Preface

The Fee Basis Technical Manual details various technical characteristics of the DHCP Fee Basis software product. This manual was produced by the Albany Information Systems Center to provide necessary information for use in the technical operation of the DHCP Fee Basis software package, Version 3.5. It should be noted that this manual is intended for use by technical computer personnel and is not designed for use by the typical end user.

Introduction

The DHCP Fee Basis package provides a range of software supporting the Department of Veterans Affairs fee for service (Fee Basis) program. A veteran is authorized Fee Basis care if s/he is legally eligible for such care and VA facilities are not feasibly available to meet the patient's medical needs. The authorization may be for short term care, ID card status for ongoing outpatient care, home nursing services which authorize home nursing visits, community nursing home, or contract hospital. Veterans authorized Fee Basis care may receive reimbursement for their travel expenses from their home to the fee provider and/or prescription services in emergent situations.

The Fee Basis package interfaces with the ADT (Admission-Discharge-Transfer) DHCP module of the PIMS (MAS) package to provide users access to registration data entered through ADT options. It integrates with VA FileMan to give non-programmer personnel the ability to extract reports with ease. It interacts with the IFCAP package in the passing of data for posting to 1358s. It integrates with the Integrated Billing (IB) package for patient insurance data. It allows users to enter and track unauthorized claims for all Fee Basis programs. Use of the Fee Basis software provides for more efficient and accurate operation of the Fee Basis programs with reduction of paperwork, savings in man-hours, and minimization of error.

Fee Basis also integrates with the Clinical Reminders package to Clinical Reminders (DBIA #5619) to provide Clinical Reminders with two functions to list the patient's ARCH (Access Received Closer to Home) eligibility of a certain date range and a list of all patients and their ARCH Eligibility. Added for FB*3.5*119.

Related manuals include the Fee Basis User Manual, which describes the functionality and use of the software; the Fee Basis Installation Guide, which provides step-by-step instructions for installing the software, the Fee Basis Guidebook supplied by Central Office, and the Fee Basis Package Security Guide.

The Fee Basis software provides menus for the four fee for service programs: Medical Fee, Pharmacy Fee, Community Nursing Home, and Civil Hospital. There are also menus for processing unauthorized claims and answering telephone inquiries regarding payments.

Some of the options in the Medical Fee Main Menu are utilized to:

- Authorize Fee Basis treatment
- Enter vendors or payments
- Create, close out, and release batches of invoices
- Record travel payments
- Establish site parameters
- Queue Fee Basis batch data for transmission to Austin, TX

The Pharmacy Fee section of the Fee Basis package provides the means to administer the Hometown Pharmacy program which provides payment for medications furnished to eligible veterans on an emergency basis.

The Community Nursing Home section provides the means to pay for nursing home care provided to VA inpatients who are placed in nursing homes in the community for an authorized period of time at VA expense.

The Civil Hospital section provides the ability to pay for care provided to veterans who are determined to be legally and medically eligible for care and who are admitted to a private hospital in emergency situations where VA facilities are not feasibly available.

The Unauthorized Claims section provides the means to process unauthorized claims which are expenses for inpatient medical services obtained by eligible veterans without prior authorization from the VA.

The Telephone Inquiry Menu contains the options that are used to answer inquiries from vendors and/or veterans regarding payments or checks.

General Information

Namespace Conventions

The namespace assigned to the Fee Basis package is FB.

Integrity Checker

The Fee Basis package has its own integrity checker. The routine is FBNTEG and should be used after the installation of a patch to verify that the patch was installed correctly. Integrity values will be supplied in the patch module.

Obsolete Options

The following options may be deleted.

FBAA VENDOR CLEANUP FBAA MRA VENDOR ADD FO

Resource Requirements

Formula for TUs: (# of FEE patients/160,000) + .04 = TUs needed

Storage requirements:

Initial:	.004 Mbytes/FEE patient
Additional:	(# of inpatient invoices X 435)/1,000,000
	(# of inpatient authorizations X 700)/1,000,000
	(# of unauthorized claims X 630)/1,000,000

Equipment requirements: Increase from Fee Basis version 3.0 for inpatient invoices for Fee 5010 EDI provider data, # of inpatient invoices X 335 is now X 435 for FB*3.5*133

Implementation and Maintenance

There are several parameters associated with the Fee Basis package that are site configurable. Each of these parameters may be set through the Supervisor Main Menu using the Site Parameter Enter/Edit option. The following is an example of what might appear on the screen while using the Site Parameter Enter/Edit option. User responses are shown in boldface type. Descriptions of the site configurable parameters begin on the following page.

