# 1 Introduction

The Electronic Claims Management Engine (ECME) generates electronic claims in National Council for Prescription Drug Programs (NCPDP) V. 5.1 and D.0 formats, based on the Outpatient Pharmacy V. 7.0 workflow. ECME:

- Allows pharmacy claims processing staff to submit, resubmit, and reverse electronic claims;
- Provides reports for end users and management on claims status, transaction history, and system configuration standings;
- Allows Automated Data Processing Application Coordinator (ADPAC) and Information Resources Management Service (IRMS) staff to configure ECME to pharmacy site specifications.
- Allows Eligibility Inquiry and Verification transactions for verification of valid patient pharmacy insurance.

ECME claims processing begins when events within Outpatient Pharmacy V. 7.0 meet specific criteria, based on Integrated Billing (IB) V. 2.0 determination, that indicate the system should generate an electronic claim. To build a claim through ECME, several conditions must be met. First, the patient must be registered and have pharmacy prescription insurance coverage. Second, the patient must be a non-service connected patient or, if service connected, the prescription must not be for the service connected condition. The patient must not have an environmental indicators condition. Finally, the drug must be billable. Logic embedded within ECME manages the creation of the electronic claim, which requires integration with IB V. 2.0, Pharmacy Data Management, and National Drug File (NDF) V. 4.0. ECME also generates claims during Consolidated Mail Outpatient Pharmacy (CMOP) V. 2.0 processing for prescriptions that meet billing requirements.

The Veterans Health Administration (VHA) developed ECME software in order to comply with the Health Insurance Portability and Accountability Act (HIPAA) of 1996 and updated it to comply to the HIPAA rule of 2009, which requires health care providers to electronically transmit outpatient pharmacy prescription claims to payers in the NCPDP format and to receive responses on a real-time basis. ECME is derived from the Point of Sale (POS) Application developed by the Indian Health Service (IHS) and is assigned to the BPS namespace.

The ECME User Manual helps users submit electronic claims, aids ADPAC and IRMS staff in configuring ECME to pharmacy site specifications, and is a reference manual for all screens and options within ECME. While the ECME User Manual does explain how to use the Electronic Management Claims Engine, it is not intended to show how ECME interacts with Outpatient Pharmacy V. 7.0, IB V. 2.0, the Austin Information Technology

Center, and other software packages to build, submit, receive, and process an electronic claim.

The ECME User Manual assumes that you are familiar with the VistA computing environment, including the Outpatient Pharmacy V. 7.0 workflow and the Department of Veterans Affairs (DVA) FileMan data structures and terminology.

The ECME User Manual consists of the following sections.

- **ECME Introduction:** Outlines the history, use and intent of the ECME software.
- **ECME Orientation:** Shows how to use the menus and options to generate an electronic claim, obtain online help, and find related manuals.
- **ECME Menu Structures:** Lists the complete ECME menu structure. It also lists the ECME User, Manager, and Reports menus.
- **Accessing the ECME Menu:** Describes how to gain access to the ECME main Menu.
- **Accessing the ECME User Screen:** Describes the elements of submitting pharmacy claims to insurers through the ECME system.
- **Accessing the ECME PHARMACY COB menu:** Describes the elements of submitting pharmacy claims to secondary insurers and submitting TRICARE claims.
- **Accessing the Pharmacy ECME Manager Menu:** Describes electronic claims management features that require management level decisions.
- **Accessing the Pharmacy Electronic Claims Reports:** Describes the reports generated by ECME.
- **ECME Background Jobs:** Describes the tasks performed by the Nightly Background Job.
- **Glossary:** Defines common ECME-related terms.
- **Acronyms:** Lists ECME-related acronyms.
- **Index:** Lists subjects, options, and menus alphabetically.

## 2 Orientation

### 2.1 Working with the ECME User Manual

The Electronic Claims Management Engine (ECME) User Manual is a menu- and option-oriented manual. In most cases, the manual describes a menu or option, shows how to access it, and uses tables and screen shots to describe its fields.

The ECME User Manual uses the following methods to enhance readability.

