier L for LEFT/R for RIGHT, default (L)eft.  
(e.g., 2R for RIGHT WRIST; 2 or 2L for LEFT WRIST): **5**

LEFT ANTECUBITTAL

The ADP coordinator can add entries to the display list through the Configure I/O Files option, specifically the IV Site option.

Select from the following IV CATHs

- |                        |                             |
|------------------------|-----------------------------|

### Menu Access:

The Start/Add/DC IV and Maintenance option is accessed through the Intake/Output Data Entry Menu option of the Patient Care Data, Enter/Edit option of the Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

**NURSPP-I/O-MENU****Intake/Output Results Reporting****Description:**

This is the main menu for all patient intake and output reports. Patient data is stored in the GMRY Patient I/O (#126) file.

**Additional Information:**

This information can be edited through the following options:

- Enter/Edit Patient Intake
- Enter/Edit Patient Output
- Start/Add/DC IV and Maintenance

A report that has a default for the date will start with T-3 and go to NOW. These date ranges of course can be changed by the user when printing a report.

Table 1 provides a reference to printing parameters for the reports using the option numbers listed in the menu below to correspond with Table 1.

| OPTION | DATE RANGE | WARD | SELECTED RM | PATIENT | SCREEN PRT | ITEMIZED |
|--------|------------|------|-------------|---------|------------|----------|
| 1      | YES        | NO   | NO          | YES     | YES        | NO       |
| 2      | NO         | YES  | YES         | YES     | YES        | NO       |
| 3      | NO         | YES  | YES         | YES     | YES        | NO       |
| 4      | YES        | YES  | YES         | YES     | YES        | YES      |
| 5      | YES        | YES  | YES         | YES     | YES        | YES (IV) |

Table 1

Note: For Intake to be itemized 'DETAILED INPUT' in the 'Enter/Edit Patient Intake' option must be used. IV solution's will display names from the IV option.

**Menu Display:**

Select Nursing System Manager's Menu Option: 5 Nursing Features (all options)

- 3 Print I/O Summary (48 Hrs)
- 4 24 Hours Itemized Shift Report
- 5 Intravenous Infusion Flow Sheet

### **Menu Access:**

The Intake/Output Results Reporting option is accessed through the Patient Care Data, Print option of the Administrator's Menu, Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

**NURCPP-I/O-SUM****Print I/O Summary by Patient (by Shift & Day(s))****Description:**

This option summarizes patient intake/output by major category and shift for a period of time as defined by the user. Patient data is stored in the GMR Y Patient I/O (#126) file.

**Additional Information:**

Patient information displayed in the report has been entered through the following options:

- Enter/Edit Patient Intake
- Enter/Edit Patient Output
- Start/Add/DC IV and Maintenance

The aggregation of I&O data by shift is determined from the shift start time information stored in the GMR Y NUR Shift/Other (#126.95) file.

**Menu Display:**

Select Patient Care Data, Print Option: **8** Intake/Output Results Reporting

- 1 Print I/O Summary by Patient (by Shift & Day(s))
- 2 Print I/O Summary (Midnight to Present)
- 3 Print I/O Summary (48 Hrs)
- 4 24 Hours Itemized Shift Report
- 5 Intravenous Infusion Flow Sheet

### **24 Hours Itemized Shift Report**

#### **Description:**

This option produces itemized patient intake and output reports by shift for a period of time as defined by the user. Patient data is stored in the GMRY Patient I/O (#126) file.

#### **Additional Information:**

The aggregation of I&O data by shift is determined from the shift start time information stored in the GMRY NUR Shift/Other (#126.95) file. Patient I&O may be printed for all patients on a ward, for patients in selected rooms, and for individual patients.

The information displayed in the report has been entered through the following options:

- Enter/Edit Patient Intake
- Enter/Edit Patient Output
- Start/Add/DC IV and Maintenance

#### **Menu Display:**

Select Patient Care Data, Print Option: **8** Intake/Output Results Reporting

- 1 Print I/O Summary by Patient (by Shift & Day(s))
- 2 Print I/O Summary (Midnight to Present)
- 3 Print I/O Summary (48 Hrs)
- 4 24 Hours Itemized Shift Report
- 5 Intravenous Infusion Flow Sheet

#### **Screen Prints:**

 DIVISION:

MEDICAL RECORD  
 FLOW SHEET-VERTICAL  
 IV FLOW SHEET

**Menu Access:**

The Intravenous Infusion Flow Sheet option is accessed through the Intake/Output Results Reporting option of the Patient Care Data, Print option of the Administrator's Menu, Head Nurse's Menu, Staff Nurse Menu, and the Nursing Features (all options) menu.

# Chapter 6 Miscellaneous Reports

## NURSPP-SHIFT

### End of Shift Report

#### Description:

This report contains patient problems, latest vitals and intake information for a selected nursing tour. Patient data comes from the NURS Patient (#214) file, NURS Classification (#214.6) file, NURS Care Plan (#216.8) file, and the GMR Y Patient I/O (#126) file.

#### Additional Information:

<sup>1</sup>The application coordinator must enter the nursing shift parameters in the GMR Y NUR Shift/Other (#126.95) file before running this report. The time period of the shift uses the hours stored in this file. Users can edit the shift hour using the Shift Starting Hour and Other Parameters option. This report can be printed by ward, selected room(s), or by individual patient. When the user wishes to print a report at the beginning of a shift, they must select the previous shift to print patient information. Included in this report is the name and pager numbers of the provider and attending physician. The code after the pager number indicates either a voice pager (V), or a digital pager (D).

#### Menu Display:

Select Nursing Features (all options) Option: 6 Patient Care Data, Print

- 1 Classification Report
- 2 Location of Individual Patient, Print
- 3 Patient Assignment Worksheet

Printing this report for all patients on a unit or for all patients in a room follows the same process as described above.

**Menu Access:**

The Health Summary Report option is accessed through the Patient Care Data, Print option of the Staff Nurse Menu, Head Nurse's menu, and Nursing Features (all options) menu.

## Section 4 Nursing Education Reports

# Chapter 1 Nursing Education Reports

## NURSE-PR-MENU

### Nursing Education Reports, Print

#### Description:

This menu allows the user to print mandatory training class deficiency reports, 3 year training, and class reports for mandatory, continuing education, ward/unit, and other training classes. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status and employee names are found in the NURS Staff (#210) file.

