Table of Contents

Introduction

This package includes one new global, IBT, that may need to be placed and translated prior to starting the install process. The IBT global is used for the Claims Tracking module, and its growth is dependent upon which options within Claims Tracking are activated. Our initial estimate is that 5 megabytes will be required per year, if Claims Tracking is fully activated. Please see the Technical Manual for additional resource requirements for the Claims Tracking module.

Three jobs will be queued at the conclusion of the installation. These jobs will be queued to run 15 minutes after the installation is completed. When each of these queued jobs is completed, a MailMan message will be sent to the user who started the installation. **Note:** Users may be allowed back into the system while these jobs are running.

The three queued jobs are as follows.

- All current inpatients with insurance are loaded into the Claims Tracking module.

- Insurance policy information from the PATIENT file (#2) is moved into the new GROUP INSURANCE PLAN file (#355.3).

  Note: This conversion will populate the "1" and "2" nodes of the INSURANCE TYPE subfile (#.3121) of the PATIENT file (#2) (the nodes ^DPT(DFN,.312,ien,1) and ^DPT(DFN,.312,ien,2)). If you have any local modifications which store data on these nodes, you must first delete this data before installing Integrated Billing v2.0. Existence of any data on the "1" or "2" nodes will cause this conversion to fail.

- Diagnoses for all entries in the BILL/CLAIMS file (#399) are moved into the new IB BILL/CLAIMS DIAGNOSIS file (#362.3).

You will be required to answer one question in the pre-init before committing to the installation of Integrated Billing v2.0. You will be asked if you would like to turn on automatic billing for inpatient billing. The purpose for deciding to run the inpatient biller at the time of installation is to properly set up the Third Party Auto Biller to run for the current inpatients who are loaded into the Claims Tracking module in the job that is queued from the post-init.

If automatic billing for inpatients is selected, the following parameters will be established during the post-init.

Auto Biller Frequency: 7 days
The Auto Biller will not run until 7 days after the installation.

Automate Billing: Yes
The Earliest Auto Bill Date will be set during the conversion for current inpatients who are loaded into the Claims Tracking module.

Billing Cycle: This will be left blank.
The billing cycle will be one month.

Days Delay: 2 days
This is the number of days after the billing cycle is completed that the bill will be created.

Please note that there is a 15-minute window (from the time the init is completed to the time that the Claims Tracking job begins) to change these parameters. Also, these parameters may be altered at any time using the option IB AUTO BILLER PARAMS.

Package Integration

This package contains two inits.

- The init IBINIT was created with Kernel v7.1 and VA FileMan v20.0. It contains all the necessary options, protocols, functions, mail groups, templates, files, fields, and data needed to install and run Integrated Billing v2.0.

- The init IBDEINIT contains sample encounter forms which you may install at your facility. This init must be installed using the Encounter Form Import/ Export Utility. Instructions for installing this init may be found in the Encounter Form Utilities Module of the User Manual, Import/Export Utility option.

IB requires the following packages be installed.

Accounts Receivable v3.7
IFCAP v4.0
OERR v1.96
Outpatient Pharmacy v5.6

Kernel v7.1 and VA FileMan v20.0
This package was created with Kernel v7.1 and VA FileMan v20.0. The IBNTEG routine was created using Kernel Tool Kit v7.2 XTSUMBLD utility.

PIMS v5.3
The Scheduling patch SD*5.3*13 also has to be installed. The Registration informational patch DG*5.3*26 describes all changes to PIMS which are needed to run Integrated Billing v2.0. The IBINIT post-init conditionally installs the PIMS routines which are part of this patch.

Pre-Installation Checklist

1. Have you loaded this package into your test account?

2. This package checks to be sure that PIMS v5.3 and Accounts Receivable v3.7 is installed. Please be sure that you have these packages installed.