- Menu options and screen actions are italicized.  
**Example:** The *Continuous Update* action redisplay the ECME User Screen.
- Screen prompts are denoted with quotation marks around them.  
**Example:** The “Select Action:” prompt will display next.
- Variable names, formal name of options, field and file names, and security keys are completely uppercase.  
**Example:** The BPS USER key.
- Screen captures/dialogues are shaded and shown in a non-proportional font.

(A) User responses to online prompts are in boldface type.

**Example:**

```
Select Pharmacy ECME User Menu Option: RPT
```

(B) <Enter> indicates you must press the Enter key (or Return key) on the keyboard to proceed to the next prompt. Other keys are represented within < > angle brackets.

**Example:** Select Pharmacy ECME Manager Menu Option: ?<Enter>

- The following symbols alert you to special information.

Symbol	Description
	Cautions you to notice critical information.
	Indicates especially important or helpful information.
	Indicates that you must hold a particular security key to perform a specific task. <b>Example:</b>  You must hold the BPS MANAGER and BPS MENU keys to access the <i>Pharmacy ECME Manager Menu</i> options.

## 2.2 Obtaining Online Help

The ECME software provides online help and commonly used system default prompts. You can enter question marks at any response prompt. At the end of the help display, VistA (Veterans Health Information Systems and Technology Architecture) immediately returns you to the point from which you started.

To retrieve Online Help in any VistA character-based product:

- Enter a single question mark (?) at a field/prompt to obtain a brief description:
  - (A) If a field is a pointer, entering one question mark (?) displays the HELP PROMPT field contents and a list of choices, if the list is short.
  - (B) If the list is long, the system will ask you if the entire list should be displayed. A Y(ES) response will invoke the display. By prefacing the starting point with an up-arrow (^) as a response, you can give the display a starting point. For example, ^M starts an alphabetic listing at the letter M instead of the letter A while ^127 starts any listing at the 127th entry.
- Enter two question marks (??) at a field/prompt for a more detailed description. If a field is a pointer, entering two question marks displays the HELP PROMPT field contents and the list of choices.
- Enter three question marks (???) at a field/prompt to invoke any additional Help text stored in Help Frames.

### 3 ECME Menu Structures

This section provides a map of the Electronic Claims Management Engine (ECME) menu structure including a list of all options. ECME is a menu-driven system that allows access based on the security keys that you hold.

Currently, ECME has the following security keys: BPSMENU, BPS USER, BPS MANAGER, BPS MASTER, and BPS REPORTS. All users must have the BPSMENU key in addition to the specific keys listed below.

The following table lists the type of users who would need access to a specific menu and the ECME Security Keys you must hold in order to access a particular ECME menu. For example, the OPECC (Outpatient Pharmacy Electronic Claims Coordinator) would need access to all ECME menus, while a Pharmacy Technician might only need access to the Main Menu, ECME User Screen, and Reports menus.

**Table 3-1: List of Users with Suggested ECME Menus and Security Keys**

# 5 Accessing the ECME User Screen

The *ECME User Screen* provides access to pharmacy claims that have been submitted electronically to third party payers/Pharmacy Benefit Managers (PBMs). This option allows you to review, close, reverse, or resubmit electronic claims.

From the ECME User Screen you can access additional actions needed to process electronic pharmacy claims, including the *Further Research* action, which allows you to research insurance, eligibility and prescription information.

You must hold the BPSMENU AND BPS USER key to view the ECME User Screen option.

This screen is accessed by selecting the **U** (ECME User Screen) option on the ECME Main Menu screen.

The screen will display nothing the first time you enter this menu option. Select the Change View option, **CV**, as in section 5.3, and specify preferences to be displayed on the screen. The system will then default to these settings and display current information about active patients and prescriptions for the time frame requested.

The Prescription line(s) follow the patient information lines sequentially. For each fill, an ECME claim is sent to the payer and each of these claims is displayed as a separate line on the User Screen (ECME User Screen).