Select Site:

Site Configurable Parameters

STATION OF JURISDICTION NAME: - The name of the Clinic of Jurisdiction for which these site parameters are defined. There can be only one entry in this file.

STATION ADDRESS LINE 1: - Street address line 1 of this COJ. This data will be printed on the authorization, VA Form 10-7079.

STATION ADDRESS LINE 2: - Street address line 2 of this COJ. This address line will also print on the authorization, VA Form 10-7079.

STATION ADDRESS LINE 3: - Line 3 of the COJ's street address.

CITY: - The city in the COJ's mailing address.

STATE: - The state in the COJ's mailing address.

ZIP: - Zip code for the COJ.

STATION TELEPHONE NUMBER: - The telephone number to which Fee Basis inquiries should be directed.

APPROVING OFFICIAL FOR 7079: - The name of the approving official authorizing Fee Basis services. This name will be printed on the authorization, VA Form 10-7079.

TITLE OF APPROVING OFFICIAL: - The title of the approving official. This title will be printed on the authorization, VA Form 10-7079.

MEDICAID DISPENSING FEE: - The dollar amount of the Medicaid dispensing fee for this COJ. Dispensing fees, which are approved by Medicaid, vary from COJ to COJ.

MEDICAL PAYMENT VENDOR DISPLAY: - This parameter is used to indicate whether the vendor's demographic data will be displayed and made editable during the entering of a medical payment.

PHARMACY PAYMNT VENDOR DISPLAY: - If there is a "Y" in this field, the vendor demographics will be displayed during the Enter Pharmacy Invoice option.

Site Configurable Parameters, cont.

DEFAULT AUTH. TIME RANGE: - The number of days of the usual long-term authorization. The data entered here will be added to the Authorization From Date and that date will become the default To Date for the authorization. For example, if the normal long-term authorization is one year, 364 would be entered in this parameter.

ASK VENDOR DURING AUTH.: - A "YES" response results in asking for a vendor when using the Enter Authorization option.

MAX # PAYMENT LINE ITEMS: - The maximum number of payment line items that will be allowed in a batch. Any number between 1 and 100 is acceptable. This value is checked during the Enter Payment options and will warn the clerks when they are within 20 of the maximum. It will prevent the clerks from exceeding this number.

EDIT AUTH. DURING PAYMENT: - This field is used to indicate that editing of the AUTHORIZATION REMARKS field and the 3 DX fields is allowable during the Enter Payment options. It is normally used for six months immediately after installing the Fee Basis software because the Remarks and DX data were not available for downloading from Central Fee system.

*ASK PROGRAM SPECIFIC AUTH.: - A "YES" answer to this site parameter will show only those authorizations that are program-specific. An example would be the display for selection of only Community Nursing Home authorizations when entering CNH payments.

APPROVING OFFICIAL FOR 7078: - The default approving official for VA Form 10-7078s.

TITLE 7078 APPROVING OFFICIAL: - The title of the default approving official for VA Form 10-7078s.

COPIES OF 7078 TO BE PRINTED: - Indicates the default number of copies to be printed for each VA Form 10-7078 generated.

PSA DEFAULT INSTITUTION: - The station number for the transmission of data to Austin is determined using this field. In almost all cases, your facility should be entered.

7078 DEFAULT AUTH SERVICE TEXT: - A free text entry for special remarks, instructions, etc. pertaining to the authorization, which will appear in Section 6 of VA Form 10-7078.

TRACK INCOMPLETE UNAUTHORIZED CLAIMS?: - This field indicates whether or not incomplete unauthorized claims should be tracked. Enter "YES" to track incomplete claims; otherwise only complete claims can be tracked. The response is a numeric character, with 1 equal to "YES" and 0 equal to "NO".

Site Configurable Parameters, cont.

'INITIAL ENTRY' STATUS FOR U/C: - If this field is filled in, then minimum data is required for entering an unauthorized claim. This is designed for sites who have streamlined their workload, where only one user enters the unauthorized claims received and another reviews the claim for completeness and makes the necessary requests, etc. The response is the numeric character 1 to activate; otherwise, leave this field blank.

UNAUTHORIZED CLAIM PRINTER: - Select a printer device name. NOTE: This is not a pointer field. The exact name must be entered.

UNAUTHORIZED CLAIM LETTER: - Indicate how you wish your unauthorized claim letters to print. Enter an "A" if the Unauthorized Claim Printer is dedicated, and you always wish a letter to print when it has been changed to the appropriate status. Enter a "B" if the Unauthorized Claim Printer is not dedicated, or you wish to batch print letters of claims which have changed to the appropriate status. Do not enter anything if you will be manually generating your own form letter.

