1 Introduction

1.1 Purpose

This document is designed to provide sufficient technical information about the Bed Management Solution (BMS) application to the developers and Information Resources Management (IRM) technical personnel to operate and maintain the software.

1.2 BMS Overview

BMS is a real-time, user-friendly Web-based Veterans Health Information Systems and Technology Architecture (VistA) interface for tracking patient movement, bed status and bed availability. It provides performance information that can be used to improve patient flow within, and between, VA Medical Centers (VAMCs).

BMS allows administrative and clinical staff to record, manage and report on the planning, patient-movement, patient occupancy, and other activities related to management of beds. All patient admission, discharge, and transfer movements are sent directly from VistA to BMS.

BMS offers the following features:

- Tracks patient movement through the system;
- Displays patient and bed occupancy status for all beds in the facility and/or Veterans Integrated Service Networks (VISN);
- Provides visibility of bed availability within VAMC's to support emergency management;
- Automates request and assignment of beds;
- Displays and facilitates timely discharge appointments;
- Supports and facilitates efficient flow operations and is a catalyst to process improvement and best practices;
- Provides reports on performance measures associated with bed management and patient flow.

BMS provides answers to the following questions:

- How many beds do we have?
- How many empty beds do we have?
- How many available female beds do we have?
- How many beds are out of service and why?
- How long does it take to clean a bed?
- How many patients are waiting for beds in community hospitals?
- How many admissions, transfers, and discharges did my unit have yesterday?
- How many discharges will we have tomorrow?
- How many scheduled admissions do we have for today?

2 Implementation and Maintenance

2.1 BMS Infrastructure Diagram

The BMS application has a list of physical components that can be divided on more physical servers according with their roles.

The following diagram represents a possible schema of physical deployment.

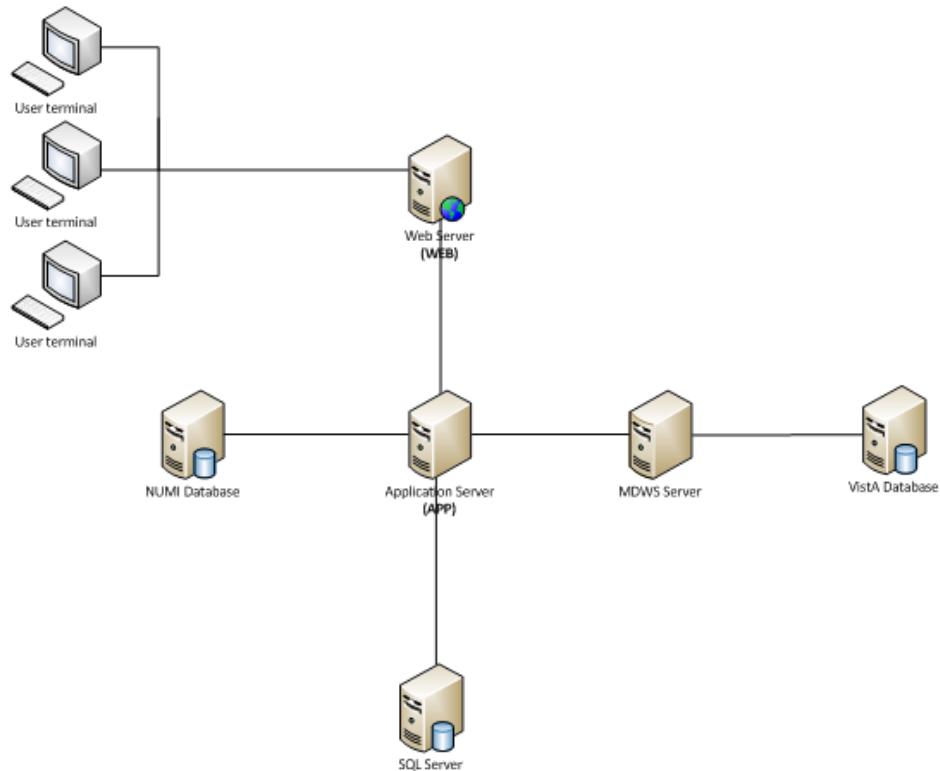

Figure 1 - BMS Infrastructure Diagram

BMS is divided into specific components:

1. Persistence layer: SQL Server 2008 R2 database
2. Application server layer: Windows Communication Foundation (WCF) Web Services installed as Windows Services

3. Web server layer: Active Server Pages (ASP) .NET Model-View-Controller (MVC) Web application hosted in Internet Information Services (IIS)
4. Data Exchange Servers:
 - a. National Utilization Management Integration (NUMI) SQL Server Database
 - b. VistA integration servers (servers that have access to VistA)
 - i. Medical Domain Web Services (MDWS): Web Service installed in IIS
5. Client Layer: Web Application client launched from browsers

2.2 System Requirements (Hardware and Software)

BMS requires the creation of a Master Windows Service Account User and numerous facility/Site Service Account Users for execution and operations.

All the BMS Application Services run under a service account.

- AICT has created the Windows User (**acc\bms_svc_prod**) as the master service account that the four BMS Services runs under. This can be referred to as the Master BMS Service Account.
- The VAAUSBMSMUL25 server hosts the four application services.
 - BMS.BedManagerService
 - BMS.SecurityHost
 - BMS.ServiceHost
 - BMS.VI.ServiceHost.

All BMS Facilities/Sites require at least one service account for certain site functionality.

- This service account will run the EMS Mobile Page and Whiteboard Kiosk Page functions.
- Under BMS version 1.xx a single service account can be used for both functions.
- The service account that runs the EMS Mobile Page and Whiteboard Kiosk Page functions must not have any Policies assigned that restrict its use to specific computers.

BMS minimum hardware and software requirements are presented below:

Table 1 - Server for Web Applications

Basic software:	Microsoft Windows Server 2008 64 bit R2 Standard Microsoft Clustering Services 2008 IIS 7.5 ASP.NET MVC3 .NET Framework 4.0
Application software:	Dashboards web application
Processor(s):	2 x Intel Xeon E5520 or equivalent
Memory:	16 GB
Hard disks:	600 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

Table 2 - Application Sever

Basic software:	Microsoft Windows Server 2008 64 bit R2 Standard .NET Framework 4.0
Application software:	EIS, EVS, DS, BMS InFlow
Processor(s):	2 x Intel Xeon E5520 or equivalent
Memory:	16 GB
Hard disks:	600 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

Table 3 - Database Server

Basic software:	Microsoft Windows Server 2008 64 bit R2 Standard Microsoft SQL Server 2008 R2 Standard .NET Framework 4.0
Application software:	Databases used by the services installed on APP
Processor(s):	2 x Intel Xeon E5520 or equivalent
Memory:	16 GB
Hard disks:	600 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

2.3 Configuration Parameters

This section describes configuration parameters of the BMS application.

Table 4 - BMS ServiceHost Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
BMS.ServiceHost.exe.config	configuration/appSettings/key	ConnectionString	Data source=vadbserver\sql2008;InitialCatalog=BMS;Persist Security Info=False;Integrated Security=SSPI	Connection string for the connection to the BMS database.
		DatasetPath	DBRepository	Data Adapters (eXtensible Markup Language (XML) mapping files) path.
		LocalServer	yes/no	ePractice remoting.
		UseSecurityContext	0/1	ePractice security context.
		ePractice.MiddleTier.Transaction	MiddleTier.dll	Specifies the middle tier assembly.
		ConnectionRef	'1	ePractice connection reference.
		TransactionProvider	ePractice.MiddleTier.	ePractice transaction provider.
		CustomTransactionProvider		
		VistaWorker.WorkerDelayTimeSpan	0:0:0:1	Time span between the BMS Service starts and the Vista Worker runs for the first time.
		VistaWorker.WorkerPeriodTimeSpan	0:0:0:5	Time span between two runs of the Vista Worker.
		VistaWorker.Enabled	true/false	Specifies if the Vista Worker is enabled.
		VistaWorker.BulkSize	100	Maximum number of processed entities in one step.
		VistaIntegration.Enabled	true/false	Specifies if the Vista Integration is enabled/disabled.
		SmtpHost	localhost	Smtp host.
		VistaWorker.VistASitesFilePath	VistASites.xml	The vista sites configuration file name.

VistaIntegration.SchedulerSecondsLate	30	The time delay of schedulers.
VistaIntegration.UpdateBmsPatients	true/false	Whether update bms patients is enabled or not.
VistasBedHoldSupported	V01BHS	Which VistA support Bed Hold.
visitorAppPwd	UM	Password used by MDWS to connect to VistA.

File	Section	Configuration key	Configuration values (ex.)	Description
BMSBackgroundProcessorAgent		visitorUserSiteCode	523	User Site Code used by MDWS to connect to VistA.
		visitorUserName	DEPARTMENT OF DEFENSE,USER	User Name used by MDWS to connect to VistA.
		visitorUserDuz	10000029117	User Duz used by MDWS to connect to VistA.
		visitorUserSsn	123456789	User SSN used by MDWS to connect to VistA.
		visitorContext	OR CPRS GUI CHART	Context used by MDWS to connect to VistA.
		UsingNewMdwsMethods	true/false	Whether use new MDWS methods for vista integration.
		BMS_EIS_GET_ENTITY_FILTR_PAGE_SIZE	1000	Number of records queried that are brought from EIS in one page.
		BMS_EVS_GET_CONCEPT_PAGE_SIZE	1000	Number of records queried that are brought from EVS in one page.
		Changeset	Number of latest build.	Changeset of the installed build.
		NumiSvcAuthenticationKey	AEB4E3F0-67E4-4CAF-8A16-D7C93A075371	NUMI service authentication key.
		NumiMaxNumberOfSitesPerCall	5	Maximum number of sites that NUMI processes in one call.
		ReadCacheEndpointFromConfig	true/false	If true the cache is read from config, otherwise is read from BMS table.
		UseCacheEndpointFromConfigWithSsl	true/false	Whether use SSL endpoint from configuration file.
		ProxyPoolMaxCount	1000	The maximum number of proxies in the pool.
		MdwsEndpointUrl_1	http://mdws_server:81/QuerySvc.asmx	MDWS instance URL address.
		MdwsEndpointUrl_2	http://mdws_server:82/QuerySvc.asmx	MDWS instance URL address.
		VistalIntegrationJobFailedMaxCount	25	The maximum number of job failures until the system decides to retry.
		VistalIntegrationJobFailedIncrementDateMinutes	10	The time span (minutes) that the system decides to increment job's start date when the threshold of job failures is reached.
		VistalIntegrationJobFailedNotificationEmailTo	va_person@va.gov	Recipient's email used when a job fails.
		VistalIntegrationJobFailedNotificationEmailFrom	BMSBackgroundProcessorAgent@va.gov	Sender's email used when a job fails.

File	Section	Configuration key	Configuration values (ex.)	Description
	configuration/system.serviceModel/services/service/host/baseAddresses	baseAddress	http://vaserver:17050/BMSOperations	BMS Operations service endpoint address.

	system.serviceModel/client/endpoint		BedCleanWF	client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/BedUnavailableWF	Bed Unavailable Workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/BedUnavailableWF	Bed Unavailable Workflow Windows authentication client endpoint address.

Table 5 - EIS Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
EISService Implementation. dll config	configuration/connectionStrings/add	ConnectionString	Workstation id=vadbserver\sql2008r2;packet size=4096;data source=vadbserver\sql2008r2;persist security info=False;Initial Catalog=BMS_EIS;Integrated Security=SSPI;	Connection string for the connection to the BMS_EIS database.
		DatasetPath	DBRepository	Data Adapters (XML mapping files) path.
	configuration/appSettings/kev	OverwriteCreateEntityId	true/false	If set to true, the service generates a new unique identifier on each resource create call, otherwise, it uses the identifier received as parameter. If set to true, the service notifies linked
		NotificationIndicator	true/false	EIS services of changes produced on entities.
		UseSecurityContext	0/1	ePractice security context
		DnsIdentity	IWHM3Services	Certificate which specifies the service's dns identity.
		ReceiveIndicator	true/false	If set to true, the service accepts notification messages from linked EIS services.
		AutomaticLinkIndicator	true/false	If set to true, entities are automatically linked (associated as equivalent) across linked EIS services.
		XEISIndicator	true/false	Specifies whether the cross EIS worker should be started.

