### Using Electronic Orders/Suspense (SU) Menu

#### **Overview**

Description	The purpose of the Electronic Order feature is to provide a method for any request for service or request for items in Prosthetics to be ordered electronically. Requests are made either manually through the Prosthetics system or sent electronically from CPRS (Computerized Patient Record System) via Consult Tracking. Through the <b>Suspense (SU)</b> option, Prosthetic employees are able to post notes to consults, cancel and complete the consult. Reports are available to display open, pending, and completed consults.
What is a Suspense?	A Suspense Request is a request for service or an item that is tracked by a <b>Five-Day</b> <b>Delayed Order Report</b> . The five workday policy refers to the process or <u>time it</u> <u>takes for a request to be created to the day an <i>initial action</i> on a request is made</u> . If this process takes more than five workdays, it is flagged on the report for monitoring and reporting purposes.
<sup>1</sup> New Suspense Entries with Patch 80	<ul> <li>With Patch RMPR*3*80, there are three new types of Suspense entries that can be entered into the Suspense module including the following and will be explained later in this manual:</li> <li>Clone CPRS</li> <li>Auto Adaptive</li> <li>Clothing Allowance</li> </ul>
<sup>2</sup> Three Options Removed	<ul> <li>There were three options removed from the Suspense Processing (SP) screen with Patch RMPR*3*80 due to programming screen space limitations including the following:</li> <li>View Initial Action Note (IA)</li> <li>View Other Action Notes (VO)</li> <li>View Complete Note (CO)</li> <li>Note: You can still view the notes on the request through the View a Request (VR) option, and all notes attached to a record will now be displayed there.</li> </ul>

Continued on next page

Prosthetics Electronic Order/Suspense Processing V. 3.0

<sup>&</sup>lt;sup>1</sup> CPRS Cloning, Auto Adaptive and Clothing Allowance Suspense entries are new functionality with Patch RMPR\*3\*80.

<sup>&</sup>lt;sup>2</sup> Three options removed from the **Suspense Processing (SP)** screen: IA, VO, CO, with Patch RMPR\*3\*80.

### Overview, Continued

CPRS Clone (Patch 80)	With Patch RMPR*3*80, we can now clone a CPRS consult. This provides PSAS with the ability to copy the original CPRS consult for an order without requiring a new prescription to be made nor another physician visit with the patient. A Purchasing Agent will look for the original CPRS order for a requested item, and copy the CPRS consult to create a new Suspense record saving time for everyone in the process.
Auto Adaptive (Patch 80)	When Prosthetics receives a request for Auto Adaptive Equipment, they now have the ability to create an Auto Adaptive Suspense record with Patch 80. This will NOT be included in the count on the <i>CPRS Compliance Report</i> as a CPRS type of suspense.
Clothing Allowance (Patch 80)	When Prosthetics receives a request for a Clothing Allowance, they now have the ability to create a Clothing Allowance Suspense record with Patch 80. This will NOT be included in the count on the <i>CPRS Compliance Report</i> as a CPRS type of suspense.
Types of Consults	<ul> <li>Prosthetics has these nationally designed CPRS consults including the following:</li> <li>1. Eyeglass Prescription</li> <li>2. Home Oxygen Prescription</li> <li>3. Contact Lens Prescription</li> <li>4. Routine Prosthetic Prescription</li> <li>It is required that the clinicians use these consults in order to prescribe prosthetic appliances or services in lieu of the paper Prosthetic Request form. These consults are interfaced to the Prosthetics software, and automatically populate the Suspense (SU) option, where the consult is kept as a Suspense record until completed by Prosthetics.</li> <li>The new Suspense record is an amendment to the original consult. This is counted in the <i>CPRS Compliance Report</i> as it is considered a CPRS record.</li> <li>IMPORTANT: You cannot clone a manual Suspense record only an original CPRS electronic record that is not more than 2 years old.</li> </ul>

## **Understanding Status Types**

Status Types	There are three status types that are used with a suspense record including the following:
	<ul> <li>Open</li> <li>Pending</li> <li>Closed</li> </ul>
Cancel Status	When a record is cancelled, it is <i>removed</i> from the Suspense Processing list entirely; it will no longer be shown there.
	You can change a suspense record to CANCEL from either an OPEN status or a PENDING STATUS. Once a suspense record has a CLOSED status, it cannot be cancelled.
	<b>Example:</b> If a manual suspense record was added twice incorrectly, it can then be cancelled.
Status Flow	When a suspense record is added to Prosthetics, the status is OPEN. Once an initial action is taken on the suspense record, the status changes from OPEN to PENDING.
	The status remains PENDING when additional action is taken on a suspense record. The status changes to CLOSED when the process is complete and either service was performed or an item was given to the patient.
Message sent to Physician	When an electronic order (ROUTINE type) suspense record is canceled in Prosthetics, a notifying message is sent to the ordering physician through CPRS. A notifying message is also sent when posting initial notes (PI), additional notes (OT), and completed notes (PC).
CPRS Electronic Orders	If an order is placed by a physician in CPRS, it is electronically sent to Prosthetics and is displayed in the Suspense Processing list with an OPEN status.
orders	<u>Sample scenario</u> : If it takes three to four months to receive a requested item(s) on an order, and the patient comes in for service that refers to this Suspense request, an action note is entered for that record. When an action note is entered, the status changes from OPEN to PENDING.
	Another action note can be placed, and the status remains PENDING. Only when the patient has the last appointment and receives the item(s), the Suspense record is completed, and the status is changed to CLOSED.

