Accounting Technician
User's Guide

Version 5.1

October 2000

Revised January 2014

Department of Veterans Affairs
Office of Information and Technology
Product Development

Revision History

Initiated on 12/29/04

Date	Revision	Description	Author(s)
January 2014		<p>Patch PRC*5.1*174 (IFCAP/eCMS Interface)</p> <p>10.12 – Added the name of security key to the following sentence, “This option is available to Fiscal users who have the PRCHJFIS Security Key.”</p> <p>10.12 – Added new Transaction Report –eCMS/IFCAP option to Accounting Utilities Menu.</p> <p>10.12.1 – Added “Note: At the DEVICE: HOME// prompt, the report can either be displayed to the screen or sent to a printer. The latter choice is appropriate when the report is long.”</p> <p>13 – Added Transaction Report – eCMS/IFCAP to Menu Outline.</p>	Robert Miller, PM; Mavis McGaugh, SME Marge Norris, Writer
February 2013	9.0	Patch PRC*5.1*161 query user for if they wish to view the 1358 details. See pages 4-1 , 4-2 .	A. Scott, Project Manager; T. Dawson, Tech Writer
January 2013	8.0	<p>As of Patch PRC*5.1*162, completion of a payment batch using the Finalize a Batch option in VistA Fee Basis will automatically generate a new transaction that is sent to Central Fee. This new transaction will replace all use of 994 code sheets in IFCAP.</p> <p>The Fee Basis - IFCAP Code Sheet Menu [PRC FEE GECS MAIN MENU] and all associated options were removed from the Accounting Technician Menu [PRCFA ACCTG TECH] as this functionality is no longer necessary.</p>	Ricky Stephens, Project Manger Mavis McGaugh, Subject Matter Expert Susan Strack, Writer
September 2012	7.5	Patch PRC*5.1*167 Updates (eCMS Interface to IFCAP): added eCMS term to the Glossary	Robert Miller, PM; Dan Navarra, Ed., Mavis McGaugh, Technical Expert
October 2011	7.0	Patch PRC*5.1*158 Modification of title for IFCAP VA Form 1358. See pages 3-1 , 4-13 , 13-1 .	C. Arceneaux, M. Anthony
August 2011	6.0	Remedy Ticket HD512314 make option lists complete. See page 8-7 to 8-8.	R. Beckwith , C. Arceneaux
July 2011	5.0	Patch PRC*5.1*153 – New message interface with Austin for 1358 Obligations see pp. 4-5 , 4-10 .	C. Arceneaux, M. Anthony
01/05/2011	4.0	Changes to the manual based on implementation of the Segregation of Duties functionality, per patch PRC*5.1*148. Includes the removal of the Obligation Data option.	Mavis McGaugh
05/31/07	3.0	Added information covering the use of the Logistics Data Query Tool (LDQT), per patch PRC*5.1*103.	Deborah Lawson, Victor J McDonald
02/06/06	2.0	Added New option, Print Obligated 1358s, per patch PRC*5.1*79.	Jan Blake, Mary Ellen Gray
12/29/04	1.1	PDF file checked for accessibility to readers with disabilities.	Mary Ellen Gray
12/29/04	1.0	Updated to comply with SOP 192-352 Displaying	Mary Ellen Gray

PREFACE

This manual is designed to provide you, the Accounting Technician, with the information necessary to obligate purchase orders and 1358s, process receiving reports, amendments, and adjustment vouchers, make General Post Fund transactions, and track invoices for payment into the Financial Management System (FMS). The Integrated Funds Distribution, Control Point Activity, Accounting and Procurement (IFCAP) package automates functions in Acquisition and Materiel Management (A&MM), Fiscal and for all VA Services that request supplies and services. The goal of IFCAP is to integrate these three areas and allow users to share procurement and financial information.

THIS PAGE INTENTIONALLY LEFT BLANK

1 Introduction

1.1 The Role of the Accounting Technician

As an Accounting Technician, you have an important role in the way the Department of Veterans Affairs manages its finances. Accounting Technicians control, coordinate and direct a variety of financial documents and reports and ensure their timely, accurate disposition. Accounting Technicians inspect purchase orders and requisitions, obligate and amend transactions of funds, and review and forward invoices and receiving reports for payment. Accounting Technicians rely on Control Point Officials and Purchasing Agents to provide accurate information about the obligations that the Accounting Technician charges to the Control Point. They also rely on the Warehouse Clerks to process receiving reports quickly and accurately, and the Purchasing Agents and Requisition Clerks to process amendments and adjustment vouchers quickly and accurately. Vendors rely on the Accounting Technician to make sure that the receiving reports are promptly transmitted for payment and that certified invoices are processed according to the Prompt Payment Act.

1.2 How to Use This Guide

This guide explains how to perform the role of the Accounting Technician by dividing that role into small, manageable tasks. The authors of this guide have listed these tasks in successive order so that each instruction builds on the functionality and information from the previous instructions. This will allow new Accounting Technicians to use this guide as a tutorial by following the instructions from beginning to end. Experienced Accounting Technicians can use this guide as a reference tool by using the index and table of contents.

Before you plunge into learning about your job as Accounting Technician, please take a few moments to familiarize yourself with how this guide is put together.

STEP 1. Read all of 1. It explains how to interpret the graphics and tpestyles used in this guide.

STEP 2. If this is your first exposure to using VistA, you should become familiar with terminology and functions that are used throughout VistA applications. There are several manuals and guides that provide a foundation for use of *Kernel*, *FileMan*, and *MailMan*. These documents replace the old *DHCP User's Guide to Computing*, which is obsolete. You will find these at:

Kernel: <http://www.va.gov/vdl/application.asp?appid=10>

FileMan: <http://www.va.gov/vdl/application.asp?appid=5>

MailMan: <http://www.va.gov/vdl/application.asp?appid=15>

STEP 3. Read the remainder of this guide.

1.2.1 Hypertext and Hyperlinks

This document contains “hypertext” that provides links to other parts of this document or to other related documents. *Hypertext* is a computer-based text retrieval system that enables you to access particular locations in electronic documents by clicking on *hyperlinks* in those documents. If you are viewing this document on your computer screen (as opposed to reading a printed copy), you will find certain hyperlinked words or phrases.

- An internal or “cross-reference” hyperlink allows you to “jump” to another part of this document. Typically, these hyperlinks will be imbedded in sentences like “See the IFCAP Glossary in 14.” Although such internal cross-references may not be shown in blue, if you move your mouse over such phrases, a pop-up box will display the link, like this:

If you have the Web toolbar enabled in your copy of Word, just click the back  icon on the toolbar to return to where you jumped from.

- Another kind of internal hyperlink uses “bookmarks” to direct you to other locations in this document. These are normally presented in a **blue font**. Again, click the back  icon on the toolbar to return to the point where you jumped from.

Links to web pages or Internet sites should open in your web browser (typically *Internet Explorer*®). Use the browser’s “back” button to return to this document. Since *Internet Explorer* and *Word* are both Microsoft products, do *not* close the browser window, since this may (under certain circumstances) also close this document.

- Links to some external documents (for example, other Word documents) may (depending on your system settings) open in Word. Such links are also usually presented in a **blue font**. For example, note the shortcut graphic with blue hyperlink to the other online documents shown in the boxed note below. Use the back  icon on the menu bar to return to where you jumped from.

In either case, you may click (or, depending on your computer’s operating system or software version, you may have to hold down the <Ctrl> key while clicking) on the link to see the other document or move to the specified place in this document.

1.2.2 Procedure Steps

- Procedures that you perform in an exact order will list the steps involved. Look for **STEP** numbers as in the following samples:
STEP 1. Select the FMS Exception option.

STEP 2. Enter the latest date that you want to retain entries. IFCAP will delete all entries recorded before that retention date.

- There are also paragraphs that simply discuss a process. In these instances, you do not need to perform any process discussed using a particular order.

1.2.3 Typographical Conventions

This guide uses a few conventions to help identify, clarify, or emphasize information.

- **Type:** The word “type” is used in this guide to mean straightforward typing at your terminal keyboard.
- **Keys:** In this guide, computer keys that you press, but which do not result in words appearing on your screen, are represented inside <angle brackets> using the Courier New font (examples: <Ctrl>+<S>, <Enter>).
- **<Enter>:** The term <Enter> is used to indicate that you must send whatever you have been typing on your keyboard to the computer. When you have completed typing your response, you send it to the computer by pressing the return or enter key once.
- **Emphasis:** Italic text (such as *must* or *not*) is used to emphasize or draw your attention to a situation or process to perform. Pay close attention to statements containing italic text.
- **Program and Utility Names:** Names of software programs and utilities appear in bold type (like **FileMan**).
- **Menus, Options, File and Field Names:** Names of menus, menu options, files, and similar items are shown in the Courier New font (as in “Select the FMS Exception option”).
- **Alert Icons:** Whenever you need to be aware of something important or informative, the Guide will display a boxed note with an icon to alert you; icons are shown in Table 1-1. Look for these icons in the left and right margins of the document.

Table 1-1 Icons Used in Boxed Notes

Icon	Meaning
	Warning: Something that could adversely affect your use of the Query Tool or of the material available in the IFCAP databases.
	Tip: Advice on how to more easily navigate or use the Guide or the software.
	Information: or Note: Additional information that might be helpful to you or something you need to know about, but which is not critical to understanding or use of the software.
	Technical Note: Information primarily of interest to software developers, IRM or Enterprise VistA Support (EVS) personnel. Most users can usually safely ignore such notes.