	XEISDomain	domain name	Domain of the cross EIS implementation.
--	------------	-------------	---

File	Section	Configuration key	Configuration values (ex.)	Description
configuration/system/serviceModel/behaviors/endpointBehaviors/behavior/clientCredentials/serviceCertificate/scopedCertificates/add		SubscriptionTopic	entity	Specifies the topic of the synchronization subscription, meaning what should be synced.
		AuditProtocol	none/udp	Transfer protocol to communicate with the audit service or none if not used.
		AuditServer	auditserver	Server where the audit service resides.
		AuditPort	10000	Port of the audit service on the specified server.
		AuditSynchronousIndicator	true/false	Specifies if the Audit Service should be called synchronous or asynchronous.
	targetUri		http://vaserver:17050/STS/Windows	URI of STS certificate.
	address		http://vaserver:17050/STS/mex	STS metadata exchange URL used by ServiceBinding.
	address		http://vaserver:17050/STS/Windows	STS URL used by WinBinding.

	add			
Connections.xml	MyConnections/ connectionString	connectionString	workstation id= vadbserver\sql2008r2;packet size=4096;data source= vadbserver\sql2008r2;persist security info=False;Initial Catalog=BMS_EIS;Integrated Security=SSPI;	Connection string for the connection to the BMS_EIS database.

Table 6 - EVS Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
MessageImpl.dll. config	configuration/ appSettings/ key	DatasetPath	DBRepository	Data Adapters (XML mapping files) path.
		ApplicationFolder	D:\CTS\CTSImport	String path to application folder.
		SqlScriptsFolder	SqlScrips	SQL scripts folder name.
		TextFilesFolder	TextFiles	Text files folder name.
		PackageFilesFolder	PackageFiles	Package files folder name.
		CodeMappingTempTable	dbo.TempMapping	The mapping temporary table name.
		TemporaryFolder	Temp	Temporary folder name.
		SubscriptionTopic	cts	Specifies the topic of the synchronization subscription, meaning what should be synced.
		NotificationIndicator	true/false	Notification indicator.
		BulkInsertBatchSize	1000	Maximum number of processed records in one step.
		DnsIdentity	IWHM3Services	Certificate which specifies the service's dns identity.
		StartSecurityEndpoints	true/false	Specifies if the secure endpoints are to be started.
		http://localhost:17050/CTSImport	EVS	EVS import from excel key.

	http://localhost:17050/CTSExport	EVS	EVS export to excel key.
configuration/system.serviceModel/services/service/host/baseAddresses/	baseAddress baseAddress	http://vaserver:17050/ CTSVocabularyRuntime https://vaserver:17050/	CTS VocabularyRuntime service endpoint address (HTTP Protocol). CTS VocabularyRuntime service endpoint address (HTTPS Protocol).

File	Section	Configuration key	Configuration values (ex.)	Description
configuration/system.serviceModel/services/service/host/baseAddresses/add	add		CTSVocabularyRuntime	
	baseAddress		http://vaserver:17050/CTSMapping	CTS Mapping service endpoint address (HTTP Protocol).
	baseAddress		https://vaserver:17706/CTSMapping	CTS Mapping service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSVocabularyBrowse	CTS VocabularyBrowse service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSVocabularyBrowse	CTS VocabularyBrowse service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSMessageRuntime	CTS MessageRuntime service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSMessageRuntime	CTS MessageRuntime service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSMessageBrowse	CTS MessageBrowse service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSMessageBrowse	CTS MessageBrowse service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSMessageEdit	CTS MessageEdit service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSMessageEdit	CTS MessageEdit service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSVocabularyEdit	CTS VocabularyEdit service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSVocabularyEdit	CTS VocabularyEdit service endpoint address (HTTPS Protocol).
	baseAddress		http://vaserver:17050/CTSMappingEdit	CTS MappingEdit service endpoint address (HTTP Protocol).
			https://vaserver:17706/CTSMappingEdit	CTS MappingEdit service endpoint address (HTTPS Protocol).
configuration/system.serviceModel/services/service/host	baseAddress		http://vaserver:17050/Xaml	XAML service endpoint address.

File	Section	Configuration key	Configuration values (ex.)	Description
	ost/baseAddresses/add			
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/EVSWrapper	EVS Wrapper service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/CTSImport	CTS Import service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/CTSExport	CTS Export service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/CTSEditBulk	CTS EditBulk service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/CTS/SubscriptionAdministration	CTS Subscription Administration service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/CTS/MessageAdministration	CTS Message Administration service endpoint address.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuerMetadata	address	http://vaserver:17050/STS/mex	STS metadata exchange URL used by ServiceBinding.

File	Section	Configuration key	Configuration values (ex.)	Description
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer	address	http://vaserver:17050/STS/Windows	STS URL used by WinBinding.
EVSWrapper.dll.config	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/EVSWrapper	EVS Wrapper service endpoint address.

Table 7 - PAP Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
PolicyAdministrationPoint.dll.config	configuration/annSettings/key	DefaultResourceRoot	VA	Default root for identifiers.
		DatasetPath	DBRepository	Data Adapters (XML mapping files) path.
		su	hmcomplus	Specifies the super user of the application.
		SubscriptionTopic	Authorization	Specifies the topic of the synchronization subscription, meaning what should be synced.
		DnsIdentity	IWHM3Services	Certificate which specifies the service's dns identity.
		AuditProtocol	none/udp	Transfer protocol to communicate with the audit service or none if not used.
		AuditServer	auditserver	Server where the audit service resides.
		AuditPort	10000	Port of the audit service on the specified server.

configuration/connectionStrings/add	connectionString	workstation id=vadbserver\sql2008r2;packet size=4096;data source=vadbserver\sql2008r2;persist security info=False;Initial Catalog=BMS_AUTHZ;Integrated Security=SSPI;	Connection string for the connection to the BMS_AUTHZ database.
configuration/system.serviceModel/bindings/wsFederationHttpBi	address	http://vaserver:17050/STS/Windows	STS URL used by UpnBinding.

File	Section	Configuration key	Configuration values (ex.)	Description
	nding/binding/security/message/issuer			
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/binding/security/message/issuer	address	http://vaserver:17050/STS/Windows	STS URL used by WinBinding.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/PAP	PAP service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/AuthorizationPublisher	AuthorizationPublisher service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/PAP/MessageAdministration	MessageAdministration service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/PAP/SubscriptionAdministration	SubscriptionAdministration service endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PDP/Request	PDP request client endpoint address.
	configuration/system.serviceModel/behaviors/endpointBehaviors/behavior/clientCredentials/serviceCertificate/scopedCertificates/add	targetUri	http://vaserver:17050/STS/Windows	URI of STS certificate.
Connections.xml	MyConnections/MyConnection/	connectionString	workstation id=vadbserver\sql2008r2;packet	Connection string for the connection to the BMS_AUTHZ database.

File	Section	Configuration key	Configuration values (ex.)	Description
	ConnectionString		size=4096;data source=vadbserver\sql2008r2;persist security info=False;Initial Catalog=BMS_AUTHZ;Integrated Security=SSPI;	

Table 8 - PDP Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
PolicyDecision Point.dll.config	configuration/appSettings/key	DefaultResourceRoot	VA	Default root for identifiers.
		ConnectionString	Data source=vadbserver\sql2008; InitialCatalog=BMS_AUTHZ;Persist Security Info=False;Integrated Security=SSPI	Connection string for the connection to the BMS_AUTHZ database.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuerMetadata	address	http://vaserver:17050/STS/mex	STS metadata exchange URL used by ServiceBinding.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/PDP	PDP service endpoint address.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/PDP/Request	PDP Request service endpoint address.

Table 9 - RS Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
------	---------	-------------------	----------------------------	-------------

RS.Service Implementation	configuration/ appSettings/	DefaultResourceRoot reportingservicesURL	VA http://vaserver:90/Report	Default root for identifiers. Reporting services URL address.
------------------------------	--------------------------------	---	---------------------------------	--

File	Section	Configuration key	Configuration values (ex.)	Description
dll.config	key		Server/ReportService2005.asmx	
		RootFolderName	Reporting Service	Reports root folder in the reporting services.
		AuditProtocol	none/udp	Transfer protocol to communicate with the audit service or none if not used.
		AuditServer	auditserver	Server where the audit service resides.
		AuditPort	10000	Port of the audit service on the specified server.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PDP/Request	PDP request client endpoint address.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuerMetadata	address	http://vaserver:17050/STS/mex	STS metadata exchange URL used by ServiceBinding.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer	address	http://vaserver:17050/STS/Windows	URL of CustomBinding_IAuthenticationService.
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/RS	RS service endpoint address.
	configuration/system.serviceModel/behaviors/endpointBehaviors/behavior/clientCredentials/serviceCertificate/scopedCertificates/	targetUri	http://vaserver:17050/STS/Windows	URI of STS certificate.

File	Section	Configuration key	Configuration values (ex.)	Description
	add			

Table 10 - STS Service Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
SecureToken Service.dll.config	configuration/ appSettings/ key	Delay	0:01:00	Sleep interval between the retries to insert the superusers in the database.
		TokenTTLInMinutes	1442	Time to live of the security token, in minutes.
		STSCertificateStoreName	My	Specifies the name of the X.509 certificate store to open.
		STSCertificateStoreLocation	LocalMachine	Specifies the location of the X.509 STS certificate store.
		STSCertificateFindType	FindBySubjectName	Specifies the type of value the X509Certificate2Collection.Find method
				searches for.
		STSCertificateFindValue	IWHM3STS	STS Certificate name.
		ServiceCertificateStoreName	My	Specifies the name of the X.509 certificate store to open.
		ServiceCertificateStoreLocation	LocalMachine/CurrentUser	Specifies the location of the X.509 services' certificate store.
		ServiceCertificateFindType	FindBySubjectName	Specifies the type of value the X509Certificate2Collection.Find method searches for.
		ServiceCertificateFindValue	IWHM3Services	Services' Certificate name.
		su	Domain qualified user names, comma separated.	Usernames of all the super users in the application.
		domains	VA VA	Comma separated list of root extension values for the application's domains.

configuration/ connectionStrings/ add	connectionString	workstation id= vadbserver\sql2008r2;packet size=4096;data source= vadbserver\sql2008;persist security info=False;Initial Catalog=BMS_AUTHZ;Integrated Security=SSPI;	Connection string for the connection to the BMS_AUTHZ database.
configuration/ system.serviceMod	baseAddress	http://vaserver.17050/STS	STS service endpoint address.

File	Section	Configuration key	Configuration values (ex.)	Description
	el/services/service/host/baseAddresses/add			
	configuration/system.serviceModel/services/service/host/baseAddresses/add	baseAddress	http://vaserver:17050/authsvc	Authsvc service endpoint address.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuerMetadata	address	http://vaserver:17050/STS/mex	STS metadata exchange URL used by ServiceBinding.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer	address	http://vaserver:17050/STS/Windows	URL of STS used by WindowsBinding.
	configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer/identity/userPrincipalName	value	VAUser@domain.com	Name of the user under which the service is running.
	configuration/system.serviceModel/behaviors/serviceBehaviors/behavior/serviceMetadata	httpGetUrl	http://vaserver:17050/STS/mex	Metadata exchange address of ServiceSTSBehavior.

Table 11 - Win ServiceHost Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
WinServiceHost.exe.config	configuration/appSettings/key	LocalServer	yes/no	ePractice remoting flag. Only used with yes.
		UseSecurityContext	0/1	Flag which specifies if ePractice uses the security context.
		AuditProtocol	none/udp	Transfer protocol to communicate with the audit service or none if not used.
		AuditServer	auditserver	Server where the audit service resides.
		AuditPort	10000	Port of the audit service on the specified server.
		ServiceCertificateStoreName	My	Specifies the name of the X.509 certificate store to open.
		ServiceCertificateStoreLocation	LocalMachine	Specifies the location of the X.509 services' certificate store.
		ServiceStatusTimeoutSecondsAdd	\$0dBySubjectName	Specifies the type of value the time in seconds to wait for the services to start. X509Certificate2Collection.Find method searches for

Table 12 - WMI User Group Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
WMI_UserGroup.exe	configuration/appSettings/key	DatasetPath	DBRepository	Data Adapters (XML mapping files) path.
		LocalMachineName	Localhost	Name of the host where WMI_UserGroup will run.
		IsRunningOnLocalMachine	true/false	Specify if WMI_UserGroup will run on local machine or not.
Connections.xml	MyConnections/MyConnection/ConnectionString	ConnectionString	packet size=4096;data source=vadbserver\sq2008r2;persist security info=False;Initial Catalog=BMS_DW;Integrated Security=SSPI;connection timeout = 600	

Table 13 - Policy Manager Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
PolicyManager.exe.config	configuration/appSettings/key	DefaultResourceRoot	VA	Default root for identifiers.
		AuditProtocol	none/udp	Transfer protocol to communicate with the audit service or none if not used.
		AuditServer	auditserver	Server where the audit service resides.
		AuditPort	10000	Port of the audit service on the specified server.
	system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer	address	http://vaserver:17050/STS/	STS address used by wsFederationBinding binding
	configuration/system.serviceModel/behaviors/endpointBehaviors/behavior/clientCredentials/scopedCertificates/add	targetUri	http://vaserver:17050/STS/	STS address of STS certificate.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PAP	PAP client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/AuthorizationPublisher	AuthorizationPublisher client endpoint address.
PolicyEditor.dll.config	configuration/system.serviceModel/client	address	http://vaserver:17050/PAP	PAP client endpoint address.

