

NATIONAL DRUG FILE (NDF)

USER MANUAL

Version 4.0
October 1998

(Revised April 2011)

Revision History

The table below lists changes made since the initial release of this manual. Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. Either update the existing manual with the Change Pages document, or replace it with the updated manual.

Note: The Change Pages document may include unedited pages needed for two-sided copying. Only edited pages display the patch number and revision date in the page footer.

Date	Revised Pages	Patch Number	Description
04/2011	i-iv, 40b-d , 41a-f	PSN*4*262	Added text and screen captures for options <i>Inquire to National Files</i> [PSNACT] and <i>Inquire to VA Product Info for Local Drug</i> [PSNLOOK] to display the three new fields created by PSN*4*261. These fields reflect enhancements to prevent the inadvertent creation of supra-therapeutic possible dosages for high risk medications during the dosage creation segment of Pharmacy Data Management and National Drug File updates. Updated Table of Contents. (N. Goyal, PM; E. Phelps, Tech Writer)
04/2011	i-iii, 45-46 , 46a-d	PSN*4*263	Modifications to section on Displaying an FDA Medication Guide. New examples added. Documentation released with PSN*4*262. (T. Leggett, DM, B. Thomas Tech Writer)
05/2010	i-iv, 4, 45-46, 47, 54	PSN*4*108	Added a new option, Display FDA Medication Guide [PSN MED GUIDE]. Added a new section, Printing an FDA Medication Guide. Added FDA Medication Guide to the Glossary and Index. (T. Leggett,DM, B. Thomas Tech Writer)
02/2009	40, 40a-b, 41a-d	PSN*4*169	Updated screen captures for options Inquire to VA Product Info For Local Drug [PSNLOOK] and Inquire to National Files [PSNACT] to reflect additional data displayed and minor changes to the display. G. Tucker Dev. Mgr., V. Howell Tech Writer
09/03	iii, 4, 7, 16, 37b-37d, 53-54	PSN*4*70	- Added the new options, <i>Local Drugs Excluded from Drug-Drug Interactions</i> and <i>VA Products Excluded from Drug-Drug Interactions</i> to the Menu list and the Reports section. - Corrected the name of the DEA, SPECIAL HDLG field. - Corrected a drug name in the <i>Local Drug/VA Print Name Report</i> . - Updated the TOC and the Index with the new reports.

Date	Revised Pages	Patch Number	Description
07/03	Title Page, i, 7-10, 25-26, 41a-c	PSN*4*65	<ul style="list-style-type: none"> -Replaced the Title Page and Revision History page. -Updated introduction to include DEA/PKI changes. -Updated screen captures changed by this patch.
02/2003	Title Page, i-ii, 41d-46, 51, 52	PSN*4*62	<ul style="list-style-type: none"> -Replaced the Title Page and Revision History page. -Updated the <i>Print a PMI Sheet</i> option and example. -Updated the Glossary for the PMI Sheet term. - (Included pages for double-sided printing.)
09/2001	Title Page, i, ii, 41d,42	Developer Request	<ul style="list-style-type: none"> - Replaced the Title Page (and associated blank page) and the Revision History page (and associated blank page after it p. ii.) - The <i>Print a PMI Sheet</i> option stated that a specific vendor supplied the information for these sheets and the verbiage was changed to a “commercial vendor”.
03/2001	Title Page, i, ii, iii, iv, 4, 37a-b, 53	PSN*4*48	<ul style="list-style-type: none"> – Replaced the Title Page (and associated blank page), and pages i, ii (blank), iii, and iv (blank), which include the Revision History and Table of Contents. Pages ii and iv have no changes, but were included for two-sided printing only. – Replaced pages 4 and 53 with the new pages. Pages 3 and 54 have no changes, but were included for two-sided printing only. – Inserted pages 37A-37B, which introduce the new <i>Local Drug/VA Print Name Report</i> option. Pages 37 and 38 have no changes, but were included for two-sided printing only.
02/2000	4, 5, 6, 8, 9, 17, 34, 41, 41a-c	PSN*4*22	Added a new option called <i>Inquire to National Files</i> .

Introduction

The National Drug File (NDF) V. 4.0 software module provides standardization of the local drug files in all Department of Veterans Affairs Medical Centers (VAMCs). Standardization includes the adoption of new drug nomenclature and drug classification, and links the local drug file entries to data in the National Drug files.

For drugs approved by the Food and Drug Administration (FDA), VAMCs have access to information concerning dosage form, strength and unit; package size and type; manufacturer's trade name; and National Drug Code (NDC). The NDF software lays the foundation for sharing prescription information among VAMCs.

With this version of NDF, a new design of the NATIONAL DRUG file (#50.6) will lay the foundation for timely data releases by Pharmacy Benefits Management (PBM) personnel to field facilities using the NDF Management System. As new drug products are released, this information can be quickly sent to facilities. Pharmacy end users will be able to match (classify) a greater percentage of their local drug files for new products. Update/delivery of data will be controlled by PBM personnel. Frequent updating of NDF will be possible with minimal time for installation and downtime.

In addition to the redesign of NATIONAL DRUG file (#50.6), Version 4.0 will provide the following enhancements:

- Addition of new fields to NDF, such as National Formulary and restriction indicators.
- Lay foundation for interfaces to other Commercial Off The Shelf (COTS) software to update NDF fields for new/revised drug information.
- Update current NDF with new/revised product information.
- Creation of an Application Programmer's Interface (API) to accommodate all existing VISTA software Database Integration Agreements (DBIAs) with NDF.
- A clean-up of associated files, such as DRUG MANUFACTURER (#55.95), DRUG UNITS (#50.607), etc.
- Incorporation of approved enhancement requests by Pharmacy/Information Resources Management (IRM) end users.

Icons used to highlight key points in this manual are defined as follows:

Indicates the user should take note of the information.

Pharmacy Pre-Installation Preparation

Entering National Drug Codes

The National Drug File (NDF) software uses National Drug Codes (NDCs) in an initial automatic process of matching a drug in the local DRUG file (#50) with a drug in the National Drug files. It is important to make sure that as many drugs as possible have been assigned their correct NDCs.

The more complete and accurate the NDC fields in the local DRUG file (#50), the more effective the automatic matching process.