### Access the Suspense Processing (SP) Menu

Suspense Menu	The Suspense (SU) Menu can be accessed from the Prosthetic Official's Menu.								
Steps	To access	the <b>Suspense</b> Menu, follow these steps:							
	Step	Action							
	1	At the Select Prosthetic Official's Menu Option prompt, type ${f SU}$							
		for the <b>Suspense</b> Menu, and press <b><enter></enter></b> .							
	2	The <b>Suspense</b> Menu displays.

### **Display a Prosthetic Suspense List**

## Suspense Menu actions

Below the display of a patient's suspense record is a list of actions that can be performed on each suspense record. The actions available are the following:

Entry	Action	Description		
23	Display Full 2319	This displays the 10-2319 Entitlement information.		
VR	View Request	View the detail of a suspense record.		
PI	Post Initial Action Note	Enter the first note on a suspense.		
OT	Post Other Note	Enter additional notes on a suspense.		
PC	Post Complete Note	Enter the final note on a suspense.		
AD	Add Manual Suspense	Add a manual suspense order in Prosthetics.		
ED	Edit Manual Suspense	Edit the description of the manual order.		
CD	CPRS Display	View the CPRS entry in Prosthetics.		
CG	Change Patient	Change the patient within the suspense module.		
CR	Cancel Request	Cancel a request that is in Open or Pending.		
FW	Forward Consult	Forward a consult to a provider via CPRS.		
PR	Print Consult	Prints only a consult to a printer or displays to		
		your screen.		
AA	Auto Adaptive	New Suspense Entry with Patch RMPR*3*80.		
CC	Clone CPRS	Copy of a CPRS consult to create a new Suspense		
		Entry with Patch RMPR*3*80.		
CA	Clothing Allowance	New Suspense Entry with Patch RMPR*3*80.

#### Page Number(s)

Notice at the top of the page on the right-hand corner, the page number is listed. It will display the total number of pages, if multiple pages are available to be viewed. Pressing **<Enter>** scrolls to the following page until you have reached the last page.

### **Understanding Field/Column Descriptions**

Columns

Below is a list of the column titles shown on the Prosthetics Suspense list.

Column	Description
Date	This is the date the order was written or the date the CPRS
	order was sent.
Туре	There are multiple types of electronic orders via CPRS
	including the following consults:
	Routine Prosthetics
	Contacts
	• Eye Glass
	• Oxygen (Home Oxygen)
	There are also Manual (NON-CPRS) entries as well as
	Clothing Allowance, Auto Adaptive and Clone Suspense
	entries that will display in the Type column.
Requestor	This is the name of the person who entered the order.
Description	This is a free-text field that is manually entered with
	approximately 15 characters in length.
Initial Action	This is a date field. It displays the date of the first action
	taken on the suspense record.
Days	This is a number field. This displays the number of "Work" days ( <b>not</b> Calendar days) from the original date the order was entered as a suspense to the day it is completed. There will be either an At-Sign (@) or an asterisk (*) next to this number, if the number is more than 5 days in length from the order entry date. Then the request will be put on <b>the Five Day Delayed Order Report</b> .
	<u>At-Sign (@)</u> : If there is an At-sign (@) next to a number, this signifies that the order is in an <b>OPEN</b> status, and the suspense is greater than five "Work" days.
	Asterisk (*): If there is an asterisk (*) next to the number in the Days column, this signifies that the order took more than 5 work days to change the status from OPEN to <b>PENDING</b> or from OPEN to <b>CLOSED</b> .
	<b>Note:</b> The calculation subtracts Saturdays and Sundays from the number of days the order was entered, even if a CPRS order was written over a weekend. <u>Holidays are always</u> <u>counted</u> . A "work day" is defined as Monday through Friday.

### Understanding Field/Column Descriptions, Continued

Columns

Below is a list of the column titles shown on the Suspense Processing (SP) list.

(continued)

Column	Description			
Status	This field shows the following status types:			
	1. Open			
	2. Pending			
	3. Closed			
	An order is placed into a PENDING status once initial action is taken. It remains in that status until the order is fulfilled and then changes to a CLOSED status.			
	<b>Note:</b> The status can change from OPEN to CLOSED.			