3. Have you installed patch SD*5.3*13?

4. Did you place the new global IBT?

5. Are protections and translation set up correctly for this new global?

6. Do you have any tasked jobs or other systems processes that need to be s hut down or rescheduled?

7. Have you scheduled down-time with the users? You should schedule approximately 2-4 hours of down time to install this package. Note that you may bring users back on-line after the installation has completed and the queued jobs are running.

8. Have you scheduled an unattended backup prior to beginning the installation?

9. Did you review global journalling and your routine map sets prior to starting the installation?

10. Have you read the complete installation instruc tions?

11. Have you coordinated the installation with the respective services in your facility? These services may include MAS, MCCR, Fiscal, Utilization Review, Fee Basis, and Quality Management.

12. Have you reviewed which users are going to get the new Claims Tracking, Encounter Form Utilities, and Insurance Data Capture menus and options, including any local menus?

13. Have you made sure that you have no data stored on the "1" or "2" nodes of the INSURANCE TYPE (#.3121) subfile of the PATIENT (#2) file (the nodes ^DPT(DFN,.312,ien,1) and ^DPT(DFN,.312,ien,2))?

Installation Instructions

Step   Description

1.   Get users off system(s).

2.   Backup system(s).

3.   Disable Routine Mapping (DSM) on all systems.

4.   Disable journalling. The globals IB, IBE, IBA, IBT, DPT, and DGCR will be very active during the installation and subsequent conversions.

5.   Sign into the UCI where the package is to be loaded.

        Note: It is suggested that MSM sites run the install on the Print Server. (Use 16K partition for DSM. Use 40K partition for MSM.)

6.   You should install patch SD*5.3*13 if you have not already done so.

7.   The tape contains routines in the DGCR and IB namespaces. Mount the tape and load the routines. See the Routine List section for a list of the distributed routines.

8.   Verify that DUZ, DT, DTIME, and U are defined and that DUZ(0)="@". The DUZ variable must be defined as an active user and the DUZ(0) variable must equal "@" in order to initialize.

9.   This package will create the new global IBT. This global should grow steadily, depending upon which options within the Claims Tracking module have been activated. When the conversions routines are run, there will be considerable growth of the global IBA.

10.   D ^IBINIT to begin the installation. Follow the sample installation in this guide.

        The pre-initialization routine will check the current environment. You must also indicate whether you wish to have the post-init routine set the inpatient Auto Biller parameters.

        When the package files are displayed, answer "NO" to all "add data" questions, as shown in the sample installation. Answer "YES" to the "Shall I write over File Security Code?" question, as shown in the sample installation.

Step   Description

11.   The initialization routine will accomplish the following.

   A.   Delete the IB ERROR file (#350.8), which will be recreated during the init.

   B.   Delete various obsolete input templates, print templates, cross-references, list templates, and protocols.

12.   The post-initialization routine will accomplish the following.

   A.   Populate the new IB ACTION STATUS file (#350.21).

   B.   Update the print routine for the HCFA 1500 entry in the BILL FORM TYPE file (#353) and add a new entry to this file.

   C.   Update the inpatient Auto Biller parameters, if specified in the pre-initialization process.

   D.   Flag all new telephone stop codes which were added with the Scheduling patch SD*5.3*13.

   E.   Review all charges "on hold" in the INTEGRATED BILLING ACTIO N file (#350) and change the status of the charge if the charge has been cancelled.

   F.   Install all required protocols and list templates.

   G.   Add an entry in the PACKAGE file (#9.4) for the Encounter Form Import/Export Utility (namespace IBDE).

   H.   Add new entries to the following files.

   MCCR UTILITY (#399.1)
   REVENUE CODE (#399.2)
   RATE TYPE (#399.3)
   IB CHARGE REMOVE REASONS (#350.3)

   I.   Remove the option IB UB-82 TEST PATTERN PRINT from the menu IB OUTPUT PATIENT REPORT MENU.

   J.   Remove the option IB NEW FEATURES 1.5 from all menus.

Step Description

    K.   Install the following PIMS and Fee Basis routines in your system. Make sure these routines are moved to all systems, if necessary.