It is important that you enter all National Drug Codes (NDCs) in the local DRUG file (#50) using Pharmacy Data Management's (PDM) option *Drug Enter/Edit* [PSS DRUG ENTER/EDIT] before the IRM staff installs this version of the software. The correct NDC format is

Manufacturer Code	-	Product Code	-	Package Code
(1 - 6 characters)		(1 - 4 characters)		(1-2 characters)

The correct NDC format: 4-4-2, 5-3-2, 5-4-1, or 5-4-2 (e.g., 0023-2323-01)

Please note that the software ***will not*** insert the dashes in the NDC for you; therefore, you must include the dashes when you enter the information.

Using the Matching Options

Rematch/Match Single Drugs [PSNDRUG] **Synonym: REMA**

This option allows you to rematch entries that are incorrectly matched or could not be matched automatically. *Report of Attempted Match Drugs* will list those items that the software attempted to match but could not; it should be printed before this option is executed. This option may be used until all entries in the local DRUG file (#50) that can be matched have been matched. It should be used to match any new drug added to the local DRUG file (#50). This option screens for inactive date and searches the DEA, SPECIAL HDLG field (# 3) to determine if one of the following values exists in the field:

0 (zero) Manufactured in Pharmacy
I Investigational Drug
M Bulk Compound Item

You must verify all matches made with this option. Failure to verify a drug that has been matched will prevent that drug from being merged when the *Merge National Drug File into Local File* option is executed.

Example 1: Rematch Manually Classed Drugs

```
Select National Drug File Menu Option: REMA Rematch / Match Single Drugs

Enter name of drug from your local drug file and a match
with the National Drug File will be attempted.
Press return at the "Select DRUG GENERIC NAME: " prompt to exit.

The CS Federal Schedule associated with this drug in the VA Product file
represents a DEA, Special Handling code of 2A

Enter RETURN to continue...

```

A warning message displays if a discrepancy is found between entries in the CS FEDERAL SCHEDULE field and the DEA, SPECIAL HDLG field when using the *Rematch / Match Single Drugs* [PSNDRUG] option. The following warning displays: "The CS Federal Schedule associated with this drug in the VA Product file represents a DEA, Special Handling code of XX," where XX is the DEA, SPECIAL HDLG code mapped to the corresponding CS FEDERAL SCHEDULE code as shown here:

	If a drug entry has a CS FEDERAL SCHEDULE of:	And its corresponding DEA, SPECIAL HDLG field is blank, the following DEA, SPECIAL HDLG code will be inserted:
Schedule I narcotics	1	1
Schedule II narcotics	2	2A
Schedule II non-narcotics	2n	2C
Schedule III narcotics	3	3A
Schedule III non-narcotics	3n	3C
Schedule IV narcotics	4	4
Schedule V narcotics	5	5

Verify Matches

[PSNVFY] **Synonym: VER**

With this option you can loop through the list of matched but unverified drugs and verify each one. It is not necessary to verify all matches at once. You can press the Return key to skip any entries you do not want to verify. It will also allow you to rematch a drug if you do not like the match. This option can be used any time after drugs from the local DRUG file (#50) have been matched with drugs in the National Drug files using the options *Rematch/Match Single Drugs*, or *Automatic Match of Unmatched Drugs*.

All matched drugs must be verified. Unverified matches are stored in the NATIONAL DRUG TRANSLATION file (#50.612), and will not merge until they are verified. To ensure accuracy one individual should match the drugs and another verify the matches.

Print VA Product Names Matched report to have a list of unverified matched drugs in the same order they will appear on the screen for verification.

Example: Verify Match

```
Select National Drug File Menu Option: VER Verify Matches

LOCAL DRUG NAME: MORPHINE SO4 200MG TAB,SA
                                ORDER UNIT: BT
                                DISPENSE UNITS/ORDER UNITS: 100

Select DRUG GENERIC NAME: FLUOROURACIL 500MG/10ML INJ AN300
CHEMOTHERAPY
This entry has already been verified.
Select DRUG GENERIC NAME: <RET>
```

NOTE ON CS FEDERAL SCHEDULE: Patches PSN*4*64 and 66 assign a CS Federal Schedule to controlled substances and identify controlled substances as narcotic or non-narcotic by populating the CS FEDERAL SCHEDULE field (#19) of the VA PRODUCT FILE (#50.68). Patch PSN*4*65 changes the *Merge National Drug File Data Into Local File* [PSNMRG] option so that the software checks each entry to see if the CS FEDERAL SCHEDULE field contains data. If an entry has a value for the CS FEDERAL SCHEDULE but its corresponding DEA, SPECIAL HDLG field (#3) of the DRUG file (#50) is blank, the DEA, SPECIAL HDLG field will be populated with the corresponding value using the following table:

	If a drug entry has a CS FEDERAL SCHEDULE of:	And its corresponding DEA, SPECIAL HDLG field is blank, the following DEA, SPECIAL HDLG code will be inserted:
Schedule I narcotics	1	1
Schedule II narcotics	2	2A
Schedule II non-narcotics	2n	2C
Schedule III narcotics	3	3A
Schedule III non-narcotics	3n	3C
Schedule IV narcotics	4	4
Schedule V narcotics	5	5

Patch PSN*4*65 ensures that the newly populated CS FEDERAL SCHEDULE field is included as part of the National Drug File details in the *Inquire to National Files* [PSNACT], *NDF Info From Your Local Drug File* [PSNRPT], *Verify Matches* [PSNVFY] and *Verify Single Match* [PSNVER] options.

Merge National Drug File Data Into Local File [PSNMRG] Synonym: MERG

Before proceeding you should contact the IRM site Manager to back up the local DRUG file (#50) and the NATIONAL DRUG TRANSLATION file (#50.612). Back-up should be done each time prior to executing this option.

This option merges the matched/verified data from the NATIONAL DRUG TRANSLATION file (#50.612) into the local DRUG file (#50). As the merge is taking place, the software will print a report listing any drugs in the NATIONAL DRUG TRANSLATION file (#50.612) that were not merged (referred to as errors to the merge). Errors are defined as the entries in the NATIONAL DRUG TRANSLATION file (#50.612) that do not have corresponding matches in the local DRUG file (#50). If no errors exist, the report will say "No Errors Found."

