October 2000

Revised January 2014

Revision History

Date	Description (Patch # if applicable)	Project Manager	Technical Writer or Analyst
January 2014	Patch PRC*5.1*174 (IFCAP/eCMS Interface) 1.6.6 – replaced "If the contracting staff…" with "If the **eCMS** contracting staff…" 1.6.7– replaced 'an eCMS user may decide – with the eCMS contracting staff' –with '**the eCMS contracting staff may determine that the 2237.**' Replaced 'then the 2237 is returned to IFCAP automatically via another HL7 message' with '**then generate a Cancellation of the 2237 in IFCAP automatically via another HL7 message.**' 2.4.5. –replaced 'prompt, enter the name or the number of the service that will use the item. Enter the date required. Enter the priority of the request' with 'prompt, you must enter the name or the number of the service that will use the item.' Added new **Note:** The Requesting Service field is mandatory in IFCAP. It is also a required field for the eCMS interface. If the Accountable Officer attempts to send a 2237 to eCMS and this field is blank, the 2237 will generate a transmission error. The Accountable Officer will have to return the 2237 to the CP user for edit and re-approval. Updated top of screen display with "If User attempts to pass this field without entering a value – the software will prompt them for a response. REQUESTING SERVICE: ?? Select the name of the Service that submitted this request." 2.5.1- replaced 'This might keep A&MM staff from…' with 'This might keep Logistics staff from…' 2.5.4 –new sentence above screen display stating "The Classification of Request field is	Robert Miller, PM	Mavis McGaugh, SME Nancy Rudinger, Lyford Greene, Developer Marge Norris, Writer

	not mandatory."		
	Added **Note:** Requesting Service is an IFCAP-required field, and the 2237 cannot go forward to the electronic Contract Management System (eCMS), **unless this field is populated**		
	Updated top of screen display with "If User attempts to pass this field without entering a value – they will be prompted to fill in this field.		
	REQUESTING SERVICE: ??		
	Select the name of the Service that submitted this request."		
	2.5.7 - Added new **Note:** the Line Item <u>DESCRIPTION</u> is now a required field in the 2237. If the User attempts to leave the DESCRIPTION field blank, the User is prompted to fill in the field.		
	2.6.4 – After the REQUESTING SERVICE: ?? prompt, the "Select the name or number of the Service that submitted this request" displays.		
	Replaced the "Note: Although Requesting Service is not an IFCAP-required field, if the 2237 is intended to go forward to the electronic Contract Management System (eCMS), this field must be populated." With "**Note:** Requesting Service is an IFCAP-required field. The 2237 cannot go forward to the electronic Contract Management System (eCMS), unless this field is populated."		
	2.6.7. – Updated the next three lines after the Description: prompt, 'If User does not enter any text, the User will be prompted to enter some text. Item DESCRIPTION is required! User must enter some text.'		
	2.6.9. – Added a note to screen display, "**Note:** Control Point Clerk is not permitted to set the 2237 to YES – Ready for Approval if any Required field is not populated."		
	2.7.5 – Updated "**Note**: Although Requesting Service is not an IFCAP - required field, if the 2237 is intended to go forward to the electronic Contract Management System (eCMS), this		

field must be populated." With "**Note**: Requesting Service is now an IFCAP-required field; the 2237 is not permitted to go forward to the electronic Contract Management System (eCMS), if this field is not populated."

3.2 – Updated heading "3.2 Converting Item Requests to Permanent Transactions" with "**3.2 Converting Temporary Requests to Permanent Transactions**"

3.2.1 - Added new "**Note:** The fields Requesting Service and Line Item DESCRIPTION are not required fields in a Temporary Request. This will mean the Control Point Clerk may encounter missing required fields when converting a temporary request to a 2237 transaction. The Clerk will be advised of the missing field(s) and be allowed to edit the new 2237 and populate the required fields. If they choose not to edit the fields at that time the 2237 will not be complete and the Clerk will not be able to set the Approval flag to YES. The Clerk will have to Edit the 2237 and populate the missing fields."

3.2.3 – new Request Review screen display

3.2.4 – REQUESTING SERVICE: **CP** User must Populate this field as it is required on a 2237**.**

3.2.5 – reworded first paragraph

  - added a note to screen caption, "Note: User cannot set the Request to "Ready for Approval?//YES" if the Requesting Service or any Item DESCRIPTION field is not populated."

7.4. – updated heading "7.4 Canceling Transactions with Permanent Number" with "7.4 Change Existing Transaction Number (of a 2237)"

7.4.1 – added first sentence "Use this option to change the transaction number of an existing 2237 transaction."

7.4.1 - added NOTE: If the 2237 you are changing has eCMS Identifiers --

immediately upon completing the process, you must manually notify the eCMS Contracting Officer of the changed 2237 number. Advise them of the cancelled original 2237# and the new 2237#. This will ensure that the Contracting Officer cancels the old 2237 in the eCMS system and will enable the Contracting Officer to link the new 2237 to the existing Award plan documents when it is Approved and sent forward to eCMS.

7.5 – replace heading "7.5 Supplementary Options in the Requestor's Menu with "7.5 Canceling Transactions with Permanent Number"

7.5.2 – added to second Note,

' …Control Point Activity file (#410)' at the end of the sentence

- updated screen capture by adding Comments: prompt, to describe the reason this transaction was cancelled

7.13.2 – updated screen display and also replaced 'Sent to eCMS' with 'Accepted by eCMS'

7.13.3- updated screen display

7.13.4 – "**Note:** The Requesting Service field is a required field on a 2237." Updated screen display

7.13.5 – the paragraph was divided into three smaller paragraphs. A sentence was added at the end of paragraph two –"If you are not selecting an Item from the Item Master File, you will be prompted to fill in the Item Description." A note was inserted below paragraph two - "**Note:** Item Description is now a Required Field. You must enter the text." Updated screen display.

7.13.6 – updated text description and screen display. Added a

"**Note:** The User will not be able to set the Ready for Approval Flag to YES if either the Requesting Service field or a Line Item Description field is not populated if a Required field is not populated, the User will see a

	warning message and be prompted to Edit the 2237 again. " 7.28 – replaced part of the note "…able to view data related to 2237 transactions returned from eCMS which are related to the Control Point(s) on which you are identified as a Control Point Clerk or Official." With "…to view data about the 2237 transactions related to the Control Point(s) on which you are identified as a Control Point Clerk or Official" 7.28.1 – added Transaction Report - eCMS/IFCAP to the Process a Request Menu Option screen display 7.28.2 – added new paragraphs one and three to this section. Added `Select Process a Request Menu <TEST ACCOUNT> Option: Transaction Report - eCMS/IFCAP` to the top of the screen display

• Pg 149, 9.2.1 MailMan Error Messages – eCMS Interface, changed last sentence to: "The CP user will need to edit the 2237 to populate the Requesting Service field and reapprove the 2237.