Table 14 - BMS Web Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
Web.config	configuration/ appSettings/	webpages:Version	1.0.0.0	Version of the web site.
		ClientValidationEnabled	true/false	Gets or sets a value that indicates whether client-side validation is enabled.

File	Section	Configuration key	Configuration values (ex.)	Description
key		UnobtrusiveJavaScriptEnabled	true/false	Gets or sets a value that indicates whether unobtrusive JavaScript is enabled.
		ReportsPath	/BMS	Path of the reports in the reporting services.
		BMS.EVSDictionaryCacheSize	512	Cache size for the vocabulary service, representing the number of concepts cached.
		VAURL	http://vaww.esm.infoshare.va.gov/PMIC/Projects/BMS/Implement/default.aspx	BMS Sharepoint Site.
		TICKETURL	http://vaww.esm.infoshare.va.gov/PMIC/Projects/BMS/Implement/HDProcess/default.aspx	Enter a defect and enhancement ticket.
		WhiteboardRefreshRate	60	Time in seconds of refresh rate of the whiteboard page.
		THRESHOLD	0	Threshold value used to compare wait time value of the patient from the Patients Pending Placement List in order to display an alert on the Patients Pending Placement List.
		aspnet:MaxHttpCollectionKeys	2000	Maximum number of aps.net collection keys.
		WhiteboardAjaxRefreshRate	60	Time in seconds of AJAX refresh rate of the whiteboard page.
		WhiteboardRealRefreshRate	60	Time in minutes of standard refresh rate of the whiteboard page.
		HomePageRefreshRate	300	Time in seconds of refresh rate of the home page.
		BMS_EIS_GET_ENTITY_FILTER_PAGE_SIZE	1000	Number of records queried that are brought from EIS in one page.
		BMS_EVS_GET_CONCEPT_PAGE_SIZE	1000	Number of records queried that are brought from EVS in one page.
		SmtpHost	VA_MAIL_SERVER	Mail Server host.
		DisplayDetailedErrorMessage	true/false	If set to true displays detailed error message, otherwise displays a generic message ("Please contact BMS administrator.").

File	Section	Configuration key	Configuration values (ex.)	Description
configuration/system.serviceModel/bindings/wsFederationHttpBinding/binding/security/message/issuer		Is_IIS_Single_Instance	true/false	If set to true a single IIS instance is used. If set to false multiple IIS instances are used (web farm scenario).
		ProxyPoolMaxCount	100	The maximum number of proxies in the pool.
		MdwsEndpointUrl_1	http://mdws_server:81/QuerySvc.asmx	MDWS instance URL address.
		MdwsEndpointUrl_2	http://mdws_server:82/QuerySvc.asmx	MDWS instance URL address.
	address		http://vaserver:17050/STS/Windows	STS Windows address used by WindowsBinding.
	address		http://vaserver:17050/STS/	STS address used by WSFederationHttpBinding_Authenticated Service binding.
	address		http://vaserver:17050/authsvc/upnidentity	Security Authentication client endpoint address.
	address		http://vaserver:17050/RS	Reporting Services client endpoint address.
	address		http://vaserver:17050/QueryFunctions	EIS QueryFunctions client endpoint address.
	address		http://vaserver:17050/QueryFunctions	EIS QueryFunctions Windows authentication client endpoint address.
	address		http://vaserver:17050/EntityManagement	EIS EntityManagement client endpoint address.
	address		http://vaserver:17050/EntityManagement	EIS EntityManagement Windows authentication client endpoint address.

File	Section	Configuration key	Configuration values (ex.)	Description
client/endpoint				
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PAP	PAP client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PAP	PAP Windows authentication client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PDP	PDP client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/PDP	PDP Windows authentication client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS VocabularyRuntime	CTS VocabularyRuntime client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS VocabularyBrowse	CTS VocabularyBrowse client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS MessageBrowse	CTS MessageBrowse client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS MessageRuntime	CTS MessageRuntime client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS MessageEdit	CTS MessageEdit client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/CTS VocabularyEdit	CTS VocabularyEdit client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/BMS ConfigurationOperations	BMS ConfigurationOperations client endpoint address.	
configuration/system.serviceModel/client/endpoint	address	http://vaserver:17050/BMS ConfigurationOperations	BMS ConfigurationOperations Windows authentication client endpoint address.	

File	Section	Configuration key	Configuration values (ex.)	Description
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/BMSQuery	BMS Query client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/BMSOperations	BMS Operations client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/TransferWF	Transfer workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/BMSWF	BMS workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/WaitingListWF	Patients Pending Placement List workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/BedCleanWF	Bed clean workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/BedUnavailableWF	Bed Unavailable workflow client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/VistaQuery	VistA Query client endpoint address.
	configuration/system.serviceModel/client/endpoint	address	http://vaserver.17050/VistaQuery	VistA Query Windows authentication client endpoint address.

2.4 Scheduled Windows and SQL Jobs Configuration

BMS runs one Windows Scheduled task: BMS – WMI_UserGroup and two SQL Jobs in order to bring data into the data warehouse (BMS_DW database): BMS - Reports Full and BMS – Reports Incremental. More information about BMS databases can be referenced from [Section 3.3](#).

2.4.1 BMS Reports Full

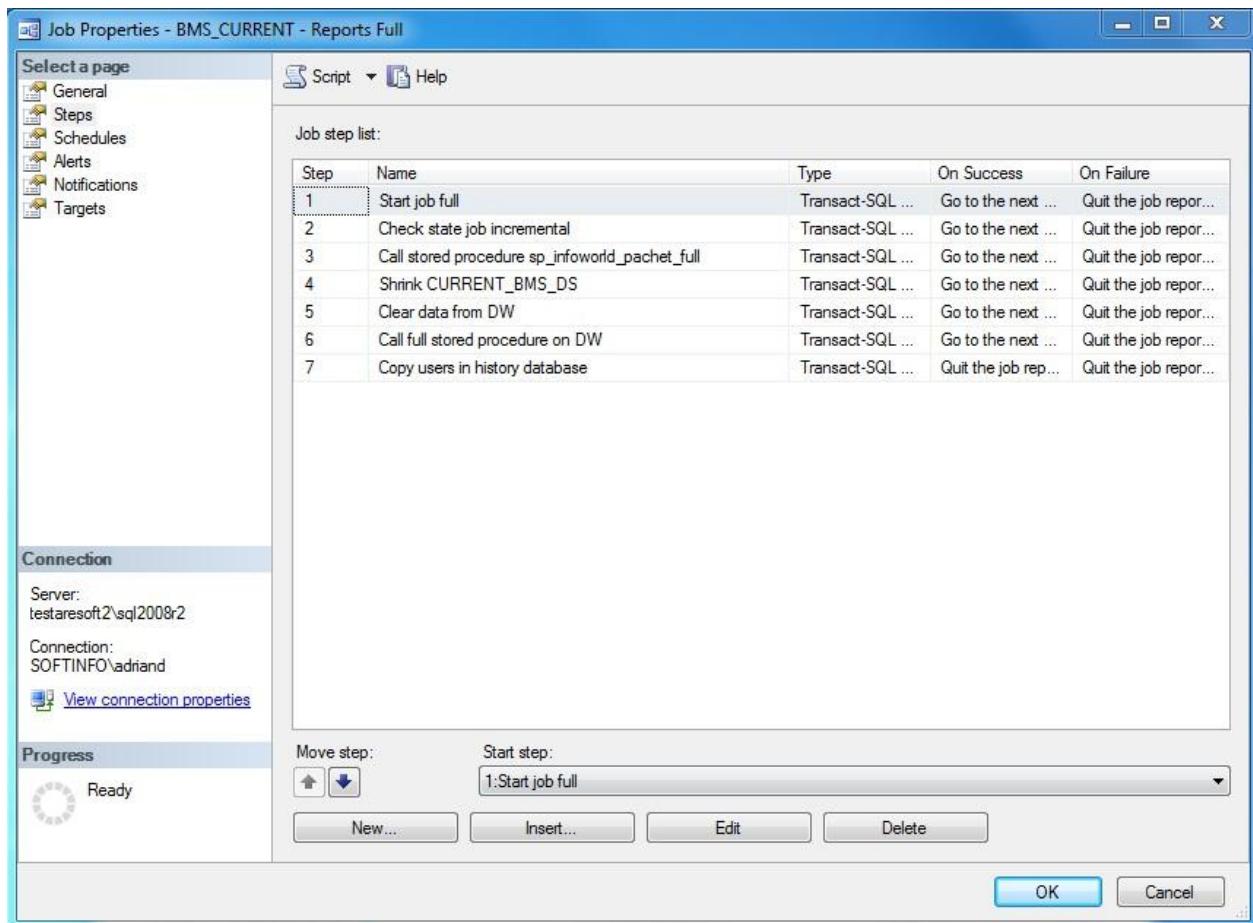

Figure 2 - BMS - Report Full Job

The job's steps can be seen in the figure above and most of them execute stored procedures. At the beginning of the process, the operations are done between the source databases and the destination database, which is BMS_DS in our case.

Each step is described below:

Step 1. Start job full: this is only an informative step for the log file.

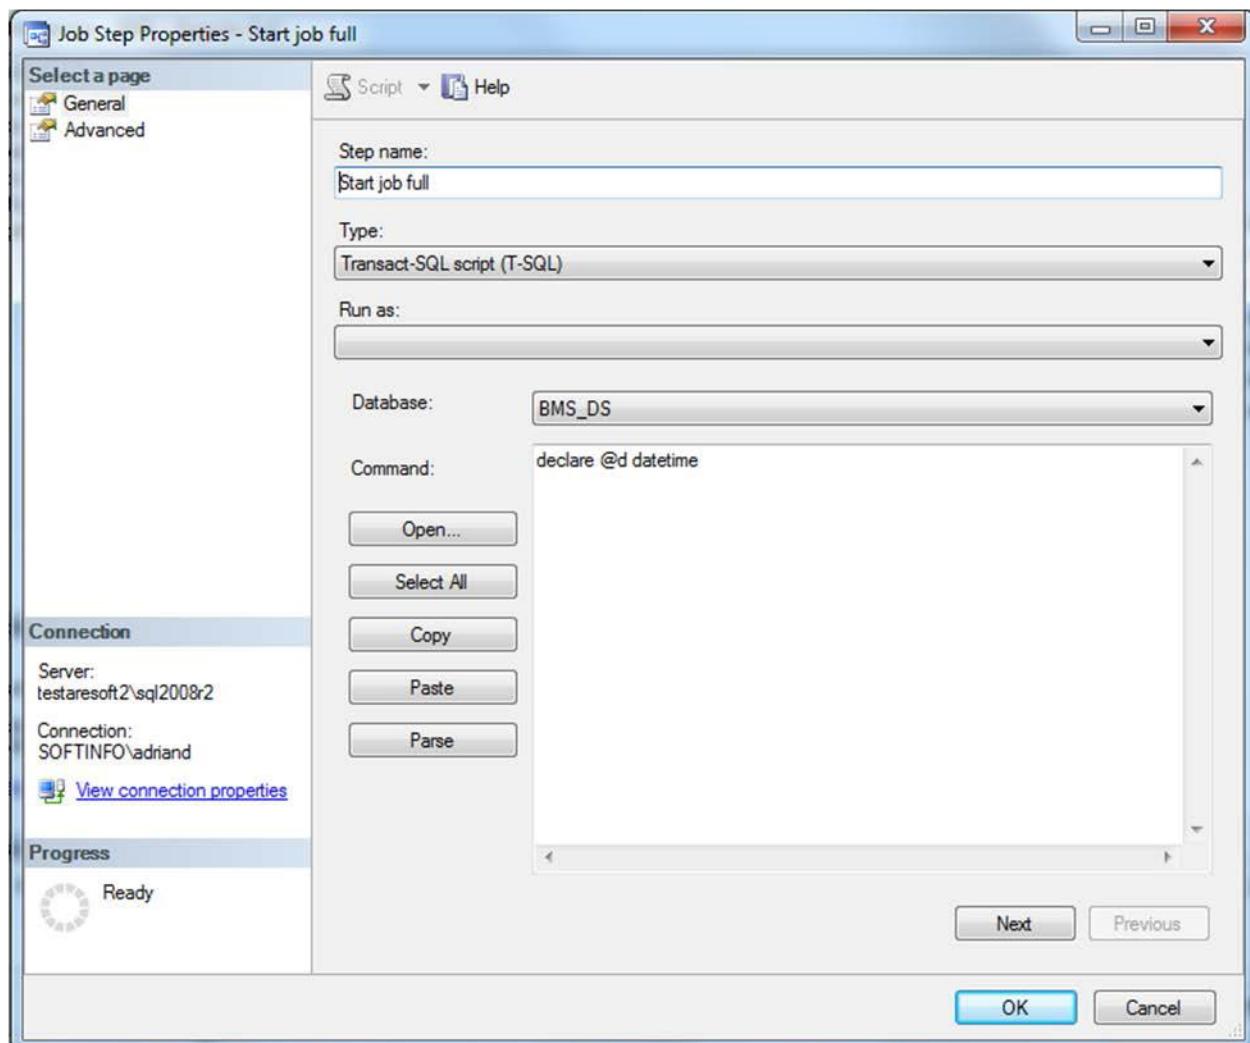

Figure 3 - BMS - Start Full Job

Step 2. Check state job incremental: it checks the state of the BMS incremental job in order to be sure that it is not currently running, in which case the full job cannot continue.