With patch PSN*4*65, when using this option to merge data from the VA Product file into the local drug file the software will check to see if the
You may execute this option at the conclusion of the entire matching/verifying process or after a section of the local DRUG file (#50) has been matched/verified. It is not important that the entire matching or verifying process be complete since only the matched and verified drugs in the NATIONAL DRUG TRANSLATION file (#50.612) will be merged. There must be at least one matched and verified drug in the NATIONAL DRUG TRANSLATION file (#50.612) for the merge to be completed successfully.

You can determine the time that the report will print. To delay the execution of this option, enter the letter Q at the "Select Printer" prompt and you will be prompted to queue the report to the printer.

Merging the NDF fields into the local DRUG file (#50) will not change the contents of the local GENERIC NAME field (#.01). You may wish to edit this field to make the local name match the NDF name.

Example: Merge National Drug File Data Into Local File

```
Select National Drug File Menu Option: MERG Merge National Drug File Data
Into Local File
This option will merge NDF fields into your local drug file. This will also
produce an Error Report for entries in the translation file which are not
in the local file if they should exist. These exceptions will not be merged.

You may queue this report if you wish.

Select Printer: [Select Print Device]
Do you want your output QUEUED? NO// <RET> (NO)
```

Automatic Match of Unmatched Drugs [PSNAUTO] Synonym: AUTO

This option allows automatic matching by NDC of newer FDA-released drugs in your local file which are manually classed, or have no VA Class assigned. This option proceeds through the local DRUG file (#50) and attempts to match each drug encountered with a drug in the National Drug files. When a match is made, the drug is added to the NATIONAL DRUG TRANSLATION file (#50.612) and must be verified and merged.

Before the automatic matching begins, the prompt below will be displayed on the screen.

```
AUTOMATIC MATCH by NDC Code process will begin. It will begin. It will attempt to
match all items that are not presently MATCHED to the National Drug File.
Are you sure you want to continue? N//
```

If you answer YES, the automatic matching process will begin and you will proceed as described below. If you answer NO, or press the Enter key, you will exit from the option.

It is extremely important that as many drugs in the local DRUG file (#50) as possible have correct NDCs assigned to them. If the NDC fields (NDC (#31), SYNONYM (#50.1)) in the local DRUG file (#50) are complete and accurate, the overall effectiveness of the automatic matching process will be greatly improved. If a drug's NDC in the local DRUG file (#50) matches a like NDC in the National Drug files, a match will be made. These matches must be verified and merged. The VA Class assigned by the matching process will override any class previously assigned. This option will screen an inactive past date.

Example: Automatic Match of Unmatched Drugs

```
Select National Drug File Menu Option: AUTO Automatic Match of Unmatched Drugs
This option will attempt to automatically match by NDC code, drugs which have
not been matched to the National Drug File. These matches must be verified
and merged.

AUTOMATIC MATCH by NDC Code process will begin. It will attempt to match
all items that are not presently MATCHED to the National Drug File.

Are you sure you want to continue ? N// Y.....

Allow Unmatched Drugs to be Classed [PSNSTCL] Synonym: CLAS Locked: PSNMGR

It will be helpful to print the Local Drugs With No VA Drug Class report before executing this option. This option is locked, so only users with the **PSNMGR** key have access. There will be some drugs in the local DRUG file (#50) that cannot be matched. Examples are investigational drugs, supply items, and drugs that are manufactured on site. You may use this option to enter the local DRUG file and assign VA classifications to these drugs.

This option should not be run until at least one merge using the menu option *Merge National Drug File Data Into Local File* has been executed.

There are two sub-options to this option. You will be prompted to answer the question, "Do you wish to automatically loop through all unmatched drugs?" If you answer NO, you may class one drug at a time by entering the local drug generic name or internal number. If you answer YES, the software will loop alphabetically through all drugs that do not have an inactive date and have not been matched, verified, and merged.

If the drug you select was previously classified, the present classification is displayed as a default. You can accept the default by pressing the Enter key, or you can enter a new classification.

Example: Allow Unmatched Drugs to be Classed (Single Drug)

```
Select National Drug File Menu Option: CLAS Allow Unmatched Drugs To Be Classed

This option allows a VA Drug Classification to be entered for
a drug in your local drug file, however, if the drug has been
classed through "the National Drug File merge procedure" you cannot change it!

Do you wish to automatically loop through all unmatched drugs?
<Reply Y,N or "^" to quit> : N

Select DRUG GENERIC NAME: CALAMINE LOTION
  1 CALAMINE LOTION (OZ) DE900
  2 CALAMINE LOTION, 4OZ BT DE900 USE FOR INPATIENT WARD STOCK
CHOOSE 1-2: 1

Select VA DRUG CLASS CODE: DE900 // <RET>

Select DRUG GENERIC NAME: <RET>
```

..... examples continue on the next page.....

Example: Allow Unmatched Drugs to be Classed (Loop)

```
Select National Drug File Menu Option: CLAS Allow Unmatched Drugs To Be Classed

This option allows a VA Drug Classification to be entered for
a drug in your local drug file, however, if the drug has been
classed through "the National Drug File merge procedure" you cannot change it!

Do you wish to automatically loop through all unmatched drugs?
<Reply Y,N or "^" to quit> : Y

ABSORBABLE GELATIN FILM (EACH)
  Select VA DRUG CLASS CODE: XA900 // <RET>
ABSORBABLE GELATIN SPONGE ,SZ 100,6/BX
  Select VA DRUG CLASS CODE: XA900 // <RET>
ABSORBABLE GELATIN SPONGE,SZ 12X7,12/BX
  Select VA DRUG CLASS CODE: XA900 // <RET>
ACCUTANE 20MG
  Select VA DRUG CLASS CODE: DE751
ACE BANDAGE,3 IN,ELASTIC
  Select VA DRUG CLASS CODE: XA100 // <RET>
ACE BANDAGE,4 IN,ELASTIC
  Select VA DRUG CLASS CODE: XA100 // <RET>
ACE BANDAGE,6 IN,ELASTIC
  Select VA DRUG CLASS CODE: XA100 // <RET>
ACEBUTOLOL 200MG CAP
  Select VA DRUG CLASS CODE: CV100 // ^
```

You can stop the looping process at any time by entering an up-arrow (^) and pressing the Enter key at the "Select VA DRUG CLASS CODE" prompt. The software will flag the last drug you classified and will begin the loop with this drug when you resume the looping process. This will allow you to review the last drug classified before continuing.

Note: If a drug has **no default classification** and you press the Enter key rather than enter a class, the software will return you to the main menu.

Example: Loop Interrupted When No Default Class and No Value Entered

```
Select National Drug File Menu Option: CLAS Allow Unmatched Drugs To Be Classed

This option allows a VA Drug Classification to be entered for
a drug in your local drug file, however, if the drug has been
classed through "the National Drug File merge procedure" you cannot change it!

