# Remove IFCAP Item Description from 2319 Release Notes

## Patch RMPR\*3\*99 Overview

---

### Introduction

Patch **RMPR\*3\*99 (Remove IFCAP Item Description from 2319)** was developed for Prosthetics to provide an interim solution for the continuation of the National Item File (NIF) data cleansing effort.

On the national level, the IFCAP Item file is pulled from each facility's database and merged into a VISN database. Then the VISN's NIF team reviews the Items and edits, deletes and adds descriptions (which are considered to be the "*data cleansing*" process).

If the IFCAP Item (at the national level) was a Prosthetic Item that was changed, added or deleted, then the Prosthetic Patient Treatment Record (2319) was historically being changed to match the data cleansing changes.

Patch RMPR\*3\*99 prevents the Prosthetic 2319 from historically being changed when data cleansing happens. This patch protects the **PROSTHETICS ITEM DESCRIPTIONS** in our Prosthetic 2319 from being overridden when the NIF make changes to the **IFCAP DESCRIPTIONS**.

---

### Patch RMPR\*3\*99 changes

Patch RMPR\*3\*99 affects multiple **Prosthetics Menu** options. All three types of the Prosthetics 2319 have changes including:

- 1) Roll and Scroll
- 2) Read Only Roll and Scroll
- 3) GUI 2319 from the Delayed Order Report (DOR) application.

This patch will change the Prosthetics 2319 *Appliance Transactions* and *Home Oxygen Items*, switching the **IFCAP Item Description** to the **HCPCS Description** display.

---

### Note to IRM

There is no new .EXE file to install. All the changes are M routines and a new cross reference in File 660. The **IFCAP Item Description** will remain in the database until phase 2 of the NIF implementation.

This is the menu option name that IRM references: **RMPR VIEW 2319 READ ONLY**.

**Note:** Please read these Release Notes for further information.

---

*Continued on next page*

## Patch RMPR\*3\*99 Overview, Continued

---

### No HCPCS entered prior to 1997

Since HCPCS codes were not used prior to 1997, you will continue to see the **IFCAP Item Description** that was selected at that time. This is considered to be protected data and will not change.

Even though the **Appliance Transaction (Screen 4)** column heading displays **HCPCS** (in the Roll and Scroll), the information will continue to display the original **IFCAP Item Description** for those transactions entered prior to 1997.

Even though the GUI version of the **Appliance Transaction (Tab 4)** displays **Item** as the column header, it is actually the **IFCAP Item** for those transactions entered prior to 1997. The column heading was **not** changed to **HCPCS**.

---

## NIF IFCAP Changes in the 2319 (Roll and Scroll)

### 2319 Roll and Scroll changes

Access the **Prosthetics Official's Menu** option, **Display/Print Patient 2319 (23)** to view the **Appliance Transactions (Screen 4)** or **Home Oxygen (Screen 8)**. Below are the sample screens for the Roll and Scroll 2319 that were affected by the NIF IFCAP changes.

### Display/Print Patient 2319 Menu (23)

```
Select Prosthetic Official's Menu Option: DD <Enter> Display/Print

23   Display/Print Patient 2319
TI   Transaction Inquiry
IP   Print All Prosthetic Items
BI   Print Prosthetic Billings for MAS
IH   Item History
SE   Search for Recalled Item
SI   Site Parameter Inquiry
VI   Vendor Inquiry

 Enter RETURN to continue or '^' to exit:

**The Item Description is new!!**

**Remarks**

If you enter a specific note in the **Remarks** field, it will be easier to locate it to identify it for future Item needs. The note displays on Screen 4 below the transaction.

**Item Description / Appliance prompt**

The **IFCAP Item Description** field display above is new. This is the field you should review to determine which **Prosthetic Item** was provided to the patient. You should no longer review the **Appliance** field. When the **Item Description** and the **Appliance** field are identical (as shown above), then the “new note” that is described on the next page will not appear. See next page.

*Continued on next page*

## NIF IFCAP Changes in the 2319 (Roll and Scroll), Continued

**Item  
Description  
NEW Note**

With Patch RMPR\*3\*99, whenever an **IFCAP Item Description** has been changed, edited or deleted, you will see a new note under this field as follows:

**\*\*\* See Above for Original Item Description \*\*\***

Due to the data cleansing, the **Appliance** field (which was the original Item selected) has a new description and the original description is now the **Item Description** field.

**After Patch  
Install - Item  
Description  
with NOTE**

## Next Step

Click the **View Detail** button at the bottom of this window to display the **Appliance Transaction Detail** window and proceed to the next page.

*Continued on next page*

# GUI 2319 Button on DOR Menu – Appliance Transactions (Tab 4), Continued

**Appliance Field** The **Appliance** field listed in the **Transaction Detail** window below is protected from changes to IFCAP (from the NIF group’s data cleansing).

The example below, “Wheelchair 9000XT 18-inch” in the **Appliance** field will remain the same with Patch RMPR\*3\*99.

**Note:** The **Appliance** field below will always display the originally selected **IFCAP Item Description**. The new “**Item Description**: field in Roll and Scroll and the new note “*See Above...*” is not necessary in the GUI 2319. This is because the GUI 2319 **IFCAP Item Description** will always be displayed and protected from changes.

**Transaction Detail window**

The screenshot shows a window titled "Transaction Detail" with the following sections:

- Appliance Item:** Appliance: fwHEELCHAIR 9000XT 18-INCH; Description: 9000XT 18" Recliner Wheelchair; HCPCS: J0003 Qty: 1; HCPCS Desc: LIGHTWEIGHT WHEELCHAIR; ICD-9 Code: 203.00 CPT Modifier: NU Disability: SC/OP; Invent Point: ; Source: COMMERCIAL; Deliver To: Ink medical Completion Date: JAN 08, 2003; Recv Stat: ; Return Stat: ; Remarks: ;
- Lab:** Order #: ; Completed: ; Tech: ; Lab Cost: ; Material Cost: ; Labor Hrs: ; Labor Cost: ; Ortho Code: ; Restor Code: ;