• Fixed "Note" box format consistency see Note in 1.6.6 (pg 15) & 2.7.6 and Note in 2.5.5 (pg 27) & 2.6.5 (Pg 32), 2.6.7

9.2.1 MailMan Error Messages – eCMS Interface

• The Accountable Officer sends all 2237s that will be processed by Contracting staff to the electronic Contract Management System (eCMS) in Austin. The IFCAP application will reject any 2237 forwarded to eCMS with no Requesting Service (Requesting Service field is blank (null)). The field is now mandatory in IFCAP, the field is required for 2237s being sent to eCMS. The Accountable Officer will receive a MailMan message advising that the 2237 must be Returned to the Service for editing by the Control Point User. The CP user will then need to edit the 2237 populate the Requesting Service field and reapprove the 2237. The Accountable Officer will then be able to process the 2237 and send it to eCMS. | | |

PREFACE

This manual is designed to provide you, the Control Point Clerk, with the information necessary to create requests, reconcile your control point balance, and generate reports that will assist you in managing your control point funds using the Integrated Funds Distribution, Control Point Activity, Accounting and Procurement (IFCAP) package. The IFCAP package automated certain functions in Acquisition and Materiel Management (A&MM), Fiscal Service, and in all of the services that request supplies and services on Veterans Affairs (VA) Form 90-2237. The goal of IFCAP is to integrate these three areas and allow users to share procurement information. IFCAP has the following components or "modules."

FUNDS DISTRIBUTION allows Fiscal Service to establish Fund Control Points, and track funding for budget purposes.

CONTROL POINT ACTIVITY automates the preparation of requests, the electronic transmission of requests to A&MM and Fiscal services and the bookkeeping processes within a service.

PROCUREMENT allows A&MM to transfer IFCAP-generated requests onto purchase orders and requisitions, process receiving documents in the warehouse, and create and transmit code sheets to Austin.

ACCOUNTING automates the creation of code sheets, handles the processing of certified invoices, and facilitates the electronic transmission of code sheets and receiving documents to the Financial Management System (FMS) located in Austin, Texas. In addition, IFCAP transfers obligation information back to the Control Point and updates the Control Point balance automatically.

INVENTORY permits services to maintain their own on-line inventory and establish an average stock level, record the distribution of goods to secondary location(s), and automatically generate IFCAP requests for replenishment purposes. Secondary locations may maintain their own inventory if they wish.

RFQ enables the Purchasing Agent (PA) to create a Request for Quotation (RFQ), evaluate bids, award the order, and generate the purchase order. Using IFCAP and the Electronic Data Interchange (EDI) functionality that currently exists in Austin, the PA can electronically send the RFQ to one or many vendors and receive the bids electronically

PURCHASE CARD permits users at Service level and in A&MM to generate purchase orders against assigned credit card(s). Charges are passed electronically from the Austin Credit Card System (CCS) to IFCAP and users reconcile payments with IFCAP Purchase Orders. The assigned Approving Official then approves reconciled orders. The local IFCAP Purchase Card Registration file is maintained by the station designated Purchase Card Coordinator. Reconciled orders are then approved by assigned Approving Officials. There are many reports that provide data on the status of the purchase card orders and timeliness of the reconciliation and approval processes.

DELIVERY ORDERS permits users to generate purchase orders for contract items at the Service-level. Using switches that are site configurable, orders can bypass Fiscal and be obligated at time of signing by Service-level staff.

Table of Contents

Chapter 1. Introduction

1.1. The Role of the Control Point Clerk

Control Point Clerks create requests, turn requests into formal transactions, and maintain Control Point funds records. These activities include creating 2237 and 1358 transactions, creating issue book requests, and creating and funding Sub-control Points.

1.2. How to Use This Manual

This manual explains how to perform the role of the Control Point Clerk by dividing that role into small, manageable tasks. The authors of this manual have listed these tasks in successive order so that each instruction builds on the functionality and information from the previous instructions. This will allow new Control Point Clerks to use this manual as a tutorial by following the instructions from beginning to end. Experienced Control Point Clerks can use this manual as a reference tool by using the index and table of contents.

1.3. Reference Numbering System

This manual uses a special paragraph numbering system to allow users to understand how the sections of the manual relate to each other. For example, this paragraph is section 1.3. This means that this paragraph is the main paragraph for the third section of Chapter 1. If there were two subsections to this section, they would be numbered sections 1.3.1 and 1.3.2. A paragraph numbered 1.3.5.4.7 would be the seventh subsection of the fourth subsection of the fifth subsection of the third subsection of Chapter 1. All clear? Actually, this means that users are able to divide their reading into manageable lessons and concentrate on one section and all of its subsections. For example, section 1.3.5.4 and all of its subsections would make a coherent lesson.

1.4. Package Management and Security Measures

IFCAP only allows the person who entered the temporary request (the requestor) to view the status of that request. This is a security measure that prevents users from altering the requests of others. Due to the nature of the information being processed by IFCAP, special attention has been paid to limiting usage to authorized individuals. Individuals in the system who have authority to approve actions, at whatever level, have an electronic signature code. This code is required before the documents pass on to a new level for processing or review. Like the access and verify codes used when gaining access to the system, the electronic signature code will not be visible on the terminal screen. These codes are also encrypted so that even when viewed in the user file by those with the highest levels of access, they are unreadable. Electronic signature codes are required by IFCAP at every level that currently requires a signature on paper.

1.5. Package Operation

IFCAP automates fiscal, budgetary, inventory, billing and payment activities. To accomplish all of these tasks, IFCAP consists of several functional components, each responsible for a similar set of tasks:

Funds Distribution (Fiscal Component)

Funds Control (Control Point Component)

Processing Requests (Control Point Component)

- Purchase Orders/Requisitions (A&MM Component)

- Accounting (Fiscal Component)

- Receiving (A&MM Component)

- Inventory (A&MM/Control Point Component)

As a Control Point Clerk, you may create and edit requests assigned to a Control Point you are authorized to use. To use a Control Point, the Control Point Official for that Control Point has to give you access. If your user access is limited to the Control Point Clerk level, IFCAP will require the Control Point Official to approve all transactions that you create before transmitting them to Personal Property Management (2237 forms and Issue Book requests) or Accounting (1358 forms).. This is because the Control Point Official is responsible for approving all expenditures to the Control Point.

Different kinds of IFCAP users have different menus. The instructions in this manual only use the options that you have as a Control Point Clerk. If you do not know what to enter at an IFCAP prompt, enter 1, 2 or three question marks and IFCAP will list your available options or explain the prompt. The more question marks you enter at the prompt, the more information IFCAP will provide.

The options you use on IFCAP have been divided into groups based upon the type of work you do. When you select these options, IFCAP will ask you a series of questions. If you do not understand the question or are unsure of how to respond, enter a question mark (?) and the computer will explain the question, or allow you to choose from a list of responses.

This is the main menu for the Control Point Clerk.

Process a Request Menu	This menu contains options for processing transaction requests.
Display Control Point Activity Menu	This menu displays request/transaction information.
Funds Control Menu	This menu contains options used to balance the Control Point.
Status of Requests Report Menu	This menu contains options to generate reports of the requests for the Control Point.
Record Date Received by Service Menu	This menu allows you to record the receipt of items ordered on IFCAP transactions.

1.6.   Features

1.6.1.   **Cost Centers**

In IFCAP 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP does not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'

1.6.2.   Suballowance/Fund Control Point Reconciliation

The report **FMS Transaction Data** shows transactions affecting the Fund Control Point balance, but it is for review only. The FMS system passes Fund Control Point adjustments to IFCAP on a daily basis. These adjustments arise from FMS accounting activity that does not originate in IFCAP. A late receipt of goods, for example, could result in an interest expense. The IFCAP system would have no record of this type of charge to the Fund Control Point, and would have to rely on FMS to provide adjustment data. The adjustments are returned in an FMS document, **Suballowance Reconciliation**, which automatically updates Fund Control Point balances.