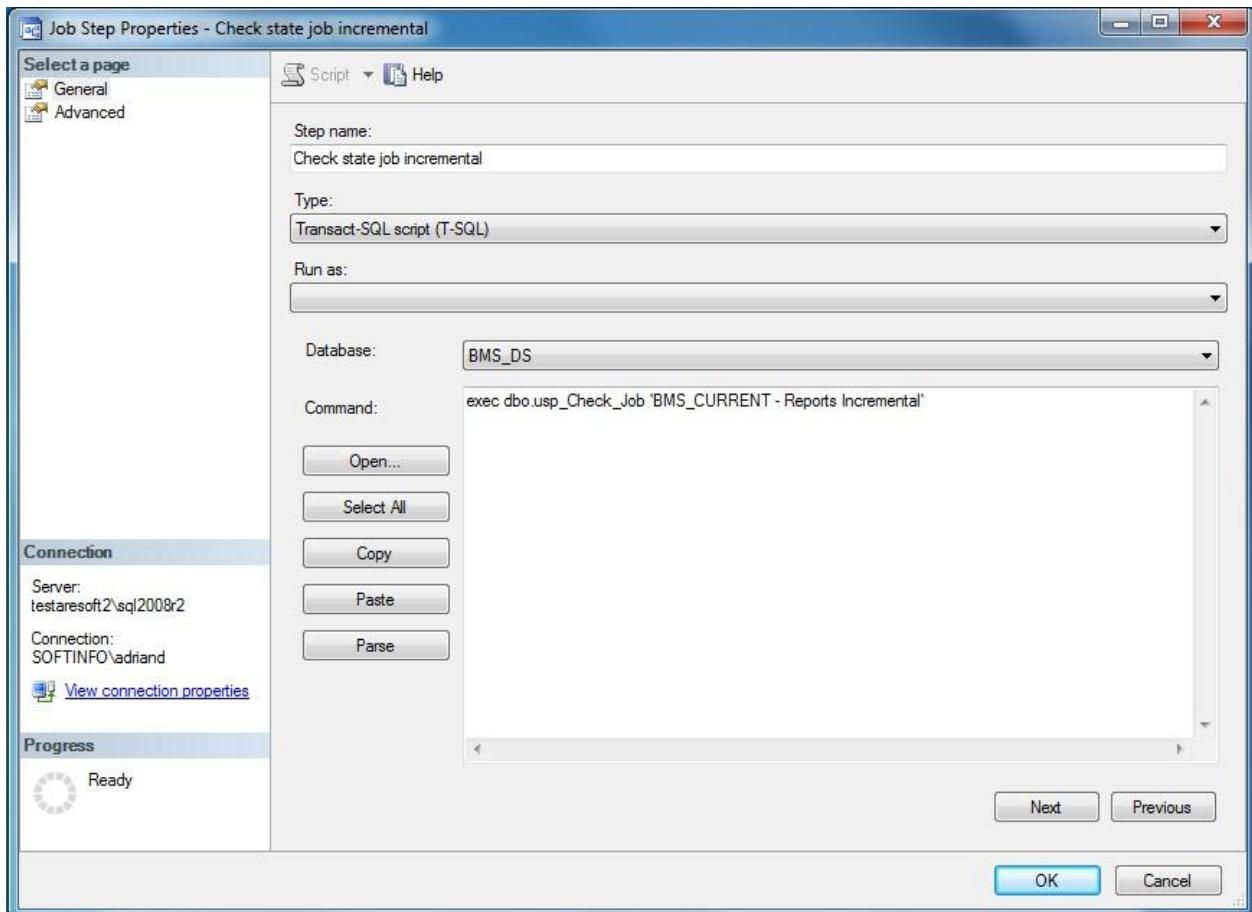

Figure 4 - BMS - Check State Job Incremental

Step 3. Call procedure sp_infoworld_pachet_full: creates or truncates the existing tables in the destination database and then inserts all the rows from each source table in the corresponding destination table. The destination tables from BMS_DS have the same name as the source tables but prefixed with the source database name. This information is stored in a configuration table in BMS_DS database, dbo.ConfigTable.

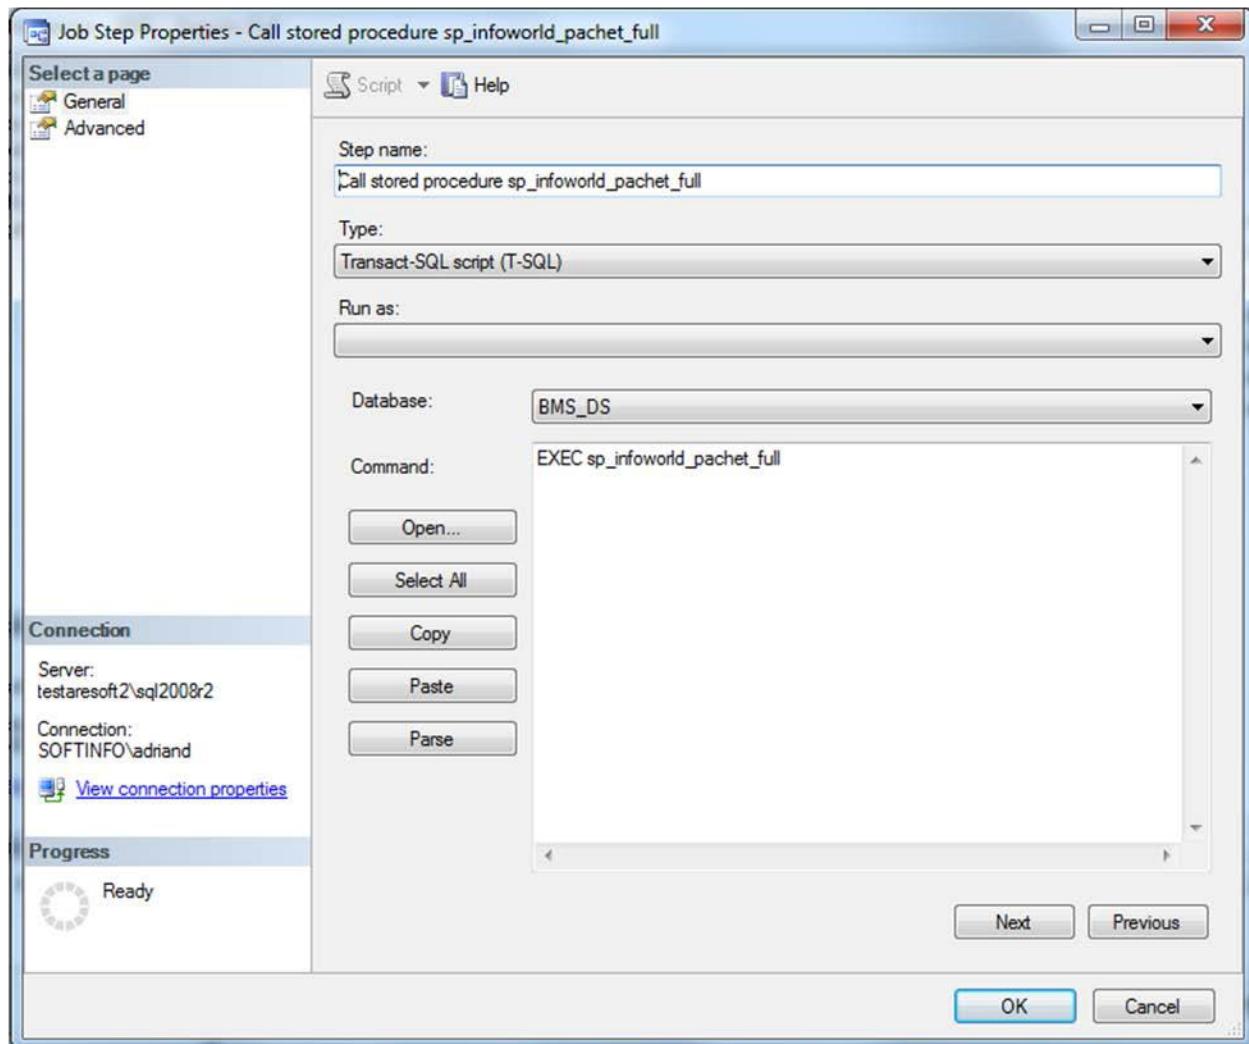

Figure 5 - BMS - Call Procedure

Step 4. Shrink BMS_DS: Shrinks the file with the id 2 (the log file), to the size of 1 MB.