### **Suspense Menu Actions**

### View a Request (VR)

Function description	<sup>1</sup> A change has been made to the <b>View Request (VR)</b> option on the <b>Suspense</b> <b>Processing</b> option [RMPR SUSP MENU] with <b>Patch RMPR*3*80</b> . This prompt now displays the initial action notes, the other action notes and the posted complete notes.
	This option begins by displaying the requested text and then all notes posted to a request. It displays notes in chronological order starting with the most recent. If more than one screen is required, it prompts you to press any key before continuing.
a.	

Step

Screen sample

To view a request, follow these steps:

Step	Action
1	At the Select Item(s) Next Screen// prompt, type VR for
	the View Request action, and press <enter.></enter.>
2	The next prompt displays: Enter a list or a range of
	numbers (shown in parenthesis) to select a suspense record.
3	Type the number for the record you want to view, and press <b><enter< b="">.&gt;</enter<></b>

### Add a Manual Suspense Record (AD)

FunctionYou can add a manual suspense record to Prosthetics to request an item or service<br/>through the Add Manual (AD) action. The manually entered suspense record status<br/>begins in an OPEN status with a new request.

Steps

To add a manual suspense, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen//, type AD to access
	the Add Manual action, and press <enter.></enter.>

Add Manual	Prosthetic Suspense	Page: 1 of 2

### **Post Initial Action Note (PI)**

# Function<br/>descriptionYou can post an initial action note on a suspense record through the Post Initial<br/>Action (PI) action. This indicates that some form of action has taken place. The<br/>status changes from OPEN to PENDING and will remain in this status until all<br/>action is completed.

Steps

To post an initial action note on a consult, follow these steps:

Step	Action
1	At the following prompt: Select Item(s): Next Screen//, type <b>PI</b> to access the <b>Post Initial Action</b> option, and press < <b>Enter</b> .>
2	The next prompt displays: Enter a list or a range of numbers (shown in parenthesis) to select a suspense record.
3	Type the number for the record you want to post an initial action note, and press <b><enter.></enter.></b>
4	At the next prompt, Edit? No//, type a Y for Yes to create a new note.
5	The text editor displays for you to type a free-text note. When complete, press the " <b>Num Lock</b> " key and then the " <b>E</b> " key to exit out of the text editor, save the data, and return to the Suspense Processing list.

### Post Other Note (OT)

FunctionYou can post an additional note on a request through the Post Other Note (OT)<br/>action. This provides a means to make a comment to the Requestor.

Steps

To post an additional note to the suspense order, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen//, type OT to access
	the <b>Post Other Note</b> action, and press <b><enter< b="">.&gt;</enter<></b>
2	The next prompt displays: Enter a list or a range of
	numbers (shown in parenthesis) to select a suspense record.
3	At the Edit? NO// prompt, type a Y for Yes to edit the note on the
	suspense record. The text editor displays for you to type a free-text note
4	When complete, press the "Num Lock" key and then the "E" key to exit
	out of the text editor, save the data, and return to the Suspense
	Processing list.

### Post a Complete Note (PC)

# FunctionYou can post a complete note when all action has taken place for a requesteddescriptionProsthetic item or service through the Post Complete (PC) action. When you post<br/>the complete note, the status on the suspense record changes from PENDING (if<br/>action has previously taken place on the request) or OPEN to CLOSED.

Steps

To post a complete note, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen//, type PC to access the
	<b>Post Complete Note</b> action, and press <b><enter< b="">.&gt;</enter<></b>
2	The next prompt displays: Enter a list or a range of
	numbers (shown in parenthesis) to select a suspense record.
3	Type the number for the record you want to view, and press <b><enter.></enter.></b>
4	At the Edit? NO// prompt, type a Y for Yes to edit the note on the
	suspense record. The text editor displays for you to type a free-text note,
	and the note will be complete with a status of CLOSED.
5	When complete, press the " <b>Num Lock</b> " key and then the " <b>E</b> " key to exit
	out of the text editor, save the data, and return to the Suspense
	Processing list.

### Edit Manual Suspense (ED)

## FunctionYou can only edit a manual Suspense record, not a CPRS electronic record for a<br/>patient. You can edit the following information for a suspense record through the<br/>Edit Manual (ED) action:

- Station
- Veteran Suspense form
- Requestor
- Description of item/services.

Steps

To edit a manual suspense, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen// prompt, type ED for the Edit Manual suspense action, and press <enter.></enter.>
	<b>Note:</b> If no changes are required, press <b><enter></enter></b> at the <b>//</b> prompt to bypass the editing option.
2	Type a number (from the list shown) to select an order, and press <b><enter.></enter.></b>

In the text editor, revise the information as needed.

out of the text editor, save the data, and return to the Suspense

When complete, press the "Num Lock" key and then the "E" key to exit

### **Cancel a Request (CR)**

Function description	You can cancel an order that was entered manually through the <b>Cancel Request</b> ( <b>CR</b> ) action. If an order was entered electronically through CPRS (ROUTINE order)
	into Prosthetics, and the order is cancelled, the physician will receive a cancelled note in CPRS.