Drug Name	NDC	FILL	RX#	Copay	Refill/ECME#
COLCHICINE 0.6MG	00074-3781-01	06/24	101297	\$ 1	/000000001653

LOC	/BillTYPE	/RXStatus	/Release Status
M/	RT/	DS	/N

These show for each claim:

- Drug Name
- NDC (National Drug Code)
- Fill/Refill Date
- Rx#
- \$ Patient Copay (if applicable)
- Refill#
- ECME#
- Fill Location
  - C = Consolidated Mail Outpatient Pharmacy (CMOP)
  - M = LOCAL MAIL
  - W = WINDOW FILL
- Bill Type
  - BB = Backbill
  - RT = Real Time Fill
- RX Status
  - AC = Active
  - NV = Non-verified
  - HL = Hold
  - SU = Suspend
  - EX = Expired
  - DS = Discontinued
  - DL = Deleted
  - ?? = Unknown
- Release Status
  - N = Rx NOT Released
  - R = Rx Released
- Coordination of Benefits Indicator
  - p- primary claim
  - s- secondary claim
  - s-Payable (p-Payable)

The status is displayed only for those fill lines (claims) that represent the most recent fill. If there is more than one fill for the same prescription within the time frame requested in the ECME User Screen parameters, the previous refill/claim is indicated with "\*\*\*\*" instead of Rx status, and the most current fill will display the RX status. If a fill has been created and put on suspense, the screen displays "\*\*\*\*".

	<i>User-Input Comments</i>	The system allows the ECME user to enter comments for any claim displayed on the ECME User Screen. The most recent comment is displayed under the Prescription Information line.
	<i>Payer Returned Responses</i>	The Payer Returned Response information is displayed beneath the user-input comments or beneath the patient information line, if no comments were entered. Each response will begin on a separate line. Valid payer-returned responses include Rejected (with a National Council for Prescription Drug Programs (NCPDP) rejection code described in the ePharmacy Rejects & Resolutions Guide on the <a href="#">e-Pharmacy Training Home Page</a> , with additional lines of descriptive error messages), Payable, Reversal Accepted, Reversal Rejected, Stranded, Stranded reversal, Captured, Duplicate, Other, Cancelled, Corrupt, Unknown status and In Progress. If a claim is closed, "Closed" is added to the status, e.g., "Reversal accepted/Closed".
<b>Message Window</b>		This section displays a plus (+) sign, minus (-) sign or informational text (i.e., Enter ?? for more actions). The plus and minus signs, entered at the action prompt, are used to jump forward or back a screen.
<b>Action Area</b>		A list of <i>Claims Data Entry</i> options is available to you as described in Section 5 of this manual. A double question mark (??) may be entered at the "Select Action" prompt for a list of all List Manager options available.

	An option chosen at the patient information level is performed on all claim items for that patient.

The ECME User Screen has several actions that help you navigate it, as shown below. Actions are entered at the "Select Action" prompt by typing the synonym for the action (e.g., **CV** for *Change View*), the first unique letter(s) of the action name (e.g., **CL** for *Close*) or the full name of the action (e.g., **Sort List** for *Sort List*).

## 5.5 Reverse Payable Claim

The *Reverse Payable Claim* action allows a user to submit a claim reversal request to the insurer for a claim that was returned as “Payable” or “Reversal Rejected”. A primary claim cannot be reversed if there is a payable secondary claim. The secondary claim must be reversed before the primary claim can be reversed.

Claims that have been closed will be displayed with “/Closed” after the status. Closed claims cannot be reversed until they are first reopened. If you attempt to reverse a claim that is closed, a message is displayed telling you that the claim “is Closed and cannot be Reversed. Reopen the claim and try again.”

Access the action by entering **REV** at the “Select Action:” prompt on the ECME User Screen.

(B) You are prompted for the line item of the payable claim to be reversed. Remember, if you enter the patient line number, a claim reverse request will be created for all of the payable claims for that patient.

