February 2006	Completely updated for CCR Version 1.5	Christine Long	
June 2002	Initial release of CCR Version 1.0	(unknown)	

### THIS PAGE INTENTIONALLY LEFT BLANK

### 1.0 Introduction

The Clinical Case Registries (CCR) software application collects data on the population of veterans with certain clinical conditions, namely Hepatitis C and Human Immunodeficiency Virus (HIV) infections at the local and national level as well as 25 local, generic registries.

Data from the registries is used for both clinical and administrative reporting on both a local and national level. Each facility can produce local reports (information related to patients seen in their system). Reports from the national database are used to monitor clinical and administrative trends, including issues related to patient safety, quality of care, and disease evolution across the national population of patients.

The software uses pre-defined selection rules that identify patients with possible Hepatitis C and/or HIV (such as a disease related *International Statistical Classification of Diseases and Related Health Problems*, ninth edition—commonly abbreviated as "ICD-9" or *International Statistical Classification of Diseases and Related Health Problems*, tenth edition—commonly abbreviated as "ICD-10"— code or a positive result on an antibody test) and adds them to the registry in a pending state. Pending patients are reviewed by the local registry coordinator and if the data confirm the diagnosis, the local registry coordinator confirms the patient in the registry.

Each night a background process transmits a set of predefined data via Health Level 7 (HL7) message to the national CCR database at the Corporate Data Center Operations (CDCO). Data from both the Hepatitis C and HIV registries, and the local registries, are aggregated in the same message. If there is more new data than is allowed by the registry parameter for a single CCR HL7 batch message (the current limit is 5 megabytes), the software will send several messages during a single night. The CCR software creates a limited set of database elements to be stored locally in the Veterans Health Information Systems and Technology Architecture (VistA) system, and focuses on assuring that the local listing is complete and accurate, that the desired data elements are extracted, and that data elements are appropriately transmitted to the national database.

The registries at each facility will store selected HIV and Hepatitis C data from 1985 to the present.

CCR provides these key features:

- Automates the development of a local list of patients with evidence of HIV or Hepatitis C infection.
- Automatically transmits patient data from the local registry lists to a national database.
- Provides robust reporting capabilities.

CCR also provides the following functions:

- Facilitates the tracking of patient outcomes relating to treatment.
- Identifies and tracks important trends in treatment response, adverse events, and time on therapy.
- Monitors quality of care using both process and patient outcome measures.

## 2.0 What's New with ROR\*1.5\*24

Patch ROR\*1.5\*24 includes maintenance and enhancement modifications to version 1.5 of the Clinical Case Registries (CCR) application that correct inherent shortcomings in the existing software and enhance other existing capabilities. ROR\*1.5\*24 contains the following enhancements (E), modifications (M) and fixes (F):

Table 1 - Changes for Patch 24

#	Description	Туре
1	Eight new local registries were added based on ICD9 codes provided by the national Office of Public Health/Population Health.	Е
	Osteoporosis (VA OSTEOPOROSIS), Prostate Cancer (VA PROSTATE CANCER), Lung Cancer (VA LUNG CANCER), Melanoma (VA	
	MELANOMA), Colorectal Cancer (VA COLORECTAL CANCER), Pancreatic Cancer (VA COLORECTAL CANCER), Hepatocellular Carcinoma (VA HCC), ALS (VA ALS)	
2	Removal of the requirement that a Hepatitis C GT lab test must be specified in the site parameters before the Potential DAA Candidates report can be run.	Е
3	Addition of new HIV antibody and antigen codes to the VA HIV registry.	Е
4	Addition of new LOINC codes to the Hepatitis C registry antibody search.	Е
5	A new Hepatitis C report, Sustained Virologic Response, has been added to identify patients who have had a SVR after treatment with HepC antiviral medications.	Е
6	A modification was made to copy CCR application help files to the local workstation when CCR is accessed on a server or network.	F
7	This patch brings the Clinical Case Registries (CCR) application into 508 compliance in many areas.	Е

Table 2 - Global Updates for Patch ROR\*1.5\*24

File Name and Number	Update	
ROR REGISTRY PARAMETERS (#798.1)	New entries "VA OSTEOPOROSIS", "VA PROSTATE CANCER", "VA LUNG CANCER", "VA MELANOMA", "VA COLORECTAL CANCER", "VA PANCREATIC CANCER", "VA HCC", "VA ALS".	
	Modified entry "VA HEPC"	
ROR SELECTION	New entries "VA OSTEOPOROSIS PROBLEM", VA	
RULE(#798.2)	OSTEOPOROSIS PTF", "VA OSTEOPOROSIS VPOV", "VA	
	OSTEOPOROSIS PROBLEM (ICD10)", VA OSTEOPOROSIS	
	PTF (ICD10)", "VA OSTEOPOROSIS VPOV (ICD10)",	
	"VA PROSTATE CANCER PROBLEM", "VA PROSTATE	
	CANCER PTF", "VA PROSTATE CANCER VPOV",	
	"VA PROSTATE CANCER PROBLEM (ICD10)", "VA	