<sup>1</sup>Note that the list of potential Suspense records that can be cancelled are shown in gray highlighted area and include the new Suspense records for Clothing Allowance, Auto Adaptive and also the Clone of a CPRS consult.

Steps

To cancel a request, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen// prompt, type CR for
	the Cancel Request action, and press <enter.></enter.>
2	Select the record in the list to be canceled (indicated within parenthesis),
	and press <b><enter.></enter.></b>
3	Enter the "Type" of the request or type two question marks to display the
	available options and select one.
4	After selecting an option from the list, press <b><enter< b="">,&gt; and the suspense</enter<></b>
	record will be deleted/canceled.

Cancel Request	Select Item(s): Quit// CR <enter> Cancel Request</enter>
-	Enter a list or range of numbers (1-5): 2 <enter></enter>
screen	
	This will CANCEL/DELETE this Suspense Request.
	Are you sure you want to CANCEL/DELETE this Suspense Request? (Y/N) ? N// Y
	<pre><pre><pre><pre><pre><pre><pre><pre></pre></pre></pre></pre></pre></pre></pre></pre>
	TYPE OF REQUEST: ?? <enter></enter>
	This is the type of order from CPRS Consult Tracking Module.
	Choose from:
	Choose from:
	1 ROUTINE PROSTHETICS
	2 EYEGLASS
	3 CONTACT LENS
	4 OXYGEN
	5 MANUAL NON CPRS
	6 CLOTHING ALLOWANCE
	7 CLONE
	8 AUTO ADAPTIVE
	TYPE OF REQUEST: 1 <enter> ROUTINE PROSTHETICS</enter>
	DELETED/CANCELLED!

<sup>&</sup>lt;sup>1</sup> The Cancel <u>Request (CR) feature has been updated with Patch RMPR\*3\*80.</u>

### Forward a Consult (FW)

 Function
 An order can be forwarded through the Forward Consult (FW) action.

 description
 If you forward an order, you will be prompted to enter the service where the order is being forwarded. The status changes from OPEN to CLOSED in the Suspense list

**Note:** If an order was forwarded to Rehab for a patient to be evaluated, then a new order may be sent to Prosthetics after that for an item(s) or service.

Steps

To forward a consult, follow these steps:

when an order has been forwarded.

Step	Action
1	At the Select Item(s): Next Screen// prompt, type FW for the Forward Consult action, and press <enter.></enter.>
2	Type a number (from the list shown) to select an order, and press <b><enter.></enter.></b>

### **CPRS** Display (CD)

#### There are four types of consult requests that are entered through Prosthetics **Four Consults** Suspense module via CPRS. They can be displayed through the CPRS Display (CD) action.

The four consults are:

- 1. Oxygen (Home Oxygen) Consult Request
- 2. Contact Lens Consult Request
- 3. Eyeglass Consult Request
- 4. Routine Prosthetics Request

Steps

To display a CPRS consult, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen// prompt, type CD for
	the CPRS Display action, and press <enter.></enter.>
2	The next prompt displays: Enter a list or a range of
	numbers (shown in parenthesis) to select a suspense record.
3	Type the number for the record you want to view, and press <b><enter.></enter.></b>

## <sup>1</sup>New Options with Patch RMPR\*3\*80

### Introduction

Purpose	There are three new options with Patch RMPR*3*80 including the following:
	<ul> <li>Auto Adaptive (AA)</li> <li>Clothing Allowance (CA)</li> <li>Clone CPRS (CC)</li> </ul>
	The Auto Adaptive (AA) option and the Clothing Allowance (CA) option are manually entered Suspense records. The Clone CPRS (CC) is a manually entered copy of a CPRS original order.
Auto Adaptive (Patch 80)	When Prosthetics receives a request for Auto Adaptive Equipment, they now have the ability to create an Auto Adaptive Suspense record with Patch 80. This will be included in the count on the CPRS Compliance Report as a CPRS type of suspense.
Clothing Allowance (Patch 80)	When Prosthetics receives a request for a Clothing Allowance, they now have the ability to create a Clothing Allowance Suspense record with Patch 80. This will be included in the count on the CPRS Compliance Report as a CPRS type of suspense.
CPRS Clone (Patch 80)	With Patch RMPR*3*80, we can now clone a CPRS consult. This provides PSAS with the ability to copy the original CPRS consult for an order without requiring a new prescription to be made nor another physician visit with the patient.
	A Purchasing Agent will look for the original CPRS order for a requested item, and copy the CPRS consult to create a new Suspense record saving time for everyone in the process.

<sup>&</sup>lt;sup>1</sup> New options with Patch RMPR\*3\*80.

## <sup>1</sup>Auto Adaptive Suspense Entry (AA)

Add an Auto Adaptive (AA)		Below is a sample of the Auto Adaptive (AA) Suspense Entry. The Auto Adaptive description is free text.							
	<b>Note:</b> Since the AA entries are manual Suspense entries and are easily identifiable by their name, these entries will not be counted against the <i>CPRS Compliance Report</i> .