#### Additional Information:

There are no data entry options for the Nursing Education module. All data entry for the nursing education reports is accomplished via the Education Tracking module of PAID version 4.0. Refer to the PAID 4.0 User Manual for further information. Assigned Mandatory Review Groups may be viewed through the Staff Record (edit/print) option.

Reports can be printed in either an 80 column or 132 column format. The 80 column format prints only the first 25 characters of the class name on the report. The 132 column format prints the entire class name on the report.

The following of calendar/fiscal year, using 1995 as an example:

Calendar year (1995) starts with is an example January (1995) and goes to December (1995).

Fiscal year (1995) starts with October of the previous year (1994) and goes to September 30th of the current year (1995). The title of the report reflects the type of report as well as the date range selected (i.e., FY 1997, CY 1997, 01/01/97-03/01/97).

<sup>1</sup>Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'. Three of the reports (Training Report by Unit/Svc. Category, 3 Yr. Training Report by Unit/Svc. Category, and Mandatory Deficiency Report by Unit/Svc. Category) can be sorted by unit or service category.

#### Security:

The security within the Nursing Education reports options screens the data viewed by nursing employees based on their AMIS Position.

---

<sup>1</sup> Patch NUR\*4\*3 January 1998

- a. The Chief, Nursing Service and the Nursing ADP Coordinators can access all data.
- b. The Associate/Assistant Chief(s) and Supervisors can access data of personnel subordinate to their positions.
- c. Head Nurses have access only to data specific to their ward.
- d. Staff can only view their own data.

An additional level of security has been provided through the Education Tracking software. Assign ONE of the following security keys to individuals that require access not included in nursing security:

- |                        |                                                                                                          |
|------------------------|----------------------------------------------------------------------------------------------------------|
| <sup>1</sup> PRSE SUP: | Assigned to all employees within the service.                                                            |
| PRSE TRAIN:            | Assigned to nursing staff responsible for decentralized or unit training (based on their assigned unit). |

Due to these changes, Nursing Education no longer needs the FileMan security access of "n". If the nursing ADPAC holds the PRSE CORD key, the ADPAC can access all nursing service training records (equivalent to "n").

### Menu Display:

<sup>1</sup> Patch NUR\*4\*3 January 1998

## NURSE-PR-MILOC

### <sup>1</sup>Training Report by Unit/Svc. Category

#### Description:

<sup>2</sup>This option allows the user to print reports on programs or classes, sorted by nursing unit or service category, that are attended by nursing employees. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status and employee names are found in the NURS Staff (#210) file.

#### Additional Information:

<sup>3</sup>Reports display data for a fiscal/calendar year or a selected date range; a specific type or all types of training; for one or more unit(s), or service categories, or the whole hospital; and for a single class or all classes. At the date range prompt, select the latest year you want to include in the report. Each unit report is printed on a separate page. At the end of each report, the following information is provided:

Total Attendees: The number of "unique" individuals who attended any class over the selected period of time.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

## NURSE-PR-MIND

### Individual Training Report

#### Description:

This option allows an individual nursing employee to view and print his/her own educational record of attended courses. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status and employee names are found in the NURS Staff (#210) file.

#### Additional Information:

<sup>1</sup>Reports display data for a fiscal/calendar year; and for a specific type or all types of training. At the date range prompt, select the latest year you want to include in the report.

The security on this option is based on the user's service position. Please refer to Security section of this chapter for more information. At the end of each report a count of the total program hours is displayed which may be total CEUs, total Contact Hrs, and/or total Class Hours.

## NURSE-PR-MI3I

### Individual 3 Yr. Training Report

#### Description:

This option allows an individual nursing employee to view and print his/her own educational record that covers 3 years of attended courses. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file, and the PAID Employee (#450) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status and employee names are found in the NURS Staff (#210) file.

#### Additional Information:

<sup>1</sup>Reports display data for a fiscal or calendar year; and for a specific type or all types of training. At the date range prompt, select the latest year you want to include in the report.

The security on this option is based on the user's service position. Please refer to Security section of this chapter for more information. At the date range prompt, select the latest year you want to include in the report.

<sup>2</sup> Patch NUR\*4\*3 January 1998

## NURSE-PR-MIDEF

### <sup>1</sup>Mandatory Deficiency Report by Unit/Svc. Category

#### Description:

This option allows the user to print a report of required classes not attended by the employee. Courses not attended as required are designated as deficiencies. Attendance data used to calculate this report is stored in the PRSE Student Education Tracking (#452) file. This data is checked against required classes located in the employee's record in the Paid Employee (#450) file and the class information existing in the PRSE Program/Class file (#452.1). The MI class name must be found in File #452.1. If the name has been deleted from this file then the MI class will never appear on this report. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file, and the PAID Employee (#450) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status is found in the NURS Staff (#210) file. Employee names are found in the NURS Position Control (#211.8) file.

#### Additional Information:

<sup>2</sup>Reports display data for a fiscal or calendar year; for one or more unit(s), or service categories, or the whole hospital; and for a single class or all classes. At the date range prompt, select the latest year you want to include in the report. Only the names of current employees (as indicated in File #450) are reflected in this report.

The percentage of compliance for all MI classes is calculated through the following formula:

$$\frac{\text{\# of individuals who attended all required MI classes assigned to Nursing service}}{\text{\# of individuals (in File #450) assigned to Nursing service and to an MI Class}}$$

In calculating the percentage of compliance for review groups, the percentage is based on attendance at all classes for the selected time frame, for active employees only. The individual is otherwise counted as deficient no matter how many classes were attended in the review group.

If an individual class is selected, the percentage is calculated as follows:

$$\frac{\text{\# of individuals who attended the selected class}}{\text{\# of individuals (in File #450) who are required to attend the selected class}}$$

---

<sup>1</sup> Patch NUR\*4\*3 January 1998

<sup>2</sup> Patch NUR\*4\*3 January 1998

Some employees who are deficient in classes may not show up on the report. This is because the deficiency reports currently do not project deficiencies for a time period, but take into account the last time the employee attended the class and the required frequency of attendance. If a report is requested for calendar year 1997, the required frequency for attending this class is yearly, and the employee last attended the class in June 1996, they are not required to attend the class again until June 1997. Even though they have not attended the class in calendar year 1997, they will not show up on the deficiency report until after June 1997. The exception to this is if the employee has never attended the class before, they would show up on a report for calendar year 1997 as deficient. Another exception to this would be classes with no required frequency for re-attendance which means attendance was only required one time. Employees attending this class will no longer be flagged as deficient after attending the class once. Also, when a class is assigned to an employee the date assigned is recorded in the employee record. If a future date is placed in this field the employee is not required to attend the class until after the date the class is assigned. So what needs to be considered for each required class are the following:

1. Date class was last attended.
2. Required frequency for re-attendance.
3. Date class was assigned to the employee.

**Note:** If an employee is not assigned a mandatory training review group and/or a required class, the deficiency reports will indicate a compliance of 100%. In a future version, a message will print stating that the employee is not assigned to any review group or to any required class. It is suggested that all supervisors be given the Employee Mandatory Training Group/Class Report option for the purpose of identifying staff who are not assigned appropriate training review group(s) or required classes.