### Example 5.5-3: Entering the Line Item for the Claim Reversal Request

```
Enter the line numbers for the Payable claim(s) to be Reversed.

If you enter **Y**, you will be prompted for a Claims Tracking Non-Billable Reason and a Comment. If the reversal is accepted by the payer, the ECME claim will be closed and a close event will then be sent to IB with the non-billable reason and comment provided by the user. IB should mark the episode as non-billable and release the first-party copay.

**5.6 Resubmit Claim**

The *Resubmit Claim* action sends a claim reversal request to the insurer, followed by a new claim for the same prescription, with the new or updated data for these conditions:

- If the claim was initially returned as “Payable”, the system sends a claim reversal request. If the payer “Accepts” the reversal request, the claim resubmission is sent. If the payer “Rejects” the reversal request, the claim is NOT resubmitted.
- If the claim was initially returned as “Rejected”, the system immediately sends the claim submission to the payer and the reversal request is NOT sent.

The Resubmit option is accessed by entering **RES** at the “Select Action:” prompt on the ECME User Screen.

#### 5.7.1 Variations to the Close claim process.

If the Non-Billable Reason selected is “OTHER”, the system prompts you with 2 choices; ”NON-BILLABLE” or “DROP TO PAPER”.

- If you select (N)ON-BILLABLE EPISODE, the Claims Tracking entry displays the Billable Episode flag = “N” with the Non-Billable Reason that you selected. Note that Billable Episode flag will be changed back to "Y" if a secondary claim is later generated and is returned as payable.
- If you select (D)ROP TO PAPER, the system stores the selected Non-Billable Reason in the Close Claim Comments, updates the Claims Tracking entry to display the Billable Episode flag = “Y”, creates the next bill date as T+1 and stores Claims Tracking comments including the initial Non-billable Reason. The next scheduled billing run will pick up this bill as long as the prescription has been released.

## 5.11 Send to Worklist

The *Send to Worklist* action allows you to send rejected claims to the Pharmacy Worklist. Depending on Pharmacy settings, all or only claims with certain reject codes may be sent to the Pharmacy Worklist from the ECME User Screen.

Claims that have been closed will be displayed with “/Closed” after the status. Closed claims cannot be sent to the Pharmacy Work List. If you attempt to resubmit a claim that is closed, a message is displayed telling you that the claim “is closed and cannot be sent to the Pharmacy Work List.”

(A) Enter **WRK** at the Select Action prompt, and a single line item for the claim you wish to send.

**Example 5.11-1: Accessing the Send to Worklist Option, and Entering a Line Item.**

### 5.13 Resubmit with Edits (hidden action)

The *Resubmit with Edits* hidden action allows you to edit previously rejected electronic pharmacy claims and to resubmit them with the edited information. The data fields that can be edited to enable resubmission are the Relationship Code, Person Code, Prior Authorization Number, Prior Authorization Type Code, up to three Submission Clarification Codes, Patient Residence Code, Pharmacy Service Type Code and/or Delay Reason Code. If the claim selected is for secondary insurance, the Coordination of Benefits information can also be edited.

The relationship code describes the relationship this patient has to the holder of this insurance policy. The standard NCPDP Patient Relationship Code list follows. However, it is important to note that some payers use their own set of codes for this field, so the field should be populated based upon the payer's expectations.

- 0 Not Specified
- 1 Cardholder
- 2 Spouse
- 3 Child
- 4 Other

The Person Code is the specific person code assigned to the patient by the payer. The Prior Authorization number is the number submitted by the provider to identify the prior authorization. For more information on the Coordination of Benefits fields, see the [Process Secondary/TRICARE Rx to ECME](#) section of this document.

Claims that have been closed will be displayed with “/Closed” after the status. Closed claims cannot be resubmitted with edits. If you attempt to resubmit a claim that is closed, a message is displayed telling you that the claim is “Closed and cannot be Resubmitted w/Edits.”

(A) Enter RED at the “Select Action:” prompt to choose the prescription line to resubmit.

## 6.1 Potential Secondary Rx Claims Report

The *Potential Secondary Rx Claims Report* is designed to help the OPECC (Outpatient Pharmacy Electronic Claims Coordinator) to identify potential Rx claims for a secondary insurance payer with pharmacy coverage, including both electronic and paper. This report will include prescription claims where the primary claim is payable or the primary claims has been rejected and closed. Below are some scenarios where a claim will not appear on the report:

- A prescription where the secondary claim is closed in ECME.
- A prescription where the secondary claim is payable in ECME.
- A prescription where the primary payer paid the full amount as there is no more revenue to collect from any other payers.