Do you wish to automatically loop through all unmatched drugs?
<Reply Y,N or "^" to quit> : Y

ABSORBABLE GELATIN FILM (EACH)

  Select VA DRUG CLASS CODE: XA900 // <RET>
ACCUTANE 20MG
  Select VA DRUG CLASS CODE: <RET>

Select National Drug File Menu Option: <RET>
```

Note: The software will not allow you to reassign the VA Classification to a drug that has already been matched, verified, and merged.

Example: Attempt to Class Item already Matched, Classed, and Merged

```
Select DRUG GENERIC NAME: SODIUM METHOHEXITAL 5GM S.P.      CN202      N/F
SORRY, CLASSIFICATION CANNOT BE CHANGED
Select DRUG GENERIC NAME: <RET>
```

After this option has been completed, print and review *Local Drug With No VA Class Report*.

To change the VA Drug Classification of a drug previously matched automatically by NDC, first attempt to rematch the drug using the *Rematch/Match Single Drugs* option. If that fails, classify the drug manually using this option.

Using the National Drug File Reports Menu

National Drug File Reports Menu [PSNSUBM] Synonym: RPRT

This option is a sub-menu containing the following reports:

<i>LDF</i>	<i>Local Drug File Report</i>
<i>VAGN</i>	<i>Report of VA Generic Names From National Drug</i>
<i>ATMP</i>	<i>Report of Attempted Match Drugs</i>
<i>PROD</i>	<i>VA Product Names Matched Report</i>

<i>SUPL</i>	<i>Supply (XA000) VA Class Report</i>
<i>MANC</i>	<i>Manually Classed Drugs Report</i>
<i>NMAT</i>	<i>Local Drugs With NO Match to NDF Report</i>
<i>LOCF</i>	<i>Local Formulary Report</i>
<i>NATF</i>	<i>National Formulary Report</i>
<i>DDIN</i>	<i>Drug-Drug Interaction Report</i>
<i>CMOP</i>	<i>VA Products Marked for CMOP Transmission</i>
<i>PNCL</i>	<i>VA Product Names By Class</i>
<i>LDPN</i>	<i>Local Drug/VA Print Name Report</i>
<i>LDRG</i>	<i>Local Drugs Excluded from Drug-Drug Interactions</i>
<i>VDRG</i>	<i>VA Products Excluded from Drug-Drug Interactions</i>

Local Drug File Report [PSNLDG] Synonym: LDF

This option generates a report containing selected information about drugs in the local DRUG file (#50). This report lists the local drug name, inactive date, NDC number, and the Drug Enforcement Agency (DEA) value. If your local drug is matched to NDF, and National Formulary and/or Restriction information exists, this is also displayed after the drug name. This report is in a 132 column format and must be sent to a printer.

Example: Local Drug File Report

Select National Drug File Reports Menu Option: **LDF** Local Drug File Report
This report gives you a printed copy of the local drug name, inactive date, NDC, and the DEA value. If your local drug is matched to NDF and National Formulary and/or Restriction information exists, this is also displayed after the drug name. This report requires 132 columns. You may queue the report to print, if you wish.

Report of VA Generic Names from National Drug [PSNVAGN] Synonym: VAGN

This option prints a report of VA Generic Names. You can print all or a specified range of names. This report might be useful during the match and verify options. If you cannot find a match and are asked to type in a VA Generic Name, you can use this list to find the correct generic name. VA Generic Names with more than one ingredient are given alphabetically by ingredient (e.g., acetaminophen/butalbital/caffeine/codeine).

This report requires 80 columns. You can print the report immediately, or delay printing until a later time.

Example: Report of VA Generic Names From National Drug

```
Select National Drug File Reports Menu Option: VAGN Report of VA Generic Names From National Drug
```

```
This report gives you a printed copy of the VA Generic Names from the National Drug File. This report may assist you in the matching process. You may queue the report to print, if you wish.

Report of Attempted Match Drugs [PSNEXC] Synonym: ATMP

This option generates a report listing all drugs you attempted to match, but for which a match could not be made during the matching process. Even though these drugs were not matched, the software “flagged” each of these drugs and an entry was made in the NATIONAL DRUG TRANSLATION file (#50.612).

This report will include the contents of the DEA, SPECIAL HDLG field (# 3) if the field contains one of the following values:

0 (zero)	Manufactured in Pharmacy
I	Investigational Drug
M	Bulk Compound Item

The report will also include any *inactive* dates found in the local DRUG file (#50).

This report should be printed after the option *Verify Matches* is executed and before the *Merge National Drug File Data Into Local File* option is executed. This is a cumulative report and will include all entries from the very beginning of the matching process until each drug is manually classed. Once a drug has been manually classed, it is automatically deleted from the report.

You may print the report immediately, or delay printing until a later time.