Icon	Meaning
 	Question: A question that might come to your mind (hopefully, followed by an Answer!)

1.3 FileMan Date Conventions

Throughout the guide, *FileMan* date conventions have been used. A date-valued response can be entered in a variety of ways. The following is a typical help prompt for a date field:

Examples of Valid Dates:
 JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
 T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
 T-1 (for YESTERDAY), T-3W (for 3 WEEKS AGO), etc.
 If the year is omitted, the computer uses CURRENT YEAR. Two digit year
 assumes no more than 20 years in the future, or 80 years in the past.

Note: If you do not specify the year when you enter a date, IFCAP will assume that you are referring to the current calendar year. This could cause some confusion around the fiscal year turnover period when you are more likely to be entering dates for next year (when the current Fiscal Year is the same as the next Calendar Year).

1.4 Package Management, Legal Requirements and Security Measures

Only authorized Control Point users are able to enter, edit, or view requests or any other information for a particular Control Point. This is a security measure that prevents users from altering the requests of others. Due to the nature of the information being processed by IFCAP, special attention has been paid to limiting usage to authorized individuals. Individuals in the system who have authority to approve actions, at whatever level, have an **electronic signature code**. This code is required before the documents pass on to a new level for processing or review. Like the access and verify codes used when gaining access to the system, the electronic signature code will not be visible on the terminal screen. These codes are also encrypted so that they are unreadable even when viewed in the user file by those with the highest levels of access. Electronic signature codes are required by IFCAP at every level that currently requires a signature on paper.

1.5 Package Operation

IFCAP automates fiscal, budgetary, procurement, inventory, invoice tracking and payment activities. To accomplish all of these tasks, IFCAP consists of several functional components, each responsible for a similar set of tasks:

- Funds Distribution (Fiscal Component)
- Funds Control (Control Point Component)
- Processing Requests (Control Point Component)
- Purchase Orders/Requisitions (A&MM Component)
- Accounting (Fiscal Component)
- Receiving (A&MM Component)
- Inventory (A&MM/Control Point Component)

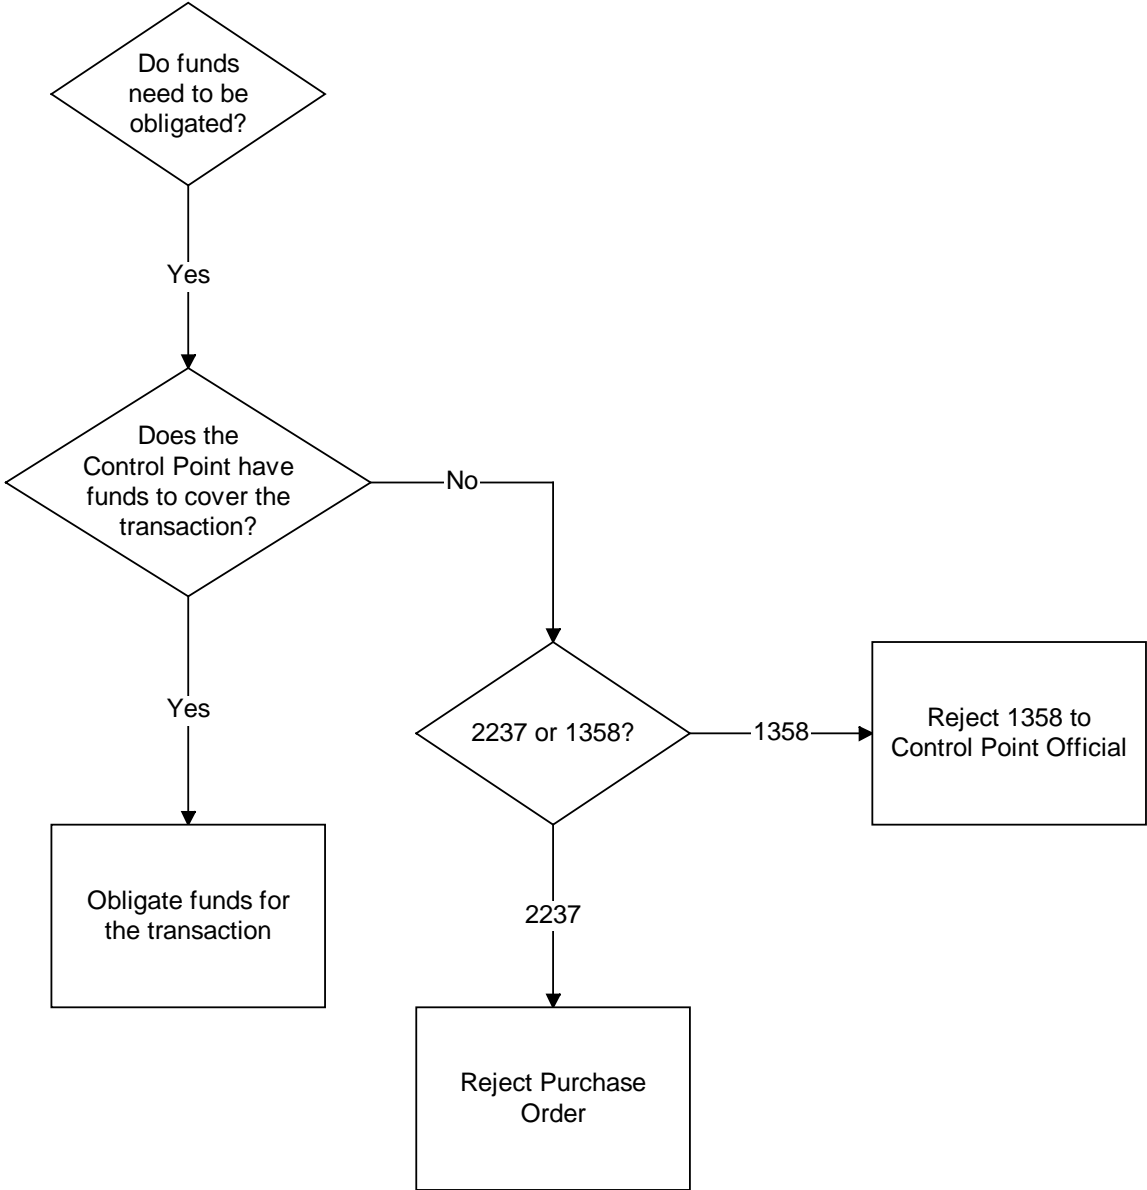

Different kinds of IFCAP users have different menus. If the menus in this manual include options that you do not see on your screen, do not panic! The instructions in this manual only use the options that you have as an Accounting Technician. If you do not know what to enter at an IFCAP prompt, enter one, two or three question marks and IFCAP will list your available options or explain the prompt. The more question marks you enter at the prompt, the more information IFCAP will provide.

The options you use on IFCAP have been divided into groups based upon the type of work you do. When you select these options, IFCAP will ask you a series of questions. If you do not understand the question or are unsure of how to respond, enter a question mark (?) and the computer will explain the question, or allow you to choose from a list of responses.

The main menu for the Accounting Technician contains these sub-menus:

Accounting Utilities Menu	This menu allows you to edit vendor files, clear a program lock, and review undelivered orders and reports.
Document Processing Menu	This menu allows you to correct errors, and inspect, forward, or return obligations, receiving reports, amendments, purchase orders, and service orders.
FMS Code Sheet Menu	This menu allows you to create, edit, delete, and review manual code sheets, and determine the status of transmission stacks.
Receiving Report Transmission Menu	This menu allows you to change the transmission date of a queued receiving report, retransmit a receiving report, and delete a report from the transmission queue.
Reprint Menu	This menu allows you to print receiving reports, purchase orders, and service orders.

1.6 Funds Obligation Flowchart

2 Inspect Purchase Orders and Requisitions

2.1 Introduction

This chapter explains how to inspect purchase orders and requisitions before obligating funds for purchase from the Control Point.

2.2 Purchase Order Number

Does the purchase order number follow the correct numbering system? If it does not, return the purchase order or requisition to Acquisition and Material Management (A&MM). Call the contracting officer listed on the purchase order or requisition and advise that the purchase order number is incorrect.

2.3 Invoice Address

Does the address in IFCAP in the Mail Invoice To: field correspond to the method of payment? If not, return the purchase order or requisition to Acquisition and Material Management (A&MM). Call the contracting officer listed on the purchase order or requisition and inform them that the invoice address is incorrect. All certified purchase orders should list Fiscal Service in the Mail Invoice To: field.

2.4 Cost Center

Compare the cost center to the requesting service. The cost center should agree in some way or other to the function of the service, for example, 822400 would be a valid cost center for Pharmacy Service. If the Cost Center is wrong, you can change it by following these three steps:

- STEP 1.** From the Accounting Technician Menu, select Document Processing Menu
- STEP 2.** From the Document Processing Menu , select Obligation Processing.
- STEP 3.** Enter the purchase order number. When IFCAP asks if the information on the purchase order is correct, answer 'N' and enter the correct cost center. At the Should The Cost Center Or BOC Information Be Edited At This Time? prompt, answer Y. Change the cost center.

You may also return the purchase order or requisition to the Purchasing Agent. The Purchasing Agent can return it to the Control Point for correction. If the service continues to send purchase orders or requisitions with an incorrect cost center, ask the Budget Analyst to review the list of available cost centers for the Control Point.

2.5 Fiscal Source Code

Compare the fiscal source code to the vendor. The vendor should have the correct fiscal source code. If not, return the purchase order or requisition to Fiscal Service or A&MM. If the service continues to send purchase orders or requisitions with an incorrect source code, ask the

Purchasing Agent in Acquisition and Materiel Management (A&MM) to change the source code for the vendor.