If a claim is determined to be electronically billable, the OPECC accomplishes this through the *Process Secondary/TRICARE Rx to ECME option*. If the claim must be

billed in paper format, the OPECC follows the current procedures for initiating a secondary bill with the billing staff.

- (A) Access the *Potential Secondary Rx Claims Report* by entering **SEC** at the “ECME Pharmacy COB Option:” prompt on the ECME Pharmacy COB Menu.

## 6.2 Potential TRICARE Claims Report

The *Potential TRICARE Claims Report* attempts to identify potential pharmacy claims for TRICARE payers. This report includes prescriptions that have been released, but have not yet been billed for any patient with dual eligibility (Veteran and TRICARE) who has an active insurance plan with pharmacy coverage and a Type of Plan of TRICARE. If the Claims Tracking entry for the specific prescription/fill is identified as being non-billable, then it will not appear on this report.

If a claim is determined to be electronically billable, the OPECC can submit the prescription through the [Process Secondary/TRICARE Rx to ECME](#) option. All TRICARE prescription claims must be billed electronically. TRICARE will **not** accept prescription claims submitted in a paper format.

(A) Access the *Potential TRICARE Claims Report* by entering **TRI** at the “ECME Pharmacy COB Option:” prompt on the ECME Pharmacy COB Menu.

### 6.3 Process Secondary/TRICARE Rx to ECME

The *Process Secondary/TRICARE Rx to ECME* option allows the OPECC to submit claims for prescriptions/refills that were entered for Secondary claims, TRICARE patients or patients with dual eligibility (Veteran and TRICARE). These claims are identified using the Potential Secondary Rx Claims Report and Potential TRICARE Claims Report.

This option submits the claim to the third party payer. Any further processing on the claim must then be done through the actions available on the ECME User Screen.

When processing a claim for TRICARE and dual eligibility patients, users will be asked for the patient’s name, the fill/refill number from the list provided, and an appropriate billing Rate Type. If the user selects a TRICARE Rate Type (TRICARE or TRICARE REIMB. INS.), the claim will be processed as a TRICARE claim. If the user selects a Reimbursable Insurance type, it will be processed as a regular non-TRICARE claim.

Claims can also be resubmitted using the *Process Secondary/TRICARE RX to ECME* option. Secondary Claims that are rejected by insurance companies because of missing or incorrect data received, or Primary Claims that have been rejected or reversed, may be resubmitted. This option is not intended to use for Payable claims. Payable claims must be reversed using the Reverse Payable Claim Action on the ECME User Screen before they can be resubmitted via this option. Information previously entered for the claim will appear as the defaults.

You must hold the BPSUSER key to use the *Process Secondary/TRICARE Rx to ECME* option.

- (A) Access the *Process Secondary/TRICARE Rx to ECME* option by entering **PRO** at the “ECME Pharmacy COB Option:” prompt on the ECME Pharmacy COB Menu.

- (D) The Process Secondary/TRICARE Rx to ECME (PRO) option will ask the user to select the Payer Sequence to bill (primary or secondary).
- (E) The Process Secondary/TRICARE Rx to ECME (PRO) option will ask the user if they wish to edit the insurance company data. If the user enters YES to this prompt, they will be able to edit the user's insurance via the Patient Insurance Information Screen

### 7.1.1 View/Unstrand Submissions Not Completed

This option provides you with options to override any current transmission status of claims that have not reached the point of completion to a status of “Done”.

When a claim is unstranded via this option, the status of the claim is changed to ‘E UNSTRANDED’ for billing requests and ‘E REVERSAL UNSTRANDED’ for reversals. This status message is displayed on the ECME User Screen, the Further Research menu, the Developer Log action of the ECME user screen, and the Recent Transaction report.

	<p>Even though you perform the <i>View/Unstrand Submissions Not Completed</i> option, the final adjudicating payer claim status of either 'Payable' or 'Rejected' will not be known unless further action is taken on the claim. This will require manual intervention for the claim to be resubmitted to the adjudicating payer after this option is run.</p>

(A) Enter **UNS** at the “Select ECME transaction maintenance options Option:” to access the unstrand options.

**Example 7.1.1-1: Accessing the View/Unstrand Submissions Not Completed Option**

Please be aware that if there are submissions appearing on the ECME User Screen
with a status of 'In progress - Transmitting', then there may be a problem
with HL7 or with system connectivity with the Austin Automation Center (AAC).
Please contact your IRM to verify that connectivity to the AAC is working
and the HL7 link BPS NCPDP is processing messages before using this option
to unstrand submissions with a status of 'In progress - Transmitting'.

Do you want to continue? NO//
```