<sup>1</sup>Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'. This report can also be sorted by unit or service category.

This report also includes an anniversary date, which is the next date an employee is scheduled to take a class.

<sup>1</sup> Patch NUR\*4\*3 January 1998

## NURSE-PR-DEMP

### Individual Employee Deficiency Report

#### Description:

This option allows the user to print required classes not attended by a specific nursing employee. Mandatory or required courses not attended are designated as deficiencies. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file, and the PAID Employee (#450) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active station and employee names are found in the NURS Staff (#210) file.

#### Additional Information:

<sup>1</sup>Reports display data for a fiscal or calendar year. At the date range prompt, select the latest year you want to include in the report. This option does not display projected deficiencies (i.e., those classes that technically are not yet identified as deficient but still have to be taken at a future time during the fiscal or calendar year). The employee's attendance at MI classes is checked against required classes located in the employee's record in the Paid Employee (#450) file, and the class information existing in the PRSE Program/Class (#452.1) file. The MI class name must be found in File #452.1. If the name has been deleted from this file then the MI class will never appear on this report.

The security on this option is based on the user's service position. Please refer to Security section of this chapter for more information. If the employee has no SSN or is not in the Paid Employee (#450) file the following message appears:

No SSN found for this person, or no entry for this person is found in the PAID Employee (#450) file.

<sup>2</sup>This report also includes an anniversary date, which is the next date an employee is scheduled to take a class.

## NURSE-PR-CES

### C.E. Training Attendance Summary Report (132 Col)

#### Description:

This option allows the user to print 132 column reports on continuing education programs or classes attended by nursing employees. The training data for each nursing employee is stored in the PRSE Student Education Tracking (#452) file. Staff data reflecting assignment location and service category is found in the NURS Position Control (#211.8) file. Active status is found in the NURS Staff (#210) file. Employee names are found in the NURS Position Control (#211.8) file.

#### Additional Information:

Reports display data for local or non-local continuing education classes. At the end of each report the following information is provided:

- Class total: The total number of classes over a period of time (local or non-local).
- Total Attended: The number of unique people who attended a class.
- Total Presentation: The number of occurrences of a class.

Reports can be sorted and printed by facility and/or product line when the appropriate fields (multi-divisional and product line) in the NURS Parameter (#213.9) file contain the value of 'yes'.

# Chapter 2 Rank Listing of Patient Problems

## NURCRP-CP RANK LISTING

### Rank Listing of Care Plan Data

#### Description:

This option displays a listing of patient problems and/or nursing orders (interventions) that have been selected for patients on one or more locations, over a date range. Data is stored in the NURS Care Plan (#216.8) file.

#### Additional Information:

Patient problems are displayed in rank order by frequency and the most frequently selected problem appears first in the report. Under the patient problems is a list of orders associated with the problem, sorted in rank order by frequency. For selected patients the first letter of the last name and last four digits of the SSN appear with each problem and order.

Information is entered through the Patient Plan of Care, Edit option.

#### Menu Display:

| 1    | 1    | involve in 1:1 and groups discussing consequences use/abuse<br>T3333, |

**Menu Access:**

The Rank Listing of Care Plan Data option is accessed through the Quality Performance Reports option of the Nursing Features (all options) menu and the Print Reports option of the QA Coordinators menu.

# Chapter 3 QI Summary

## NURQA-PT-MENU

### QI Summary Enter/Edit

#### Description:

This section explains the options which create the QI Summary data. Entries are stored in the QI Summary file (#217). The Performance Improvement Summary is a module which allows users to create and print monthly/quarterly QI reports, track nursing, non-nursing, and interdisciplinary performance measures, and also integrate data entered into the Survey Generator. Survey Generator is a package that creates questionnaires, totals results, and tracks percentages for threshold evaluation. Together, the Survey Generator and QI Summary report are used for tracking and reporting any performance measures, including chart audits, and discharge summary audits.

Performance Improvement Summary is found in the NURQ namespace. File numbers are in the range of 217 to 217.4. The files are as follows:

- 217 - NURQ QI SUMMARY: This file contains all of the QI Summary data.
- 217.1- NURQ STANDARDS OF CARE/PRACTICE: This file contains a list of all the standards of care and standards of practice.
- 217.2 - NURQ RATIONALE: This file contains all of the rationale data.
- 217.3 - NURQ FREQUENCY: This file contains all of the frequency data.

#### Additional Information:

Performance measures are pulled from information (questions) in the Survey Generator. If a double question mark (??) is entered at this prompt,

Select PERFORMANCE MEASURE: ??

You will be presented with the performance measures (questions) from the identified survey. Example:

Select PERFORMANCE MEASURE: ??

CHOOSE FROM:

- 1 Is the IV fluid infusing as ordered?
- 2 Is the bag and IV tubing properly labeled and dated?
- 3 Was the tubing changed every 48 hours?
- 4 Was the dressing changed every 24 hours?
- 5 Was the site appearance charted every shift?
- 6 Was the site changed every 72 hours or documentation given why it wasn't?
- 7 Is there a signature for every initial?

## QI Summary

There is no jumping allowed in this module. Data can be printed through the QI Summary Print option.