2.6 Budget Object Code

Compare the Budget Object Code (BOC) number on the purchase order or requisition to the transaction code descriptions in VA HANDBOOK 4671.2.

The BOC should match the budget object code descriptions. If not, you can change it by following these three steps:

- STEP 1.** From the Accounting Technician Menu), select Document Processing Menu
- STEP 2.** From the Document Processing Menu, select Obligation Processing.
- STEP 3.** Enter the purchase order number. When IFCAP asks if the information on the purchase order is correct, answer 'N' and enter the correct BOC.

You may also return the purchase order or the requisition to Acquisition and Material Management Service for return to the service. If the service continues to send purchase orders or requisitions with an incorrect budget object code, ask the Budget Analyst to change the list of available budget object codes for the Control Point.

3 Obligating and Amending Purchase Orders

3.1 Introduction

Purchase orders are orders to a vendor to deliver items. The 2138 has a receipt date and a single, private vendor. This is different from the 1358 Obligation forms, which are for services.

3.2 Is there Adequate Funding for the Purchase Order?

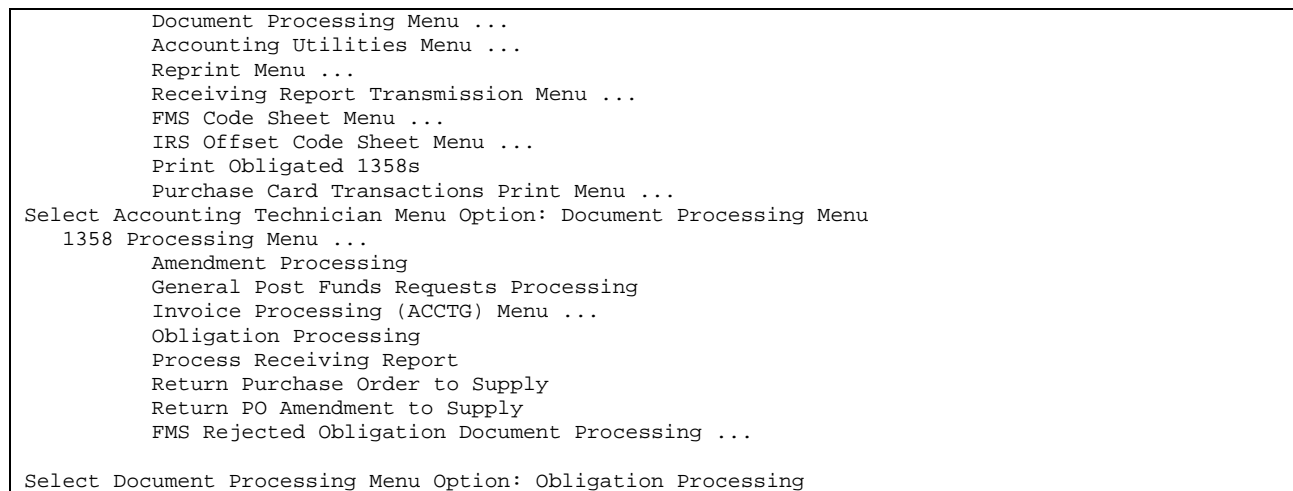

Control Points cannot process a request if the request exceeds the amount of their allotted funds. At the end of a fiscal year, some Control Points are given the authority to over-commit funds so that they can obtain bids or quotes for next year's purchases. You should receive a daily report from the Austin Finance Center called the *Status of Allowance Report*, listing the funds available for each Control Point. Check this document closely for availability of funds, especially at the close of a fiscal year.

3.3 Obligating a Purchase Order

3.3.1 Menu Path

From the Accounting Technician's Menu, select Document Processing Menu. From the Document Processing Menu, select Obligation Processing.

Figure 3-1 Menu Path

3.3.2 Select Order Number

Enter a STATION NUMBER and a PURCHASE Order Number at the appropriate prompts. If you do not know the Purchase Order Point, enter three question marks (???) at the prompt and IFCAP will display the available orders.

Figure 3-2 Select Order Number

```
Select STATION NUMBER (^ TO EXIT): 688//          WASHINGTON, DC
Select Purchase Order Number: ???
Choose from:
  U00001      688-U00001  02-23-00  ST   Pending Fiscal Action
              FCP: 081    $ 106.20

Select Purchase Order Number: U00001 688-U00001  02-23-00  ST   Pending Fiscal Action
              FCP: 081    $ 106.20
```

3.3.3 Display Order Information

IFCAP will display the purchase order and ask if the Control Point and cost center information are correct. If not, answer N to edit the information. Otherwise, enter Y. IFCAP will display the cost of the order and its effect on the uncommitted and un-obligated balances of the Control Point. IFCAP will also display the status of funds balance for the Control Point. The status of funds balance is the funds available to the Control Point at the time the purchase order is being obligated. If the un-obligated balance is greater than the net cost of the order, then you can obligate the order. Otherwise, return the order to the Purchasing Agent or Requisition Clerk.

Figure 3-3 Display Order Information

```
Obligation Processing
      Purchase Order - 688-U00001
COST CENTER: 828100          CONTROL POINT: 081 SPD
BOC: 2660                   AMOUNT: $ 106.20
Net Cost of Order:          $ 106.20
Justification(s):
      No Justification Information shown.
The information listed above is recorded on this Purchase Order.
Is the above information correct? YES//

Net Cost of Order:          $ 106.20
Control Point Balances
Uncommitted Balance:       $ 299992.80
Unobligated Balance:       $ 300000.00
Committed, Not Obligated:   $ 7.20
OK to Continue? YES//
Would you like to review the entire Purchase Order? YES//
```

3.3.4 Obligation Date

Enter the date the purchase order is obligated at the `Select Obligation Processing Date:` prompt. This date determines the accounting period, fiscal quarter, etc., of the purchase order for FMS records. IFCAP will ask you if the purchase order is ready to transmit to FMS. The invoice will be paid when the invoice and the receiving report are in agreement. Payment occurs 23 to 30 days after the invoice as received or the goods were received, whichever is later.

```
Select Obligation Processing Date: JAN 5,1994// (JAN 05, 1994)
This Purchase Order Obligation will now generate the
Original Entry Miscellaneous Order (MO) Document. The MO Document
will be marked for transmission to FMS.
Transmit this Document to FMS? YES//
The Electronic Signature must now be entered to generate the MO Document.
Enter ELECTRONIC SIGNATURE CODE: Thank you.
...now generating the FMS Miscellaneous Order (MO) Document...
...EXCUSE ME, HOLD ON...
```

3.3.5 Post Using Status of Funds Tracker

IFCAP may ask you if you want to post this purchase order to the *Fiscal Status of Funds Tracker*, a financial tracking option used at some facilities. If you see this prompt, enter a Control Point name. If you do not know the Control Point, enter three question marks (???) at the `Select Control Point Name:` prompt and IFCAP will display a list of the available Control Points.

If you do not see this prompt, it is ok. It means your site has opted not to use that functionality.

Figure 3-4 Post Using Status of Funds Tracker

```
Do you wish to post this information to the Fiscal Status of Funds
Tracker? NO// ???
If you answer 'YES', you will be asked the information necessary to post
the code sheet to the Fiscal Status of Funds. A 'NO' or an '^' will
skip the bypass the posting.
Do you wish to post this information to the Fiscal Status of Funds
Tracker? NO// Y (YES)
REMEMBER, DO NOT ENTER TRANSACTION FOR FUTURE QUARTERS!

Select CONTROL POINT NAME: ???
CHOOSE FROM:
  33          033 PHARMACY
  40          040 BUILDING MANAGEMENT

Do you wish to queue the Purchase Order to another printer? NO//
Select STATION NUMBER ('^' TO EXIT): 688//
```

3.4 Amend a Purchase Order

3.4.1 Is There Adequate Funding for the Amendment?

Control Points cannot process an amendment if the amendment exceeds the amount of their allotted funds. At the end of a fiscal year some Control Points are given the authority to over commit funds so that they can obtain bids or quotes for next year's purchases. You should receive a daily report from the Austin Finance Center called the 'Status of Funds Report,' listing the funds available for each Control Point. Check this document closely for availability of funds, especially at the close of a fiscal year. This information is also available on an FMS report called the *Object Class by Allowance Report*.

3.4.2 Obligate an Amendment

Amendments add, delete, or adjust items on a purchase order before the item is received. Amendments are different from adjustments, which adjust the quantity of an item on a receiving report after it is processed by Fiscal Service.

3.4.2.1 Menu Path

From the Accounting Technician’s Menu, select Document Processing Menu. From the Document Processing Menu, select Obligation Processing.

Figure 3-6 Menu Path

THIS PAGE INTENTIONALLY LEFT BLANK

4 Obligating and Adjusting 1358 Transactions

4.1 Inspect the 1358 for Correctness

Are the cost center and budget object code (BOC) appropriate for this purchase? Is the Purpose (justification) adequate? Is the Purpose sufficiently explained? If the cost center or budget object code is wrong, you can correct them during the obligation process. If the Purpose (justification) is incorrect or inappropriate, return the 1358 to the service.

4.2 Is There Adequate Funding for the 1358?

Control Points cannot process a 1358 if the 1358 exceeds the amount of their allotted funds. At the end of a fiscal year some Control Points are given the authority to over commit funds so that they can obtain bids or quotes for next year's purchases. You should receive a daily report from the Austin Finance Center called the 'Status of Funds Report,' listing the funds available for each Control Point. Check this document closely for availability of funds, especially at the close of a fiscal year. This information is also available on an FMS report called the *Object Class by Allowance Report*.