DG3PR0	DG3PR1
DG3PR2	DGBLRV
DGPMVBUR	DGPTF
DGPTTS	DGPTTS1
DGPTTS3	DGRPDB
DGPTUTL	FBUINS

    L.   Queue three conversion jobs to run, starting 15 minutes from the present time.

13.   Recompile all templates and cross-references. Type D ALL^IBEFUTL1 to recompile all input, print, and cross-reference routines on all CPUs. The following is a list of the templates that should be compiled.

Note: If you move compiled routines, you may move IBX* for all Integrated Billing compiled routines.

>>> Remember to recompile the following templates on all CPUs.

TEMPLATE	ROUTINE	TYPE	ROUTINE
IB CURRENT STATUS	IBXEXS	INPUT	DIEZ
IB EDIT MCCR PARM	IBXPAR	INPUT	DIEZ
IB INACTIVATE EXEMPTION	IBXEXI	INPUT	DIEZ
IB NEW EXEMPTION	IBXEX	INPUT	DIEZ
IB SCREEN1	IBXSC1	INPUT	DIEZ
IB SCREEN2	IBXSC2	INPUT	DIEZ
IB SCREEN3	IBXSC3	INPUT	DIEZ
IB SCREEN4	IBXSC4	INPUT	DIEZ
IB SCREEN5	IBXSC5	INPUT	DIEZ
IB SCREEN6	IBXSC6	INPUT	DIEZ
IB SCREEN7	IBXSC7	INPUT	DIEZ
IB SCREEN8	IBXSC8	INPUT	DIEZ
IB SCREEN82	IBXSC82	INPUT	DIEZ
IB SCREEN8H	IBXSC8H	INPUT	DIEZ
IB STATUS	IBXST	INPUT	DIEZ
IBDF EDIT DATA FIELD	IBXF15	INPUT	DIEZ
IB BILLING CLOCK HEADER	IBXBCR2	PRINT	DIPZ
IB BILLING CLOCK INQ	IBXBCR	PRINT	DIPZ
IB CPT CP DISPLAY	IBXCPTC	PRINT	DIPZ
IB CPT PG DISPLAY	IBXCPTG	PRINT	DIPZ
IB CPT RG DISPLAY	IBXCPTR	PRINT	DIPZ
IB DIVISION DISPLAY	IBXDIVD	PRINT	DIPZ

Step Description

>>> Remember to recompile the following cross references for the following files on all CPUs.

FILE	ROUTINE	TYPE	ROUTINE
INTEGRATED BILLING ACTION (#350)	IBXA	X-REF	DIKZ
ENCOUNTER FORM (#357)	IBXF0	X-REF	DIKZ
ENCOUNTER FORM BLOCK (#357.1)	IBXF1	X-REF	DIKZ
SELECTION LIST (#357.2)	IBXF2	X-REF	DIKZ
SELECTION (#357.3)	IBXF3	X-REF	DIKZ
SELECTION GROUP (#357.4)	IBXF4	X-REF	DIKZ
DATA FIELD (#357.5)	IBXF5	X-REF	DIKZ
BILL/CLAIMS (#399)	IBXX	X-REF	DIKZ

14. Move routines to all systems. It is recommended that the globals DGCR, IB, IBA, IBE, and IBT be journalled.

15. Rebuild routine map sets.

It is strongly recommended that the following routines be added to the routine map set on the volume set that they will be primarily running on.

IBA*   IBC*   IBEF*   IBR*   IBT*   IBX*

16. You may wish to bring users on-line at this point.

17. You may now delete obsolete routines from your system.

The IB routines IBACKIN, IBEP, IBEHCFA, IBEHCF1, IBOHCTP, IBOHCP, IB15*, and IBY* are obsolete and may be deleted from your system.

The only active DGCR routines with Integrated Billing v2.0 are DGCRNS, DGCRAMS, and DGCRP3. All other DGCR routines are obsolete and may be deleted from your system.