NUMBER OF COPIES: - This field indicates the number of copies of a letter to be printed. The maximum number of copies allowed is five.

PRINT U/C ON LETTERHEAD?: - No entry is necessary if you will not be printing letters. Enter the numeric character 1 if your site will be printing unauthorized claims letters on letterhead.

STATION NAME (EDITABLE): - This is the first line of the return address. The data is pulled from Field #.01 and can be edited at this prompt.

Site Parameters Not Edited by Users (edited by routines):

FPPS TRANSMIT START: - This is the start date and time for the beginning of the FB FPPS TRANSMIT menu option. This value will be auto-populated by the menu option to help track when the last time a batch was started. FB*3.5*121.

FPPS TRANSMIT END: - This is the finish date and time for the FB FPPS TRANSMIT menu option. This value will be auto-populated by the menu option to help track when the last time a batch finished. FB*3.5*121.

*Will be deleted in future version

Callable Routines

For IFCAP

Routine Function Call: \$\$HDR^FBAAUTL3()

This call returns the header necessary for the 994 code sheets in IFCAP (FEE for IFCAP V. 4.0 or FEN for IFCAP V. 5.0).

Routines to Map

It is recommended that the following routines be mapped.

FBAAAUT	FBAACO*	FBAACCB*	FBAACIE	FBAADEM*	FBAAEP*
FBAAMP*	FBAAOB	FBAAPI	FBAAPIE*	FBAASCB*	FBAAUTL*
FBAAVD*	FBCH78*	FBCHREQ*	FBCHSCB	FBMRA*	FBNHEA*
FBNHED*	FBNHEP*	FBNHPC	FBNHRAT	FBNHRC	

NOTE: Routine FBAAVD* should be mapped only if the vendor demographics will be displayed during the payment process. Vendor demographics will be displayed only if set to do so through the Site Parameter Enter/Edit option which is in the Supervisor Menu.

Non-Menu Diagram Exported Options

The following options do not appear on the menu but are exported with the package.

• FBAA MRA PURGE AUTO

This option is taskable and will purge transmitted MRAs. It should be used <u>only</u> when you are sure Austin has received your MRA transmissions, since use of this option will prevent retransmission of MRAs. Upon successful completion of the purge, a mail message will be sent to a mail group confirming the purge specifics. Remember to add a mail group to the FBAA PURGE TRANSMITTED MRA'S bulletin.

• FBAA MRA SERVER This server processes all incoming MRA messages received from Austin through MailMan.

• FBAA PAID SERVER

This server processes incoming payment information sent from FMS. The job will run in the background and will send a bulletin to the FEE mail group upon completion. The bulletin will detail the number of vendors found for each action type taken. FB*3.5*121 the message length from Central Fee is changing to 138 characters. The FBPAID and FBPAID1 routines were modified to accept either length (existing 82 or new 138 character) messages. See Appendix B for the 138 character message format.

• FBUC QUEUE BATCH PRINT If your letters are not automatically printed, and you choose not to use the Batch Print Letters option in the Letters for Unauthorized Claim submenu, this option should be run at least once a day.

• FBUC ABANDONED

This option is to be queued to run nightly. A device needs to be specified. It will search the FEE BASIS UNAUTHORIZED CLAIMS file (#162.7) for those claims that have the status of INCOMPLETE UNAUTHORIZED CLAIM or APPEAL/ISSUED STATEMENT OF CASE.

If the expiration date for these claims is met, the claim will be dispositioned to ABANDONED. A printout of those claims which were updated will print to the specified device.

• FB FPPS MONITOR (FB*3.5*122)

This option should be queued to run nightly after the FP FPPS TRANSMIT option has completed it's nightly run. It checks two new parameters in the FEE BASIS SITE PARAMETERS (#161.4) file to verify that the transmit option is being run in a timely manner (e.g. daily) and sends messages to G.FEE (local VistA users) and <u>Fee.EDI Issues@va.gov</u> (Purchased Care Business office) to alert users that payment data is has not been sent. This option may also be run interactively to check the status of the transmit option and can be added as a Fee user's (e.g. Fee Administrator) secondary menu option. Running the option interactively does not send messages to any mail group.

Archiving and Purging

Archiving

There are currently no archiving capabilities within the Fee Basis package.

Purging

The Fee Basis package allows the user to purge transmitted delete type and reinstate type MRAs through the Purge Transmitted MRAs option under the Supervisor Main Menu of the Medical Fee Main Menu. A site may elect to run this purge manually through use of this option, or have the purge automatically run through a background task by setting up the FB MRA Purge Auto option through TaskMan. It will effectively purge the delete type and reinstate type MRAs automatically and forward a bulletin to the FEE mail group upon completion.