## Clone a CPRS Consult (CC)

Introduction to Cloning	The <sup>1</sup> <b>Clone CPRS (CC)</b> option is a new action within the <b>Suspense (SU)</b> screen with Patch RMPR*3*80. This new feature allows you to create a duplicate Suspense record from an original CPRS order in Suspense. This saves the patient from having to make another physician visit and creating another encounter. The Purchasing Agent can search the Suspense history on a patient to find an original order for a requested item, and copy the CPRS consult to create the new Suspense record.
Types of Suspense Records	Below are the TYPES of Suspense records and are designated as "types" in the second column of the <b>Suspense</b> (SU) screen. The list below will appear as part of the <i>CPRS Compliance Report</i> . This data is rolled up nationally every month as part of the National Prosthetic Patient Database (NPPD).
	<ol> <li>ROUTINE PROSTHETICS</li> <li>EYEGLASS</li> <li>CONTACT LENS</li> <li>OXYGEN</li> <li>MANUAL NON CPRS</li> <li>CLOTHING ALLOWANCE</li> <li>CLONE</li> <li>AUTO ADAPTIVE</li> </ol>
	<b>Note:</b> Number #5 (MANUAL NON CPRS) does not appear as part of the CPRS Compliance Report, and you cannot create a Clone of a manual Suspense record, Clothing Allowance or Auto Adaptive Suspense records (since they are created manually as well.) You can only create a clone of a CPRS original order.
Why create a Clone?	When you create a clone of a CPRS order, it creates a separate Suspense record and provides documentation in CPRS on a replaced or repaired item. This is similar to documenting in the medical record any new item or service that was issues or performed. The clone (or new Suspense record) is sent to the Originator/Provider as a note.
	The new Suspense record is an amendment to the original consult. A Clone is counted in the <i>CPRS Compliance Report</i> as it is considered to be a CPRS record.
	Continued on next page

<sup>1</sup> Clone CPRS (CC) is a new option with Patch RMPR\*3\*80.

November, 2003

What can you Clone?	<ul> <li>You can clone the following consults:</li> <li>Eyeglass</li> <li>Home Oxygen</li> <li>Contact Lens</li> <li>Routine (general request from CPRS)</li> </ul> Note: These are part of the Consult Tracking application. Note: A MANUAL NON CPRS Suspense record does not appear as part of the CPRS Compliance Report. You cannot create a Clone of a manual Suspense record, Clothing Allowance or Auto Adaptive Suspense records (since they are created manually as well.) You can only create a clone of a CPRS original order.
	IMPORTANT: Do NOT clone an initial order that is more than two (2) years old. This is for safety and health purposes in case the patient has physical changes within two years.
What you CANNOT clone	<ul> <li>You cannot clone the following:</li> <li>Manual Suspense Entries</li> <li>Auto Adaptive Equipment Suspense entry</li> <li>Clothing Allowance Suspense entry</li> </ul>
CA and AA orders	The <b>Clothing Allowance</b> ( <b>CA</b> ) and the <b>Auto Adaptive</b> ( <b>AA</b> ) options are not consults or CPRS orders, but are manually entered Suspense records. You cannot clone these orders; only create a new Suspense record. <b>Note:</b> These entries do not have ICD-9 codes.
Initial and Complete Action Notes	When an Initial Action or Complete Action note is written on a clone, the CPRS record is updated as well. This is created under the name of the original prescriber.

**Example** Below is a sample of the Clone CPRS Consult. Notice that the **Clone CPRS (CC)** option is used to make a clone of a ROUTINE Suspense record. This means that this record is a CPRS order.

**Steps** To create a clone of a routine CPRS consult, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen// prompt, type CC for
	the Clone CPRS action, and press <enter.></enter.>
2	Enter the line item that you want to clone or a range of numbers for multiple line items, and press <b><enter< b="">.&gt;</enter<></b>
3	You have completed the clone process! You can now display the option on your screen at the <b>Device</b> prompt by pressing <b><enter></enter></b> twice.

#### View Request (VR) Option (Patch RMPR\*3\*80 Enhancement)

#### View Request (VR) of a Clone

**View Request** You can select the View Request (VR) option to view a cloned Routine CPRS consult. This option has been enhanced with Patch RMPR\*3\*80 to include all the (**VR**) notes posted to a Suspense entry including the initial action notes, the other posted notes, and the completed posted notes.

> Note: When an Initial Action or Complete Action is taken, the CPRS record is updated as well. This is created under the name of the original prescriber.

### View Request (VR) - Auto Adaptive Suspense Record

**Example** Below is a sample of a closed Auto Adaptive Suspense Record. The same procedure is used with a Clothing Allowance Suspense record.