1.6.3.   Rollover of Funds From Previous Quarters

The Budget Analyst for your Control Points might use IFCAP to designate your Control Point to receive rollover funds from a previous quarter. IFCAP allows Budget Analysts to designate Control Points to transmit and receive remaining funds at the end of each quarter.

1.6.4.   eCMS Interface to IFCAP (2237 Processing)

As of October 2012, the process to obtain bids and award contracts occurs within the electronic Contract Management System (eCMS). With the implementation of an interface between IFCAP and eCMS, the 2237s created by control point users may be sent automatically to eCMS at the time the Accountable Officer e-signs and processes the 2237, and then determines it should go to Purchasing & Contracting. A new Status, "*Sent to eCMS (P&C),*" will be placed onto the 2237. The 2237 data will be transmitted in an HL7 message to eCMS. If the Accountable Officer decides to send the 2237 to eCMS, then IFCAP will store certain information about that transaction in a new IFCAP/ECMS TRANSACTION FILE [414.06].

1.6.5.   Returning a 2237 from eCMS to the Accountable Officer

If the staff decides that a 2237 should be returned to the Accountable Officer, the 2237 is returned to IFCAP automatically via another HL7 message. The 2237 is then available to the Accountable Officer to complete the processing of the 2237 within IFCAP. Using the "Process a Request in PPM" option, a status, "To IFCAP Ordering Officer," may then be placed on the 2237 and an IFCAP Purchasing Agent may include the 2237 in a Purchase Order. Alternatively, if appropriate, the status, "Assigned to PPM," may be placed on the 2237 and a Requisition Clerk can include the 2237 in a Requisition.

The Users listed on a 2237 as the Accountable Officer and the Initiator will receive a VistA MailMan message if eCMS returns that 2237 to the Accountable Officer. The phone number and e-mail address of the eCMS Contact will be included in the MailMan message.

Note: If the eCMS contracting staff decides that a 2237 should be returned to the Control Point level, the 2237 is returned to IFCAP automatically via another HL7 message. The Control Point users are required to edit the 2237 and reapprove it. The Accountable Officer will then be able to process it again and send it back to eCMS.

The Users listed on the 2237 as the Accountable Officer, Control Point Official and Initiator will receive a VistA MailMan message if eCMS returns a 2237 to the Control Point level. The pphone number and e-mail address of the eCMS Contact will be included in the MailMan message.

1.6.7.   **Cancelling a 2237 in eCMS & IFCAP**

After communicating with the FCP User, the eCMS contracting staff may determine that the 2237 should be Cancelled; the eCMS User will then generate a Cancellation of the 2237 in IFCAP automatically via another HL7 message. The 2237 will have the status of Canceled and the existing IFCAP background processes will update the Running Balance to reflect the entry as CAN(celled) and the amount will be set to zero. If due-ins were established when the 2237 was Approved, they will be reversed.

The Users listed on a 2237 as the Accountable Officer, Control Point Official, and Initiator will receive a VistA MailMan message if eCMS cancels a 2237. The phone number and e-mail address of the eCMS Contact will be included in the MailMan message.

Chapter 2. How To Create Requests

2.1.   Introduction

To determine what type of request to make, follow the instructions in the section below. Turn to the section on the form they indicate, and create that form.

2.2.   Which 2237 Request Form Should You Use?

To choose the correct type of request form, you need to determine whether the item you want is on record in IFCAP as an item that someone has already purchased using IFCAP. If so, you are in luck, because that means that there is less information you will need to complete about the item to make your request. You determine whether there is a record for the item by consulting the Item Master File. If you are requesting a monthly estimated service, skip to the section on creating a 1358 order request.

2.3.   How to Consult the Item Master File

2.3.1.   Introduction

IFCAP has a file of most of the items that people at your facility have purchased. This file is called the Item Master File. You need to consult this file to determine what kind of request to make. If you still do not know what vendor to select for your request after reading this section, contact the Acquisition section (Purchasing) in Acquisition and Material Management (A&MM). Using the Item History option on the Requestor menu you can see a listing of the last 5 orders placed for an item or look at the orders for an item placed within a specific date range.

2.3.2.   Menu Path

```
Select Requestor's Menu Option: ITEM History
Select STATION NUMBER: 688//
Select CONTROL POINT: 110 NAME .01               0160A1   10   0100    010042116

     Select one of the following:
          L          Last 5 Purchase Orders
          D          Date Range

Select ITEM HISTORY Viewing Method: L// Date Range
Select ITEM MASTER NUMBER: 309 ??

CHOOSE 1-3: 1  3094      CONTRACT ITEM
```

2.3.3.   Setup Parameters

Enter a station number and then a Control Point. At the Select Item Master Number: prompt, enter the Item Master number for the item, the name of the item, a stock number, or some other feature of the item that IFCAP can search. IFCAP will search the Item Master File for all item

descriptions that have the information you enter at this prompt and ask you to choose one if there are several matches. You can also type three question marks at this prompt and read the entire item master list. If IFCAP does not find a match, you have to create either a Non-Repetitive Order or a Repetitive and Non-Repetitive Order. Skip to the sections on these two request types and create one of those requests instead.

```

2.3.4. **Item Information**

After you select an item, IFCAP will display information for the item. Look at the VENDOR: field. Is "WAREHOUSE" one of the vendors listed for the item? If so, this means that this item is a "Posted Stock" item, or an item stocked at the warehouse for the control point. If one of the vendors is "WAREHOUSE", you have to create an Issue Book/Interval Issue Request for this item. Skip down to the section on Issue Book/Interval Issue Requests.

2.3.5. **Order Type**

If IFCAP does not list "WAREHOUSE" as one of the vendors, you can create either a Repetitive order or a Repetitive and Non-Repetitive Order.

2.4. **Creating Repetitive (PR Card) Order 2237 Requests**

2.4.1. **Introduction**

If EVERY item in your request is in the Item Master File, you can create a Repetitive Order request. You can also create a Repetitive and Non-Repetitive Order request, even if you found matches for all of your items on the Item Master File.

2.4.2. **Setup Parameters**

Use the New 2237 option on the Process a Request Menu to enter a Station number, Fiscal Year, Quarter and Control Point. If the Control Point selected is attached to more than one Inventory Point, the user will be asked to select the Inventory Point that will be attached to the order. The user can simply press the <enter> key at the prompt and no Inventory Point will be attached to the order

2.4.3. **Menu Navigation**

2.4.4. **Classification and Sort Groups**

At the Classification of Request: prompt, create a classification name for the request if you like, or press the Enter key to skip this prompt. The Classification of Request: prompt allows you to create reports that group requests by categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group. Press the Enter key at the Date of Request: prompt if you want to accept the default of today's date.

```

     Enter one of the following:
       S.EntryName to select a Sort Group

     To see the entries in any particular file, type <Prefix.?>

     If you simply enter a name then the system will search each of the above files
     for the name you have entered. If a match is found the system will ask you if it
     is the entry that you desire.

     However, if you know the file the entry should be in, then you can speed

2.4.5. **Requestor Information**

Enter your name at the Requestor: prompt. If you do not enter a name at the Requestor: prompt, your name will be entered into that field automatically by the IFCAP software.