It should be noted that change type and add type MRAs will no longer be purged through use of these options. They will be cleaned up automatically upon confirmation from Austin on each respective transaction.

Contained in Version 3.0 of Fee Basis is a purge routine called FBAABPG. This routine should only be used when batch numbers exceed 99000 and prior to the site reaching number 99999 as the next available batch number. This information is found in the FEE BASIS SITE PARAMETERS file (#161.4), Field #10.

A system backup should be completed prior to the execution of the purge routine. To initiate the purge, you will be prompted for a cutoff date. This date has to be in the past. All batches FINALIZED prior to this date and having no rejects pending will be purged from the FEE BASIS BATCH file (#161.7). All pointed to fields will be deleted as well as any cross-references which use the batch number. Below is a list of files which contain fields which could be affected by the purge.

FILE NUMBER FILE NAME

162	FEE BASIS PAYMENT
162.1	FEE BASIS PHARMACY INVOICE
162.5	FEE BASIS INVOICE
163	FEE BASIS MEDICAL DENIALS
163.1	FEE BASIS PHARMACY DENIALS

After the purge is complete, the number of batches purged and the To Date will be displayed. Also shown is the FBAA BATCH PURGE bulletin triggered to any mail group entered in the BULLETIN file for this message.

Since there will be a number of sets and kills made to global nodes during this purge, it is important to consider JOURNAL media requirements.

This purge may take a considerable amount of time; therefore, it is recommended the routine be run during off-hours.

The FBAABPG routine will not free up a large amount of disk space. With DUZ and DT set as well as DUZ(0)="@" in programmer mode, do the following.

```
>
>D ^FBAABPG
```

The following is an example of the prompts and steps involved in executing the FBAABPG routine. User responses appear in boldface type.

This option is used to purge Fee Basis batch numbers for a time frame in the past. Do you want to continue? SAMUELS, SARA has run the Fee Batch Number purge routine. The batches were purged on 08/11/93. All batches that were finalized prior to 01/01/93 were purged. The total number of batches purged was 21.

External Relations

1. In order to run this package, your facility must be running a minimum of the following.

VA File Manager V. 20.0 NEW PERSON file (#200) Kernel V. 7.1 Kernel Toolkit V. 7.2 IFCAP V. 4.0 Fee Basis V. 3.0 (if previously running Fee Basis) PIMS V. 5.3 Integrated Billing V. 2.0 CPT V. 5.0

The DHCP Fee Basis software product is fully integrated with Version 20.0 of VA FileMan and Version 7.1 of the Kernel. Version 3.5 is also integrated with the 1358 module of IFCAP. When outpatient batches are released for payment, there will be a posting to the appropriate 1358. For inpatient batches, the estimated amount from the VA Form 10-7078, as well as the actual amount, will be posted to the 1358 when batches are released for payment. The Fee Basis package interfaces with the ADT (Admission-Discharge-Transfer) DHCP module of the PIMS (MAS) package to provide users access to registration data entered through ADT options. Integration with the PTF (Patient Treatment File) module of PIMS allows for the creation of non-VA PTF records. Integration with CPT V. 5.0 allows for entry of modifiers for CPT codes. The package also integrates with the Integrated Billing (IB) package for patient insurance data.

In order to make an entry in the NEW PERSON file (#200), the user must hold the XUSPF200 security key.

2. Fee Basis V. 3.5 custodial integration agreements.

IFCAP (DBIA #287)

Fee Basis provides IFCAP with a way to determine Fee codesheet headers.

Clinical Reminders (DBIA #5619)

3. Fee Basis V. 3.5 subscriber integration agreements.

IFCAP (DBIA #s: 43, 315-A, 315-B, 315-C, 5573, 5574) IFCAP provides Fee Basis with the following.

- Gets the IFCAP station number and uses it to determine whether an obligation number entered by the user exists in IFCAP.
- Returns all accounting numbers and symbols.
- Posts transactions to 1358.
- Determines whether a 1358 is open and available for posting.
- Verifies that a user can certify without violating 1358 segregation of duty. FB*3.5*117

• Returns the events and actors for a 1358 obligation. FB*3.5*117

Registration (DBIA #s: 64, 186-C, 226-A, 226-B, 226-C, 226-D, 226-E, 226-F, 1011) Registration provides Fee Basis with the following.

- Look-up to the BENEFICIARY TRAVEL MODE OF TRANSPORTATION file (#392.4).
- Look-up to the PERIOD OF SERVICE file (#21).
- A call into the routine to create a PTF record.
- Calls to determine Category C status.
- A call into the registration routine.
- A call to display rated disabilities.
- A call to determine last Means Test for a patient.
- Ability to add insurance company information to the PATIENT file (#2).
- A routine to transmit records to a remote location.