**NOTE:** If you want your survey results to be differentiated by location on the QI Summary report, you must make sure that Nursing Location is a required demographic on the survey. If this is not done, prior to allowing users to participate in the survey, your results will be skewed. The following example shows how to make Nursing Location a required demographic on a survey:

### Survey Generator Manager Menu

- 1 Create/Edit a Survey
- 2 Copy an Survey
- 3 Print a Survey
- 4 Release/Disable a Survey for Participation
- 5 Count Survey Participants
- 6 Delete a Survey, Questions and Responses
- 7 Clear a Survey of Responses
- 8 Generate Survey Statistics
- 9 Print Statistics by a Demographic Data Item
- 10 Print all Survey Responses Individually
- 11 Export a Survey
- 12 Import a Survey
- 13 Populate the Demographic Reference File
- 14 Fix a Survey Response

Select Survey Generator Manager Menu Option: **1** Create/Edit a Survey

### Create/Edit/Maintain a Survey

v 2.0

Select one of the following:

- C Create a New Survey
- B Edit Basic Survey data
- D Add or Edit Demographic Survey Fields
- E Edit All Questions Sequentially
- I Add/Edit Individual Questions
- P Print a Survey
- Q Quit (also uparrow, or <RETURN>)

Selection: **D** Add or Edit Demographic Survey Fields

Survey Name Selection

Survey NAME: **ANY SURVEY** By: NURSNURSE11,FIVE

Subject: ANY SURVEY  
Add/Edit Demographic Questions

By: NURSNURSE11,FIVE

Select DEMOGRAPHIC DATA ITEM: **NURSING LOCATION**

DEMOGRAPHIC DATA ITEM: NURSING LOCATION// **<RET>**

TYPE: **P** POINTER

FILE: **211.4** NURS LOCATION

IS THIS A REQUIRED ANSWER?: **Y** YES

Subject: ANY SURVEY  
Add/Edit Demographic Questions

By: NURSNURSE11,FIVE

Select DEMOGRAPHIC DATA ITEM: **<RET>**

Create/Edit/Maintain a Survey

v 2.0

Select one of the following:

- C Create a New Survey
- B Edit Basic Survey data
- D Add or Edit Demographic Survey Fields
- E Edit All Questions Sequentially
- I Add/Edit Individual Questions
- P Print a Survey
- Q Quit (also uparrow, or <RETURN>)

Selection: **<RET>**

Survey Generator Manager Menu

- 1 Create/Edit a Survey
- 2 Copy an Survey
- 3 Print a Survey
- 4 Release/Disable a Survey for Participation
- 5 Count Survey Participants
- 6 Delete a Survey, Questions and Responses
- 7 Clear a Survey of Responses
- 8 Generate Survey Statistics
- 9 Print Statistics by a Demographic Data Item
- 10 Print all Survey Responses Individually
- 11 Export a Survey
- 12 Import a Survey
- 13 Populate the Demographic Reference File
- 14 Fix a Survey Response

Select Survey Generator Manager Menu Option:

**Restrictions:**

There is no security in the package keeping one service from looking at another services data in the QI routines or in the Survey Generator. You can print anyones' data, but you can only edit your own data. This version of the QI Summary module is compatible with the Survey Generator V. 2.0.

**Future Plans:**

This package will be enhanced as JCAHO requirements change.

**Recommendations:**

The QI Summary Report is meant to work in conjunction with the Survey Generator. By using the Survey Generator, you can develop appropriate performance measures to use in monitors and audits. The survey generator will provide you with basic tabulations and statistics which you will use in the QI Summary Report. Once a 'Survey' is created, the performance measures will point to the QI Summary Report - Performance Measure. For specifics on the use of the Survey Generator please refer to the Survey Generator Version 2.0 User Manual.

**Definitions:**

QI: Quality Improvement also called CQI (Continuous Quality Improvement) and TQI (Total Quality Improvement) is an approach to quality management that builds upon traditional performance improvement methods by:

- \* Emphasizing the organization and systems, rather than individuals.
- \* Using objective data with which to analyze and improve processes.
- \* The ideal that systems and performance can always improve even when high standards appear to have been met.
- \* This is also called Performance Improvement or Quality Management.

Standards of Care: A written value that defines patient expectations. Standards of Care reflect the Clinical functions of an organization as they are directed to the patient who receives the service. Example: The patient can expect skin integrity to be maintained.

Standards of Practice: A written value that defines the rules, actions, or conditions of practitioners who provide patient care. Standards of Practice reflect the professional functions of the organization as they are directed to the staff who delivers the service. Example: The RN will assist the patient in maintaining skin integrity by assessing the patient, providing an environment conducive to skin integrity and treating skin breakdown when it occurs according to procedure.

Key Functions: Also called "Important Functions" or "Important Aspects of Care" are a goal directed interrelated series of processes that are believed to have a significant effect on the probability of desired patient outcomes (high-risk function, high-volume function, and problem-prone function). Examples: Patient care, education of patients and family, continuum of care, patient rights, assessment.

Indicator (Performance Measure): "A measurement used to monitor and evaluate the quality of important governance, management, clinical and support functions" (Joint Commission) Performance measures do not measure the quality of care, but the practices of individuals, the rules and regulations of the organization, the timeliness of treatment, the use of medical technology and the function of all health care team members. Performance measures point to issues of care that need further investigation. Examples: \* Was a Skin Risk Assessment (10-0096) completed? Yes/No. \*The acute med/surg unit has a 2% or less incidence of skin breakdown for pts. per quarter.

Type of Indicator/Performance Measure - Performance measures can be of 3 types:

- Structure - assesses the environment in which the care occurs, including qualifications and numbers of providers.
- Process - assesses an important and discrete activity that is carried out, either to directly care for the patient or to support patient care.
- Outcome - assesses what happens or does not happen to a patient following a process.

Definition of Terms: Part of Performance Measure Development that comes after you have identified the Important Function (Key Function or Important Aspect of Care) and the Performance Measure Statement. It defines the terms in your performance measure statement to provide consistency for reviewers.

Example:

I. Important Aspect of Care (Key Function):  
Assessment

II. Performance Measure Statement:  
Patients will be assessed within 8 hours of admission.

III. Definition of Terms:

- A. Patients - any inpatient with a LOS longer than 24 hours.
- B. Assessed - 1) Have data gathered regarding chief complaint; physical signs and symptoms; history of medical problems, surgeries, procedures; allergies; psychologic and social status; and ability, need, and readiness to learn and 2) conclusions drawn by a registered nurse, physician, and social worker.
- C. Within 8 hours of admission - within 8 hours of the patient's arrival in the nursing unit.

### Menu Display:

- 8 Edit All QI Summary Data

**Menu Access:**

The QI Summary Enter/Edit option is accessed through the QI Data, Enter/Edit option of the Nursing Features (all options) option, or through the QA Coordinator menu option.

## NURQA-PT-ALL

### Edit All QI Summary Data

#### Description:

This option allows the user to enter/edit all of the QI Summary data for the survey. Data comes from the QI Summary (#217) file which has pointers to the Standards of Care/Practice (#217.1) file, Rationale (#217.2) file, and Frequency (#217.3) file.