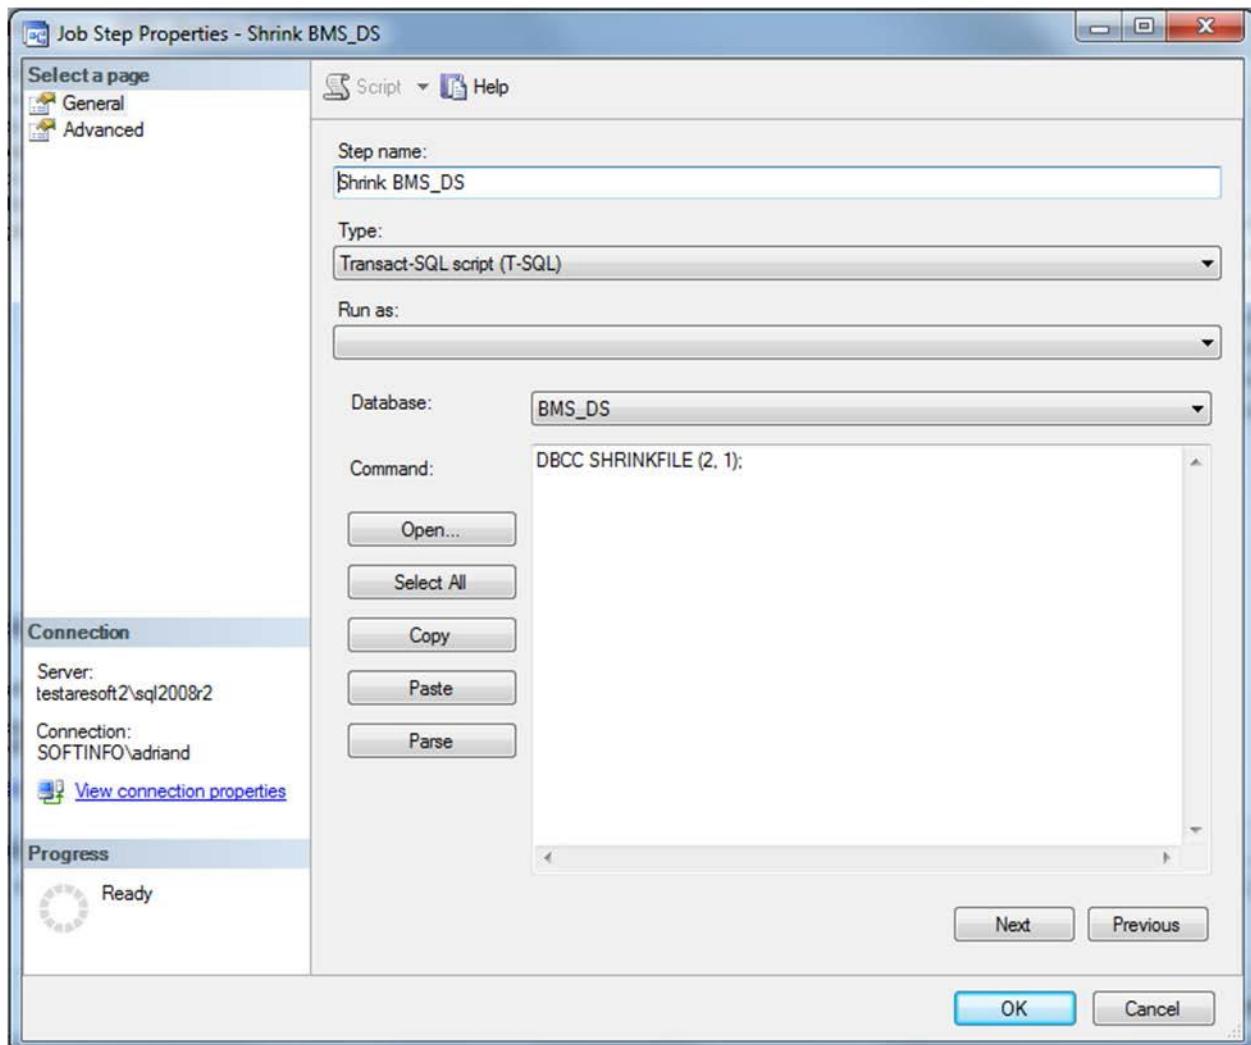

Figure 6 - BMS - Shrink

Step 5. Clear data from BMS_DW: the data warehouse database is cleared, meaning that its tables will become empty, but of course exceptions can exist and they really do - tables that contain static data and should not be removed. Thus, the database becomes ready to receive all the source data.

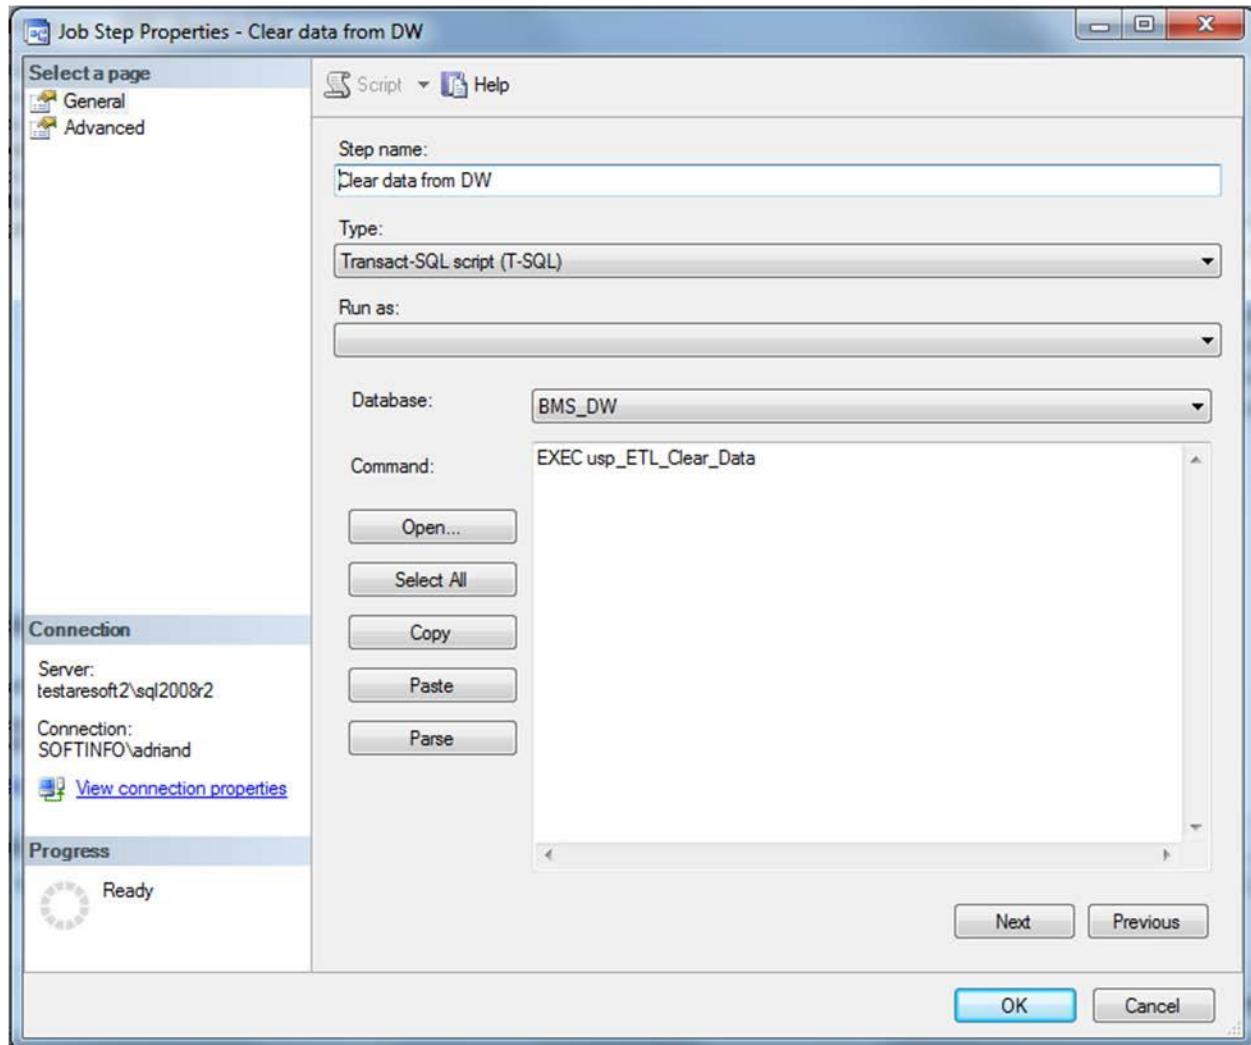

Figure 7 - BMS - Clear Data

Step 6. Call procedure full on BMS_DW: it inserts first the vocabulary data, then EIS entities (ETL dimension tables) and BMS acts (ETL facts tables).

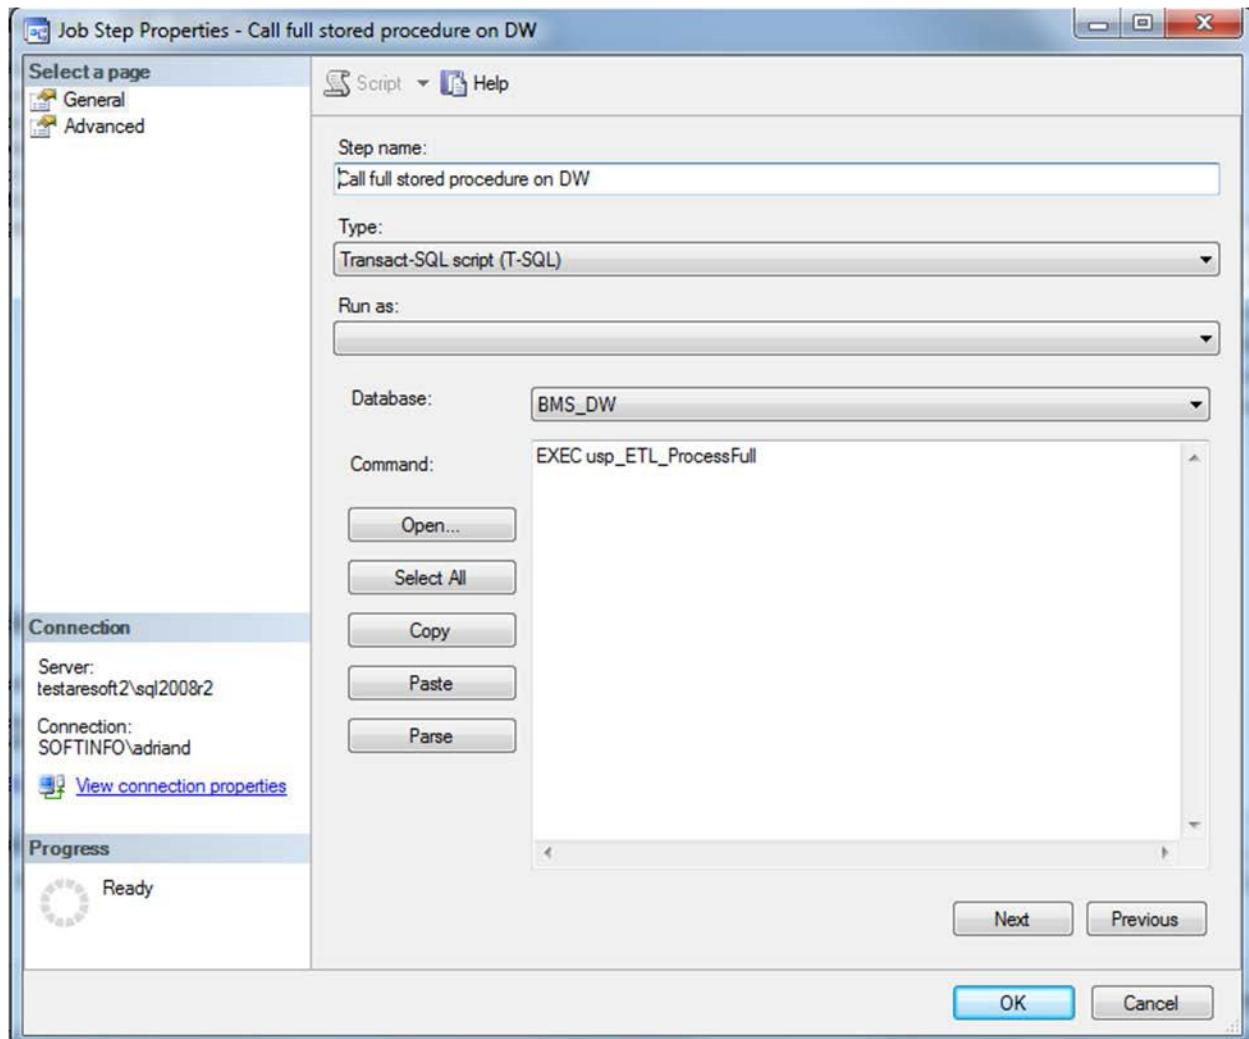

Figure 8 - BMS - Call Procedure Full

Step 7. Copy users in history database: adds users in user_h table from BMS History database. This step is needed because some reports need to display users that did certain insert/update/delete operations in the application.