4.3 Obligate the 1358

4.3.1 Menu Path

From the 1358 Processing Menu, select Obligate 1358.

Figure 4-1 Menu Path

```
Select Accounting Technician Menu Option: Document Processing Men
Select Document Processing Menu Option: 1358 Processing Menu
  Obligate 1358
  Adjust (Increase/Decrease) 1358
  Liquidate 1358
  1358 Print Menu ...
  Close 1358
  Recalculate 1358 Balances
  Reopen a Closed 1358
  Send 1358 back to Service without action
Select 1358 Processing Menu Option: Obligate 1358
```

4.3.2 Enter Station Number

Enter a STATION NUMBER and a FISCAL YEAR. Enter the TRANSACTION NUMBER of the 1358 you wish to obligate. You will be able to view the Authority, Sub-authority, Service Start Date and Service End Date on the screen.

You will be asked to review the 1358 request:

Would you like to review this request?? No// Y (Yes)

Responding NO will continue with the 1358 Obligating. Responding YES will then display all the detailed information on the 1358 to ascertain full 1358 compliance prior to obligating. Once the display has completed you will be asked:

Would you like continue obligating this 1358?? Yes// N (No)

Responding NO will exit the Obligate 1358 option. Responding YES will allow continuation of the 1358 Obligate processing.

At the Will this 1358 Obligation Need To Be Accrued In FMS? prompt, enter Y if this obligation should be distributed among multiple accounting periods. Otherwise, enter N. Confirm that the information is correct.

Enter N at the Are these Auto Accrual values correct? prompt to edit the Cost Center or BOC. Otherwise, enter Y.

Enter Y at the Is the above information correct? prompt to continue.

SERVICE END DATE: Oct 31, 2010

MONTHLY HHA COSTS
```

You are the Approver on this 1358 transaction.

Per Segregation of Duties, the Approver is not permitted to Obligate the 1358

5 Enforcing Segregation of Duties in Online Certification System for 1358 Obligation

An interface exists between the IFCAP application and the Online Certification System (OLCS) located at the Financial Services Center (FSC) in Austin, Texas. The interface will support the validation of the Certifier of Payment role in the OLCS.

The interface is a one-way data exchange of 1358 Obligation data from the IFCAP application to the OLCS using VistA MailMan messages. The mail messages support segregation of duties within OLCS by providing OLCS with the names of the requestor, approver, and obligator on every 1358 transaction as it is obligated in IFCAP. Segregation of duties prevents a user from functioning in more than one role on a 1358. The OLCS will verify that a certifier processing an invoice for a 1358 in OLCS is not the requestor, approver, or obligator on that 1358 in IFCAP.

IFCAP triggers a VistA MailMan message to the OLCS when a 1358 is obligated (i.e. Electronic Signature Code is entered). The exchange of 1358 Obligation data from the IFCAP to the Online Certification System will occur in the background and be transparent to IFCAP end-users.

```
ENTER A NEW 1358 Obligation Number OR A COMMON NUMBERING SERIES
1358 Obligation Number: c15 688-C15 ACCOUNTING TECHNICIAN
Are you adding '688-C15003' as a new 1358 Obligation Number? y (Yes)

...updating 1358 Obligation balances...
...Excuse me, Let me think about this for a moment...
...Control Point has been notified of this transaction...
```

IFCAP will trigger a VistA MailMan message to the OLCS when a 1358 is obligated (No message is displayed to the user).

5.1 Adjustments to 1358s

5.1.1 Introduction

Control Points may require changes to their obligated 1358 during the month. IFCAP links the 1358 adjustment to the original 1358 by the obligation number and increases or decreases the obligated total automatically.

5.1.2 Inspect the Adjustment for Correctness

Is the Purpose of the adjustment sufficiently explained? Decrease adjustments should have a minus sign preceding the dollar amount; was the adjustment correctly entered as a decrease or an increase? If not, return the adjustment to the Control Point.

5.1.3 Is There Adequate Funding for the Adjustment?

Control Points cannot process an adjustment if the adjustment exceeds the amount of their allotted funds. At the end of a fiscal year some Control Points are given the authority to over commit funds so that they can obtain bids or quotes for next year's purchases. You should receive a daily report from the Austin Finance Center called the 'Status of Allowance Report,' listing the funds available for each Control Point. Check this document closely for availability of funds, especially at the close of a fiscal year. This information is also available on an FMS report called the *Object Class by Allowance Report*.

5.1.4 Adjust the 1358

5.1.4.1 Menu Path

From the Accounting Technician's Menu, select Document Processing Menu.

Figure 5-1 Menu Path

```
Select Accounting Technician Menu Option: Document Processing Menu

```

5.1.4.3 Review Balances

IFCAP will list the service balance, the fiscal balance, and the adjustment amount. The service balance is the balance on the 1358 after the Control Point Clerk enters authorizations. The fiscal balance is the balance on the 1358 after Fiscal Service enters payments (liquidations). IFCAP will also list the cost center and the budget object code for the original 1358 and for the adjustment, and the auto accrual values. Enter N at the Is the above information correct?: prompt to edit the Cost Center or BOC. At the Will this 1358 Obligation Need To Be Accrued In FMS? prompt, Enter Y if this obligation should be distributed among multiple accounting periods. Otherwise, enter N. Confirm that the information is correct.

Figure 5-3 Review Balances

```

5.1.4.4 Enter Electronic Signature

IFCAP will list the transaction number of the adjustment, the current amount obligated on the 1358, the total amount of authorizations for the 1358, the total liquidations (payments) for the 1358, the authorization balance (payments authorized by the Control Point), the liquidation balance (the balance on the 1358 after Fiscal Service enters payments), and the amount of the adjustment. Enter Y at the OK to Continue? prompt. Enter Y at the Transmit this Document to FMS? prompt. Enter your ELECTRONIC SIGNATURE CODE. IFCAP will compute the adjustment and record the adjustment. Enter a caret (^) at the Select Station Number: prompt to return to the 1358 Processing Menu.

5.1.5 Enforcing Segregation of Duties on 1358 Adjustments

Per Segregation of Duties on 1358s, you will be advised if you already signed the 1358 transaction as a Requestor or Approver and you will not be permitted to Obligate the Adjustment.

```

You are the Requestor on this 1358 transaction. Per Segregation of Duties, the Requestor is not permitted to Obligate the 1358.

No further processing is being taken on this 1358 adjustment obligation.

It has NOT been obligated.

5.1.6 Enforcing Segregation of Duties in Online Certification System for 1358 Adjustments

An interface exists between the IFCAP application and the Online Certification System (OLCS) located at the Financial Services Center (FSC) in Austin, Texas. The interface will support the validation of the Certifier of Payment role in the OLCS.

The interface is a one-way data exchange of 1358 Obligation data from the IFCAP application to the OLCS using VistA MailMan messages. The mail messages support segregation of duties within OLCS by providing OLCS with the names of the requestor, approver, and obligator on every 1358 transaction as it is obligated in IFCAP. Segregation of duties prevents a user from functioning in more than one role on a 1358. The OLCS will verify that a certifier processing an invoice for a 1358 in OLCS is not the requestor, approver, or obligator on that 1358 in IFCAP.

IFCAP will trigger a VistA MailMan message to the OLCS when a 1358 increase/decrease adjustment is obligated (i.e. Electronic Signature Code is entered). The exchange of 1358 Obligation data from the IFCAP application to the Online Certification System will occur in the background and be transparent to IFCAP end-users.

```

Adjustment Transaction # 688-11-1-110-0022      1358 # 688-C15003
Current amount obligated on 1358:      $ 19,999.00

6 Review and Forward Receiving Reports for Payment

6.1 Introduction

This chapter explains how to make sure that the information on the received order report is correct.

6.2 Dollar Amounts

Compare the dollar amounts on the receiving report to the purchase order. To view the IFCAP record of the purchase order, follow the steps in this section.

6.2.1 Menu Path

From the Accounting Technician Menu, select Document Processing Menu.

From the Document Processing Menu, select Process Receiving Report.

Enter a STATION NUMBER and a FISCAL YEAR.

At the Select PURCHASE ORDER NUMBER: prompt, enter the PAT number for the receiving report. If you do not know the PAT number, enter three question marks (???) at the prompt and IFCAP will display the available transactions.

7 Process 1358 Invoices for Payment

7.1 Introduction

After an invoice is sent to the Certifying Official (usually the Control Point Official) to be certified for payment, the Certifying Official returns it to the accounting office, where the Voucher Audit Clerk (or Accounting Technician if there is no Voucher Audit Clerk at your station) records the certification in IFCAP. (See the Voucher Auditor Manual for options used to process the Certified Invoices).

7.2 Menu Path

From the Accounting Technician Menu, select Document Processing Menu.
 From the Document Processing Menu, select Invoice Processing (ACCTG) Menu.
 From the Invoice Processing (ACCTG) Menu, select Invoice Processing for Payment.

Figure 7-1 Menu Path

```

Invoice Processing for Payment
Return Invoice to Voucher Audit
PV Payment Voucher (PV) Inquiry
FMS Payment Voucher Error Processing
View Certified Invoice
Select Invoice Processing (ACCTG) Menu Option: Invoice Processing for Payment
  
```

7.2.1 Select Station Number

Select a STATION NUMBER. Enter the INVOICE TRACKING ID NUMBER recorded on the invoice before it was sent to the Certifying Official. Compare the purchase orders on the invoice and the IFCAP record of the invoice amount to make sure that they are the same. If the amounts are different, verify that there is no clerical error, then call the Control Point Official to correct the discrepancy. You may also display or print the 1358.