#### Additional Information:

This data can be edited all at one time through option 8, or each section can be edited individually through options 1-7. Data can be printed through the QI Summary Print option.

#### Menu Display:

Select Nursing Features (all options) Option: **8** QI Data, Enter/Edit

```
AMIS 1106 Acuity Edit
Manhours Edit, AMIS 1106a
QI Summary Enter/Edit ...
Review/Edit Patient Classification ...
```

Select QI Data, Enter/Edit Option: **QI** Summary Enter/Edit

```
1 Disciplines
2 Important Functions
3 Data
4 Performance Measures
5 Receiver of Results
6 References
7 Other QI Summary Data
8 Edit All QI Summary Data
```

#### Screen Prints:

Select QI Summary Enter/Edit Option: **8** Edit All QI Summary Data  
Select SURVEY: **PATIENT RIGHTS**

Answer with the survey name.

DISCIPLINES: HEAD NURSE// <RET>

Enter name of person(s) or units responsible for this report.

SERVICE: NURSING// <RET>

Enter the name of the service associated with this survey.

DATA SOURCE:  
 INTERVIEW WITH COGNITIVELY INTACT PATIENTS  
 Edit? NO// <RET>

Enter the name of the source from which the data was collected.

SAMPLE SIZE: 27// <RET>

Answer with number of observations.

METHODOLOGY:  
 PATIENT INTERVIEW  
 Edit? NO// <RET>

Enter the method with which the data was collected.

FREQUENCY: SEMIANNUALLY// <RET>

Enter how often this information is reported, i.e. monthly, quarterly, etc. This is a pointer to the Frequency (#217.3) file. The following is a sample list of entries:

- ANNUALLY
- BIMONTHLY
- BIWEEKLY
- DAILY
- MONTHLY
- QUARTERLY
- SEMIANNUALLY
- WEEKLY

MONITORING PERIOD: YEAR// <RET>

Answer with the period of time data was collected, i.e. June, 1992; April-June, 1992; etc.

Select RECEIVER OF RESULTS: **CHIEF OF NURSING SERVICE**

Answer with the name of the person(s) or committees this information is communicated to.

RECEIVER OF RESULTS: CHIEF OF NURSING SERVICE// <RET>

You may edit this entry.

## QI Summary

DATE COMMUNICATED: MAR 02, 1995// <RET>

Enter date this information was given to another group or supervisor.

Select RECEIVER OF RESULTS: <RET>

You may make another entry.

### REFERENCES:

SEVERAL ARTICLES HAVE BEEN WRITTEN CONCERNING PATIENT RIGHTS  
Edit? NO// <RET>

Answer with any references you may have.

### OTHER:

PATIENTS WERE SURVEYED REGARDING THEIR KNOWLEDGE OF RIGHTS. NEEDS  
IDENTIFIED INCLUDED THE RIGHT TO REFUSE TREATMENT.  
Edit? NO// <RET>

Enter any additional data you may have. The field 'Other' is an extra field that may be used by the service to track additional information not contained in other segments of this module.

Select LOCATION: NUR CCU// <RET>

Enter the location you wish to enter data for.

Select IMPORTANT FUNCTIONS: **ETHICS/PATIENT RIGHTS**

Answer with high priority functions, processes, treatments, and activities that have the greatest impact on patient care, occur most frequently, affect the largest number of patients or produce risk problems.

IMPORTANT FUNCTIONS: ETHICS/PATIENT RIGHTS  
Replace <RET>

You may edit this entry.

Select STANDARDS OF CARE: THE PATIENT WILL NOT HAVE ANY COMPLICATIONS// <RET>

Enter patient expectations describing the kinds of care the patient can expect to receive from nurses.

Select STANDARDS OF PRACTICE: THE NURSE WILL PROVIDE EDUCATION TO THE  
PATIENT// <RET>

Enter nurses expectations -- what the nurse does to meet the patient expectations.

Select IMPORTANT FUNCTIONS: <RET>

You may enter more than one.

Select PERFORMANCE MEASURE: 1 Did you receive a copy of the Patient's Bill of Rights when you arrived on the nursing unit?

Answer with one of the questions from the survey.

PERFORMANCE MEASURE: Did you receive a copy of the Patient's Bill of Rights when you arrived on the nursing unit?

Replace <RET>

TYPE OF INDICATOR: OUTCOME// <RET>

Enter either Structure, Process or Outcome. Structure (an indicator that assesses the environment in which care occurs); Process (indicator that assesses an important and discrete activity that is carried out, either to directly care for the patient or to support patient care); Outcome (indicator that assess what happens or does not happen to a patient following a process).

DEFINITION OF TERMS:

COGNITIVELY INTACT: AWARE OF THEIR ACTIONS

Edit? NO// <RET>

Enter the definition of any terms used in this data entry.

Select RATIONALE: STUDY ON HOW NURSES ARE SAFEGUARDING PATIENT'S RIGHTS// <RET>

Answer with reason for looking at this indicator. High Risk (causes great risk to patient); High Volume (occurs frequently); Problem Prone (causes problems for patients and staff). The following is a sample list of entries:

HIGH RISK  
HIGH VOLUME  
PROBLEM PRONE

METHOD OF DETERMINING VARIANCE: HISTOGRAM// <RET>

Enter mechanism to determine when further evaluation must be triggered.

CONCLUSIONS:

STAFF HAS INCREASED AWARENESS OF PATIENT RIGHTS

Edit? NO// <RET>

Enter any conclusions you have about this indicator.

RECOMMENDATION/ACTION: EDUCATE PATIENTS REGARDING RIGHTS

Replace <RET>

Describe the recommendations and actions taken on this performance measure.

## QI Summary

PERSON/GROUP TAKING ACTION: PROJECT COORDINATOR// <RET>

Enter name of person(s) responsible for implementing the action.

DATE IMPLEMENTED: MAR 02, 1995// <RET>

Enter date when action is initiated.

EFFECTIVENESS OF ACTION TAKEN: ACTIONS TAKEN WERE EFFECTIVE IN IMPROVING PATIENT CARE// <RET>

Answer with how effective the actions were that were taken. The following is a list of choices:

1. NO ACTIONS TAKEN
2. ACTIONS TAKEN WERE EFFECTIVE IN IMPROVING PATIENT CARE
3. ACTIONS TAKEN WERE PARTIALLY EFFECTIVE IN IMPROVING PATIENT CARE
4. ACTIONS TAKEN WERE NOT EFFECTIVE IN IMPROVING PATIENT CARE

Select PERFORMANCE MEASURE: <RET>

You may enter another performance measure.