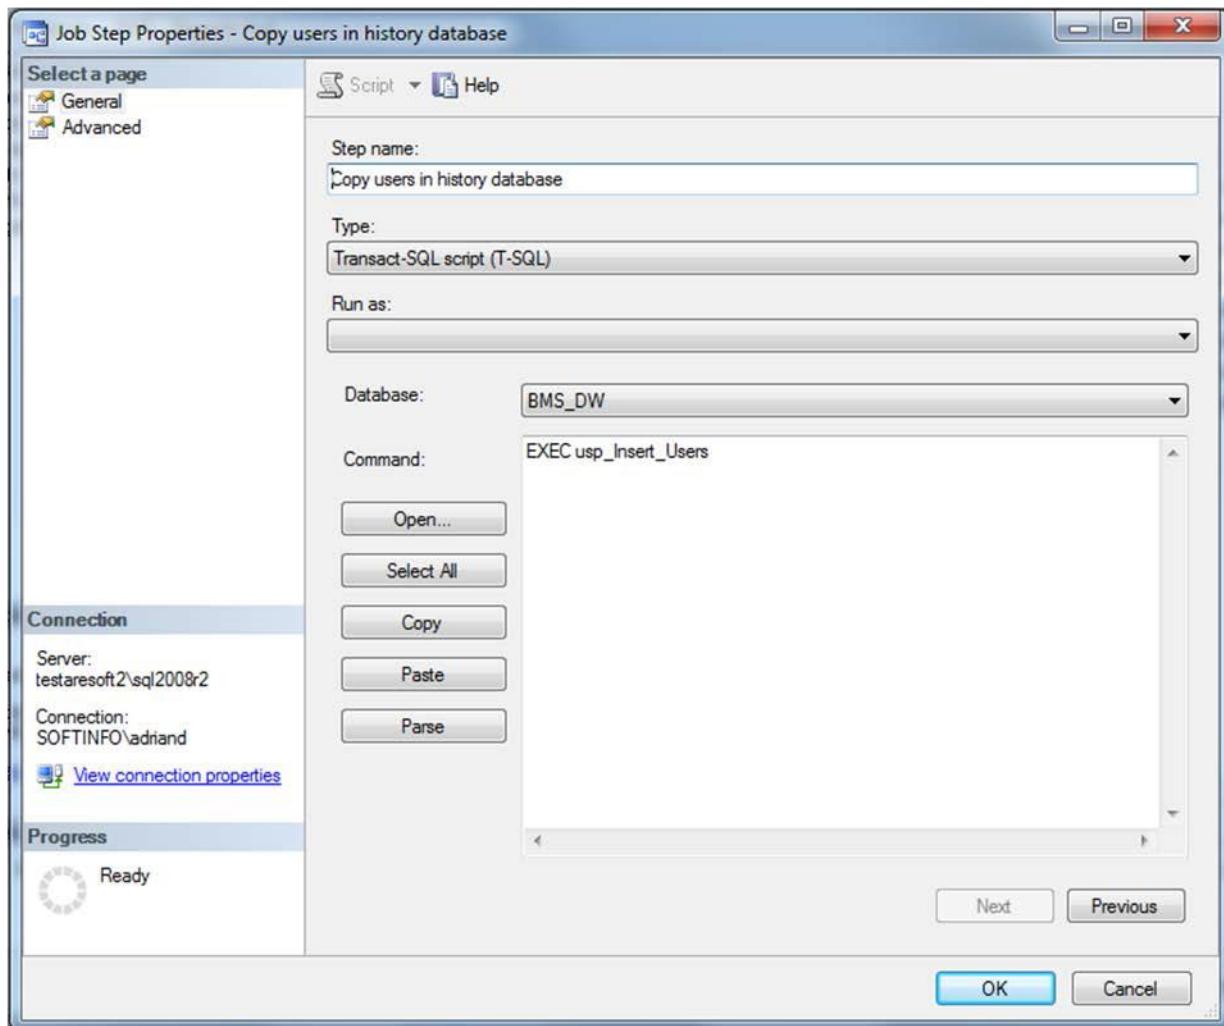

Figure 9 - Copy Users in History Database

For each step a log file can be set, see screenshot below for step 7:

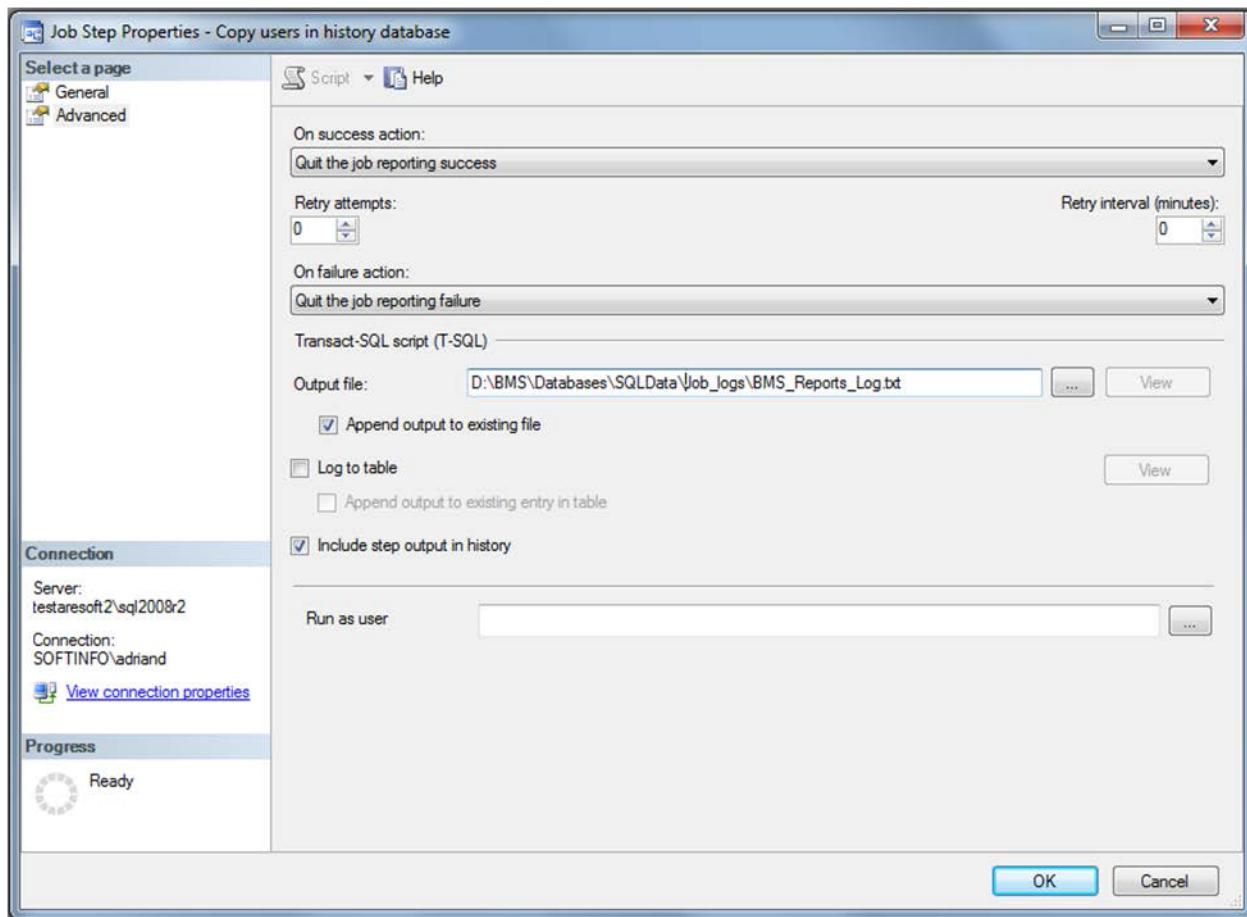

Figure 10 - BMS Reports Full Path File Log

The job can be run by right clicking on the job and then choosing “Start job at step...”, selecting the first job in the appearing window and then hitting the Start button. Then a smaller window remains open, showing the progress of the execution and its result: success or failure. The detailed results can be found in the log file that you set at the installation phase. If an operation fails at any step, the job will quit. This setting can be changed in the step’s *Advanced* tab.

2.4.2 BMS Incremental

BMS Incremental logic is to keep the BMS_DW database up to date without having to delete all the existing data. The following picture shows the job's steps.

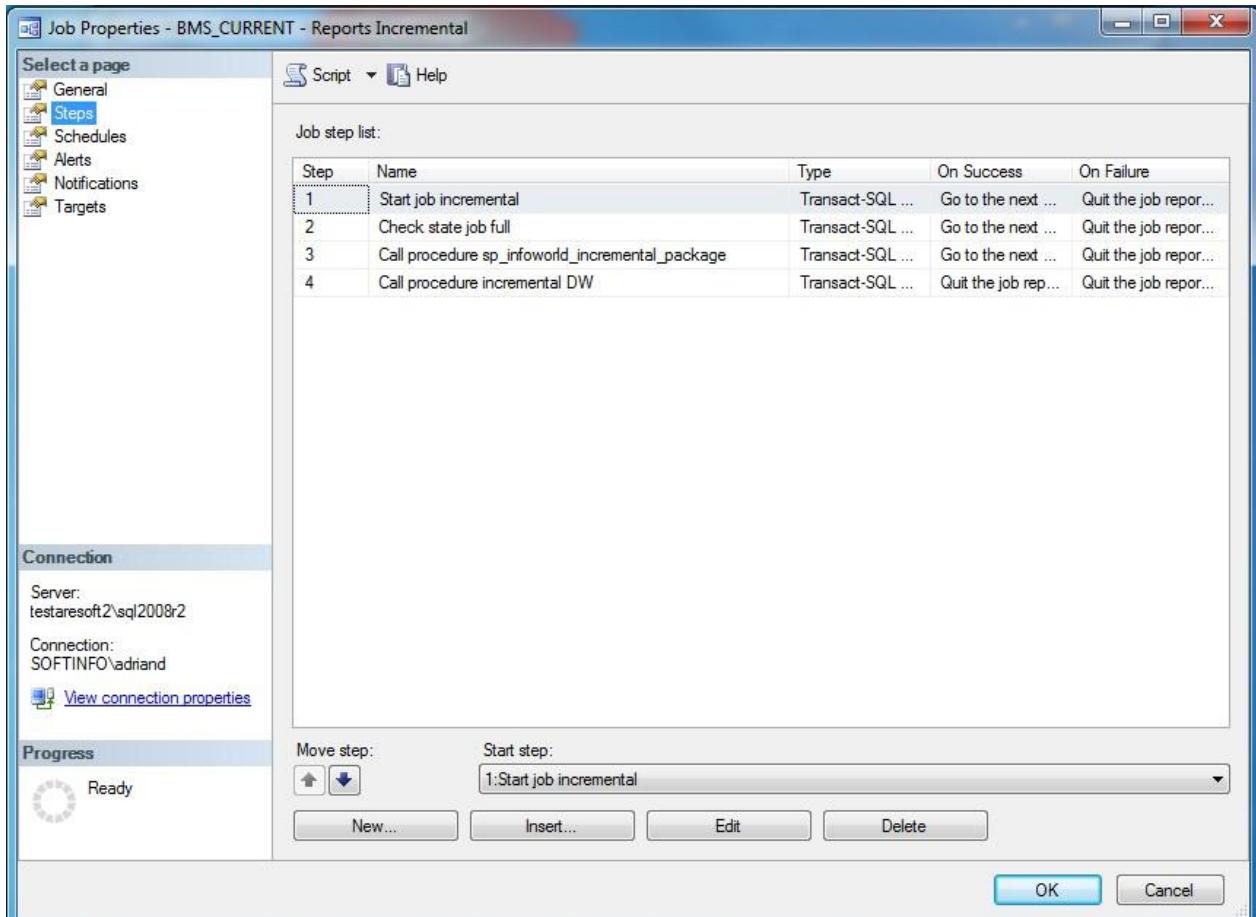

Figure 11 - BMS - Report Incremental Job

Step 1. Start job incremental: this is only an informative step for the log file.