7.3 Verifying Payment Transmission

Eventually, a CAPPS report will print, listing the payment transmission you created. Look at the invoices on the report to see if any of your invoice payments are rejected. If you have rejects, use the following steps to edit and retransmit corrected payment information.

7.3.1 Menu Path

From the Accounting Technician Menu, select Document Processing Menu.

From the Document Processing Menu, select Invoice Processing (ACCTG) Menu.

7.3.2 Enter and Verify Transmission

Enter the correct information about the invoice payment at the prompts.

Figure 7-5 Enter and Verify Transmission

```
Select Invoice Processing (ACCTG) Menu Option: FMS Payment Voucher Error Processing
FMS Payment Voucher Error Processing
Select STATION NUMBER ('^' TO EXIT): 688//          WASHINGTON,DC
  Select one of the following:
    PV          Payment Voucher
Select Transaction Type: PV Payment Voucher
Select Payment Voucher Number: PV-688C4522301

8 Resolving Error Messages

8.1 FMS Error Processing

FMS documents are generated automatically as a result of certain IFCAP processes. For example, creation and generation of ceiling transactions in IFCAP results in Sub-allowance (SA) documents being created and transmitted to FMS. Additionally, when Accounting obligates purchase orders or invoices for payment, various types of FMS documents are automatically sent to Austin.

In designing the interface with FMS, IFCAP developers have built-in various edit checks to prevent rejection of FMS documents. An example of such functionality is the Required Fields File, explained earlier in this document, which ensures that all fields required for a given fund and type of FMS document are present on that FMS document before transmitting it to FMS. Even so, it is impossible to prevent every scenario that might cause FMS documents to reject. It is far less likely that the documents that IFCAP creates automatically will reject, compared with the documents that users create manually, using the FMS Code Sheet Menu's Create a Code Sheet option. That is because the automatic document processes contain more built-in protection against document rejection in FMS.

Because rejection of FMS documents is, to some extent, inevitable, there are options in IFCAP to assist users in correction and retransmission of the rejected documents. IFCAP will allow the user to correct errors by correcting the source document, then rebuilding the document and retransmitting it to FMS.

Once FMS has tried to process a document that rejects, it will send an error message containing all relevant FMS error codes to the appropriate recipients the following day. Appropriate recipients are those who are defined in the FCP file (420) to receive FMS notifications for their FCP. When the user has corrected a rejected document, the new document will automatically transmit to Austin. The only exceptions are the Budget documents, SA, ST, and AT, which must be generated again with the Generate Budget Code Sheets option of the Fund Distribution Module.

IFCAP transactions being transmitted to the FMS system in Austin are in the form of a mail message.

If FMS rejects a document from IFCAP, the FMS mail group will receive an electronic mail message from FMS notifying them of the rejected document. The message will include the FMS error code, along with a brief description of the error. The action the user must take to correct the rejected document varies according to the type of document that has rejected. See the *FMS Handbook* for a list of FMS error codes.

8.2 Stack Status Report

The Accounting Technician Menu has an option to allow inquiry into all documents and give users the status on each document. The data can be gathered by document type, status or a group of status. The user can see the document with or without code sheet information.

10 Accounting Utilities

10.1 Introduction

This chapter lists the options contained on the Utilities Menu. These options enable the Accounting Technician to Edit a BOC on an item in the ITEM file, Review VRQs, establish AR Vendors in the IFCAP Vendor file, edit entries in the Vendor file, clear a lock if necessary, lookup a vendor ID number in the Vendor file, and print a report of documents awaiting Fiscal action.

10.2 Update Status of Funds Balances

This option was more useful when IFCAP was not being updated automatically if adjustments were made to the control point balances in the corporate (now FMS) system. It allows the Accounting Technician to manually enter the current balance of the control point, as listed on the Status of Allowance report, into the IFCAP system thereby enabling the technician to see the effect of any transaction input into IFCAP against the actual balance recorded in FMS. To utilize this feature the field STATUS OF FUNDS TRACKING: in File 411 must be set to YES. This is done by the IFCAP Coordinator using the Site Parameter option. It would have to be set individually for each station on the computer system.

10.2.1 Enter Parameters and Display

At the Select FUND CONTROL POINT STATION NAME: prompt, enter the appropriate Station Number.

At the Select CONTROL POINT: prompt, enter the CONTROL POINT.

At the STATUS OF FUNDS BALANCE: prompt, enter the actual balance of the control point per the *Status of Allowance* report from FMS.

Figure 10-1 Update Status of Funds Balances

```
Select Accounting Utilities Menu Option: update Status of Funds Balances

  STATUS OF FUNDS BALANCE: 12312.56
Select CONTROL POINT:
```

10.3 Lookup Vendor ID Number

This option is designed to permit Fiscal Service to lookup the Vendor ID Number, Alternate Address Indicator and Payment address information for any vendor in the vendor file.

10.3.1 Enter Parameters and Display

At the Select FUND CONTROL POINT STATION NAME: prompt, enter the appropriate Station Number.

At the Select CONTROL POINT: prompt, enter the CONTROL POINT.

At the Select Vendor Name or PO Number: prompt, enter the Vendor Name or purchase order number.

10.4 Vendor File Edit

This option permits the Fiscal Service to edit the VENDOR NAME and PAYMENT ADDRESS fields of an entry in the Vendor File.

10.4.1 Enter Parameters and Display

Enter a STATION NUMBER.

At the VENDOR NAME: prompt, enter the name of the vendor you wish to edit, or enter two question marks (??) to see a list of those available..

If you changed any critical data fields, IFCAP may ask if you need to send a Vendor Request (VRQ) to Austin. If so, answer YES to generate a VRQ. If you made no change to critical fields, IFCAP will not ask you the question.

```

10.7 Undelivered Orders Reconciliation Report

This option generates the 850 Undelivered Orders Reconciliation Report. This report is very resource intensive and should be scheduled to run in off-hours. The option can be invoked manually. This report is restricted to purchase orders from a single station, and can be limited to a date range. The default date range is from T-90 days to T.

10.7.1 Enter Parameters and Display

Enter a STATION NUMBER.

At the Select BEGINNING DATE: prompt, enter a beginning date, or press <Enter> to accept the default 90-day period.

At the Select ENDING DATE: prompt, enter an ending date, or press <Enter> to accept the default.

Enter a DEVICE.

10.10 Review Vendor Request

This option allows Fiscal to review Vendor Requests *before* they are sent to Austin. This option was added to reduce the number of VRQs going to Austin. Reviewers are expected to check the VENDOR file in FMS, get any information available, and edit the vendor locally rather than sending a VRQ to Austin.

10.10.1 Enter Parameters and Display

At the Select VRQ Action: prompt, select the action, or enter two question marks (??) to see a list of actions.

10.11 Setup Accounts Receivable Selected Vendor

This option handles creation and editing of a VRQ for vendor records chosen by Accounts Receivable users. Once the VRQ is “created,” it will be reviewed by Fiscal or sent directly to Austin. The CAN FISCAL ADD VENDORS? flag in the ADMIN. ACTIVITY SITE PARAMETER (#411) file will govern whether Fiscal Service or Supply Service edits these vendor records. If the flag is set to YES, Fiscal will edit these records. Otherwise, Supply will have the honor. Fiscal will be able to review the Vendor Request, edit the Vendor entry, delete the request or send the VRQ to Austin. The option works the same way as the Review Vendor Request option.

10.11.1 Enter Parameters and Display

At the Select EDIT Action: prompt, enter ER to edit the record.

10.12 Transaction Report – eCMS/IFCAP

This report displays information about HL7 transactions that occur between eCMS and IFCAP at your station. This option is available to Fiscal users who have the PRCHJFIS Security Key. The report is generated from data stored in the IFCAP/ECMS TRANSACTION file (#414.06).

10.12.1 Enter Parameters and Display

A report can be generated for a single 2237, a single eCMS Contact, a date range, a specific Station Number, a specific fund control point, a specific messaging Event type, multiple Event types or ALL the records.

Note: if your Station is using the IFCAP sub-station functionality, a report can be generated for a specific sub-station.