Steps

To view an Auto Adaptive Suspense record, follow these steps:

Step	Action
1	At the Select Item(s): Next Screen// prompt, type VR for
	the View Request action, and press <enter.></enter.>
2	Enter a line item (or a range of line items to view multiple requests), and
	press < <b>Enter</b> .>

## Linking and the Suspense Processing (SP) Menu

#### **Overview**

Patch description	<ul> <li>Patch RMPR*3.0*62 (February, 2002) enhances the purchase order process from the <b>Purchasing (PU) Menu</b> to link the transaction to the Suspense record(s). You can access the Prosthetic purchase orders through the <b>Enter New Request (EN) Menu</b> (under the <b>Purchasing (PU) Menu</b>). The <b>Suspense Processing List Manager</b> screen now <u>automatically</u> displays after posting a transaction.</li> <li>Note: There are other Prosthetic menus and options that automatically display the <b>Suspense Processing List Manager</b> screen (listed on the first page of this document).</li> </ul>
New Menu option	In addition to the new reports with Patch RMPR*3.0*62, there is a new <b>Suspense</b> <b>Menu</b> option entitled: Link Patient Record to Suspense (LS), but the main changes with this patch have been done to the Suspense Processing List Manager screen.
Linking Feature	<ul> <li>With Patch RMPR*3.0*62, you will now LINK a transaction to the Suspense record (from CPRS) in the patient's Suspense Processing List Manager screen.</li> <li>A result of the linking is a match of the HCPCS Code to the ICD-9 Code which will automatically create the PCE (Patient Care Encounter) for <u>electronic</u> consults.</li> <li>Linking is required for <u>manual</u> suspense entries; however, no PCE is generated. Therefore, the Appointment Management Menu no longer appears.</li> </ul>

## Suspense Items Linked

Accessing the	After you post a transaction, the Suspense Processing List Manager screen
Suspense	automatically displays. You can then Post Initial Action (PI), Post Other Note
Processing	(OT), or Post Complete (PC) to link to a transaction.
Screen	
	You can also perform any action on a patient that you need to as if you had accessed
	this screen from the Suspense Processing (SP) Menu EXCEPT the following
	action: Change Patient (CG).

Steps

To link suspense items, follow these steps:

Step	Action
1	From the Suspense Processing List Screen, select the action: Post
	Initial (PI), Post Other (OT), or Post Complete (PC) on the Suspense
	record for the patient you want to link with the transaction.
2	Select the number of the Suspense record that you want to post the note.
3	The List of 2319 Record(s) display which includes the date, the item
	description, and the vendor in the 2319.
4	At the Enter 2319 Record to be LINKED prompt, select the
	number of the transaction you issued or posted.
5	You then have the option to edit the note that you just created or quit.

#### Link a Range of 2319 Records

Items

Link a Range of You can link a range of 2319 transactions by entering a dash between two numbers if there are multiple 2319 records listed. You can only select one Suspense record at a time, but you can link multiple transactions to that specific Suspense record.

Sample	If two or more transactions are shown for one consult, but they were created from
Scenario	different menus (i.e., Stock Issue Menu and Purchase Card Menu), when linking
Example	the first transaction (Stock Issue Menu), you would perform one of these actions:
	1) Post Initial (PI) or Post Other (OT) for a note on that consult. In the
	i) i ost initiar (i i) of i ost other (o i) for a note on that consult. In the

second transaction linking, you would then Post a Complete (PC) note to the same consult.

- Or -

2) Remember that you can always **Post Other** (OT) after a consult has been closed. An example is the case of two transactions from one consult resulting from different menus. You can Post Complete Note (PC) for the first transaction (Stock Issue) and then Post Other (OT) for the second transaction (Purchase Card) in order to complete the "Linking" process.

# Adding New Line Items/Shipping Charges During Reconcile/Close Out

Introduction to Automatic Linking	<ul> <li>You can add a new line item or a shipping charge to an already created Purchase Order (PO) during the reconciling/close out process. There are two possible linking scenarios including:</li> <li><u>Multiple Consults</u> - where you will select the proper link for the new line item or a shipping charge.</li> <li><u>Single Consult</u> - Automatic Linking – where you are adding a line item or a shipping charge to a PO that has only one consult associated with it. Therefore</li> </ul>
	the linking association is done <u>automatically</u> for you.
Scenario 1 – Multiple Consults	When creating a PO – a 1358 or Visa, it may be associated with two or more Suspense (consults) records. One consult could be a CPRS consult and the other one is a Manual consult. But when you reconcile/close out the transaction, you need to add a new line item or a shipping charge as you did not include this in the original transaction.
	Because you are adding to the PO, and it has two Suspense records associated with it, you will be prompted to identify which record – the CPRS or the Manual consult to link the new line item or the shipping charge to the correct transaction.
	<b>Note:</b> Since the PO has some items associated with one consult, and some items associated with another, you will have to determine the proper link.
Scenario 2 – Automatic Linking	A PO is created and linked to one Suspense record. It is not split into multiple records, and NO estimated shipping charge was included. At the reconcile/close out of this transaction, you need to add the shipping charge.
	Because all the items were on the same consult (same Suspense record), all additional items and/or shipping charges will be <b><u>automatically linked</u></b> at the close out without the user having to select the link. Because the linking is done automatically, there will be no additional prompt for you.