At the Requesting Service: prompt, you must enter the name or the number of the service that will use the item.

```
REQUESTOR: IFUSER,TWO
```

Note: The Requesting Service field is mandatory in IFCAP. It is also a required field for the eCMS interface. If the Accountable Officer attempts to send a 2237 to eCMS and this field is blank, the 2237 will generate a transmission error. The Accountable Officer will have to return the 2237 to the CP user for edit and re-approval.

2.4.6. **Special Remarks**

At the Special Remarks: prompt, enter any special handling information about the item, such as whether the item needs refrigeration, special handling, or if a VA employee has to go to the vendor to get the item. The Purchasing Agent can transfer these remarks to the purchase order that the vendor receives. Enter the cost center at the Cost Center: prompt if this purchase is assigned to a section or service that has a cost center defined in IFCAP for their expenses. Cost centers allow Fiscal staff to create total expense records for a section or service.

Note: In IFCAP V. 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP will not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'.

At the "Would you like to see the procurement history for this item?:" prompt, enter Y if you want to know the date, vendor, quantity ordered, item price or total purchase price of this item the last five times it was requested. Enter a budget object code (BOC).   Budget object codes are defined and describe what type of item or service you are requesting. Enter a quantity. This quantity represents numbers of units, so if you order one unit that has forty items per unit (say, syringes per box), then you are going to receive 40 syringes.

2.4.10. **Delivery Schedules**

At the "Select Delivery Schedule:" prompt, press the Enter key if you want all the items on your request delivered at once. If you select a delivery schedule, you are notifying the vendor that you want them to deliver different amounts of the items on different days. For example, if you want to order 100 cases of computer paper, but do not want all of it delivered at once, you can "stagger" the delivery by entering 1 at the Select Delivery Schedule: prompt. Enter a date and the amount you would like delivered on that date, enter 2 at the next Select Delivery Schedule: prompt and enter a date and the amount you would like delivered on that date, etc. Make sure that the total number of items among all the delivery dates equals the total number of items you are ordering.

At the Select Line Item Number: prompt, enter "2" if you want another item on this request. Otherwise, hit the Enter key. Enter the location you want the item to be delivered at the Deliver to/Location: prompt. At the Justification: prompt, enter your name and telephone number and

information about how the item will be used. This will help the Personal Property Management Accountable Officer. The PPM Accountable Officer will adjust your request to save money, solicit another vendor or purchase a similar item if there is a problem with the vendor or item you specified. Explaining how you plan to use the item will help the VA acquire the item faster and cheaper. Enter your name at the Originator of Request: prompt. Add comments if you like. 2.5. Creating Non-Repetitive Order 2237 Requests

2.5.1. Introduction

If none of the items are in the Item Master File, you can use a Non-Repetitive Order request. You can also create a Repetitive and Non-Repetitive Order request, even if you did not find matches for any of your items on the Item Master File. This might keep Logistics staff from rejecting your request if you mistakenly listed an item as Non-Repetitive that in fact was in the Item Master File.

2.5.2. Menu Navigation

Use the New 2237 (Service) request option on the Process a Request Menu to enter a Station number, Fiscal Year, Quarter and Control Point. If the Control Point selected is attached to more than one Inventory Point, the user will be asked to select the Inventory Point that will be attached to the order. The user can simply press the <enter> key at the prompt and no Inventory Point will be attached to the order.

2.5.4. **Classification and Sort Groups**

At the Classification of Request: prompt, create a classification name for the request if you like, or press the Enter key to skip this prompt. The Classification of Request: prompt allows you to create reports that group requests by categories that **YOU** define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group. Press the Enter key at the Date of Request: prompt to select today's date. Enter your name at the Requestor: prompt.

The Classification of Request field is not mandatory.

2.5.5. **Priority of Order**

Enter the date required and the priority of the request. Priorities are based on the days remaining before the delivery date requested for the item. The priority categories in IFCAP, ranging from shortest to longest delivery time remaining, are "Emergency", "Special" and "Standard". Different stations assign different time durations to these categories. Check with your Fiscal office to determine the durations at your station for these categories. At the Special Remarks: prompt, explain how the service will use the item, names of other items that would fulfill the same need, and any other information that would help the Purchasing Agent fulfill your request. Purchasing Agents sometimes change orders to fulfill the service's need faster, find a better item or change the vendor for a better price. Explaining the use of the item will make these tasks easier to accomplish. Enter the cost center at the Cost Center: prompt if this purchase is assigned to a section or service that has a cost center defined in IFCAP for their expenses. Cost centers allow Fiscal staff to create total expense records for a section or service.

Note: In IFCAP V. 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP will not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'.

2.5.7. **Item Information**

At the Description: prompt, define the item as thoroughly as you can. Since you are creating a non-repetitive order, the item you are requesting is not in the Item Master File. This means that the Purchasing Agent will have to make a "best guess" of exactly what kind of item you need, based on the information you provide in this field. Describe what the service plans to do with the item and any special features of the item (for example, does it have to be flexible or blue or heat-resistant or non-toxic). At the Unit of Purchase: prompt, enter the measuring standard for the item. For example, if you order 1 unit and select LB (pound) as unit of purchase, your request will list one pound of the item.

Note: the Line Item <u>DESCRIPTION</u> is now a required field in the 2237. If the User attempts to leave the DESCRIPTION field blank, the User is prompted to fill in the field.

Double-check the printout of your request to make sure that the quantity and the unit of purchase are correct.

2.5.8.   **Stock Number**

Enter the stock number for the item. Enter the estimated cost per unit. The cost per unit will depend on the item and how many items are in a unit. If the item is ordered at one unit per item, the cost per unit is the cost per item. At the Select Delivery Schedule: prompt, press the Enter key if you want all the items on your request delivered at once. If you select a delivery schedule, you are notifying the vendor that you want them to deliver different amounts of the items on different days. For example, if you want to order 100 cases of computer paper, but do not want all of it delivered at once, you can "stagger" the delivery by entering 1 at the Select Delivery Schedule: prompt. Enter a date and the amount you would like delivered on that date, enter 2 at the next Select Delivery Schedule: prompt. 2.6.   Creating Repetitive and Non-Repetitive Order 2237 Requests

2.6.1.   Introduction

If one or more, but not all the items on your request are on the Item Master File, you can create a Repetitive and Non-Repetitive Order Request. This is a versatile form type, because it allows other IFCAP users to "split" your request into multiple orders. Also, it is easier for Personal Property Management staff to correct a Repetitive and Non-Repetitive Order if you mistakenly list an item as non-repetitive that in fact is on the Item Master File, or if IFCAP fails to match an item to the Item Master File because you've misspelled or misnamed the item.

2.6.2. **Setup Parameters**

Enter a Station Number, a Fiscal Year, and a quarter. Enter a Control Point. If the Control Point selected is attached to more than one Inventory Point, the user will be asked to select the Inventory Point that will be attached to the order. The user can simply press the <enter> key at the prompt and no Inventory Point will be attached to the order

2.6.3. **Form Type**

The system will generate a transaction number.   At the Form Type: prompt, enter Repetitive And Non-Rep Order.

2.6.4. **Classification and Sort Groups**

At the Classification of Request: prompt, create a classification name for the request if you like, or press the Enter key to skip this prompt. The Classification of Request: prompt allows you to create reports that group requests by categories that **YOU** define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group. Press the Enter key at the Date of Request: prompt. Enter your name at the Requestor: prompt. Enter the service that will use the item or service at the Requesting Service: prompt.

electronic Contract Management System (eCMS), unless this field is populated.