Example: Report of Attempted Match Drugs

```
Select National Drug File Reports Menu Option: ATMP Report of Attempted Match Drugs

This report should be run after the menu option "Verify Matches" and
before the menu option "Merge National Drug File Data Into Local File".
It gives you a hard copy of the items from your local file for which
a match was attempted, but no match was made from the National Drug File.
You may queue the report to queue if you wish.

VA Product Names Matched Report [PSNPFN] Synonym: PROD

This option generates a report listing all drugs that have been matched. The report is not cumulative and will not include entries that have been previously merged into the local DRUG file (#50). The VA Product Names matched report can be printed before and/or after the menu option *Verify Matches*. It should be printed and reviewed before the *Merge National Drug File Data Into Local File* option is executed. This report may also be printed after the auto-match process to review what was matched. It generates a hard copy of the matches selected in the menu option *Automatic Match of Unmatched Drugs* and the option *Verify Matches*.

The data for this report is stored in the NATIONAL DRUG TRANSLATION file (#50.612). If a matched entry has not been verified, it will appear on the report with a special notation NOT VERIFIED. (Refer to the first entries on the following sample report.) User names will only print on the report when those names change; the user who began the automatic match by NDC process will have his or her name printed on the report for those matches.

After reviewing this report, incorrect matches may be rematched by using the menu option *Rematch/Match Single Drugs*.

This report requires 132 columns. You may print the report immediately, or delay printing until a later time.

Example: VA Product Names Matched Report

Select National Drug File Reports Menu Option: PROD VA Product Names Matched Report

This report can be run before and/or after the menu option "Verify Matches". It should be run before the menu option "Merge National Drug File Data Into Local File". This report may also be run after the auto-match process to review what was matched. It generates a hard copy of the matches selected in the menu option "Automatic Match of Unmatched Drugs" and the menu option "Verify Matches". This report requires 132 columns. You may queue the report to print, if you wish.

Local Drugs with No VA Drug Class Report [PSNOCLS] Synonym: NOCL

This option generates a report of drugs from the local DRUG file (#50) which have no VA drug classification. It will print only the active drugs in the file. This report should be generated after using the *Merge National Drug File Data Into Local File* option. You may wish to print this report *before* and *after* executing the *Allow Unmatched Drugs To Be Classed* option.

This report will display the contents of the DEA, SPECIAL HDLG field (#3) if the field contains one of the following values:

0 (zero) Manufactured in Pharmacy
I Investigational Drug
M Bulk Compound Item

You can print the report immediately, or delay printing until a later time.

Example: Local Drugs with No VA Drug Class Report

Select National Drug File Reports Menu Option: NOCL Local Drugs With No VA Drug Class Report

This report should be run after executing the menu option "Merge National Drug File Data Into Local File". It may be useful to print this report before and after executing the "Allow Unmatched Drugs To Be Classed" option. It gives you a hard copy of the drugs from your local drug file which are "active" and have no VA Drug Classification.
You may queue the report to print, if you wish.

NDF Info From Your Local Drug File [PSNRPT] Synonym: DFL

This option generates a report containing information for a given range of drugs or for all drugs that have been merged. This option should be executed after the *Merge National Drug File Data Into Local File* option has been completed. The report contains data that is stored in the NDF fields of the local DRUG file (#50). Any drugs that do not contain NDF information (i.e., the drug has not been matched, verified, and merged) will be ignored. In the following example, the "START WITH" and "GO TO" prompts refer to an alphabetical range in the GENERIC NAME field (#.01).

To print a list of drugs by VA Drug Classification, you can use the *Formulary Report* option.

You can print the report immediately, or delay printing until a later time.

Example: NDF Info from Local Drug File

Select National Drug File Reports Menu Option: DFL NDF Info From Your Local Drug File

This report gives a printed copy of the drugs from your local drug file that have been matched to the National Drug File. This report requires 132 columns. You may queue the report to print, if you wish.

Supply (XA000) VA Class Report [PSNSUPLY] Synonym: SUPL

This option generates a report of all the items from the local DRUG file (#50) which have an "XA" VA Drug Classification. It will print only the active items in the file, and will sort by local DRUG file (#50) generic name.

You may print the report immediately, or delay printing until a later time.

Example: Supply (XA000) VA Class Report

Select National Drug File Reports Menu Option: SUPL Supply (XA000) VA Class Report

This report should be run if you have already classed your local drugs/items using Version 1.0 of NDF. After the installation of Version 2.0 of NDF and the VA DRUG CLASS file is re-installed, you may wish to re-class your local items with an "XA" classification using the newly expanded "XA000" classification. It gives you a hard copy of the items from your local drug file which are "active" and have an "XA" VA Drug Classification.
You may queue the report to print, if you wish.

Manually Classed Drugs Report [PSNMCLS] Synonym: MANC

This option generates a report, listing all active drugs in the local DRUG file (#50) that have been manually assigned a VA Drug Classification. The report will sort alphabetically by local drug generic name and will exclude supply items which have been assigned an "XA" classification.

You may print the report immediately, or delay printing until a later time.

Example: Manually Classed Drugs Report

Select National Drug File Reports Menu Option: MANC Manually Classed Drugs Report

This report will give you an alphabetic listing, by local generic name, of the drugs from your local drug file which are "active" and have been assigned a manual VA Drug Classification through the option "Allow Unmatched Drugs To Be Classed". This report will exclude your supply items that have been assigned an "XA" class.

You may queue the report to print, if you wish.

Local Drugs with No Match to NDF Report [PSNONDF] Synonym: NMAT

This option generates a report that contains entries in your local DRUG file (#50) with no match to the National Drug files. You can print all drugs or only those marked for Outpatient Pharmacy use.

Example: Local Drugs with No Match to NDF Report

Select National Drug File Reports Menu Option: NMAT Local Drugs With NO Match to NDF Report

This report should be run after executing the menu option "Merge National Drug File Data Into Local File". It gives you a hard copy of the drugs from your local DRUG file which are "active" and have no match to NDF. You have the choice to print ALL drugs or only drugs marked for Outpatient use. If you answer "yes" to the question, you will print all. If you answer "no", you will print only Outpatient use drugs. You may queue the report to print, if you wish.

Do you wish to print ALL drugs from your local file?

Enter Yes or No: YES

Select Printer: *[Select Print Device]*

Local Formulary Report [PSNFRMLY] **Synonym: LOCF Locked: PSNMGR**

This option is locked with the PSNMGR key, so only user with the PSNMGR key can access it. This report gives you a printed copy of formulary drugs from your local file with synonyms not marked as quick codes. You are asked first whether or not to include supply items. Next you are asked to type in a title for this report. You can print by Generic Name/Tradename (see Example 1) or VA Class Code (see Example 2). If you choose to print by VA Class code, the software will ask you to pick a range of VA Drug Class Codes. Only active drugs will print.

This report should only be run *after* executing the NDF software.

You may print the report immediately, or delay printing until a later time.

Example 1: Formulary Report sorted by Generic/Tradename

```
Select National Drug File Reports Menu Option: LOCF Local Formulary Report
```

```
This report gives you a printed copy of formulary drugs from your local file with synonyms marked as trade names. You will be asked if you want to include supply items. You are asked to type in a title for this report. You are then asked to print by Generic Name/Trade name or VA Class Code. If you choose to print by VA Class Code, it will ask you to pick a range of VA Drug Class Codes. Only active drugs will print. Drugs with a future inactive date will print as well. You may queue the report to print, if you wish.
```

```
Do you wish to include supply items? NO// <RET>
```

```
Enter title for report: HOSPITAL// <RET>

Local Drug/VA Print Name Report [PSNVAPRINT] Synonym: LDPN

This option generates a report listing all active entries in the local DRUG file (#50) for which the Generic Name does not match the VA Print Name stored in the National Drug File. You can sort this report alphabetically using a range of letters, or display all entries in the file that meet this criteria.