### **Menu Access:**

The Edit All QI Summary Data option is accessed through the QI Summary Enter/Edit option of the QI Data, Enter/Edit option of the Nursing Features (all options) option, or the QA Coordinators menu option.

## NURSQA-PR-MENU

### Quality Performance Reports

#### Description:

This section explains the option which prints the QI Summary data. Data comes from the QI Summary file (#217) and the QA Forms file (#748).

B. DATA:

1. DATA SOURCE:  
     INTERVIEW WITH COGNITIVELY INTACT PATIENTS
2. SAMPLE SIZE: 27
3. METHODOLOGY:  
     PATIENT INTERVIEW
4. FREQUENCY: SEMIANNUALLY
5. MONITORING PERIOD: YEAR
6. SURVEY STATISTICS:

1) Did you receive a copy of the Patient's Bill of Rights when you arrived on the nursing unit?

12 participants or 40.0% responded NO  
 18 participants or 60.0% responded YES

2) Were the rules of your unit discussed with you? (meals passes laundry)

13 participants or 43.3% responded NO  
 17 participants or 56.7% responded YES

3) Does the nursing staff provide you with privacy?

3 participants or 10.0% responded BLANK-BYPASSED.  
 6 participants or 20.0% responded NO  
 21 participants or 70.0% responded YES

4) Does the nursing staff treat your personal property with respect?

6 participants or 20.0% responded BLANK-BYPASSED.  
 2 participants or 6.7% responded NO  
 22 participants or 73.3% responded YES

5) Do you know about living wills and medical durable power of attorney?

5 participants or 16.7% responded NO  
 25 participants or 83.3% responded YES

6) Do you know why you are in the hospital? (request a specific diagnosis/answer)

3 participants or 10.0% responded BLANK-BYPASSED.  
 3 participants or 10.0% responded NO  
 24 participants or 80.0% responded YES

---

7) Do you know what medications you are taking?

1 participants or 3.3% responded BLANK-BYPASSED.  
5 participants or 16.7% responded NO  
24 participants or 80.0% responded YES

8) Do you usually know what your plan of care is?

2 participants or 6.7% responded BLANK-BYPASSED.  
7 participants or 23.3% responded NO  
21 participants or 70.0% responded YES

9) Do the nurses treat you with respect?

4 participants or 13.3% responded NO  
26 participants or 86.7% responded YES

10) What is the name of the nurse caring for you?

Enter RETURN to continue or '^' to exit: <RET>

**Menu Access:**

The QI Summary, Print option is accessed through the Quality Performance Reports option of the Nursing Features (all options) menu, or the QA Coordinators menu.

# Glossary

AA Authorized absence of staff member from duty.

Access Code A unique sequence of characters known by and assigned only to the user, the system manager and/or designated alternate(s). The access code (in conjunction with the verify code) is used by the computer to identify authorized users.

Acuity Patient classification or category rating from 1 through 5.

Administration Schedule This is a common abbreviation for a schedule. A schedule is the frequency for which an action is to take place, such as every eight hours (Q8H) or every other day (QOD).

ADP Coordinator/ADPAC/Application Coordinator Automated Data Processing Application Coordinator. The person responsible for implementing a set of computer programs (application package) developed to support a specific functional area such as nursing, PIMS, etc.

ADT Admission, Discharge, Transfer (PIMS option).

AMIS Automated Management Information System.

Application A system of computer programs and files that have been specifically developed to meet the requirements of a user or group of users. Examples of *VISTA* applications are the PIMS and nursing modules.

Archive The process of moving data to some other storage medium, usually a magnetic tape, and deleting the information from active storage in order to free-up storage space on the system.

Audit Trail/Logging Features The use of automated software procedures to determine if the security controls implemented for protection of computer systems are being circumvented and to identify the potential source of the security breach.

Backup Procedures The provisions made for the recovery of data files and program libraries and for restart or replacement of ADP equipment after the occurrence of a system failure.

Baud Rate The rate at which data is being transmitted or received from a computer. The baud rate is equivalent to the number of characters per second times 10.

Block The unit of storage transferred to and from disk drives, typically 512, 1024, or 2048 bytes (characters).

## Glossary

**Boot** The process of starting up the computer.

**Bulletin** A canned message that is automatically sent by MailMan to a user when something happens to the data base.

**Byte** A unit of computer space usually equivalent to one character.

**C.E.** Continuing education.

**CIOFO** Chief Information Office Field Office, formerly known as Information Resource Management Field Office, and Information Systems Center.

**CNO** Central nursing office (e.g., CNO printer).

**Contingency Plan** A plan which assigns responsibility and defines procedures for use of the backup/restart/recovery and emergency preparedness procedures selected for the computer system based on a risk analysis for that system.

**CORE** A collection of VA developed programs (specific to PIMS, Pharmacy Service, and Laboratory Service) which are run at VA Medical Centers.

**CPRS** Computerized Patient Record System.

**CPU** Central Processing Unit, the core of a computer system.

**CRT** Cathode Ray Tube, similar to a TV monitor but used in computer systems for viewing data. Also called a Video Display Terminal (VDT).

**Current Employee** A nursing employee with the status of 'active' or 'intermittent' as identified in the NURS Staff (#210) file.

**Currently Employed** See 'Current Employee'.

**Cursor** A visual position indicator (e.g., blinking rectangle or an underline) on a CRT that moves along with each character as it is entered from the keyboard.

**Data Dictionary** A description of file structure and data elements within a file.

**Device** A hardware input/output component of a computer system (e.g., CRT, printer).

**Disk** A magnetic storage device used to hold information.

**Edit** Used to change/modify data typically stored in a file.

**EOD** Enter on Duty. The date on which an individual began his/her employment.

**Field** A data element in a file. For example, FTEE and SEX are fields in the NURS Staff file (#210).

**File** An area where data is stored for retrieval at a later time. A computer record of related information (e.g., Staff (DB) File, Patient file, Prescription file).

**File Manager or FileMan** Within this manual, File Manager or FileMan is a reference to VA FileMan. FileMan is a set of M routines used to enter, edit, print, and sort/search related data in a file; a data base.