2.6.5.   **Priority of Order**

Enter the date required and the priority of the request. Priorities are based on the days remaining
before the delivery date requested for the item. The priority categories in IFCAP, ranging from
shortest to longest delivery time remaining, are "Emergency", "Special" and "Standard".
Different stations assign different time durations to these categories. Check with your Fiscal
office to determine the durations at your station for these categories. At the Special Remarks:
prompt, explain how the service will use the item, names of other items that would fulfill the
same need, and any other information that would help the Purchasing Agent fulfill your request.
Purchasing Agents sometimes change orders to fulfill the service's need faster, find a better item
or change the vendor for a better price. Explaining the use of the item will make these tasks
easier to accomplish. Enter the cost center at the Cost Center: prompt if this purchase is assigned
to a section or service that has a cost center defined in IFCAP for their expenses. Cost centers
allow Fiscal staff to create total expense records for a section or service.

Note: In IFCAP V. 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP will not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'.

2.7. Creating Issue Book/Interval Issue Requests

2.7.1. Introduction

An Issue Book/Interval Issue Request is for "posted stock" items, or items that the warehouse keeps in stock. You must use an Issue Book/Interval Issue request for posted stock items. You must not use an Issue Book/Interval Issue request for any items that are not posted stock. If you need some items that are posted stock and some items that are not posted stock, create an Issue Book/Interval Issue Request for the posted stock items. Use one of the other forms for the other items. The Government makes certain procurement guarantees to vendors in exchange for discounts on posted stock. Obtaining posted stock items from any source other than the warehouse is a potential violation of those guarantees. If you request a posted stock item on any request other than an Issue Book/Interval Issue request, the computer will reject your request.

2.7.2. Setup Parameters

Enter a Station Number. Enter the Fiscal Year, Fiscal Quarter, and the Control Point. If the Control Point selected is attached to more than one Inventory Point, the user will be asked to

2.8.   Creating 1358 Order Requests

2.8.1.   Introduction

Use a 1358 Order request to budget money for ongoing service expenses, such as the utility bill, copier repair, rent, or postage. A 1358 Order allows the Control Point to "obligate funds," or establish a budget for ongoing services, so there will be money to pay the vendor when the monthly or quarterly statement is due.

2.8.2.   Menu Navigation

Select New 1358 Request from the Control Point Clerk's Menu. Enter a station number, fiscal year, quarter, Control Point, Authority and if required a Sub-Authority. 2.8.3. **Classification and Sort Groups**

The Classification of Request: prompt allows you to create reports that group requests by categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group.

```
CLASSIFICATION OF REQUEST: ???
     This Classification of Request field allows you to classify and/or categorize all
     transactions (requests) for supplies, services, etc.
     This is the previous 'Type of Request" field.
CHOOSE FROM:
     This is the name used to identify the type of request.  File  #410.2 is pointed
     to by the Classification of Request field (#8) of the Control Point Activity
     file, #410.
CLASSIFICATION OF REQUEST:
SORT GROUP: ???
     This Sort Group field may be used to group together all transactions (requests)
     that relate to a specific project, work order, investigator, food group, doctor,
     etc.
     This is the previous 'Project Number' field.
     Enter one of the following:
       S.EntryName to select a Sort Group
       W.EntryName to select a Work Order

     To see the entries in any particular file, type <Prefix.?>

     If you simply enter a name then the system will search each of the above files
     for the name you have entered. If a match is found the system will ask you if it
     is the entry that you desire.

     However, if you know the file the entry should be in, then you can speed
     processing by using the following syntax to select and entry:
           <Prefix>.<entry name>
```

```
                    or
         <Message>.<entry name>
                    or
         <File Name>.<entry name>

     Also, you do NOT need to enter the entire file name or message to direct the look
     up. Using the first few characters will suffice.
SORT GROUP:

2.8.4. **Requestor**

Note: Per implementation of Segregation of Duties within the 1358 options, the User is no longer asked to Enter the name of an individual at the Requestor: prompt. Your name is automatically entered as the Requestor.

Press the Enter key at the Date of Request: prompt to accept the default date of today.
Enter the date that you want to commit funds to your request at the Date Committed: prompt, or press the Enter key to accept the default of the first date of the current month.
Enter the total cost in dollars for the services at the Committed (Estimated) Cost: prompt.
Enter the cost center at the Cost Center: prompt. Cost centers allow Fiscal staff to create total expense records for a section or service.

Note: In IFCAP V. 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP will not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'.

Chapter 3. Turning Temporary Requests into Transactions

3.1. Introduction

No request can go forward for approval without first becoming a transaction. See the Control Point Requestor manual for options located on the Requestor menu.

3.2. Converting Temporary Requests to Permanent Transactions

3.2.1. Menu Navigation

When you log onto the Control Point Clerk menu, IFCAP will tell you which Control Points have new requests. From the Control Point Clerk's Menu, select Process a Request Menu. Select Change Existing Transaction Number. The requests will have a form type assigned. Read the following sections to turn these requests into transactions.

NOTE: The fields Requesting Service and Line Item DESCRIPTION are not required fields in a Temporary Request.   This will mean the Control Point Clerk may encounter missing required fields when converting a temporary request to a 2237 transaction. The Clerk will be advised of the missing field(s) and be allowed to edit the new 2237 and populate the required fields. If the Clerk chooses not to edit the fields at that time the 2237 will not be complete and the Clerk will not be able to set the Approval flag to YES.   The Clerk will have to Edit the 2237 and populate the missing fields.

3.3.3. **Conversion to Permanent Number**

IFCAP will assign a transaction number to the request, making the request a transaction. IFCAP will ask you if you want to edit the transaction. IFCAP will ask you for a cost center, a budget object code (BOC), and a sub-control point. Budget object codes are in the left column of MP-4 Part V, Appendix B-1. At the Select Sub-Control Point: prompt, you can associate this purchase with a category of purchases that you can define. This allows you to group similar purchases together. IFCAP will ask you if you want to assign a vendor to the transaction.

Note: Sometimes, you will want to leave the vendor field blank on a 1358 in case you want to change vendors or use multiple vendors.

If you assign a vendor, IFCAP will ask you for a contract number. Explain the purpose of the 1358. Add comments if you like. If you make a mistake, answer Y at the Would you like to review this request?: prompt. If the 1358 is ready for approval, answer Y at the Is this request ready for approval?: prompt. Chapter 4. Monitoring Request Status

4.1. Introduction

As a Control Point Clerk, employees who request goods and services from your control point often need to know the status of their request. This chapter explains how to determine the status of a request, and what stage of accounting or procurement it has reached.

4.2. Monitoring Request Status

4.2.1. When You Know the Purchase Order Number?

From the Control Point Clerk's Menu, select Display Control Point Activity Menu. From the Display Control Point Activity Menu, select Purchase Order Status. Enter the station number and the Control Point. Enter the purchase order number at the Select Purchase Order Number: prompt. You can type three question marks (???) to list all the purchase orders for the control point.

5.1.2.   Setup Parameters

Enter a fiscal year, fiscal quarter and a control point. Enter the number of the obligation you want to adjust at the Select Obligation Number: prompt. If you do not know the number, enter as many of the first characters that you remember or enter three question marks, and IFCAP will list the available obligations. IFCAP will display the amount of the obligation you selected and assign a transaction number to the adjustment you are creating. At the Classification of Request:

prompt, create a classification name for the request if you like, or press the Enter key to skip this prompt. The Classification of Request: prompt allows you to create reports that group requests by categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Enter your name at the Requestor: prompt. Enter today's date at the Date of Request: prompt. Enter the cost center at the Cost Center: prompt . Cost centers allow Fiscal staff to create total expense records for a section or service.

Chapter 6. Handling System Down or Life-Threatening Emergencies

In some facilities, Purchasing Agents prepare for system crashes by creating a set of purchase order numbers to use when the system crashes. Ask your Purchasing Agent if he or she does this. If so, call him or her when the system crashes and ask for one of the "emergency" purchase order numbers. When the system is functioning, create your requests in IFCAP using this purchase order number and enter in the Comments: field of the request that this order was requested during a system failure and that the order has already been ordered and obligated using the emergency purchase order number.