Note: At the DEVICE: HOME// prompt, the report can either be displayed to the screen or sent to a printer. The latter choice is appropriate when the report is long.

```

Select Accounting Utilities Menu <TEST ACCOUNT> Option: TTransaction Report - eCM

11 FMS Code Sheet Menu

11.1 Introduction

It is possible to create FMS documents manually using the FMS Code Sheet Menu. These options should be used only for creating those FMS documents that IFCAP does not generate automatically (*e.g.*, AO, TO).

Use of the manual code sheet option may mean you have to enter more fields on the document than you would enter if creating the document directly on-line in FMS. Although the menu refers to “code sheets,” you are actually creating FMS documents. Using the options on this menu you may create, edit, delete, review, retransmit and purge the documents. Documents created using this menu are stored in the Generic Code Sheet (#2100.1) file and appear on the Stack Status Report in the same way as the documents generated automatically.

11.2 Menu Choices

Figure 11-1 FMS Code Sheet Menu

```
Select Accounting Technician Menu Option: FMS Code Sheet Menu
  Code Sheet Edit
  Create a Code Sheet
  Delete a Code Sheet
  Purge Transmission Records/Code Sheets
  Retransmit Stack File Document
  Review a Code Sheet
  Stack Status Report
  User Comments
```

11.2.1 Transmission Records/Code Sheets

This routine will delete Code Sheets from the Code Sheet file and Batch and Transmission records from the Transmission Record file. Deletion is based on the date a batch and a code sheet is created.

11.2.2 Enter Parameters and Display

Enter a STATION NUMBER.

At the Batch Type: prompt, enter FINANCIAL MANAGEMENT.

At the Enter the number of days you wish to retain code sheets: prompt, enter the number of days you wish to retain code sheets.

Figure 11-2 FMS Code Sheet Menu

```
Select STATION NUMBER (^ TO EXIT): ALBANY.VA.GOV//   NY  VAMC   500
Station: ALBANY.VA.GOV (#500)
Batch Type: FINANCIAL MANAGEMENT
Enter the number of days you wish to retain code sheets: (0-999999): 365//
This program will remove all stack file entries which were created before
JUN 22, 1999. I will now delete all code sheets and associated records which were created before
JUN 22, 1999 for station 500.
OK to continue? YES//
```

11.2.3 Retransmit Stack File Document

If you need to retransmit a document, you can use this option to select a document in the Generic Code Sheet (#2100.1) file and retransmit the document. It will reset the Current Status to TRANSMITTED.

Note: Documents with a current status of FINAL - NO FURTHER ACTIVITY ALLOWED cannot be retransmitted.

Figure 11-3 Retransmit Stack File Document

```
Select FMS Code Sheet Menu Option: retransmit Stack File Document
Select Stack Document for Retransmission: ET-66BJJJ1003
Current Status: REJECTED BY FMS
Do you want to retransmit this document now? NO// y (YES)
NEW Status: TRANSMITTED
```

11.2.4 User Comments

This option permits you to add text to the FMS document record in the Generic Code Sheet (#2100.1) file.

Figure 11-4 User Comments