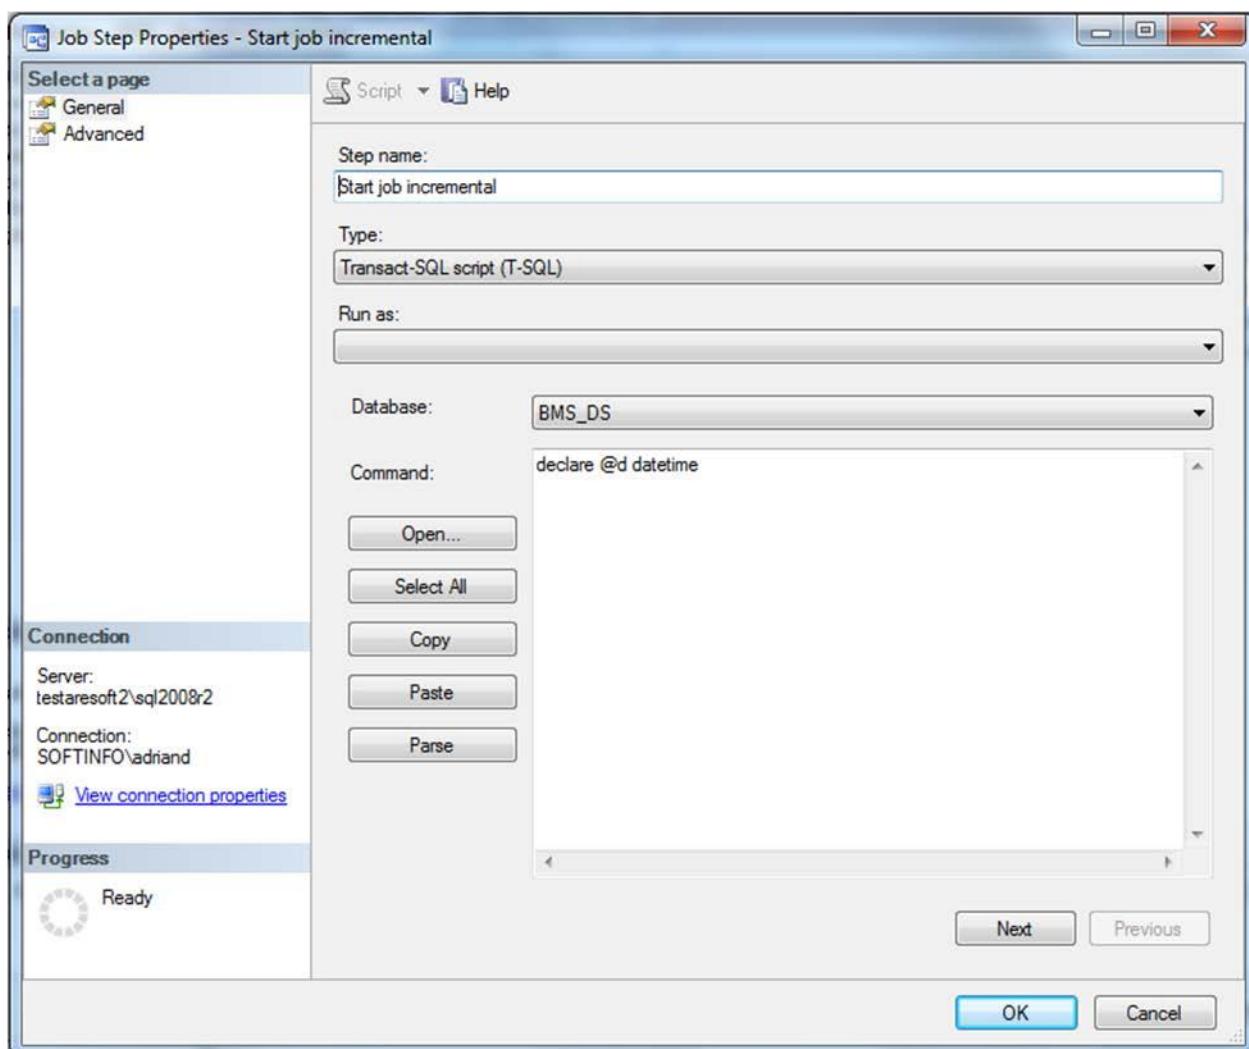

Figure 12 - BMS - Start Job Incremental

Step 2. Check state job full: it checks the state of the BMS full job described above in order to be sure that it is not currently running, in which case the incremental job cannot continue.

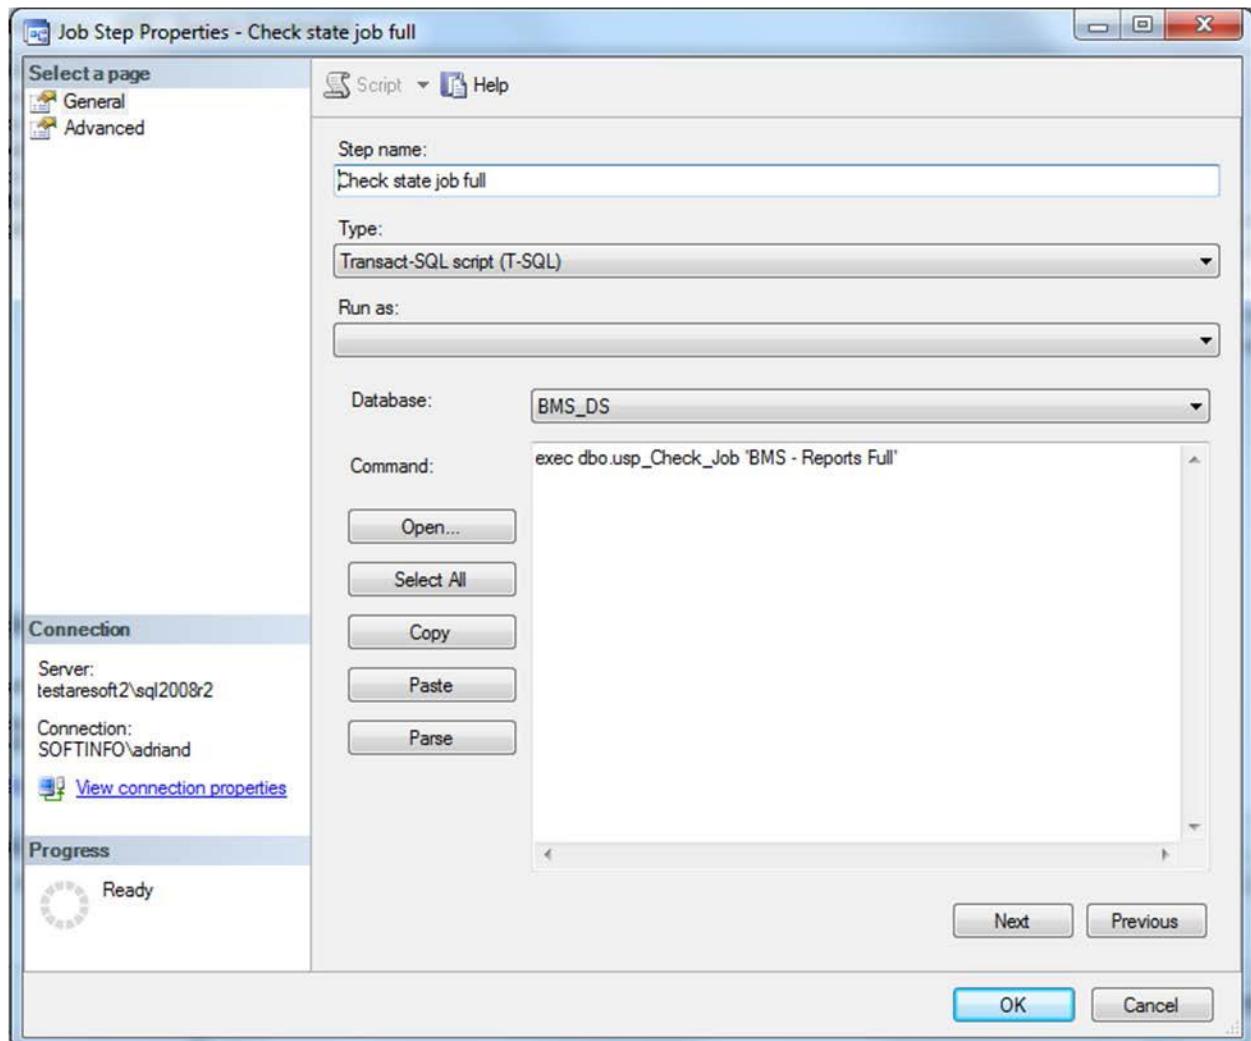

Figure 13 - BMS - Check State Job Full

Step 3. Call procedure sp_infoworld_incremental_package: makes all the necessary updates from the source databases to the BMS_DS database. When rows are deleted in the source tables, an update is made in BMS_DS database (in the necessary tables) by changing a flag column's value to 1 (deleted) from 0 (existing).

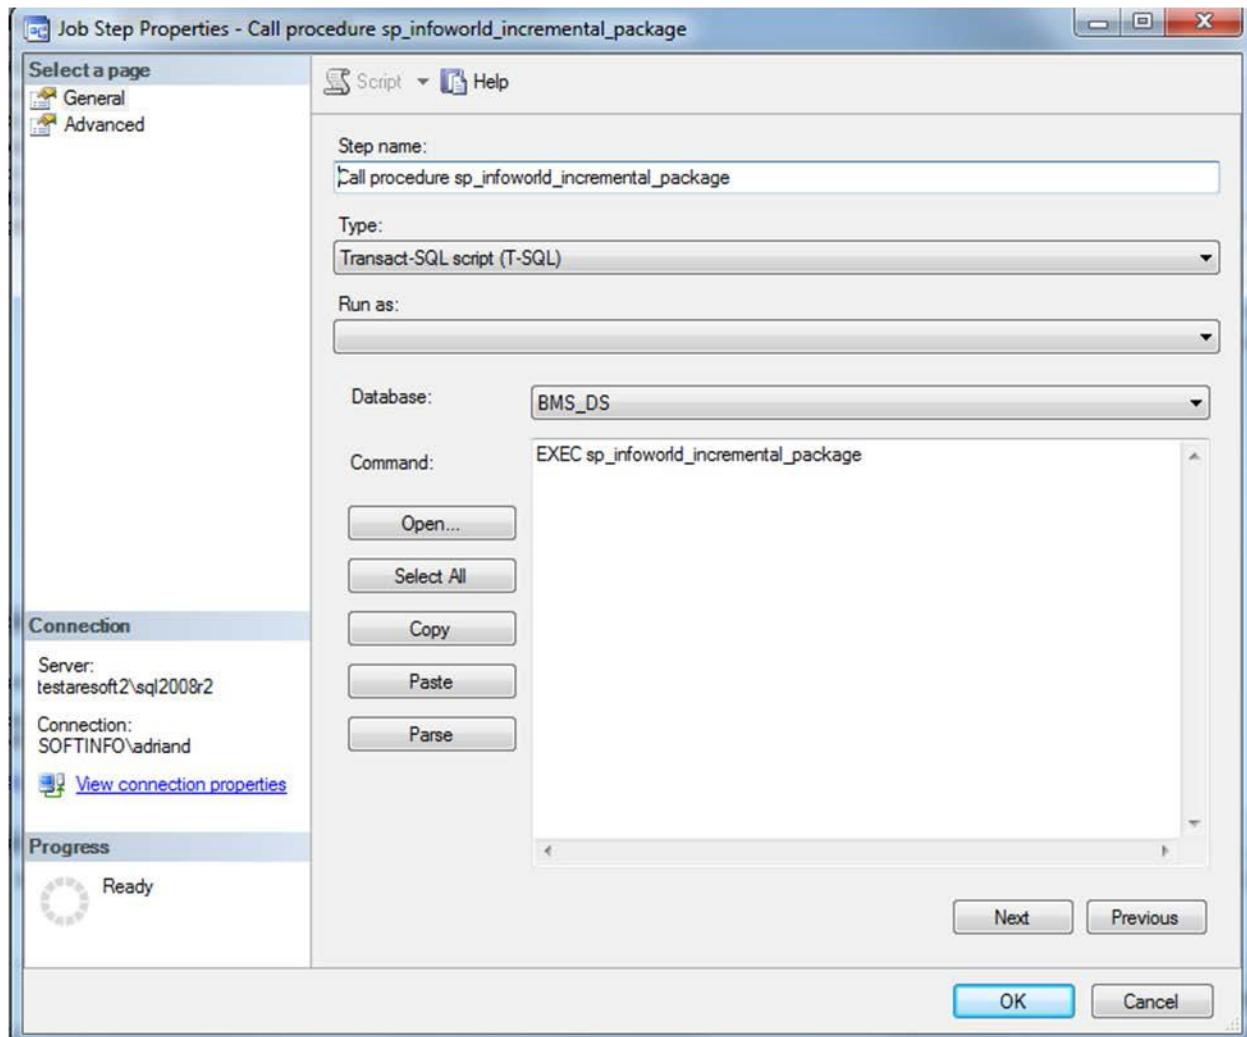

Figure 14 - BMS - Call Procedure Properties

Step 4. Call procedure incremental DW: will search for any new, updated or deleted row in BMS_DS database's tables in order to do the correspondent operations in its tables.