```
Comments: // System Failure reconciliation -- DO NOT ORDER -- DO NOT OBLIGATE
```

If you do not clearly explain that this order has already been filled, the Purchasing Agent will order it again and your control point will be charged for the purchase.

Chapter 7. Other IFCAP Functions

7.1. Supplementary Options in the Process a Request Menu

This chapter describes the options available to you in IFCAP that were not mentioned in the previous chapters. Each section of this chapter defines the purpose of the option, the menu path to reach the option in the menus, what information to enter at the prompts, and how to interpret the output that the option creates.

7.2. Editing a 2237 (Service)

7.3.3. **Interpreting the Request Form**

The request form lists the information you provided in the Enter/Edit a Request options in a style that represents a manual VA 2237 form. The form lists each item with description and unit cost, and a total cost for the request. It also lists where the item(s) should be delivered. If you printed the last page of the 2237, the form will list signature and date columns for officers and clerks to sign at various stages of approval and receipt. Enter another transaction at the Select Transaction: number or press the Enter key to return to the Requestor's Menu.

NOTE: If the 2237 has been sent to and accepted by eCMS for processing, there will be Identifiers that will indicate that this occurred. The text "Accepted by eCMS" will appear to the right of the Priority in the Header on Page 1. The eCMS Line Item ID will appear beneath the Item description.

7.4. Change Existing Transaction Number (of a 2237)

7.4.1. Menu Navigation

Use this option to change the transaction number of an existing 2237 transaction.
NOTE: If the 2237 you are changing has eCMS Identifiers -- immediately upon completing the process, you must manually notify the eCMS Contracting Officer of the changed 2237 number. Advise the Contracting Officer of the cancelled original 2237# and the new 2237#. This will ensure that the Contracting Officer cancels the old 2237 in the eCMS system and will enable the Contracting Officer to link the new 2237 to the existing Award plan documents when it is Approved and sent forward to eCMS.
Select Process a Request Menu from the Control Point Clerk's Menu. Select Change Existing Transaction   from the Process a Request Menu. Enter a Station number and a Control Point number. Enter the transaction you want to change at the Select Transaction Number: prompt, or enter three question marks and IFCAP will display the available transactions.
At the Select CONTROL POINT ACTIVITY TRANSACTION NUMBER prompt enter   2237 number you wish to change. You will be given an opportunity to review the 2237 If you enter Yes at that prompt.

7.5.2. Canceling Transactions

NOTE: When doing a ?? lookup of 2237 transactions, some of the 2237s may show the text "Accepted by eCMS." **DO NOT cancel** any transaction showing that text from within IFCAP.   Now that an interface exists between IFCAP and the electronic Contract

> Management System, the cancellation of a 2237 that has been "Accepted by eCMS" *must be initiated by a User from within the electronic Contract Management System*.

NOTE: When an IFCAP User cancels a 2237, the Name of the User and the Date/Time of the cancellation are now stored in the 2237 record in the Control Point Activity file (#410).

IFCAP will ask you to confirm that you want to cancel the transaction, and ask you to enter comments that explain why you have cancelled the transaction. At the Would you like to cancel another transaction?: prompt, answer Y to cancel another transaction or press the Enter key to return to the Process a Request Menu.

7.8.4. **Item Information**

After you select an item, IFCAP will display what unit of sale the vendor uses to sell the item and if you have to buy the item by a specific multiple. In the example below, the unit is per can, but the item must be ordered in multiples of six, so the user would enter a multiple of six at the Quantity: prompt. Many repetitive items will have a mandatory source of the warehouse, meaning that the warehouse supplies this item. If the item you want is not a warehouse item, you must enter the vendor name after you enter the item number. If you do not know who the vendor should be for that item, press the Enter key at the vendor prompt and IFCAP will list the available vendors for the item. You can add another repetitive item at the Select Item: prompt or press the Enter key to stop adding items. IFCAP will determine the cost of the items. At the Would You Like To Create Another Repetitive Item List Entry?: prompt, answer Y to add another item or N to return to the Repetitive Item List Menu.

IFCAP will assign a transaction number to the request and prompt you for a form type. Based on which form type you select, IFCAP will prompt you for additional information about the purpose of your request and the source of funds. Read the sections in this guide on creating this form type for explanations of these prompts. Enter "T" for today as the date of the request. Enter your name as the Requestor.

Enter the Service that you are creating the request for at the Requesting Service: prompt.

NOTE: The Requesting Service field is a required field on a 2237.

Enter the date that the goods or services are required. Assign a priority to the request. The priority categories in IFCAP, ranging from shortest to longest delivery time remaining, are "Emergency", "Special" and "Standard". Different stations assign different time durations to these categories. Check with your Fiscal office to determine the durations at your station for these categories.

7.13.5. **Special Remarks**

At the Special Remarks: prompt, explain how the service will use the item, names of other items that would fulfill the same need, and any other information that would help the Purchasing Agent fulfill your request. Purchasing Agents sometimes change orders to fulfill the service's need faster, find a better item or change the vendor for a better price. Explaining the use of the item will make these tasks easier to accomplish. Enter a cost center. Cost center numbers are listed in the left column of MP-4 Part V, Appendix B-1.

Cost centers allow Fiscal staff to create total expense records for a section or service. Enter 1 at the Select Line Item Number: prompt for the first item on the request. At the Item Master File No.: prompt, enter the item name or number. You can also type three question marks (???) to see a list of the items you can request. If you are not selecting an Item from the Item Master File, you will be prompted to fill in the Item Description.

Note: Item Description is now a Required Field. You must enter the text.

Enter how many units of purchase (not number of items) at the Quantity: prompt. At the BOC: prompt, enter the budget object code classification for this item. Budget object codes are defined

in MP-4 Part V, Appendix B-2. If you do not know the BOC for this item, enter three question marks and IFCAP will list the available budget object codes. At the Intermediate Product Code: prompt, enter the Intermediate Product Code if there is one. The Intermediate Product Code is a stock number that vendors sometimes use.

7.17.4. **Classification and Sort Groups**

The Classification of Request: prompt allows you to create reports that group requests by categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group.

```
CLASSIFICATION OF REQUEST: ???
     This Classification of Request field allows you
     to classify and/or categorize all transactions
     (requests) for supplies, services, etc.
     This is the previous 'Type of Request" field.
CLASSIFICATION OF REQUEST:
SORT GROUP: ???
     This Sort Group field may be used to group together all
     transactions (requests) that relate to a specific project,
     work order, investigator, food group, doctor, etc.
     This is the previous 'Project Number' field.
     Enter one of the following:
       S.EntryName to select a Sort Group
       W.EntryName to select a Work Order

     To see the entries in any particular file, type <Prefix.?>

     If you simply enter a name then the system will search each of
     the above files for the name you have entered. If a match is
     found the system will ask you if it is the entry that you desire.