File Name and Number	Update
	PROSTATE CANCER PTF (ICD10)", "VA PROSTATE  CANCER VPOV (ICD10)", "VA LUNG CANCER PROBLEM",  "VA LUNG CANCER PTF", "VA LUNG CANCER VPOV", "VA  LUNG CANCER PROBLEM (ICD10)", "VA LUNG CANCER  PTF (ICD10)", "VA LUNG CANCER VPOV (ICD10)", "VA
	MELANOMA PROBLEM", "VA MELANOMA PTF", "VA MELANOMA VPOV", "VA MELANOMA PROBLEM (ICD10)", "VA MELANOMA PTF (ICD10)", "VA MELANOMA VPOV (ICD10)", "VA COLORECTAL CANCER PROBLEM", "VA
	COLORECTAL CANCER PTF", VA COLORECTAL CANCER VPOV", "VA COLORECTAL CANCER PROBLEM (ICD10)", "VA COLORECTAL CANCER PTF (ICD10)", VA COLORECTAL CANCER VPOV (ICD10)", "VA PANCREATIC CANCER PROBLEM", "VA PANCREATIC CANCER PTF", "VA
	PANCREATIC CANCER VPOV", "VA PANCREATIC CANCER PROBLEM (ICD10)", "VA PANCREATIC CANCER PTF (ICD10)", "VA PANCREATIC CANCER VPOV (ICD10)", "VA HCC PROBLEM", "VA HCC PTF", "VA HCC VPOV",
	"VA HCC PROBLEM (ICD10)", "VA HCC PTF (ICD10)", "VA HCC VPOV (ICD10)", "VA ALS PROBLEM", "VA ALS PTF", "VA ALS VPOV", "VA ALS PROBLEM (ICD10)", "VA ALS PTF (ICD10)", "VA ALS VPOV (ICD10)"
ROR ICD SEARCH (#798.5)	New entries "VA OSTEOPOROSIS", "VA PROSTATE CANCER", "VA LUNG CANCER", "VA MELANOMA", "VA COLORECTAL CANCER", "VA PANCREATIC CANCER", "VA HCC", "VA ALS""
ROR XML ITEM(#799.31) ROR REPORT PARAMETERS (#799.34)	New entry "LAST_TAKEN"  New entry "Sustained Virologic Response"

# 3.0 Obtaining Software and Documentation

The CCR 1.5 software distributives and documentation files are available for downloading from the following Office of Information Field Offices (OIFO) [ANONYMOUS SOFTWARE] directories.

Table 3 - Software and Documentation Sources

OIFO	FTP Address	Directory	
Albany	ftp.fo-albany.med.va.gov	ANONYMOUS.SOFTWARE	
Hines	ftp.fo-hines.med.va.gov	ANONYMOUS.SOFTWARE	
Salt Lake City	ftp.fo-slc.med.va.gov	ANONYMOUS.SOFTWARE	

Table 4 - Files Included in Distribution

File Name	Contents	Retrieval Format
ROR1_5P24GUI.ZIP	Zipped GUI distributive	BINARY
ROR1_5P24DOC1.ZIP	Zipped DOC distributive, which includes both . PDF and . DOC formats:	BINARY
	► User Manual (ROR1_5_24UM)	
ROR1_5P24DOC2.ZIP	► Installation and Implementation Guide (ROR1_5_24IG)	BINARY
	► Technical Manual / Security Guide (ROR1 5 24TM)	
	► Release Notes (ROR1_5_24RN)	

Patch ROR\*1.5\*24 is available in the National Patch Module on FORUM<sup>1</sup> as a PackMan message.

### 4.0 VistA Documentation on the Intranet

Documentation for this product, including all of the software manuals, is available in the VistA Document Library (VDL). The Clinical Case Registries documentation may be found at <a href="http://www.va.gov/vdl/application.asp?appid=126">http://www.va.gov/vdl/application.asp?appid=126</a>.

For additional information about the CCR, access the CCR Home Page at the following address: <a href="http://vistA.med.va.gov/ClinicalSpecialties/CCR/">http://vistA.med.va.gov/ClinicalSpecialties/CCR/</a>.

Training links and information are also available at http://vaww.VistAu.med.va.gov/VistAu/CCR/.

## 5.0 Specific Instructions

(See the CCR Installation and Implementation Guide for installation instructions.)

<sup>&</sup>lt;sup>1</sup> FORUM is the VA's national-scale email system. FORUM uses the VistA mail software and provides an excellent interface for threaded messages that can take the form on ongoing discussions. The national patch module is a VistA application that helps developers to manage the numbering, inventory, and release of patches. Patches are developed in response to request submissions and an error reporting request system known as National Online Information Sharing. A process called the Kernel Installation Distribution System (KIDS) is used to roll up patches into text messages that can be sent to sites along with installation instructions. The patch builds are sent as text messages via email, and the recipient (*e.g.*, a site administrator) can run a PackMan function to unpack the KIDS build and install the selected routines.

See http://citeseerx.ist.psu.edu/viewdoc/download?doi=10.1.1.100.5551&rep=rep1&type=pdf

## 6.0 Matching GUI Version to Patch

WARNING If the **GUI** and **VistA** software versions do not match, users may encounter problems with the application. For example, if the site has installed Patch ROR\*1.5\*24, users' **GUI** installations should also be at Patch level 24. Users can determine the **GUI** version by using the Help | About CCR menu option.

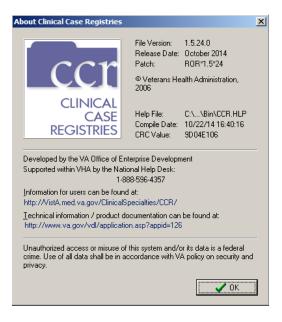

Figure 1 - Help | About Pane

This menu option displays the About Clinical Case Registries screen. It shows basic information about the current file version including the release date, patch number, similar to the screen shown here where the Clinical Case Registries software was developed and the software compile date. Click [OK] or press the < Esc > key to close the pane.

Since CCR 1.5.10, this window meets current VA GUI Standards and Conventions requirements.

Users may download the latest GUI software as outlined in 3.0 above.