Integrated Billing (DBIA #s: 228-A, 228-B, 396)

Integrated Billing provides Fee Basis with the following.

- Look-up to the PLACE OF SERVICE file (#353.1).
- Look-up to the TYPE OF SERVICE file (#353.2).
- Ability to add insurance information.

Kernel (DBIA #s: 290-A, 290-B)

Kernel provides Fee Basis with the following.

• Ability to reference the DEVICE (%ZIS(1)) and TERMINAL TYPE (%ZIS(2)) files.

DRG Grouper (DBIA #s: 993-A, 993-B, 1010)

DRG Grouper provides Fee Basis with the following.

- Look-up on the "AFEE" cross-reference in the PTF file (#45).
- Look-up to the PTF CLOSE OUT file (#45.84).
- Look-up to the PTF RELEASE file (#45.83).

Internal Relations

Any Fee Basis option in File #19 should be able to run independently provided the user has the appropriate keys.

Package-wide Variables

All variables associated with the Fee Basis package are of equal importance. There are no package-wide variables associated with this package.

How to Generate On-Line Documentation

This section describes some of the various methods by which users may secure Fee Basis technical documentation. On-line technical documentation pertaining to the Fee Basis software, in addition to that which is located in the help prompts and on the help screens which are found throughout the Fee Basis package, may be generated through utilization of several Kernel options. These include but are not limited to %INDEX; Menu Management, Inquire option and Print Option File; VA FileMan, Data Dictionary Utilities, List File Attributes.

Entering question marks at the "Select ... Option:" prompt may also provide users with valuable technical information. For example, a single question mark (?) lists all options which can be accessed from the current option. Entering two question marks (??) lists all options accessible from the current one, showing the formal name and lock for each. Three question marks (???) displays a brief description for each option in a menu while an option name preceded by a question mark (?OPTION) shows extended help for that option, if available.

For a more exhaustive option listing and further information about other utilities which supply on-line technical information, please consult the DHCP Kernel Reference Manual.

%INDEX

This option analyzes the structure of a routine(s) to determine in part if the routine(s) adhere(s) to DHCP Programming Standards. The %INDEX output may include the following components: compiled list of Errors and Warnings, Routine Listing, Local Variables, Global Variables, Naked Globals, Label References, and External References. By running %INDEX for a specified set of routines, the user is afforded the opportunity to discover any deviations from DHCP Programming Standards which exist in the selected routine(s) and to see how routines interact with one another, that is, which routines call or are called by other routines.

To run %INDEX for the Fee Basis package, specify the following namespaces at the "routine(s) ?>" prompt: FB*.

Fee Basis initialization routines which reside in the UCI in which %INDEX is being run, as well as local routines found within the Fee Basis namespace, should be omitted at the "routine(s) ?>" prompt. To omit routines from selection, preface the namespace with a minus sign (-).

INQUIRE OPTION

This Menu Management option provides the following information about a specified option(s): option name, menu text, option description, type of option and lock, if any. In addition, all items on the menu are listed for each menu option.

To secure information about Fee Basis options, the user must specify the name or namespace of the option(s) desired. The namespace associated with the Fee Basis package is FB.

PRINT OPTION FILE

This utility generates a listing of options from the OPTION file. The user may choose to print all of the entries in this file or may elect to specify a single option or range of options. To obtain a list of Fee Basis options, the following option namespace should be specified: FB.

LIST FILE ATTRIBUTES

This VA FileMan option allows the user to generate documentation pertaining to files and file structure. Utilization of this option via the "Standard" format will yield the following data dictionary information for a specified file(s): file name and description, identifiers, cross-references, files pointed to by the file specified, files which point to the file specified, input templates, print templates, and sort templates. In addition, the following applicable data is supplied for each field in the file: field name, number, title, global location, description, help prompt, cross-reference(s), input transform, date last edited, and notes.

Using the "Global Map" format of this option generates an output which lists all cross-references for the file selected, global location of each field in the file, input templates, print templates, and sort templates. For a comprehensive listing of Fee Basis files, please refer to the File Section of this manual.

Appendix B – Transmission Mappings from Central Fee

Definition of the interface between Central Fee and VistA Fee Basis. Central Fee sends a nightly Payment Confirmation file to VistA Fee Basis using MailMan. The following table defines the field/element Description in the fixed length message. Note: Fields from the mail message are filed to three different Fee Basis files in VistA depending on the Fee Program (FEE-PGM) fields in the message.