```
Select FMS Code Sheet Menu Option: User Comments
Select Stack Document: ET-
1 ET-66BJJJ1001
2 ET-66BJJJ1002
3 ET-66BJJJ1003
4 ET-66BJJJ1004
5 ET-66BJJJ1005
Press <RETURN> to see more, '^' to exit this list, OR
CHOOSE 1-5: 1 ET-66BJJJ1001
Current Status: REJECTED BY FMS
USER COMMENTS: do not correct or retransmit this document
```

12 The Logistics Data Query Tool

The Logistics Data Query Tool is designed to assist Chief Logistics Officers; Materiel Managers; Purchasing Agents; and members of the Facility Logistics Staff (including Inventory Managers; Supply, Processing, and Distribution (SPD) Technicians; Management Analysts; Warehouse Clerks; or Supply System Analysts). The Query Tool can be used to quickly access, analyze and verify IFCAP and Prosthetics procurement data and display it using a graphical user interface to the VistA data. You can sign-on to VistA, find data, view the data, or easily move the data into a Microsoft® Excel® spreadsheet.

The Query Tool is a Windows software application that acts as a “front-end” to enable you to more easily find, display, and export VistA data. The Query Tool is a substitute for the VA FileMan utility program which has traditionally been used to look directly at the MUMPS globals (files) which store VistA data. The Query Tool enables you to...

- Search for data and display data by a range of dates
- Sort and rearrange the view of the data; display the data in a custom view
- Export the data into a Microsoft Excel spreadsheet file

Information on what the Query Tool can do for you can be found in the Logistics Data Query Tool Manual.

The Logistics Data Query Tool Manual is available online at...

<http://www.va.gov/vdl/application.asp?appid=42>.

THIS PAGE INTENTIONALLY LEFT BLANK

13 Menu Outline

This chapter lists each menu option assigned the standard menu configuration for an Accounting Technician. Main menu options are flush left. Subordinate options are spaced to the right. For example, if you wanted to use the “Single Receiving Report Reprint in Fiscal” option, you would select “Reprint Menu”, then “Receiving Report Reprint Menu”, then “Single Receiving Report Reprint in Fiscal”.

NOTE: The Fee Basis - IFCAP Code Sheet Menu [PRC FEE GECS MAIN MENU] and all associated options were removed from the Accounting Technician Menu [PRCFA ACCTG TECH] as this functionality is no longer necessary.

14 Glossary

This glossary defines terms in this manual that users might find unfamiliar.

0-9	
Term	Definition / Discussion
1358	VA Form 1358, Estimated Obligation or Change in Obligation
2138	VA Form 90-2138, <i>Order for Supplies or Services</i> (first page of a VA Purchase Order)
2139	VA Form 90-2139, <i>Order for Supplies or Services</i> (Continuation) (continuation sheet for Form 90-2138)
2237	VA Form 90-2237, <i>Request, Turn-in and Receipt for Property or Services</i> (used to request goods and services)

A	
Term	Definition / Discussion
A&MM	<i>See</i> Acquisition and Materiel Management (Service)
AACS	Automated Allotment Control System—Central computer system developed by VHA to disburse funding from VACO to field stations.
Accounting Technician	Fiscal employee responsible for obligation and payment of received goods and services.
Acquisition and Materiel Management (Service) (A&MM)	VA Service responsible for contracting and for overseeing the acquisition, storage, and distribution of supplies, services, and equipment used by VA facilities
Activity Code	The last two digits of the AACS number. It is defined by each station.
ADP Security Officer	The individual at your station who is responsible for the security of the computer system, both its physical integrity and the integrity of the records stored in it. Includes overseeing file access.
Agent Cashier	The person in Fiscal Service (often physically located elsewhere) who makes or receives payments on debtor accounts and issues official receipts.
ALD Code	Appropriation Limitation Department. A set of Fiscal codes which identifies the appropriation used for funding.
Allowance table	Reference table in FMS that provides financial information at the level immediately above the AACS, or sub-allowance level.

A	
Term	Definition / Discussion
Amendment	A document which changes the information contained in a specified Purchase Order. Amendments are processed by the Purchasing & Contracting section of A&MM and obligated by Fiscal Service.
AMIS	Automated Management Information System.
Application Coordinator	The individuals responsible for the implementation, training and trouble-shooting of a software package within a service. IFCAP requires there be an Application Coordinator designated for Fiscal Service, A&MM Service.
Approve Requests	The use of an electronic signature by a Control Point Official to approve a 2237, 1358 or other request form and transmit said request to A&MM/Fiscal.
Approving Official	A user that approves reconciliations to ensure that they are correct and complete.
Authorization	Each authorization represents a deduction from the balance of a 1358 to cover an expense. Authorizations are useful when you have expenses from more than one vendor for a single 1358.
Authorization Balance	The amount of money remaining that can be authorized against the 1358. The service balance minus total authorizations.

B	
Term	Definition / Discussion
Batch Number	A unique number assigned by the computer to identify a batch (group) of Code Sheets. Code Sheets may be transmitted by Batch Number or Transmission Number.
Breakout Code	A set of A&MM codes which identifies a vendor by the type of ownership (e.g., Minority-owned, Vietnam Veteran Owned, Small Business Total Set Aside, etc.).
Budget Analyst	Fiscal employee responsible for distributing and transferring funds.
Budget Object Code	Fiscal accounting element that tells what kind of item or service is being procured. Budget object codes are listed in VA Handbook 4671.2
Budget Sort Category	Used by Fiscal Service to identify the allocation of funds throughout their facility.

C	
Term	Definition / Discussion
CC	Credit Charge entry identifier used by FMS and CCS for charges paid to Vendor thru Credit Card payment process.
CCS	The Credit Card System. This is the database in Austin that processes the credit card information from the external Credit Card Vendor system (currently CitiDirect), and then passes information on to FMS and IFCAP.
Ceiling Transactions	Funding distributed from Fiscal Service to IFCAP Control Points for spending. The Budget Analyst initiates these transactions using the Funds Distribution options.
Chief Logistics Office (CLO)	<p>The Chief Logistics Office (CLO) develops and fosters logistics best practices for the Veterans Health Administration. Through the VHA Acquisition Board the CLO develops the annual VHA Acquisition plan that forms the basis for VHA's acquisition strategy. This strategy seeks to procure high quality health care products and services in the most cost effective manner. This includes the attainment of socio-economic procurement goals. The CLO also develops and implements a comprehensive plan for the standardization of healthcare supplies and equipment. This includes the development and administration of clinical product user groups.</p> <p>The CLO is also responsible for developing improvements to supply chain management within VHA. This includes the establishment and monitoring of logistics benchmarking data. The CLO serves as liaison for logistics staff in each of the 21 VISNs.</p> <p>The head of CLO is the Chief Prosthetics and Clinical Logistics Officer (CPCLO).</p>
Chief Prosthetics and Clinical Logistics Officer (CPCLO)	The official in charge of the VHA Chief Logistics Office (CLO) , also called the Clinical Logistics Office.
CLA	<i>See</i> Clinical Logistics Analyst
Classification of Request	An identifier a Control Point can assign to track requests that fall into a category (<i>e.g.</i> , Memberships, Replacement Parts, Food Group III).
Clinical Logistics Analyst (CLA)	<i>Logistics</i> refers to how resources are acquired, transported and stored along the supply chain. By having an efficient supply chain and proper logistical procedures, an organization can cut costs and increase efficiency. <i>Clinical logistics</i> refers specifically to resources used for clinical purposes. A CLA is a person who examines processes, methods and data for clinical logistics operations.

C	
Term	Definition / Discussion
Clinical Logistics Office	<i>See</i> Chief Logistics Office (CLO).
Clinical Logistics Report Server (CLRS)	The CLRS project allows the extraction of selected procurement and inventory data from VHA facilities to a centralized Clinical Logistics Report Server. The server supports the collection, tracking, and reporting of National Performance Measures, assisting the Under Secretary for Health (USH) in evaluating facility performance in the areas of consolidation of high tech equipment, standardization, socioeconomic goal accomplishment, acquisition, and inventory management.
CLRS	<i>See</i> Clinical Logistics Report Server (CLRS).
Common Numbering Series	This is a pre-set series of Procurement and Accounting Transaction (PAT) numbers used by Purchasing and Contracting, Personal Property Management, Accounting Technicians and Imprest Funds Clerks to generate new Purchase Orders/Requisitions/Accounting Transactions on IFCAP. The Application Coordinators establish the Common Numbering Series used by each facility.
Control Point	Financial element, existing ONLY in IFCAP, which corresponds to a set of elements in FMS that include the Account Classification Code (ACC) and define the Sub-Allowance on the FMS system. Used to permit the tracking of monies to a specified service, activity or purpose from an Appropriation or Fund.
Control Point Clerk	The user within the service who is designated to input requests (2237s) and maintain the Control Point records for a Service.
Control Point Official	The individual authorized to expend government funds for ordering of supplies and services for their Control Point(s). This person has all of the options the Control Point Clerk has plus the ability to approve requests by using their electronic signature code.
Control Point Official's Balance	A running record of all the transactions generated and approved for a Control Point from within IFCAP and also. Effects changes to the control point that are initiated directly from within the FMS system. Provides information that shows the total amount of funds committed, obligated and remaining to be spent for a specified fiscal quarter.
Control Point Requestor	The lowest level Control Point user, who can only enter temporary requests (2237s, 1358s) to a Control Point. This user can only view or edit their own requests. A Control Point Clerk or Official must make these requests permanent before they can be approved and transmitted to A&MM.

C	
Term	Definition / Discussion
Cost Center	Cost Centers are unique numbers which define a service. One cost center must be attached to every Fund Control Point. This enables costs to be captured by service. Cost centers are listed in VA Handbook 4671.1.

D	
Term	Definition / Discussion
Date Committed	The date that you want IFCAP to commit funds to the purchase.
Default	A suggested response that is provided by the system.
Deficiency	When a budget has obligated and expended more than it was funded.
Delinquent Delivery Listing	A listing of all the Purchase Orders that have not had all the items received by the Warehouse on IFCAP. It is used to contact the vendor for updated delivery information.
Delivery Order	An order for an item that the VA purchases through an established contract with a vendor who supplies the items.
Direct Delivery Patient	A patient who has been designated to have goods delivered directly to him/her from the vendor.
Discount Item	This is a trade discount on a Purchase Order. The discount can apply to a line item or a quantity. This discount can be a percentage or a set dollar value.

E	
Term	Definition / Discussion
eCMS	The VA's electronic Contract Management System hosted at the Austin Information Technology Center in Austin, Texas.
EDI	<i>See</i> Electronic Data Interchange (EDI).
EDI Vendor	A vendor with whom the VA has negotiated an arrangement to submit, accept and fill orders electronically.
EDI X12	“X12” is the U.S. standard ANSI ASC X12, which is the predominant standard used in North America. Thus, “EDI X12” refers to electronic data interchanges which meet the X12 standard. Also seen as “X12 EDI.”
Electronic Data Interchange (EDI)	Electronic Data Interchange is a method of electronically exchanging business documents according to established rules and formats.

E	
Term	Definition / Discussion
Electronic Signature	The electronic signature code replaces the written signature on all IFCAP documents used within your facility. Documents going off-station will require a written signature as well.
Expenditure Request	A Control Point document that authorizes the expenditure of funds for supplies and/or services (e.g., 2237, 1358, etc.).

F	
Term	Definition / Discussion
FCP	Fund Control Point (see Control Point).
Federal Tax ID	A unique number that identifies your station to the Internal Revenue Service.
FileMan	The FileMan modules are the “building blocks” for all of VistA. FileMan includes both a database management system (DBMS) and user interface. <i>Source:</i> http://www.hardhats.org/fileman/FMmain.html
Fiscal Balance	The amount of money on a 1358 and any adjustments to that 1358 that have been obligated by Fiscal Service. This amount is reduced by any liquidations submitted against the obligation.
Fiscal Quarter	The fiscal year is broken into four three month quarters. The first fiscal quarter begins on October 1.
Fiscal Year	Twelve month period from October 1 to September 30.
FMS	Financial Management System, the primary accounting system for administrative appropriations. FMS has a comprehensive database that provides for flexible on-line and/or batch processing, ad-hoc reporting, interactive query capability and extensive security. FMS is concerned with budget execution, general ledger, funds control, accounts receivable, accounts payable and cost accounting.
FOB	Freight on Board. An FOB of “Destination” means that the vendor has included shipping costs in the invoice, and no shipping charges are due when the shipper arrives at the warehouse with the item. An FOB of “Origin” means the Vendor has paid shipping costs directly to the shipper and then will include them on their Invoice.
FPDS	Federal Procurement Data System.

F	
Term	Definition / Discussion
FTEE	Full Time Employee Equivalent. An FTEE of 1 stands for 1 fiscal year of full-time employment. This number is used to measure workforces. A part-time employee that worked half days for a year would be assigned an FTEE of 0.5, as would a full-time employee that worked for half of a year.
Fund Control Point	IFCAP accounting element that is not used by FMS. See also control point.
Funds Control	A group of Control Point options that allow the Control Point Clerk and/or Official to maintain and reconcile their funds.
Funds Distribution	A group of Fiscal options that allows the Budget Analyst to distribute funds to Control Points and track Budget Distribution Reports information.

G	
Term	Definition / Discussion
GBL	Government Bill of Lading. A document that authorizes the payment of shipping charges in excess of \$250.00.
GL	General Ledger.