     However, if you know the file the entry should be in, then you can
     speed processing by using the following syntax to select and entry:
          <Prefix>.<entry name>
                   or
          <Message>.<entry name>
                   or
          <File Name>.<entry name>
      Also, you do NOT need to enter the entire file name or message
     to direct the look up. Using the first few characters will suffice.

7.18.3. **Classification and Sort Group**

The Classification of Request: prompt allows you to create reports that group requests by
categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is
assigned to a project, office, or some other category for which a sort group has been created. If
this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to
generate expense reports for projects and offices. Make sure that you include all applicable
purchases in the sort group and exclude all purchases that do not belong to the sort group.
Per the implementation of Segregation of Duties within the 1358 process, you will no longer be
prompted to enter a Name at a Requestor prompt. Your name is automatically entered as the
Requestor.

7.19.3. **Authority & Sub-Authority**

The Authority field is mandatory and the Authority entered when the transaction was created will
be shown as a default.   You may change this value if it is not appropriate for the 1358.
If you Edit the Authority value and select an Authority that requires a Sub-Authority, you will be
required to enter a Sub-Authority value.   You may ?? both fields to see the list of possible
choices.

7.19.4. **Classification and Sort Groups**

The Classification of Request: prompt allows you to create reports that group requests by categories that YOU define. Enter a sort group at the Sort Group: prompt if this purchase is assigned to a project, office, or some other category for which a sort group has been created. If this purchase does not belong to a sort group, just press the Enter key. Sort groups are used to generate expense reports for projects and offices. Make sure that you include all applicable purchases in the sort group and exclude all purchases that do not belong to the sort group.

Per the implementation of the Segregation of Duties within the 1358 options, the User is no longer   asked to Enter the name of an individual at the Requestor: prompt. Your name is automatically entered as the Requestor.

You may Enter a date in the Date of Request field or accept the default date.

Committed field will have a default value that you can accept or change.

Enter the cost of the 1358 at the Committed (Estimated) Cost: prompt.

Enter the budget object code classification for the 1358 at the BOC1: prompt. If you do not know the budget object code, enter three question marks at the prompt and IFCAP will display the available budget object codes.

At the Select Sub-Control Point: prompt, you can associate this purchase with a category of purchases that you can define. This allows you to group similar purchases together.

If a Vendor was entered when the 1358 was initially created, the Vendor name will be shown as a default and you may accept it or change it. If a Contract Number was entered originally it will be the default value and may be accepted. If a Contract Number is required per the Authority entered on the 1358, you must enter a Contract Number.

Purpose: is now a mandatory prompt and the text entered originally will be shown as a default.

Enter the name of the User that requested the creation of the 1358 transaction at the Originator of Request: prompt.

If the system displays a Date Received: prompt, enter the date that the service was completed.

Add comments if you like.

Enter N at the Would You Like To Review This Request?: prompt to return to the 1358 Request Menu.

7.20.3. **Display 1358 Balances**

IFCAP will assign a transaction number to the entry, and display the obligation amount, the fiscal balance, and the service balance. The fiscal balance is the dollar amount Fiscal Service shows is still available to the Control Point after the entry has been obligated by Fiscal Service. The fiscal balance is what the Accounting Technician will read to determine if the Control Point has sufficient funds to meet the obligation. The service balance is what you have committed, the dollar amount left in the Control Point minus the non-obligated committed funds. Enter the recipient of the funds and any additional information that would aid in the processing of this transaction at the Reference: prompt (e.g., patient name, patient Social Security Number, or Vendor). Add comments if you like. At the Would you like to EDIT or CREATE an Authorization: prompt, enter "E" to edit an authorization or "C" to create an authorization, or press the Enter key to return to the 1358 Request Menu. Enter an authorization. An authorization is a unique number that IFCAP uses to record individual charges against a 1358. If you do not know the authorization, enter three question marks and IFCAP will list the available authorizations. IFCAP will list the amount of the authorization and the current balance of the authorization. IFCAP will also list any daily records of transactions posted against the authorization.

Note: You must deduct the dollar amount for each invoice you receive from the balance of the 1358. If you mark the 1358 as complete, you will no longer be able to edit or access that 1358.

IFCAP will assign a number to the daily activity entry. Enter N at the Is this the final daily activity?: prompt to create another entry. Enter the amount of the activity at the Daily Activity Amount: prompt. Do not exceed the authorization balance. You may enter a vendor invoice number, a reference, and a description if you like. If the amount of the daily activity that you create is equal to the authorization balance, IFCAP will ask you to confirm that you want to clear

the balance on the authorization and mark it as complete. IFCAP will then return to the 1358 Request Menu.

7.28.2. **Setup Parameters**

The selection criteria for the report to be generated include: Single 2237, Single eCMS Contact, Date Range, Single Station, Sub-station (if applicable, and YES response to Single Station prompt), Single Fund Control Point, and up to four distinct Event Types.

The report is based on data in the new IFCAP/ECMS TRANSACTION file (#414.06).   As 2237s are sent to and from eCMS via HL7 messages, certain information about each transaction is stored within this file.

The User is able to generate a report for a Single 2237.   User must be a Clerk or Official on the Control Point selected for the 2237.

Enter a Station number, fiscal year and fiscal quarter. Enter a Control Point. If you do not know the Control Point, enter three question marks at the prompt and IFCAP will list the available Control Points. IFCAP will print a 'Budget Object Code Detail Totals' report, listing each budget object code by its transactions and transaction cost. IFCAP will provide a total for all budget object codes, and list the total uncommitted balance for the Control Point from current and prior quarters. After printing the report, IFCAP will return to the Funds Control Reports Menu.

```
This report displays item costs from 2237 orders, sorted
by budget object code.

Chapter 8. Menu Outline
8.1. Option Listing

The following is a list of the options assigned to Control Point Clerks in the default IFCAP configuration. You may have some options that are not listed here, because you have additional responsibilities beyond the typical responsibilities of a Control Point Clerk. You may not have all of the options listed below. Main menu options are flush left. Subordinate options are spaced to the right. For example, if you wanted to use the "Copy a Transaction" option, you would select "Control Point Clerk's Menu", then "Process a Request Menu", then "Copy a Transaction". To add any of the options listed below to your menus, contact your local Information Resources Management (IRM) service.

Chapter 9. Error Messages And Their Resolution

9.1.   Use Errors

As you use IFCAP to request goods and services, you will receive errors. Some errors are use errors. Use errors mean that IFCAP has determined that the information you have entered in the system is either incomplete or inconsistent, and look like this:

```
Select TRANSACTION: 10195
Incorrect format - please re-enter number

Select TRANSACTION:
This guide and the online option descriptions should help you with these errors.
```

9.2.   System Errors

System errors occur when IFCAP fails to function properly. IFCAP is written in a programming language called Digital Standard MUMPS. When errors occur, IFCAP will display the error code. Record the error code and notify your OIT staff.