Example: Local Drug/VA Print Name Report

```
Select National Drug File Reports Menu Option: Local Drug/VA Print Name Report
```

```
This report shows a list of the active drugs in local DRUG file where the  
GENERIC NAME does not match the VA PRINT NAME.
```

```
Select one of the following:
```

```
  A          ALL  
  S          SELECT A RANGE
```

```
Print Report for (A)ll Drugs or (S)elect a Range of Drugs: S// SELECT A RANGE
```

```
There are drugs in the Drug file with leading numerics.
```

```
Print report for drugs with leading numerics? N// O
```

```
To see drugs beginning with the letter 'A', enter 'A', or whichever letter you  
wish to see. To see drugs in a range, for example drugs starting with the  
letters 'G', 'H', 'I' and 'J', enter in the format 'G-J'.
```

```
Select a Range: A-B
```

```
This report will include drugs starting with the letter A,  
and ending with drugs starting with the letter B.
```

```
Is this correct? Y// ES
```

```
DEVICE: HOME// VIRTUAL Right Margin: 80//
```

Using the Inquire Options

Inquiry Options

[PSNQUER] **Synonym: INQ**

This sub-menu contains all the inquiry options in the National Drug File package.

LINQ Inquire To Local Drug File
*PNIN Inquire to VA Product Info For Local Drug **
NDCU NDC/UPN Inquiry
NAT Inquire to National Files

**Formerly Lookup National Drug Info In Local File.*

Inquire to Local Drug File

[PSNVIEW] **Synonym: LINQ**

This option allows you to view the local DRUG file (#50) by Generic Name/Synonym or VA Drug Class Code. If you choose a VA Drug Class Code, you may enter either the code or the class name. For VA Drug Class Code, the software will sort by the least expensive price in the PRICE PER DISPENSE UNIT field (#16). The Generic Name, VA Drug Class Code, Price Per Dispense Unit, Message, and Synonyms not marked as quick codes are displayed. Only active formulary drugs can be viewed.

Example 1: Inquire to Local Drug File by Generic Name Chosen

```
Select Inquiry Options Option: LINQ Inquire To Local Drug File

You may look-up by DRUG GENERIC NAME or VA CLASS CODE

Enter a "G" for GENERIC NAME or a "C" for VA CLASS CODE: G          GENERIC

Select DRUG GENERIC NAME : NORPACE
 1  NORPACE  PENICILLAMINE 125MG CAP          MS104

Auto-Creation of Supra-Therapeutic Possible Dosages

In order to prevent inadvertent creation of supra-therapeutic possible dosages for high risk medications during the dosage creation segment of Pharmacy Data Management and National Drug File updates, three patches have been released. Patch PSN*4*261 added three new fields to the VA PRODUCT file (#50.68). Patch PSN*4*262, in conjunction with Pharmacy Data Management patch PSS*1*155, provides the functionality to determine if possible dosages should be auto-created or not during the match/re-match process.

PSN*4*262 contains changes to the *Inquire to VA Product Info For Local Drug* [PSNLOOK] option to include the display of the new fields.

For more information about the new fields, refer to PSN*4*261. For information on how the new fields affect auto-creation of possible dosages during the match and re-match process, refer to patch PSS*1*155. For more information about the supra-therapeutic dosages project, refer to the Release Notes for these patches.

Example 1: Auto-Create Default Possible Dosage=Yes [PSNLOOK]

Select OPTION NAME: PSNLOOK

This option will allow you to look up entries in your local DRUG file. It will display National Drug File software match information.

Printing a Patient Medication Information Sheet

Print a PMI Sheet

[PSNPMIS] **Synonym: PMIS**

This option allows you to print a Patient Medication Information Sheet (PMI).

These medication information sheets can be provided to patients, explaining how and why to take a medication and the possible side effects. A commercial vendor supplies the information provided in the Patient Medication Information Sheets. This information is updated periodically to provide new medication information sheets and changes to existing sheets.

If the PMI Sheet does not print and the message “Drug is not linked to a valid Medication Information Sheet for language selected” is printed instead, the user should select another language and re-print the medication sheet. If this still does not work, then the user should contact the NDF Manager for further assistance.

Example: Print a PMI Sheet

```

Medication instructions for ACETAMINOPHEN 325MG (TYLENOL) TAB

Page 1

IMPORTANT NOTE: The following information is intended to supplement, not substitute for, the expertise and judgment of your physician, pharmacist or other healthcare professional. It should not be construed to indicate that use of the drug is safe, appropriate, or effective for you. Consult your healthcare professional before using this drug.

ACETAMINOPHEN - ORAL (uh-seet-uh-MEE-no-fen)

COMMON BRAND NAME(S): APAP, Liquiprin, Panadol, Tylenol

USES: This drug is used to relieve mild to moderate pain and to reduce fever.

HOW TO USE: Take this medication as directed. Do not take more than recommended. Do not use for more than 10 days without consulting your doctor. This medication is not to be given to children under 3 years of age without your doctor's approval.

SIDE EFFECTS: When taken as directed, most people experience little or no side effects with this medication. Tell your doctor immediately if any of these highly unlikely but very serious side effects occur: easy bruising or bleeding, persistent sore throat or other signs of infection. In the unlikely event you have an allergic reaction to this drug, seek medical attention immediately. Symptoms of an allergic reaction include: rash, itching, swelling, dizziness, trouble breathing. If you notice other effects not listed above, contact your doctor or pharmacist.