(B) You will be prompted for a date range to display all stranded claims. The system will accept a date range with or without a time attached to it.

- **First Transaction Date:** If a date only is entered for a start date, the system will assume the start date is the date entered and the time will be the beginning of the 24 hour clock (.0001) otherwise the system will accept the entered time parameter.
- **Last Transaction Date:** If a date only is entered for the ending date range, the system will assume the ending of a 24 hour clock (.2359) except if you enter the current date. If you enter today’s date as the ending date of the date range, the system will automatically assign the ending time to be 30 minutes prior to the current time to ensure that you do not interrupt any transmissions that may be currently processing.

## 7.2 Pharmacy ECME Setup Menu

The *Pharmacy ECME Setup Menu* option allows the ADPAC or IRMS to configure ECME to VAMC specifications.

 You must hold the BPSMENU, BPS MANAGER, and BPS MASTER keys to view the *Pharmacy ECME Setup Menu (SET)* option.

Access the menu by entering “SET” at the “Select Pharmacy ECME Setup Menu Option:” prompt in the *Pharmacy ECME Manager Menu* option.

### Example 7.2-1: Accessing the Pharmacy ECME Manager Menu Option

#### 7.2.1 Edit Basic ECME Parameters

The *Edit Basic ECME Parameters* option allows the ADPAC or IRMS to determine how data will be input to ECME.

	This option should not be used after the initial setup unless any of the information changes for the pharmacy.
--	--

Access the menu by entering **BAS** at the “Select Pharmacy ECME Setup Menu Option:” prompt in the *Pharmacy ECME Setup Menu* option.

#### Example 7.2.1-1: Accessing the Edit Basic ECME Parameters Option

```

*****
*Electronic Claims Management Engine (ECME) V1.0*
*                XXXXXXX VAMC                *

*****

BAS    Edit Basic ECME Parameters
PHAR   Edit ECME Pharmacy Data
REG    Register Pharmacy with Austin Information Technology Center

Select Pharmacy ECME Setup Menu Option: BAS Edit Basic ECME Parameters

```

The Edit Basic ECME Parameters option allows you to enter/edit the number of seconds that the Outpatient Pharmacy application waits for a response to come back from the third party payer. As delivered, the system will have a default timeout of 10 seconds but it is up to each site to determine how long their pharmacists wait for a response from the payer. The ECME timeout can be populated once the system is installed. After this

amount of time has passed, claims processing will continue but you will not see messages indicating the process.

This option will prompt for the Default Eligibility Pharmacy. Once entered, this Pharmacy will be placed on the NCPCP Eligibility Verification request when it is initiated by the new option in IB.

	<p>One important reason for this is because of DUR (Drug Utilization Review) /79 rejects. If the payer indicates that there is a problem with the drug (e.g., overdose), the pharmacists will have to act on that response.</p>
---	---

This option also allows you to set the “Insurer Asleep” interval time and number of retries. The Insurer Asleep Interval parameter allows an input between 0 and 29 minutes with a default of 20. The Insurer Asleep Retries parameter allows an input between 0 and 99 retries with a default of 10. If either the Insurer Asleep Interval or the Insurer Asleep Retries parameter is set to 0, the functionality will be disabled. If the user does disable this functionality, any claims that are in an Insurer Asleep state will automatically be resubmitted to the payer.