```
RECORDING THAT AN ERROR OCCURRED ---
        X2^PRCST212:1, %DSM-E-UNDEF, undefined variable PRCSTDT, -DSM-I-ECODE,
 MUMPS error code: M6

        Sorry 'bout that
```

9.2.1.   MailMan Error Messages – eCMS Interface

The Accountable Officer sends all 2237s that will be processed by Contracting staff to the electronic Contract Management System (eCMS) in Austin. The IFCAP application will reject any 2237 forwarded to eCMS with no Requesting Service (Requesting Service is blank (null)). The field is required for 2237s being sent to eCMS. The Accountable Officer will receive a MailMan message advising that the 2237 must be Returned to the Service for editing by the Control Point User. The CP user will need to edit the 2237 to populate the Requesting Service field and reapprove the 2237. The Accountable Officer will then be able to process the 2237 and send it to eCMS.

Example of this Error Message:

```

GLOSSARY

1358	VA Form 1358, Estimated Obligation or Change in Obligation.
2138	VA Form 90-2138, Order for Supplies or Services.
2139	VA Form 90-2139, Order for Supplies or Services (Continuation). This is a continuation sheet for the 2138 form.
2237	VA Form 90-2237, Request, Turn-in and Receipt for Property or Services.
A&MM	Acquisition and Materiel Management Service.
AACS	Automated Allotment Control System--Central computer system developed by VHA to disburse funding from VACO to field stations.
Accounting Technician	Fiscal employee responsible for obligation and payment of received goods and services.
Activity Code	The last two digits of the AACS number. It is defined by each station.
Allowance table	Reference table in FMS that provides financial information at the level immediately above the AACS, or sub-allowance level.
AMIS	Automated Management Information System.
AITC	Austin Information Technology Center hosts many different VA systems.
Authorization	A charge to an obligated 1358. Each authorization represents a deduction from the balance of a 1358 to cover an expense. Authorizations are useful when you have expenses from more than one vendor for a single 1358.
Authorization Balance	The amount of money remaining that can be authorized against the 1358. The service balance minus total authorizations.
Budget Analyst	Fiscal employee responsible for distributing and transferring funds.
Budget Object Code	Fiscal accounting element that tells what kind of item or service is being procured. Budget object codes replace sub accounts in IFCAP 5.1. Budget object codes are listed in the left column of MP4 Part V, Appendix B-1.
Ceiling Transactions	Funding distributed from Fiscal Service to IFCAP Control Points for spending.
Control Point	Financial element, existing ONLY in IFCAP that corresponds to the ACCS number in FMS.

Control Point Requestor	The lowest level Control Point user, who can only enter temporary requests (2237s, 1358s) to a Control Point. The users can only view or edit their own requests. A Control Point Clerk or Official must make these requests permanent before they can be approved and transmitted to A&MM.
Cost Center	"Subsection" of a Fund Control Point. Cost centers allow fiscal staff to create total expense reports for a section or service, and allow requestors to assign requests to that section or service. Cost centers are listed in the left column of MP-4 Part V, Appendix B-1.
Date Committed	The date that you want IFCAP to commit funds to the purchase.
Deficiency	When a budget has obligated and expended more than it was funded (see MP-4, Part V Section C).
eCMS	Electronic Contract Management System (eCMS) located at the Austin Information Technology Center (AITC).
Fiscal Balance	The amount of money on a 1358 and any adjustments to that 1358 that have been obligated by Fiscal Service. This amount is reduced by any liquidation submitted against the obligation.
Fiscal Quarter	The fiscal year is broken into four three-month quarters. The first fiscal quarter begins on October 1.
Fiscal Year	Twelve-month period from October 1 to September 30.
FMS	Financial Management System, which has replaced CALM as the primary accounting system for administrative appropriations. FMS has a comprehensive database that provides for flexible on-line and/or batch processing, ad-hoc reporting, interactive query capability and extensive security. FMS is concerned with budget execution, general ledger, funds control, accounts receivable, accounts payable and cost accounting.
FOB	Freight on Board. An FOB of "Destination" means that the vendor has included shipping costs in the invoice, and no shipping charges are due when the shipper arrives at the warehouse with the item. An FOB of "Origin" means that shipping charges are due to the shipper, and must be paid when the shipper arrives at the warehouse with the item.

FTEE	Full Time Employee Equivalent. An FTEE of 1 stands for 1 fiscal year of full-time employment. This number is used to measure workforces. A part-time employee that worked half days for a year would be assigned an FTEE of 0.5, as would a full-time employee that worked for half of a year.
Fund Control Point	CALM accounting element that is not used by FMS.
Justification	A written explanation of why the Control Point requires the items requested. Adequate justification must be given if the goods are being requested from other than a mandatory source.
ISMS	Integrated Supply Management System.
Liquidation	The amount of money on the invoice from the vendor for the authorization. They are processed through payment/invoice tracking.
OA&L	Office of Acquisitions and Logistics.
Obligation Number	The C prefix number that Fiscal Service assigns to the 1358.
Organization Code	Accounting element functionally comparable to Cost Center, but used to organize purchases by the budget that funded them, not the purposes for spending the funds.
PAID	Paid Accounting Integrated Data.
Partial Date	The date that a warehouse clerk created a receiving report for a shipment.
Program Code	Accounting element that identifies the VA initiative or program that the purchase will support.
Purchase Order	A government document authorizing the purchase of the goods or services at the terms indicated.
Purchasing Agents	A&MM employees legally empowered to purchase goods and services from commercial vendors.
Receiving Report	Report that Warehouse Clerk creates to record that the warehouse has received an item.
Requestor	See "Control Point Requestor."
Requisition	An order from a Government vendor.
Service Balance	The amount of money on the on the original 1358 and any adjustments to that 1358 when created by that service in their Fund Control Point. This amount is reduced by any authorizations created by the service.
SF-18	Request for Quotation.
SF-30	Amendment of Solicitation/Modification of Contract.
Sort Order	The order in which the budget categories will appear on the budget distribution reports.

Sub-cost Center	A subcategory of Cost Center. In IFCAP 5.1, the last two digits of the cost center, if anything other than "00" will be the 'sub-cost center' that is sent to FMS. IFCAP will not use a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field, unless the last two digits of the cost center are '00'.
Sub-control Point	A specific budget within a Control Point, defined by a Control Point user.
TDA	Transfer of Disbursing Authority. A sequential number Central Office assigns to each funding it gives to your station. The first funding they give you in the fiscal year is TDA number 1, the second funding they give you is TDA number 2, etc.
Total Authorizations	The total amount of the authorizations created for the 1358 obligation.
Total Liquidations	The total amount of the liquidation against the 1358 obligation.
Transaction Number	The number of the transaction that funded a Control Point (See Budget Analyst User's Guide)
Vendor file	An IFCAP file of vendors solicited by the facility. This file contains ordering and billing addresses, contract information, FPDS information and telephone numbers. File 440 contains information about the vendors solicited by your station. The debtor's address may be drawn from this file, but is maintained separately. If the desired vendor is not in the file, contact A&MM Service to have it added.
VRQ	FMS Vendor Request document. When users in IFCAP create a new Vendor record or edit an existing record a VRQ message is sent to the FMS system at the AITC.
VUP	Vendor Update document. FMS responds to a VRQ by sending a VUP message back to IFCAP. The VUP contains the FMS vendor information (i.e. Address data, FMS Code and Alternate-Address-Indicator), ensuring that the information in the IFCAP vendor file matches the information in the FMS vendor table.