#### No Suspense Item is Selected/No Linking

No action on Suspense When no action is performed on a Suspense record, there is no linking done. When you exit the **Suspense Processing List Manager** screen, a new message displays as shown below.

Suspense	Suspense Processing         Aug 21, 2001@12:15:44         Page: 1 of 8

## **Printing Suspense Reports**

## **Overview of Reports**

Print Menu Options	There are five (5) <b>Print</b> menu options available within the <b>Suspense</b> Menu that are detailed over the next few pages. The menu options are as follows:
	<ul> <li>Print Closed Suspense Records (PC)</li> <li>Print Detailed Open/Pending Suspense Records (PO)</li> <li>Print 5 Day Old Suspense Report (PR)</li> <li>Print Summary Open/Pending Suspense Records (PS)</li> <li>Print Suspense Statistics (ST)</li> </ul>
In this section	This section covers the following topics:
	Торіс
	Print Closed Suspense Records (PC)
	Print Detailed Open/Pending Suspense Records (PO)
	Print 5 Day Old Suspense Report (PR)
	Print Summary Open/Pending Records (PS)
	Print Suspense Statistics (ST)

# Print Closed Suspense Records (PC)

Print Closed Date and Times	The <b>Print Closed Suspense Records (PC)</b> Menu option provides the data for the closed suspense records. <u>Note</u> : This report will include closed records with a completion date that is within an entered date range, regardless of the initial request date. This means that the totals on this report will not necessarily equal the corresponding totals on the Print Suspense Statistics (ST) report. Also, this report is date and time sensitive. An ending time should be entered, otherwise, the system will default to a time of 00:00. Do <b>NOT</b> enter a T for Today	
	or you wi	ll not receive full results. <u>It is recommended that you enter 16:30 for the</u> or N for Now.
Steps	To print t	he Closed Suspense Record(s), follow these steps:
	Step	Action
	1	At the Select Suspense Option prompt, type PC for the Print Closed Suspense Records Menu option, and press <enter.></enter.>
	2	At the <b>Start With Completion Date: First</b> // prompt, type the beginning date of the date range. (You can enter T for Today minus the number of days for the starting date.)
	3	At the Go to Completion Date: Last// prompt, type the ending date of the date range. NOTE: If the end date is the current date, you can type N for NOW.
	4	At the <b>Device</b> prompt, press <b><enter></enter></b> to accept the current default or you can enter two question marks and select an item from a list.

# Print Detailed Open/Pending Suspense Records (PO)

Function description	You can print the detailed information from an OPEN or PENDING suspense record using the <b>Print Detailed Open/Pending Suspense Records (PO)</b> Menu option.
	<b>Note:</b> The number of working days that a request has been OPEN or PENDING from the data entry date into Suspense to the date the report is printed is shown (in parenthesis) next to the <b>Initial Action Date</b> field (see below).
Steps	To print the detailed Open/Pending suspense records, follow these steps:
	Step Action
	1 At the Select Suspense Option prompt, type PO for the Print Detailed Open/Pending Suspense Records option, and press <enter.></enter.>
	2 At the <b>Device:</b> Home// prompt, press < <b>Enter</b> > to accept the default. (You can also type two question marks to select a device from a list.)
	3 The detailed data displays.

#### Print 5 Day Old Suspense Report (PR)

FunctionThe Print 5 Day Old Suspense Report (PR) Menu option prints all open records<br/>between two fixed dates. The start date is 90 days prior to the report run date<br/>(current date), and the end date is seven (7) days prior to the report run date (current<br/>date).

**Note:** Do not compare this report with the Suspense Statistics Report as they were developed for different purposes and will not necessarily show the same figures.

Steps

To print the 5 Day Old Suspense Report, follow these steps:

Step	Action
1	At the Select Suspense Option prompt, type <b>PR</b> for the <b>Print</b>
	5 Day Old Suspense Report Menu option, and press <enter.></enter.>
2	At the <b>Site</b> prompt, press <b>&lt; Enter</b> > to accept the default or type two
	question marks to select an option from the list.
3	At the <b>Device:</b> Home// prompt, press < <b>Enter</b> > to accept the
	default. (You can also type two question marks to select a device from a
	list.)
4	The detailed data displays.