Occasionally, Emdeon or the third-party payer will return a reject code indicating that the destination system is not available. As one example, the third-party payer may be down for regular system maintenance and any claims submitted during this time will be rejected. When this situation does occur, Emdeon or the third-party payer will generally return one or more of the NCPCP system processing reject codes shown in the table below. These reject codes are automatically resubmitted by ECME at the intervals specified in the “insurer asleep” parameter.

Reject Code	Explanation
90	Host Hung Up
91	Host Response Error
92	System Unavailable/Host Unavailable
95	Time Out
96	Scheduled Downtime
97	Payer Unavailable
98	Connection To Payer Is Down

### Example 7.2.1-2: Entering Edit Basic ECME Parameters

```

```

### 7.2.2 Edit ECME Pharmacy Data

The *Edit ECME Pharmacy Data* option enables pharmacy users to edit specific parameters that affect the electronic submission of third party prescription claims. The pharmacy site will use this option to control whether the transmission of prescriptions to the CMOP dispensing site will automatically submit electronic third party prescription claims to the insurance payers. This option is also where the pharmacy site will set the parameter of how many days will pass before a reversal is automatically processed for a non-released prescription.

You must hold the BPS MASTER key to view the Edit Basic ECME Parameters (BAS), Edit ECME Pharmacy Data (PHAR), and Register Pharmacy with Austin Automation Center (REG) options.

Access the option by entering **PHAR** at the “Select Pharmacy ECME Manager Menu Option:” prompt in the *Pharmacy ECME Manager Menu* option.

The following table describes the Edit ECME Pharmacy Data option fields:

**Table 7.2.2-1: Description of Edit ECME Pharmacy Data Option Fields**

<b>Entry</b>	<b>Description</b>
<b>BPS PHARMACIES NAME</b>	Pharmacy in a specific VAMC (Department of Veterans Affairs Medical Center) database. The pharmacy user may enter a new BPS pharmacy, which must be 3-30 alphabetical characters.
<b>NAME</b>	Display-only field that displays the full pharmacy name entered.
<b>NCPDP #</b>	A 7-digit number assigned to the specified pharmacy by the National Council for Prescription Drug Programs (NCPDP). It is also known as NABP.
<b>NPI</b>	National Provider Identifier. A 10-digit number required by the Health Insurance Portability and Accountability Act of 1996 (HIPAA) to identify individual and organizational providers, such as outpatient sites. The NPI has a usage requirement date beginning May 23, 2008.
<b>STATUS</b>	The status of the BPS Pharmacy is either ACTIVE or INACTIVE. The STATUS of the pharmacy may be revised through the Register Pharmacy with Austin Information Technology Center option.
<b>OUTPATIENT SITES</b>	One or more Outpatient Sites (from File 59) may be linked with a single BPS Pharmacy entry. However, an Outpatient Site can only be linked with a single BPS Pharmacy. All of the sites linked with a BPS Pharmacy should have the same NCPDP number. When an Outpatient Site is linked to an active BPS Pharmacy entry, the ECME switch for that site is considered ENABLED. If an Outpatient Site is linked to an incorrect BPS Pharmacy, it must be removed from the incorrect entry before it can be linked to the correct entry.
<b>CMOP</b>	ON if the transmission of prescriptions to the CMOP (Consolidated Mail Outpatient Pharmacy) dispensing site will automatically submit electronic third party prescription claims to the insurance payers. See note below for explanation of claims generated before and after switch is turned on or off.
<b>AUTO-REVERSE PARAMETER</b>	Enter numbers from 1 to 30 for the number of days to wait before ECME reverses non-released prescription claims with a PAYABLE payer-returned response. Entering a zero, ("0"), the default, disables the Auto-Reverse process. Each site's business practice will dictate what this value should be.
<b>DEFAULT DEA #</b>	The pharmacy's Drug Enforcement Administration (DEA) number. Many insurance companies require the prescriber's DEA number to be part of the claim. The pharmacy's DEA number will be used if the prescriber does not have one.