PRECAUTIONS: If you have any of the following health problems, consult your doctor before using this medication: severe liver disease, alcohol dependency, any allergies. Acetaminophen may cause liver damage. Daily use of alcohol, especially when combined with acetaminophen, may increase your risk for liver damage. Check with your doctor or pharmacist for more information. Acetaminophen is often used instead of aspirin. They are equally effective in relieving pain; however, acetaminophen does not reduce swelling and inflammation like aspirin does. There are many brands and forms of acetaminophen on the market. Read the dosing instructions carefully as the amount of acetaminophen may vary among products. Acetaminophen appears to be safe for use during pregnancy. Use only if clearly needed. Acetaminophen is found in breast milk, but side effects in nursing infants have not been reported. Consult your doctor if you are breast-feeding.

DRUG INTERACTIONS: Tell your doctor of all nonprescription and prescription drugs you use especially: isoniazid, phenobarbital, phenytoin, zidovudine, sulfapyrazone. Check the labels on all your medicines because they may also contain acetaminophen. Ask your pharmacist about the safe use of those products. Do not start or stop any medicine without doctor or pharmacist approval.

OVERDOSE: If overdose is suspected, contact your local poison control center or emergency room immediately. Symptoms of overdose may include vomiting, excessive sweating, dark urine, stomach pain, and extreme fatigue.

..... *example continues on the next page*

Example: Print a PMI sheet (cont.)

NOTES: Acetaminophen does not cause the stomach and intestinal ulcers that aspirin and aspirin-like NSAIDs (e.g., ibuprofen, ketoprofen) may cause.

MISSED DOSE: If you miss a dose, take as soon as remembered; do not take if it is almost time for the next dose, instead, skip the missed dose and resume your usual dosing schedule. Do not "double-up" the dose to catch up.

STORAGE: Store at room temperature between 59 and 86 degrees F (between 15 and 30 degrees C) away from moisture and sunlight. Do not store in the bathroom. Do not freeze liquid forms.

Select DRUG GENERIC NAME: <RET>

Select National Drug File Menu Option: <RET>

Displaying an FDA Medication Guide

Display FDA Medication Guide [PSN MED GUIDE] Synonym: FDA

This option allows you to display a Food and Drug Administration (FDA) Medication Guide.

Medication guides are paper handouts that come with many prescription medicines. These guides address issues that are specific to particular drugs and drug classes, and they contain FDA approved information that can help patients avoid serious adverse events. The FDA requires that medication guides be issued with certain prescribed drugs and biological products when the agency determines that: certain information is necessary to prevent serious adverse effect; patient decision-making should be informed by information about a known serious side effect with a product; or patient adherence to directions for the use of a product are essential to its effectiveness.

The system allows the user to select the appropriate document through the generic drug name. If there is no associated medication guide, the system shall inform the user and allow the user to select another drug.

If there is no medication guide associated with the medication, the message: "There is no FDA Medication Guide associated with this medication" is displayed.

If the FDA Medication Guide does not automatically open in a .pdf format when the user presses <Enter>, the desktop may not have the required software installed. The user should contact local technical support for assistance.

Enter RETURN to continue, '?' for HELP, or '^' to exit: ?

When unable to get the FDA Medication Guide to display, review the following
suggestion(s) for troubleshooting potential problems:

1) If no FDA Medication Guide exists for a product that you believe should
have one, confirm that one is required by visiting the FDA website
(www.fda.gov). If one is required, log a support ticket to request its
addition. Please understand that there may be a delay between the time
that a new Medication Guide is posted to the FDA website and when it is
made available in VistA through a National Drug File data update patch.
```

Example 2: Displaying an FDA Medication Guide for a VA Product when the Java Software Component is not Installed or is not Running

The following URL provides the link to the FDA Medication Guide associated with this medication. Thin Client users: copy/paste the URL below into a browser to access the FDA Medication Guide for this drug:

```
vaww.national.cmop.va.gov/FDAMedGuides/Lindane_Lotion_(Generic)_(2008).pdf
```

Please wait...

The system is unable to display FDA Med Guide automatically.

The FDA Medication Guide will not automatically open on Thin Client and some types of encrypted sessions. If you do not believe this is the reason contact your local technical support for assistance.

You can copy/paste the link above into your browser's address bar to retrieve the FDA Medication Guide.

Enter RETURN to continue, '?' for HELP, or '^' to exit: ?

When unable to get the FDA Medication Guide to display, review the following suggestion(s) for troubleshooting potential problems:

- 1) The browser did not open automatically. This may be due to the following:
 - You might be connected to VistA via Thin Client or an encrypted session that prevents the FDA Med Guide from automatically displaying. Please copy and paste the URL link below into your browser's address bar to retrieve the FDA Medication Guide:

```
vaww.national.cmop.va.gov/FDAMedGuides/Lindane_Lotion_(Generic)_(2008).pdf
```

- The computer might not have the required Java software component installed or the software might not be functioning properly. Please, contact technical support for assistance.

- 2) When doing a copy/paste of the link into the browser's address and an HTTP 404 - File Not Found error is received. This may be due to the following:
 - A common issue exists when the link is displayed in two lines in the terminal screen. When you copy both lines at the same time and paste it into the browser's address, the second line is ignored by the browser resulting in a 'broken' link. To resolve this issue, copy and paste one line at a time from the terminal screen into the browser's address to make sure the complete link is used.
 - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.

- 3) The browser opened automatically, however you receive an HTTP 404 - File Not Found error. This may be due to the following:
 - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.

Select VA PRODUCT NAME:

Glossary

Automatic Matching by NDC Matching

This is the pairing of a drug from the local DRUG file (#50) with a drug in the National Drug files with the same NDC number. This matching will be accomplished when the option *Automatic Match of Unmatched Drugs* is executed for the first time.

Active Drug

Drugs that contain no inactivation date in the INACTIVE DATE field (#100) of the local DRUG file (#50).

Bulk Compound

An item manufactured by the pharmacy in a large quantity (gallons, pounds, etc.) and kept on hand to be dispensed in smaller quantities (ounces, grams, etc.). Identified by the code "M" in the DEA, SPECIAL HDLG field (#3) of the local DRUG file (#50).

CMOP

Consolidated Mail Outpatient Pharmacy.

DEA, SPECIAL HDLG Field (#3)

A field of the local DRUG file (#50). Contains one or more codes representing special characteristics of a product.

DRUG File

See Local DRUG File (#50).

DRUG INGREDIENTS File (#50.416)

A file that contains individual generic drugs that are components of various drug products.

Error

In the National Drug File (NDF) software, an error is an entry in the NATIONAL DRUG TRANSLATION file (#50.612) that does not have a match in the local DRUG file (#50).

FDA Medication Guide

Paper handouts that come with many prescription medicines given to the patient. The guides address issues that are specific to particular drugs and drug classes, and contain FDA-approved information that can help patients avoid serious adverse events.

FSN

Federal Stock Number. A unique identifying number assigned by the Federal Supply system to a product (drug, supply, food item, etc.) for ordering and accounting purposes. Synonymous with the National Stock Number (NSN). One of the fields in the local DRUG file (#50).

Investigational Drug

A new drug for which an investigational new drug application has been filed with, and approved by the Food and Drug Administration (FDA). The drug may be a new chemical compound which has not been released for general use and is not available through regular channels of interstate commerce, or it may be an approved drug with a new use, different dosage level, different route of administration, or a new combination of drugs. Identified by the code "I" in the DEA, SPECIAL HDLG field (# 3) of the local DRUG file (#50).

Local DRUG File

This file contains the local GENERIC NAME (#.01), INACTIVE DATE (#100), DEA, SPECIAL HDLG (#3), and NDC fields, as well as others. NDF software attempts to match products from this file with products in the VA GENERIC file (#50.6) and the VA PRODUCT file (#50.58).

Local Generic Name

Field #.01. The first field in the local DRUG file (#50). This is the identifying name for the item. It is this name that is routinely printed on prescription labels, medication administration records, inventory sheets, etc. The field name is GENERIC NAME (#.01). These terms are interchangeable throughout this document. This field is automatically stuffed with the VA Print Name when an item is marked for CMOP transmission.

Manually Classed Drug	A drug from the local DRUG file (#50) which could not be matched to the National Drug files, but has been assigned a VA Drug Classification through the use of the <i>Allow Unmatched Drugs to be Classed</i> menu option.
Manufacturer Code	The first portion of the NDC number (the first 4-6 digits). Identifies the manufacturer of the product.
Manufactured in Pharmacy	An item which is manufactured (or compounded) by pharmacy services on a prescription-by-prescription basis (as opposed to a bulk compound). Identified by the code "0" in the DEA, SPECIAL HDLG field (#3) of the local DRUG file (#50).
National Drug File Package or National Drug File Software	This software package attempts to match the National Drug files entries with local DRUG file (#50) entries using both automatic matching and manual matching. The automatic matching is by NDC number only.
National Drug files	VA GENERIC file (#50.6), VA PRODUCT file (# 50.68), NDC/UPN file (#50.67). Three files that contain a list of available drug products. Includes specific information for each product, including trade name, NDC number manufacturer, VA Drug Class code, dosage form, route of administration, strength, units, ingredients, ingredient strength and units, package code, package size, package type, VA product name, and VA generic name. NDF software attempts to match products from this file with products in the local DRUG file (#50).
National Drug Identifier	A unique, HL7 compatible code assigned to all products marked for CMOP transmission. This code is utilized to transmit VA Print name and dispense unit from VISTA to the vendor.

**NATIONAL DRUG
TRANSLATION File**

File #50.612. A temporary file that is created by the NDF software. This file will contain information on drugs that have been matched, or for which a match was attempted.

NDC (NDC Number)

National Drug Code. A unique number assigned to a drug by the manufacturer for identification purposes. The NDC is in one of three formats: 4-4-2, 5-3-2, or 5-4-1. The first part is the manufacturer's code, the second part is the product number, and the last is the code for the package size and type. This is one of the fields in the local DRUG file (#50).

NDF

National Drug File. In this document, NDF refers to either the National Drug file software. (*See National Drug File Package or National Drug File Software.*)

OTC

Over-the-Counter. A term used to describe a product that may be supplied or purchased without a physician's prescription. Identified by the code "9" in the DEA, SPECIAL HDLG field (#3) of the local DRUG file (#50).

Package Code

The last portion of the NDC number (the last two digits). This identifies the package type and size in which the product is supplied.

Package Size

The actual (physical) amount of a drug in the individual package (i.e., 5000 capsules per bottle).

Package Type

The physical container in which a drug is supplied (i.e., bottle, vial).

PMI Sheet	Patient Medication Information Sheet. Medication information sheets given to the patient to explain how and why to take a medication and the possible side effects. The information supplied in the PMI sheet is supplied by a commercial vendor.
Product Code	The second portion of the NDC number (the second four digits) that identifies the specific drug.
PSNMGR	The name of the primary menu option and of the key that must be assigned to the pharmacy coordinator and supervisors using the National Drug File software.
Supply Item	A non-drug item entered into the GENERIC NAME field (#.01) of the local DRUG file (#50) that may be a prosthetic or expendable item such as ostomy supply, alcohol pads, syringes, bed pans, etc. identified by the code "S" in the DEA, SPECIAL HDLG field (#3) of the local DRUG file (#50).
Trade Name	This is the brand name. The name given to a generic product to distinguish it as one produced and sold by a specific manufacturer.
UPC	Universal Product Code. A unique number assigned to a product by a manufacturer commonly used for supply items. These may be found in the NDC/UPN file (#50.67).
VA Dispense Unit	The standardized unit assigned to a product when the product is marked for CMOP transmission.
VA DRUG CLASS File	File (#50.605). This file contains the VA Drug Classification codes and their descriptions. Each product in the National Drug files has one of these codes assigned.

VA Generic Name	A name given to an item (drug, supply, etc. in the VA GENERIC file (#50.6)). It is this name which is matched with the entry in the GENERIC NAME (local generic name) field (#.01) of the local DRUG file (#50). This name does not contain strength, unit, or dosage form.
VA Print Name	The forty-character name assigned as the name that prints on all prescription labels for products marked for CMOP transmission.
VA Product Name	The unique name assigned to each drug product in the National Drug files. This name comes from the VA PRODUCT file (#50.68) and includes strength, unit, and dosage form.
VISTA	Veterans Health Information Systems and Technology Architecture.
