(This page included for two-sided copying.)

Introduction

This ePharmacy Phase 4 Iteration II release includes updates for PSO*7*281, and installation instructions are included in the patch description.

Outpatient Pharmacy V. 7.0

Patch PSO*7*281 includes the following enhancements:

- ➢ ePharmacy Medication Profile (View Only) [PSO PMP] option has been modified to display the Bad Address Indicator, add the PU (Patient Record Update action, move sort actions to the hidden menu, and add the new REJ (View Reject) action to the hidden menu.
- ➢ The default answer of (I)gnore on the Reject Processing Screen has been changed to (Q)uit which automatically sends the claim rejection information to the Pharmacy Reject Worklist
- ➢ The View Prescription [PSO VIEW] option has been modified to give comprehensive help text for the View Prescription prompt.
- ➢ The REJ (View Reject) action was added to the hidden menu for View Prescriptions [PSO VIEW] option and the ePharmacy Medication Profile (View Only) [PSO PMP] option.
- ➢ The ECME LOG was recording the routing of WINDOW for all original fills and refills. A modification was made to correctly state the route for each fill that is processed after this patch is installed.
- ➢ The ECME Log entry that is stored when a prescription is printed from suspense has been changed from stating ECME:SUSP LABEL PRINTED to ECME:PRINTED FROM SUSPENSE. This change will affect fills processed after this patch has been installed.
- ➢ A change was made to allow the user to edit Dispensed As Written (DAW) and National Drug Code (NDC) fields for expired and discontinued ePharmacy prescriptions and refills.
- ➢ A modification was made to store the last used NDC for payable prescriptions that were pulled early from suspense. This change affects the PP Pull RX action of the Patient Prescription Processing [PSO LM BACKDOOR ORDERS] option.
- ➢ A post install routine (PSO260PI) from PSO*7.0*260 will be deleted with this patch.

(This page included for two-sided copying.)

(This page included for two-sided copying.)

ePharmacy Medication Profile (View Only)

Bad Address

Patients flagged with the Bad Address indicator will display the same warning messages as PATIENT PRESCRIPTION PROCESSING [PSO LM BACKDOOR ORDERS] option. If the user holds the PSO ADDRESS UPDATE key, a prompt to update the address/phone will be displayed. If the site parameter EDIT PATIENT DATA under Site Parameter Enter/Edit [PSO SITE PARAMETERS] option is defined as YES, the prompt to update the address/phone will always be displayed.

Example: Bad Address Warnings for user who do not hold the PSO ADDRESS UPDATE key

```
Select ePharmacy Menu Option: MP  ePharmacy Medication Profile (View Only)

Select PATIENT NAME:    OPPATIENT,ONE         10-18-63    666204589       YES
     ACTIVE DUTY
WARNING : ** This patient has been flagged with a Bad Address Indicator.
   Combat Vet Status: ELIGIBLE                          End Date: 10/11/2009

        WARNING: The patient address is indicated as a bad
                 address (UNDELIVERABLE).
                 Medication will not be mailed to
                 the patient until the address has been
                 corrected.

Press Return to continue:
```

Action Modifications

Patient Record Update action addition

The PU (Patient Record Update) action has been added to the Patient Medication Profile screen. To achieve this, the PU action was added to the PATIENT MEDICATION PROFILE protocol menu [PSO PMP MENU].

Example: Addition of PU (Patient Record Update) action

Actions moved to the hidden menu

The following actions have moved to the hidden menu of the Medication Profile screen. To achieve this,
they were removed them from the PATIENT MEDICATION PROFILE protocol menu [PSO PMP
MENU] and added to the ePharmacy Medication Profile Hidden Actions [PSO PMP HIDDEN ACTIONS
MENU] protocol:

> DR   Sort By Drug
> ID   Sort By Issue Date
> LF   Sort By Last Fill Date
> RX   Sort By Prescription.

Example: Sort actions moved to the hidden menu

```

Reject Notification Screen

The default answer of (I)gnore on the Reject Processing Screen has been changed to (Q)uit which automatically sends the claim rejection information to the Pharmacy Reject Worklist (i.e. re-instate discontinued order, unhold, refill, PP - pull early from suspense, edit that doesn't create a new order, and release with NDC edits). Due to conflicting patch release schedules and shared routines with another Pharmacy patch, the new order, copy, edits that create new orders, and renewal functions will remain with a default answer of (I)gnore for reject processing screens displayed prior to label print. These functions will be updated in a subsequent ePharmacy Iteration II patch when the conflict no longer exists.

Example: Default Answer for Reject Notification/Processing screen

Help Text Modification

The help text for the VIEW PRESCRIPTION prompt has been modified to state clearly the valid information that may be entered for the prompt.

Example: VIEW PRESCRIPTION prompt help text

```
VIEW PRESCRIPTION: ?

 A prescription number or ECME # may be entered.  The ECME
 number must be entered in E.NNNNNNN format, where NNNNNNN
 is the prescription ECME # (example: E.0289332).  Or Just
 Answer with PRESCRIPTION RX #
 Do you want the entire PRESCRIPTION List? N  (No)

VIEW PRESCRIPTION:
```

The REJ (View Reject) action was added to the hidden menu on the Rx View screen. The ePharmacy Hidden Actions Menu #2 [PSO PMP HIDDEN ACTIONS MENU #2] protocol was added to contain this new action, and this protocol is also used by the VIEW PRESCRIPTION option [PSO VIEW].

Example: Addition of REJ (Reject Information) action

```

ECME LOG

Window/Mail routing:

The ECME LOG was recording the routing of WINDOW for all original fills and refills. A modification
was made to correctly state the route for each fill that is processed after this patch is installed. The Patient
Prescription Processing [PSO LM BACKDOOR ORDERS] option, View Prescription [PSO VIEW]
option, and ePharmacy Medication Profile (View Only) [PSO PMP] option is affected by this change.

Example: ECME LOG modification

Dispensed As Written (DAW) and National Drug Code (NDC)

A change was made to allow the user to edit Dispensed As Written (DAW) and National Drug Code (NDC) fields for expired and discontinued ePharmacy prescriptions and refills. An example of an edit to DAW and NDC for a discontinued Rx is given below. Note that the edits for expired ePharmacy prescriptions would function in the same manner.

Example: DAW edit of a discontinued Rx

```