- An Outpatient Site is considered ECME active if the Outpatient Site is linked to a BPS Pharmacy, and if that BPS Pharmacy is ACTIVE. Once an Outpatient Site is ECME active, claims for the Outpatient Site can be transmitted to the third-party payer.
- If an Outpatient Site is activated after a claim is already sent to ECME, ECME **will NOT** generate an electronic claim.
- If an Outpatient Site is inactivated (by unlinking it from a BPS Pharmacy or by changing the STATUS field), reversals for that site will be processed but new submissions will not.

### 7.2.3 Register Pharmacy with Austin Information Technology Center

The *Register Pharmacy with Austin Information Technology Center* option allows the ADPAC to register a pharmacy with the Austin Information Technology Center and update the contact information. This registration should only be performed on initialization of the pharmacy with ECME. Once the pharmacy has been set up to use ECME, the *Edit ECME Pharmacy Data* option should be used to make any changes.

The automated registration process will send an email to the Primary Site Contact if the registration has any errors or warnings to report. The Alternate Site Contact will be used when the email address for the Primary Site contact is missing. If the alternate site contact does not have an email address, the message will be sent to the BPS OPECC mail group. In addition, if either the primary or alternate site contact is missing their email address, it will be reported as a warning during manual registration. Following is a sample email.

This option should not be used after the initial setup unless any of the information changes for the pharmacy.

You must hold the BPS MASTER key to view the Edit Basic ECME Parameters (BAS), Edit ECME Pharmacy Data (PHAR), and Register Pharmacy with Austin Automation Center (REG) options.

Access the menu by entering **REG** at the “Select Pharmacy ECME Setup Menu Option:” prompt in the *Pharmacy ECME Setup Menu* option. You must hold the BPSMENU and BPS MANAGER keys to view the *Statistics Screen* option.

Access the menu by entering **STAT** at the “Select Pharmacy ECME Manager Menu Option:” prompt in the *Pharmacy ECME Manager Menu* option.

Statistics collection begins at the moment of ECME installation and continues until either you use the **Z** (clear) action or ECME gets uninstalled. It depends on the each site's business practice as far as how often or if the stats are cleared.

## 8.2.2 Payer Sheet Detail Report Option

The *Payer Sheet Detail Report* option allows you to list the information on payer sheets used for electronic claims. Payer sheets are templates defined by each payer used to create NCPDP transmissions. The sheets indicate which fields to send in the transmissions, as well as the acceptable values that may appear in the fields. You may also express conditions for when particular values are to be used.

Access the *Payer Sheet Detail Report* option by entering **PAY** at the “Select Other Reports Option:” prompt on the Pharmacy Electronic Claims Reports, Other Reports option screen.

## 9 BPS Nightly Background Job

The *BPS Nightly Background Job* is scheduled to run daily at the sites during off-hours at intervals defined by the site staff. One of the functions of this job is to identify claims to be reversed and then to automatically submit the Reversal Request to the payer.

For inpatient claims reversals, the program will go through all WINDOW fills for the date 5 days prior to the current date (T-5) and check to see if the patient is a current inpatient. If so, the reversal would be given the reason CURRENT INPATIENT to differentiate between non-released prescriptions and inpatient reversals.

The auto-reversal process for outpatient claims is dependent on whether the site sets the Auto-Reversal parameter to anything but 0 (see Auto-Reversal parameter in the Edit ECME Pharmacy Data option on the ECME Setup menu). All non-released outpatient prescriptions that were initially returned as PAYABLE and are not currently REVERSED and have a date older than the number of days set in the Auto-Reversal parameter would be reversed.

After the *BPS Nightly Background Job* identifies claims to auto-reverse and processes the Reversal Request, the system sends a bulletin to the members of the “BPS OPECC” mail group listing both reversals from the parameter setting and the inpatient claims. This mail group needs to be created at the site and should include all OPECC resources.