**Focus Group** Previously referred to as the Expert Panel, or SIUG (Special Interest User Group). A committee which advises programmers about the development of a particular system/package.

**FTEE** Full time employee equivalent.

**Global** An M term used when referring to a file stored on a storage medium, usually a magnetic disk. In the nursing software, for example, nursing employee data is stored in one global, and patient data is stored in another global.

**GMRV** This signifies the General Medical Record namespace assigned to the Vitals/Measurements application.

**GMRY** This signifies the General Medical Record namespace assigned to the Intake and Output application.

**Grade/Step** The salary grade and its related step.

**Hardware** The physical or mechanical components of a computer system such as CPU, CRT, disk drives, etc.

**I&O** Intake and Output.

**Intake /Output Type** The type denotes from where the intake or output is derived, i.e., oral, intravenous, etc.

**IRMS** Information Resource Management Service.

**IV** Intravenously; by intravenous injection.

**Kernel** A set of software utilities. These utilities provide data processing support for the application packages developed within the VA. They are also tools used in configuring the local computer site to meet the particular needs of the hospital. The components of this operating system include: MenuMan, TaskMan, Device Handler, Log-on/Security, and other specialized routines.

**Kilobyte** More commonly known as Kbyte or K. A measure of storage capacity equivalent to 1024 characters.

**LAYGO** An acronym for Learn As You Go. A technique used by FileMan to acquire new information as it goes about its normal procedure. It permits a user to add new data to a file.

**M** Formerly known as MUMPS. Massachusetts (General Hospital) Utility Multi-Programming System. This is the programming language used to write all *VISTA* applications.

**M.I.** Mandatory Inservice.

**MailMan** An electronic mail, teleconferencing, and networking system.

**Megabyte** A measure of storage capacity; approximately 1 million characters. Abbreviated as Mbyte or Meg.

**Memory** A storage area used by the computer to hold information.

**Menu** A set of options or functions available to users in editing, formatting, generating reports, etc.

**Menu Manager** A part of the Kernel that allows each site to manage the various options or functions available to individual users.

**ML** Milliliters; a unit of volume used in the Intake and Output application.

**Modem** An electronic device which converts computer signals to enable transmission through a telephone.

**Module** A component of the nursing software application that covers a single topic or a small section of a broad topic.

**Namespace** A naming convention followed in the VA to identify various applications and to avoid duplication. The namespace is used as the prefix for all routines and globals used by the application. The nursing software uses NUR as its namespace.

**NPSB** Nurse Professional Standards Board.

**Nursing Unit** A nursing location which is found in the NURS Location (#211.4) file.

**Operating System** The innermost layer of software that communicates with the hardware. It controls the overall operation of the computer such as assigning places in memory, processing input and output. One of its primary functions is interpreting M computer programs into a language the system can understand.

**Option** A functionality that is invoked by the user. The information defined in the option is used to drive the menu system. Options are created, associated with others on menus, or given entry/exit actions. For example, the NURS-SYS-MGR is the main menu for the Nursing application.

**Package** Otherwise known as an application. A set of M routines, files, documentation and installation procedures that support a specific function within VISTA (e.g., the ADT and Intake and Output applications).

**Password** A protected word or string of characters that identifies or authenticates a user, a specific resource, or an access type (synonymous with verify code).

**Patient Plan of Care** Previously referred to as Nursing Care Plans. The following is a list of terms related to Patient Plan of Care:

**Additional Text** Appears as an individual selection for the five basic components of the care plan. It is free text, ranging from 1-245 characters and can be used to clarify or individualize a patient's plan of care. Additional Text does not highlight and no '\*\*' precedes it when selected. Example: ADDITIONAL TEXT: Hard of Hearing.

**Aggregate Term** An aggregate term is an element. Throughout the hierarchy of Patient Plan of Care when a selection is made in the development of a patient care plan, that selection is an element/aggregate term. In the Patient Plan of Care site configuration file the same holds true. When prompted with "Select Term to Add," you are adding an element/aggregate term, to that level of the Patient Plan of Care hierarchy. Aggregate terms may be either a Frame or a Term. An example of an aggregate term may be any of the following: altered cardiovascular status, Goals/Expected Outcomes, A-line patent, PA line.

**Appended Text** Text that is entered by the user at the end of an element to further clarify the context of the patient data. (For example, if you choose to append the text for SIGNS AND SYMPTOMS OF INFECTION, you could add the terms REDNESS, SWELLING, DRAINAGE, etc., for clarification.).

**Classification** A characteristic assigned to one or more aggregate terms in order to link the proper contributing factor (Etiology, Goals/Expected Outcomes, Interventions or Related Factors) or parent (Patient Specific Problems). The TERM 'wine with meals' is an Intervention, therefore, the classification is ORDERABLE and is displayed with Treatment Interventions/Orders.

**Contributing Factor** One of the 5 basic components of a patient plan of care. The 5 contributing factors are:

1. Defining Characteristics
2. Etiology/related and/or risk factors
3. Goals/expected outcomes
4. Intervention/orders
5. Related problems.

**Defining Characteristics** Subjective/objective signs and symptoms indicative of a condition corresponding to a given Nursing Diagnosis. It is a contributing factor as well as a classification for "Defining Characteristics".

**Element** A component or an essential part. It can be a TERM or FRAME and comprises the selections used to create a Patient Plan of Care. Example: below the knee amputation or altered cardiovascular status.

**Frame** This is an element that is general and allows specific items or elements to be selected. A frame contains more selections or terms. Example:

+A-line (FRAME)

1. Calibrate and monitor on Adm. & PRN (TERM)
2. Maintain good position of extremity.

**Goal** A classification used to identify a Goal and/or Expected Outcome. A goal can be measurable or the final outcome of a problem. When used as date for reference or action 'Met' is associated with it.

**Goal/Expected Outcome** Has two purposes:

1. It is a contributing factor (major level), as well as;
2. A classification for the "contributing factor" Goals/Expected Outcomes.

**Internal Text** This is text that can be entered by the user to clarify the meaning of an element. Left and right brackets, [ ], indicate the user will be asked to insert additional text to clarify the element. E.g., V/S q[ ]h, 4 is inserted and text appears as V/S q[4]h.

**Intervention** The classification for the contributing factor 'Intervention/ Orders'. It links all orders or interventions. Previously, this was named Nursing Interventions.

**Lead Text** See Glossary Term under Patient Plan of Care "Text".

**Max** The maximum number of selections that can be selected under a frame. This is normally left blank, when creating a site specific Patient Plan of Care there is no limit to the selections that can be made.