18. You may now use the Encounter Form Import/Export Utility to import the sample encounter forms exported with this package. It is not necessary to perform this step at this point, but it must be performed before you begin active design and development of forms for your facility. Instructions for importing the forms may be found in the Encounter Form Utilities Module of the User Manual, Import/Export Utility option. Once you have imported these sample forms, you may delete the IBDEI* routines from your system. This will delete the initialization routines for the Encounter Form Import/Export Utility package (namespace IBDE).

Step Description

19.   You will be notified by a MailMan message when each of the queued
        conversion jobs have completed. Once the final conversion has completed,
        you may delete the IBI*, IBONI*, and IB20* routines from your system. This
        will delete the initialization, pre-init, and post-init routines from your
        system.

20.   Run the Build Primary Menu Trees option on the Menu Management menu
        on all systems. Though this step is optional, it may greatly improve
        performance during the first few days of operation.

21.   Review the entry in the IB SITE PARAMETERS file (#350.9) and ensure that
        all parameters are set correctly.

22.   Ensure that the option IB MT NIGHT COMP is tasked to run early each
        morning (after the G&L has been completed, but before normal working
        hours). This job now includes updates performed by the Claims Tracking
        and Automated Biller modules. Be sure that this option is not tasked twice
        to run on your system! This will have adverse effects on the Means Test
        Billing module.

Routine List

Sample Installation

```
>D ^IBINIT

This version (#2.0) of 'IBINIT' was created on 21-MAR-1994
        (at ALBANY ISC VAX DEVELOPMENT, by VA FileMan V.20.0)

I HAVE TO RUN AN ENVIRONMENT CHECK ROUTINE.

Initialization Started: MAR 21, 1994@12:38:03

The auto biller parameters can be set automatically during the post-init
by answering the following question affirmatively.  If the auto biller
parameters are set-up by the post-init then the Earliest Auto Bill
Date of the current inpatient admissions will be set as they are
loaded into the Claims Tracking module by one of the queued conversion
routines.  The result will be that the auto biller will be able to
process these inpatient admissions and possibly create bills for them
when it runs.  If these parameters are not set and the auto biller
will be running at your site for inpatient admissions then the
Earliest Auto Bill Date of each current inpatient admission will
have to be set manually after the conversion is done.

The parameters will be set up with the following values:

    Auto Biller Frequency: 7 days - the auto biller will not run
                                    until 7 days after this install
    Automate Billing:      1 Yes  - the Earliest Auto bill date will
                                    be set during the conversion
    Billing Cycle:         left blank, billing cycle will be one month
    Days Delay:            2 days - number of days after the billing
                                    cycle is completed that the bill
                                    will be created

If these settings for the parameters are not what your site requires
then you may change them after the installation is complete but
before the conversions begin to run - there is a 15 minute window.
These parameters can also be changed at any time after the
installation and conversion are complete (option IB AUTO BILLER PARAMS).

Enter Yes or No: YES
I AM GOING TO SET UP THE FOLLOWING FILES:

   2         PATIENT  (Partial Definition)
Note:  You already have the 'PATIENT' File.

   36        INSURANCE COMPANY
Note:  You already have the 'INSURANCE COMPANY' File.

   350       INTEGRATED BILLING ACTION
Note:  You already have the 'INTEGRATED BILLING ACTION' File.

   350.1     IB ACTION TYPE  (including data)
Note:  You already have the 'IB ACTION TYPE' File.
Want my data merged with yours? NO
```

```
    350.2     IB ACTION CHARGE  (including data)
Note:  You already have the 'IB ACTION CHARGE' File.
Want my data merged with yours? NO

    350.21    IB ACTION STATUS

    350.3     IB CHARGE REMOVE REASONS  (including data)
Note:  You already have the 'IB CHARGE REMOVE REASONS' File.
Want my data merged with yours? NO

    350.4     BILLABLE AMBULATORY SURGICAL CODE
Note:  You already have the 'BILLABLE AMBULATORY SURGICAL CODE' File.

    350.41    UPDATE BILLABLE AMBULATORY SURGICAL CODE
Note:  You already have the 'UPDATE BILLABLE AMBULATORY SURGICAL CODE' File.

    350.5     BASC LOCALITY MODIFIER
Note:  You already have the 'BASC LOCALITY MODIFIER' File.

    350.6     IB ARCHIVE/PURGE LOG
Note:  You already have the 'IB ARCHIVE/PURGE LOG' File.

    350.7     AMBULATORY CHECK-OFF SHEET
Note:  You already have the 'AMBULATORY CHECK-OFF SHEET' File.

    350.71    AMBULATORY SURG. CHECK-OFF SHEET PRINT FIELDS
Note:  You already have the 'AMBULATORY SURG. CHECK-OFF SHEET PRINT FIELDS'
File.

    350.8     IB ERROR  (including data)
Note:  You already have the 'IB ERROR' File.
I will OVERWRITE your data with mine.

    350.9     IB SITE PARAMETERS
Note:  You already have the 'IB SITE PARAMETERS' File.

    351       CATEGORY C BILLING CLOCK
Note:  You already have the 'CATEGORY C BILLING CLOCK' File.

    351.1     IB CONTINUOUS PATIENT
Note:  You already have the 'IB CONTINUOUS PATIENT' File.

    351.2     SPECIAL INPATIENT BILLING CASES

    352.1     BILLABLE APPOINTMENT TYPE  (including data)
Note:  You already have the 'BILLABLE APPOINTMENT TYPE' File.
Want my data merged with yours? NO

    352.2     NON-BILLABLE DISPOSITIONS

    352.3     NON-BILLABLE CLINIC STOP CODES

    352.4     NON-BILLABLE CLINICS

    353       BILL FORM TYPE  (including data)
Note:  You already have the 'BILL FORM TYPE' File.
Want my data merged with yours? NO
```