Globals	<p>Globals are variables which are automatically and transparently stored on disk and persist beyond program, routine, or process completion. Globals are used exactly like ordinary variables, but with the caret character prefixed to the variable name.</p> <p>Globals are stored in highly structured data files by MUMPS, and accessed only as MUMPS globals. VistA file definitions and data are both stored in globals.</p>

I	
Term	Definition / Discussion
Identification Number	A computer-generated number assigned to a code sheet.
IFCAP	The VA's Integrated Funds Distribution Control Point Activity, Accounting and Procurement system.
Imprest Funds	Monies used for cash or 3 rd party draft purchases at a VA facility.
Integrated Supply Management System (ISMS)	ISMS is the system which replaced LOG I for Expendable Inventory.

I	
Term	Definition / Discussion
ISMS	See Integrated Supply Management System.
Item File	A listing of items specified by A&MM service as being purchased repetitively. This file maintains a full description of the item, related stock numbers, vendors, contract numbers and a procurement history.
Item History	Procurement information stored in the Item File. A history is kept by Fund Control Point and is available to the Control Point at time of request.
Item Master Number	A computer generated number used to identify an item in the Item File.

J	
Term	Definition / Discussion
Justification	A written explanation of why the Control Point requires the items requested. Adequate justification must be given if the goods are being requested from other than a mandatory source.

K	
Term	Definition / Discussion
Kernel	<p>The Kernel is the software “scaffolding” that supports all VistA applications. The Kernel system permits any VistA software application to run without modification to its base structure no matter what hardware or software vendor the application was built on.</p> <p>The Kernel includes a number of management tools including device, menu, programming, operations, security/auditing, task, user, and system management. Its framework provides a structurally sound computing environment that permits controlled user access, menus for choosing various computing activities, the ability to schedule tasks, application development tools, and numerous other management and operation tools.</p> <p><i>Source:</i> http://hardhats.org/kernel/KRNmain.html</p>

L	
Term	Definition / Discussion
Liquidation	The amount of money posted to the 1358 or Purchase Order as a payment to the vendor. They are processed through payment/invoice tracking.

L	
Term	Definition / Discussion

LOG I	LOG I is the name of the Logistics A&MM computer located at the Austin Automation Center. This system continues to support the Consolidated Memorandum of Receipt.
-------	--

M	
Term	Definition / Discussion

M	The Massachusetts General Hospital Utility Multi-Programming System, or alternatively M, is a programming language originally created for use in the healthcare industry. M is designed to make writing database-driven applications easy while simultaneously making efficient use of computing resources. The most outstanding, and unusual, design feature of M is that database interaction is transparently built into the language. Many parts of VistA are written in M.
---	---

MailMan	<p>Mailman is an integrated data channel in VistA for the distribution of:</p> <ul style="list-style-type: none"> • Patches (Kernel Installation and Distribution System or KIDS builds) • Software releases (<i>KIDS</i> builds) • Computer-to-computer communications (HL7 transfers, Servers, etc.) • Person-to-person messaging (email)
---------	---

Source: <http://www.hardhats.org/cs/mailman/MMmain.html>

Mandatory Source	A Federal Agency that sells supplies and services to the VA, Defense Logistics Agency (DLA), General Services Administration (GSA), etc.
------------------	--

MSC Confirmation Message	A MailMan message generated by the Austin Message Switching Center that assigns an FMS number to an IFCAP transmission of documents.
--------------------------	--

MUMPS	<i>See M.</i>
-------	---------------

O	
Term	Definition / Discussion

Obligation	The commitment of funds. The process Fiscal uses to set aside monies to cover the cost of an Order.
------------	---

O	
Term	Definition / Discussion
Obligation (Actual) Amount	The actual dollar figure obligated by Fiscal Service for a Purchase Order. The Control Point's records are updated with actual cost automatically when Fiscal obligates the document on IFCAP.
Obligation Number	The 6 character number assigned to orders, requisitions and 1358s. (i.e. C prefix number that Fiscal Service assigns to the 1358.)
Option	A Vista Option is an application component defined in VA Kernel to control user and remote server access to VistA applications. Options can appear on menu "trees" of options, through which the user navigates to execute application software. Types of options include menu (to allow grouping of options); edit (to edit application files via VA FileMan); inquire (to query the database via VA FileMan); print (to execute reports via VA FileMan); run routine (to execute custom application software); server (to process remote procedure calls via MailMan); and Broker (to process GUI remote procedure calls via Kernel Broker).
Organization Code	Accounting element functionally comparable to Cost Center, but used to organize purchases by the budget that funded them, not the purposes for spending the funds.
Outstanding 2237	A&MM report that lists all the IFCAP generated 2237s pending action in A&MM.

P	
Term	Definition / Discussion
Partial	A Receiving Report (VA document that shows receipt of goods) for only some of the items ordered on a Purchase Order.
Partial Date	The date that a warehouse clerk created a receiving report for a shipment.
PAT Number	Pending Accounting Transaction number – the primary FMS reference number. See also Obligation Number.
Personal Property Management	A section of A&MM Service responsible for screening all requests for those items available from a Mandatory Source, VA Excess or Bulk sale. They also process requisitions for goods from Federal Agencies and equipment requests. In addition, they maintain the inventory of Warehouse stocked items and all equipment (CMRs) at the facilities they support.

P	
Term	Definition / Discussion
POA	Purchase Order Acknowledgment. The message received electronically from an EDI vendor acknowledging the placement of an order.
PPM	Personal Property Management, now referred to at most sites as Acquisition and Materiel Management Service.
Program Code	Accounting element that identifies the VA initiative or program that the purchase will support.
Prompt Payment Terms	The discount given to the VA for paying the vendor within a set number of days (e.g., 2% 20 days means the VA will save 2% of the total cost of the order if the vendor is paid within 20 days of receipt of goods).
Purchase Card	A card, similar to a credit card, that Purchase Card Users use to make purchases. Purchase Cards are not credit cards but debit cards that spend money out of a deposited balance of VA funds.
Purchase Card Coordinator	A person authorized by a VA station to monitor and resolve delinquent purchase card orders, help VA services record, edit and approve purchase card orders in a timely manner, assign purchase cards to IFCAP users, and monitor the purchase card expenses of VAMC services.
Purchase Card Orders	Orders funded by a purchase card.
Purchase Card User	A person who uses a purchase card. Purchase Card Users are responsible for recording their purchase card orders in IFCAP.
Purchase History Add (PHA)	Information about purchase orders which is automatically sent to Austin for archiving. This same transaction is also used to send a PO for EDI processing.
Purchase History Modify (PHM)	Information about amendments which is automatically sent to Austin for archiving.
Purchase Order	A government document authorizing the purchase of the goods or services at the terms indicated.
Purchase Order Acknowledgment	Information returned by the vendor describing the status of items ordered (e.g., 10 CRTs shipped, 5 CRTs backordered).
Purchase Order Status	The status of completion of a purchase order (e.g., Pending Contracting Officer's Signature, Pending Fiscal Action, Partial Order Received, etc.).
Purchasing Agents	A&MM employees legally empowered to create purchase orders to obtain goods and services from commercial vendors.

Q	
Term	Definition / Discussion
Quarterly Report	A Control Point listing of all transactions (Ceilings, Obligations, Adjustments) made against a Control Point's Funds.
Quotation for Bid	Standard Form 18. Used by Purchasing Agents to obtain written bids from vendors. May be created automatically and transmitted electronically within the Purchasing Agent's module.

R	
Term	Definition / Discussion
Receiving Report	The VA document used to indicate the quantity and dollar value of the goods being received.
Reconciliation	Comparing of two records to validate IFCAP Purchase Card orders. Purchase Card Users compare IFCAP generated purchase card order data with the CC transaction sent from the CCS system in Austin.
Reference Number	Also known as the Transaction Number. The computer generated number that identifies a request. It is comprised of the: Station Number-Fiscal Year-Quarter - Control Point – 4-digit Sequence Number.
Repetitive (PR Card) Number	See Item Master Number.
Repetitive Item List (RIL)	A method the Control Point uses to order items in the Item File. The Control Point enters the Item Master Number, the quantity and vendor and IFCAP can sort and generate 2237 requests from the list. A RIL can be created by using the Auto-Generate feature within the Inventory portion of the package.
Requestor	See Control Point Requestor.
Requisition	An order from a Government vendor.
Running Balance	A running record of all the transactions generated and approved for a Control Point. Provides information that shows the total amount of funds committed, obligated, and remaining to be spent for a specified fiscal quarter.

S	
Term	Definition / Discussion
Section Request	A temporary request for goods and/or services entered by a Control Point Requestor. These requests may or may not be made permanent by the Control Point Clerk/Official.

S	
Term	Definition / Discussion
Service Balance	The amount of money on the on the original 1358 and any adjustments to that 1358 when created by that service in their Fund Control Point. This amount is reduced by any authorizations created by the service.
SF-18	Request for Quotation.
SF-30	Amendment of Solicitation/Modification of Contract.
Short Description	A phrase which describes the item in the Item Master file. It is restricted to 3 to 60 characters and consists of what the item is, the kind of item, and the size of item (e.g., GLOVE-SURGICAL MEDIUM).
Site Parameters	Information (such as Station Number, Cashier's address, printer location, etc.) that is unique to your station. All of IFCAP uses a single Site Parameter file.
Sort Group	An identifier a Control Point can assign to a project or group of like requests. It is used to generate a report that will tell the cost of requests.
Sort Order	The order in which the budget categories will appear on the budget distribution reports.
Special Remarks	A field on the Control Point Request that allows the CP Clerk to enter information of use to the Purchasing Agent or vendor. This field can be printed on the Purchase Order.
Stacked Documents	The purchase orders, receiving reports, and 1358s which are sent electronically to Fiscal and stored in a file for printing at a later time rather than being printed immediately.
Status of Funds	Fiscal's on-line status report of the monies available to a Control Point. FMS updates this information automatically.
Sub-control Point	A user defined assignment of all or part of a ceiling transaction to a specific category (sub-control point) within a Control Point, Transactions can then be posted against this sub-control point and a report can be generated to track use of specified funding within the overall control point..
Sub-cost Center	A subcategory of Cost Center. IFCAP will not utilize a 'sub-cost center' field, but will send FMS the last two digits of the cost center as the FMS 'sub-cost center' field.

T	
Term	Definition / Discussion
Tasked Job	A job, usually a printout, that has been scheduled to run at a predetermined time. Tasked jobs are set up to run without having a person watching over them.
TDA	See “Transfer of Disbursing Authority.”
Total Authorizations	The total amount of the authorizations created for the 1358 obligation.
Total Liquidations	The total amount of the liquidations against the 1358 obligation.
Transaction Number	The number of the transaction that funded a Control Point (See Budget Analyst User’s Guide). It consists of the Station Number – Fiscal Year – Quarter – Control Point – Sequence Number.
Transfer of Disbursing Authority	The method used to allocate funds to a VA facility.
Transmission Number	A sequential number given to a data string when it is transmitted to the Austin DPC; used for tracking message traffic.
Type Code	A set of A&MM codes that provides information concerning the vendor size and type of competition sought on a purchase order.

U	
Term	Definition / Discussion
Unit of Issue	A description of the quantity/packaging combination in which the item is issued to the end user; it may be different from the Unit of Purchase, which is the combination used when the item is procured from the vendor. For example, a vendor may sell an item in cases of 24 cans, but the end user receives individual cans from that case.
Unit of Purchase	A description of the quantity/packaging combination in which VA purchases the item from the vendor; it may be different from the Unit of Issue, which is the combination used to actually issue the item to the end user. See also Unit Conversion Factor.
Unit Conversion Factor	A number which expresses the ratio between the unit of measure and the unit of issue. Among other things, the conversion factor (which is part of the vendor data) is used at order release to calculate the due-ins and due-outs. Supply stations receive the conversion factor at the time of order release and use it to translate the order quantities into supply station amounts. If an item is procured, stocked and issued using the same units, then the conversion factor would be 1.

V	
Term	Definition / Discussion
Vendor file	An IFCAP file of vendor information solicited by the facility. This file contains ordering and billing addresses, contract information, FPDS information and telephone numbers. The debtor's address may be drawn from this file, but is maintained separately. If the desired vendor is not in the file, contact A&MM Service to have it added.
Vendor ID Number	The ID number assigned to a vendor by the FMS Vendor unit.
VRQ	FMS Vendor Request document. When a new vendor is added to IFCAP a VRQ message is sent electronically to the Austin FMS Vendor unit to determine if the vendor exists in the central vendor system. If the vendor is not in the system, Austin will confirm information and establish the vendor in the central file. If vendor exists in central file already, Austin will verify the data. <i>See also VUP.</i>
VUP	Vendor Update Message. This message is sent electronically from the FMS system to ALL IFCAP sites to ensure that the local vendor file contains the same data as the central vendor file in Austin. This message will contain the FMS Vendor ID for the vendor and also the Alternate Address Indicator if applicable. <i>See also VRQ.</i>