**Min** The minimum number of selections that can be selected under a frame. The number one (1) is always entered when creating a site specific Patient Plan of Care indicating that at least one (1) selection must be made or the frame will not be included in the care plan.

**Orderable** A classification that is used to link a name and/or frame to Intervention/Order. Orderable allows you to track the date of initiation and the date of discontinuation.

**PPC** Patient Plan of Care (Previously called Nursing Care Plan).

**Prime Document** A classification for the highest level of PPC.

**Related Factor** The classification for the contributing factor for Related Problems.

**Related Problem** One of the 5 basic contributing factors of the PPC.

**Site Configurable** A term used to refer to features in the system that can be modified to meet the needs of each site. The site configuration option allows ADP coordinators to add to "already existing" medical diagnoses/nursing problems.

**Tabular** The output format for PPC in which the frame and/or document is displayed. There are 3 types of output format, but only tabular is used with PPC.

**Term** An element used to designate a specific/singular thought or idea. Ex., calibrate and monitor on Adm. & PRN.

**Text** Lead and trail text are fields which should be used to provide additional information to FRAMES and TERMS usually associated with Intervention/Orders and Nursing Goals/Outcomes. This information, though useful, might exceed the frame's or term's 60 character field.

1. Lead Text (for Terms) An example of lead text: The aggregate term under an Intervention should be "assess, monitor and document respiratory rate during activities". The key intervention is "respiratory rate during activities" but for clarity you need to include assess, monitor, and document. Therefore, you can build the aggregate term "respiratory rate during activities" under the frame Intervention/Orders and place the text "assess, monitor, and document" into the lead text field.
2. Trail Text (for Terms) Example: The aggregate term under Intervention might be "assess for signs of fatigue and weakness" but you also need to note that the patient should be monitored and that the information must be documented. Therefore, by adding; " monitor and document" as trail text to the aggregate term, the following intervention can be displayed on the care plan: "assess for signs of fatigue and weakness; monitor and document."
3. Lead and/or Trail Text (for Frames): Lead and/or Trail Text can be used in a FRAME so that you do not have to keep typing the same word or phrase to TERMS listed under FRAME. Ex. When a user selects the FRAME "refer for appropriate consult", he/she is asked to select the appropriate consult(s). When the Care Plan is printed the word "specifically" is printed following the element. "Specifically" is listed as a Trail Text in the site configuration file. The print would look like "refer for appropriate consult specifically (Physical Therapy, Chaplain)".

PIMS Patient Information Management System previously known as the MAS Package.

PO Per orum; refers to an item consumed orally or through the mouth.

Pointer A special type of FileMan data that takes its value from another file. This is a method of joining files together and avoiding duplication of information.

Port An outlet in the back of the computer into which terminals can be connected.

Printer A device for printing (on paper) data which is processed by a computer system.

Program A set of M commands and arguments, created, stored, and retrieved as a single unit in M.

Protocol A single entry point referencing multiple routine entry points to execute several inter related, required processes which perform specific functions. When multiple protocols are associated with a single procedure (i.e., intravenous lines or IV lines), they are found grouped under a single option.

**Purge** The deletion of data from a file.

**Qualifier** A word that gives a more detailed description of an item.

**Queuing** The scheduling of a process/task to occur at a later time. Queuing is normally done if a task uses up a lot of computer resources.

**Required Field** A field which the user must complete by entering requested data.

**Response Time** The average amount of time the user must wait between the time the user responded to a question at the terminal and the time the system responds by displaying data and/or the next question.

**Restart/Recovery Procedures** The actions necessary to restore a system's data files and computational capability after a system failure or penetration.

**<RET>** Carriage return.

**Routine** A set of commands and arguments, created, stored, and retrieved as a single unit in M.

**Risk Analysis** An analysis of system assets and vulnerabilities to establish an expected loss from certain events based on estimated probabilities of the occurrence of such events.

**Security Key** A function which unlocks specific options and makes them accessible to an authorized user.

**Security System** A part of Kernel that controls user access to the various computer applications. When a user signs-on, the security system determines the privileges of the user, assigns security keys, tracks usage, and controls the menus or options the user may access. It operates in conjunction with MenuMan.

**Sensitive Information** Any information which requires a degree of protection and which should be made available only to authorized users.

**Service Category** A term used within the nursing software to categorize employees into six generic groups:

- (1) registered nurse
- (2) licensed practical nurse
- (3) nursing assistant
- (4) clerical staff
- (5) administrative officer/assistant
- (6) other

The sixth category, other, can be used when (a) the first (1-5) categories are inappropriate, and/or (b) the FTEE should not be included in the above five FTEE category counts.

**Service Position** A term used within the nursing software to categorize employees based on job descriptions. Examples of service positions are: staff nurse, LPN 5, NA 4, supervisor, clerk typist, etc.

**Site Configurable** A term used to refer to features in the system that can be modified to meet the needs of each site.

**Software** A generic term referring to a related set of computer programs. Generally, this refers to an operating system that enables user programs to run.

**Subroutine** A part of a program which performs a single function.

<sup>1</sup>**Synonym** A qualifier abbreviation appended to vitals/measurements numeric values on graphic reports.

**Task Manager or TaskMan** A part of Kernel which allows programs or functions to begin at specified times or when devices become available. See Queuing.

**Telecommunications** Any transmission, emission, or reception of signs, signals, writing, images, sounds or other information by wire, radio, visual, or any electromagnetic system.

**Terminal** A device used to send and receive data from a computer system (i.e., keyboard and CRT, or printer with a keyboard).

**TIU** Text Integration Utility.

**Type(s) of Training** A specific category of training class or program as defined in the PAID Education Tracking module. The categories are defined as mandatory training, continuing education, other/miscellaneous, and ward/unit-location training.

**UCI** User Class Identifier. The major delimiter of information structure within the operating system.

---

<sup>1</sup> Patch NUR\*4\*4 August 1997

**User** A person who enters and/or retrieves data in a system, usually utilizing a CRT.

**Utility** An M program that assists in the development and/or maintenance of a computer system.

**VDT** Video Display Terminal. Also called a Cathode Ray Tube (CRT).

**Verify Code** A unique security code which serves as a second level of security access. Use of this code is site specific; sometimes used interchangeably with a password.

**VISTA** Veterans Health Information Systems and Technology Architecture.

**Ward/Unit Location** See Nursing Unit.