353.1   PLACE OF SERVICE   (including data)
Note: You already have the 'PLACE OF SERVICE' File.
Want my data to overwrite yours? NO

353.2   TYPE OF SERVICE   (including data)
Note: You already have the 'TYPE OF SERVICE' File.
Want my data to overwrite yours? NO

354   BILLING PATIENT
Note: You already have the 'BILLING PATIENT' File.

354.1   BILLING EXEMPTIONS
Note: You already have the 'BILLING EXEMPTIONS' File.

354.2   EXEMPTION REASON   (including data)
Note: You already have the 'EXEMPTION REASON' File.
Want my data merged with yours? NO

354.3   BILLING THRESHOLDS   (including data)
Note: You already have the 'BILLING THRESHOLDS' File.
Want my data merged with yours? NO

354.4   BILLING ALERTS
Note: You already have the 'BILLING ALERTS' File.

354.5   BILLING ALERT DEFINITION   (including data)
Note: You already have the 'BILLING ALERT DEFINITION' File.
Want my data merged with yours? NO

354.6   IB FORM LETTER   (including data)
Note: You already have the 'IB FORM LETTER' File.
Want my data merged with yours? NO

355.1   TYPE OF PLAN   (including data)
I will OVERWRITE your data with mine.

355.2   TYPE OF INSURANCE COVERAGE   (including data)
I will OVERWRITE your data with mine.

355.3   GROUP INSURANCE PLAN

355.4   ANNUAL BENEFITS

355.5   INSURANCE CLAIMS YEAR TO DATE

355.6   INSURANCE RIDERS   (including data)
I will MERGE your data with mine.

355.7   PERSONAL POLICY

356   CLAIMS TRACKING

356.1   HOSPITAL REVIEW

356.11   CLAIMS TRACKING REVIEW TYPE   (including data)
I will MERGE your data with mine.

356.2   INSURANCE REVIEW

   356.21   CLAIMS TRACKING DENIAL REASONS (including data)
I will MERGE your data with mine.

   356.3   CLAIMS TRACKING SI/IS CATEGORIES (including data)
I will MERGE your data with mine.

   356.399   CLAIMS TRACKING/BILL

   356.4   CLAIMS TRACKING NON-ACUTE CLASSIFICATIONS (including data)
I will MERGE your data with mine.

   356.5   CLAIMS TRACKING ALOS (including data)
I will MERGE your data with mine.

   356.6   CLAIMS TRACKING TYPE (including data)
I will MERGE your data with mine.

   356.7   CLAIMS TRACKING ACTION (including data)
I will MERGE your data with mine.

   356.8   CLAIMS TRACKING NON-BILLABLE REASONS (including data)
I will MERGE your data with mine.

   356.9   INPATIENT DIAGNOSIS

   356.91   INPATIENT PROCEDURE

   356.93   INPATIENT INTERIM DRG

****************************************************************************

The installation of Integrated Billing Version 2.0 has completed.

Please remember to re-compile all templates, by typing D ALL^IBEFUTL1
in programmer mode, on all of your systems.

Please be sure that the Means Test nightly billing compilation (option
IB MT NIGHT COMP) is scheduled to run.  If it is not, it should be