# Print Suspense Statistics (ST)

Function description	The <b>Print Suspense Statistics (ST)</b> Menu option prints statistics from the PROSTHETICS SUSPENSE file (#668). This report will summarize only those suspense records whose initial request date is within an entered date range. Thus if a record has an initial request date prior to the report begin date, but a				
	completed (close out) date within the date range, it will not be counted in the CLOSED SUSPENSE RECORDS totals. The same reasoning applies to the OPEN and PENDING totals. It is important to realize that the figures in this report will not necessarily equal the corresponding figures in the other suspense reports.				
Steps	To print the summary Open/Pending suspense record(s), follow these steps:				
	Step         Action				
	1 At the Select Suspense Option prompt, type ST for the Print Suspense Statistics Menu option, and press <enter.></enter.>				
	2 You can enter a Starting Date and an Ending Date.				
	3 At the <b>Device:</b> Home// prompt, press < <b>Enter</b> > to accept the default. (You				
	can also type two question marks to select an option from a list.)

## **Appendix A – Combine Actions**

# Add Manual Suspense/Post Complete Note Simultaneously (AD,PC)

**Function description** You can combine actions for timesaving purposes in the Suspense Processing module. You can enter up to a maximum of three actions at one time. This is done by entering commas between the action code (i.e., AD,PI,PC, to add a manual suspense record, post an initial action note, and close the record simultaneously).

You can add a manual suspense and post a complete note all in the same step. The combination of the two steps may be done at one time if a suspense order was created and the service was completed all at the same patient appointment visit.

Steps

To add a manual suspense and complete a note at the same time, follow these steps:

Step	Action			
1	At the Select Item(s): Next Screen//, type AD,PC, and			
	press < <b>Enter</b> .>

## Appendix B – Appointment Management

## Overview

Introduction to using Appointment Management in Prosthetics	The <b>Appointment Management</b> feature is used to view appointments for a selected patient or clinic and to execute appropriate action(s) against these appointments, such as the <b>Check-in/Unscheduled Visit</b> action. If a patient is selected, all appointments for the selected patient within the designated time frame will be displayed. <b>Note:</b> If you do <b>NOT</b> use the <b>Appointment Management</b> feature at your facility, you can type the ^ to QUIT and exit this screen.			
Reference	For more detailed instructions on how to use the Appointment Management feature, you can access the following website for the User Manual: <u>http://vista.med.va.gov/pms/scheduling</u>			
Displaying Clinic Appointments	If selecting a clinic, you will be prompted for the appointment date range to display. Only clinic appointments within the designated time frame and with a status of NO ACTION TAKEN or ACTION REQUIRED are displayed.			
Actions	Following is a list of actions that may be accomplished through the <b>Appointment Management</b> Screen.			
Appointment Management Screen	<b>CI Check In</b> CO Check Out CL Change Clinic MA Make Appointment PR Provider Update EP Expand Entry NS No Show DE Delete Check Out RT Record Tracking PD Patient Demographics PC PC Assign or Unassign GAF GAF Score	PT Change Patient UN Unscheduled Visit EC Edit Classification CD Change Date Range CA Cancel Appointment DX Diagnosis Update AE Add/Edit DC Discharge Clinic AL Appointment Lists CP Procedure Update TI Display Team Information		
Most commonly used actions in Prosthetics		I in Prosthetics include the <b>Check In</b> ( <b>CI</b> ) action and ction. See the next page for more information on		

## Using the Check-in/Unscheduled Visit Actions in Appointment Management

Check-in/ Unscheduled Visit option	The <b>Check-in/Unscheduled Visit</b> option is used to schedule in an unanticipated appointment (for current date or past date) or to record a patient's arrival time (check in time) for statistical purposes for existing and/or unscheduled appointments. To add a new unscheduled appointment, the patient must be actively enrolled in the selected clinic. If the patient is not enrolled in the specified clinic, you will have the
	opportunity to either enroll or schedule the patient for a consultation.
Check out a patient	You may also check out a patient using this option when adding a new unscheduled appointment. When you choose <b>Checkout</b> , a checkout interview is displayed.
	Depending on how parameters are set at your site and classification criteria, the checkout interview may prompt you for provider, diagnosis, classification, and procedure code information. The default provider and diagnosis assigned to the clinic through the <b>Set up a Clinic</b> option (if any) appear as defaults. If all required information is entered, the appointment is automatically checked out.
Unscheduled appointments	If an unscheduled appointment is entered, you may print a routing slip for the visit. If you are entering the unscheduled appointment at the time it is actually occurring, you may be able to issue a request for the patient's records. This will only occur if your site is running the Record Tracking package and the clinic has been so defined in Record Tracking. A request notice is automatically printed on the appropriate file room printer.
	If while adding a new unscheduled appointment, you select a clinic where the clinic parameter, <b>ASK FOR CHECK IN/OUT TIME</b> , ( <b>Supervisor</b> Menu - <b>Set Up a Clinic</b> option) is set to YES, you will be prompted for a checked in/out date/time.
	To schedule an appointment type of COLLATERAL, EMPLOYEE, or SHARING AGREEMENT requires the patient to be registered with a primary eligibility or other entitled eligibility of COLLATERAL, EMPLOYEE, or SHARING AGREEMENT. If the selected appointment type has subcategories, you will be asked to select the appropriate subcategory.
	Any appointment made through this option will have a visit status of UNSCHEDULED VISIT.