scheduled to run early each morning (after the G&L Recalculation).
Be sure that it is not scheduled twice!!

The Integrated Billing DGCR* routines have been converted to the IB*
namespace.  The following DGCR* routines are still required on your system:

        DGCRNS      DGCRAMS     DGCRP3

These routines were exported with this version.

The following DGCR* routines are now obsolete and may be deleted from
your system:

DGCRA      DGCRA0      DGCRA1      DGCRA2      DGCRA3      DGCRA31     DGCRA32     DGCRAMS1
DGCRAMS2   DGCRB       DGCRB1      DGCRB2      DGCRBB      DGCRBB1     DGCRBB2     DGCRBR
DGCRBULL   DGCRC       DGCRCC      DGCRCC1     DGCRCC2     DGCRCPT     DGCRMENU    DGCRNQ
DGCRNQ1    DGCROBL     DGCROMBL    DGCRONS1    DGCRONS2    DGCRONSC    DGCROPV     DGCROPV1
DGCROPV2   DGCRORT     DGCRORT1    DGCROST     DGCROST1    DGCROTR     DGCROTR1    DGCROTR2
DGCROTR3   DGCROTR4    DGCRP       DGCRP0      DGCRP1      DGCRP2      DGCRP4      DGCRPAR
DGCRPAR1   DGCRSC1     DGCRSC2     DGCRSC3     DGCRSC4     DGCRSC4A    DGCRSC4B    DGCRSC4C

```

```
The following IB* routines are now obsolete and may be deleted from
your system:

IBACKIN    IBEP    IBEHCFA    IBEHCF1    IBOHCTP    IBOHCP

*************************************************************************
>
```

Sample Installation

Resource Requirements

The installation of Integrated Billing v2.0 may require approximately 5-15 megabytes of additional disk capacity. This includes up to 2.5 megabytes in the global DPT, up to 2.5 megabytes in the global DGCR, up to 5 megabytes in the global IBA, and up to 5 megabytes in the new global IBT. 4 megabytes of disk capacity will be needed to load all of the routines exported with this package.

The Encounter Form Utilities require a small amount of additional capacity to edit and store the format of the encounter forms. Please note that the standard partition size has been increased to 40K. You will need to increase your partition size to the new standard in order to run the utilities. The printing of encounter forms will require at least one dedicated printer that most sites have already received. The printing will require additional CPU capacity; however, this job may be scheduled during non-peak workload hours.

The Insurance Data Capture module has been highly used during testing. This module will increase disk utilization in the DPT global by approximately 1K per every 10 insurance policies and in the IBA global by 1K per every three insurance policies.

Based on the experience of our test sites, the Claims Tracking module will use approximately 5K of disk space for every pre-admission entry (one for every insurance case plus 5 per week for UR). In addition, approximately 1K of disk space for every 3 outpatient visits or prescription refills will be used.