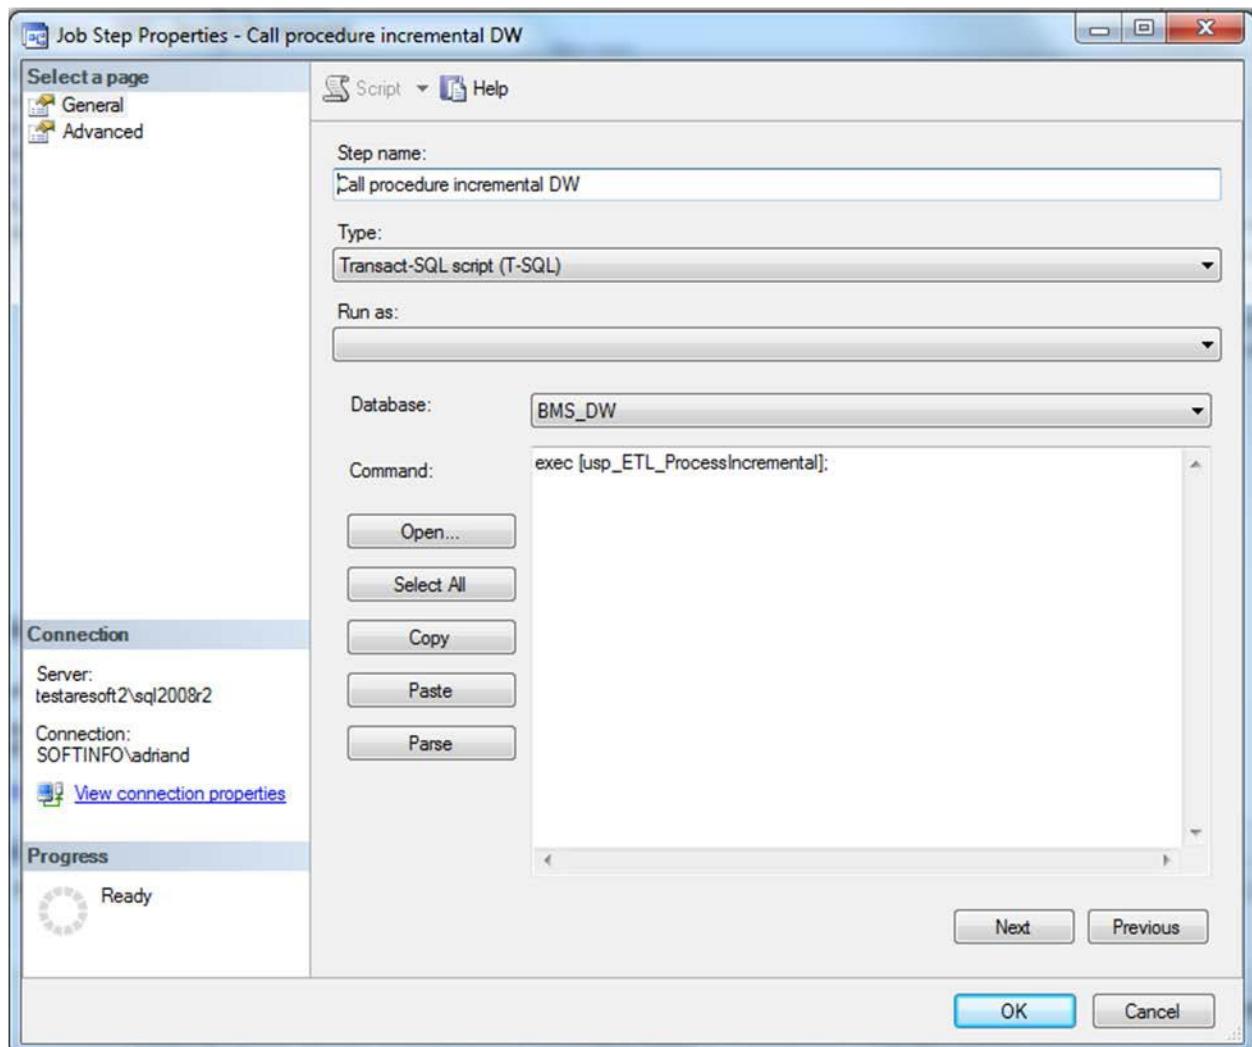

Figure 15 - BMS - Call Procedure Incremental

For each step a log file can be set, see screenshot below for step 4:

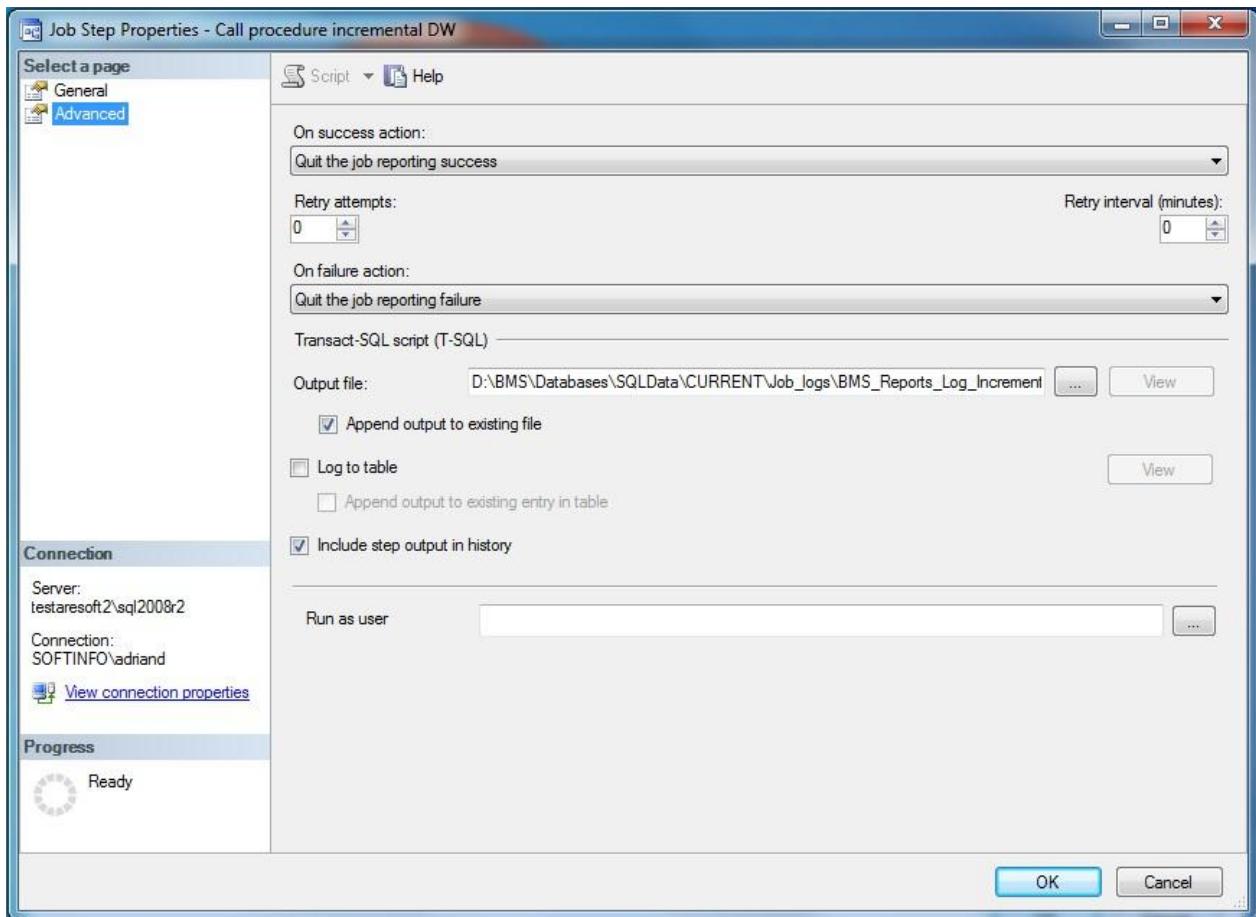

Figure 16 - BMS Incremental Path File Log

2.4.3 BMS Reports Windows Management Instrumentation (WMI)

This job runs a process through Windows Task Scheduler that takes all the users and user groups from the Active Directory and inserts them in BMS_DW database.

In order to run the process successfully, the user needs to configure WMI_UserGroup.config file (Reference Table 12 - WMI User Group Configuration Parameters) and set the connection of the database in the Connections.xml file. These files are stored in the folder where WMI_UserGroup application is installed.

2.5 Ward Whiteboard Kiosk Mode Display Configuration

One of BMS functionalities is to be able to display the Ward Whiteboard page on the large displays, in kiosk mode.

These displays should be placed carefully, considering that confidential patient data (Social Security Number) should not be in view of people who are not authorized to see it.

Large display boards run in kiosk mode—a method of operation designed for Internet kiosks and other settings where limiting end-user interactions with applications are advisable. Kiosk mode locks down the user interface to protect applications from accidental or deliberate misuse.

In order to configure the Ward Whiteboard page to be displayed on the large displays, in kiosk mode, certain steps need to be completed:

1. Disable the screen saver
2. Configure the power settings to disable the sleep, stand-by mode
3. Configure auto-login
4. Configure the BMS user that will be used to do a default login
5. Configure the start-up command

2.5.1 Disable Screen Saver

In order to display the Whiteboard page continuously the screen saver needs to be disabled.

NOTE: The Windows menu that allows the disable of the screen saver might be different from one version of Windows to another. For example, for Windows 7 the needed operations are:

- Right click on the desktop
- Click Personalize
- Click on the screensaver button on the lower-right part of the page

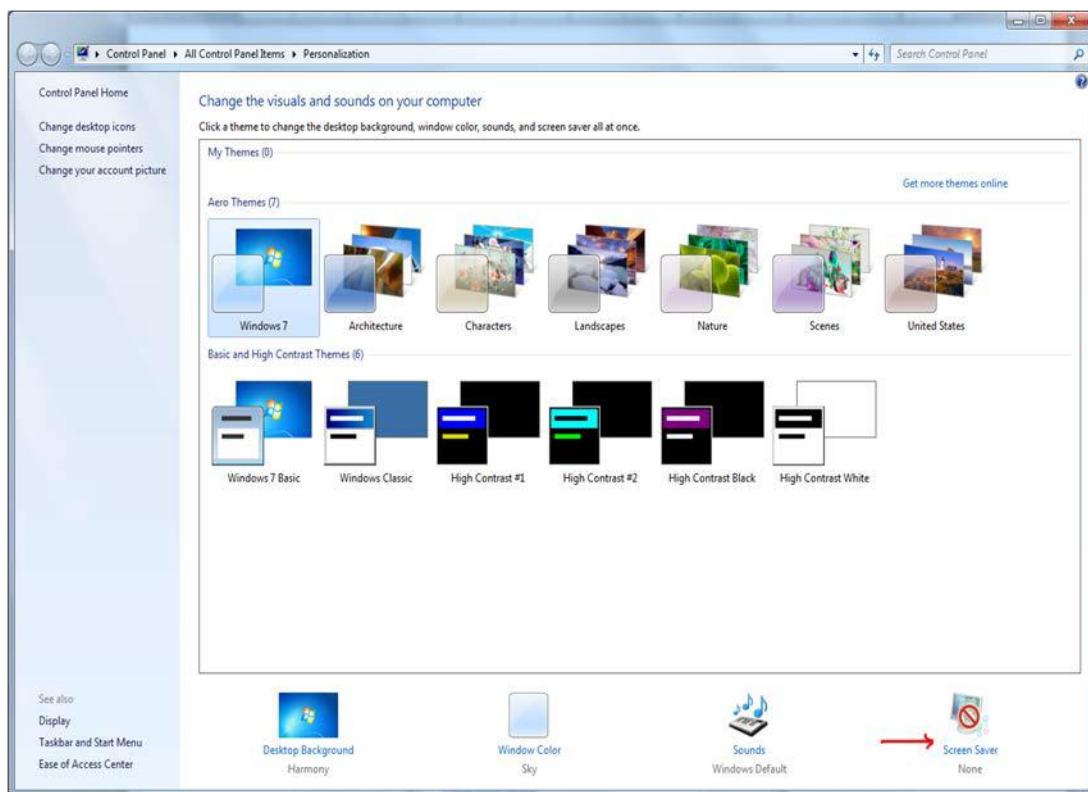

Figure 17 - Screen Saver Option

- Select None from the screensaver drop down on the displayed form

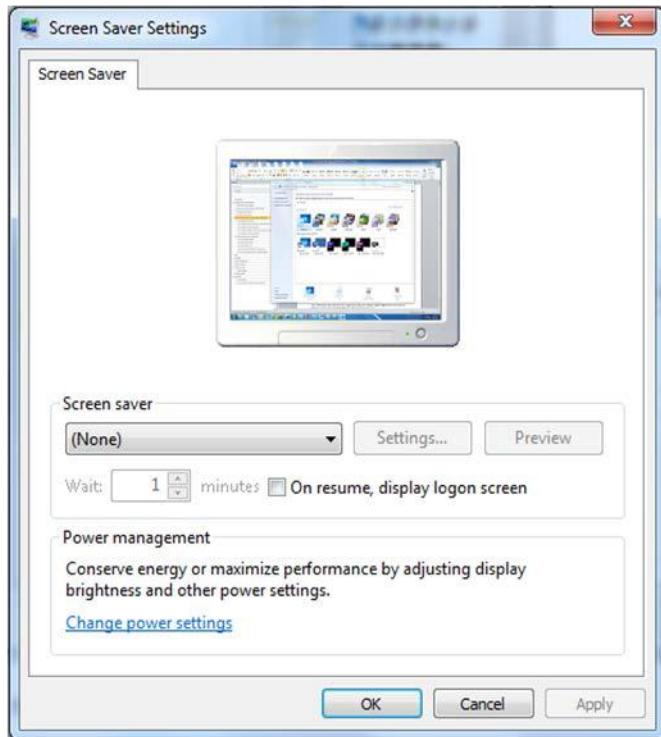

Figure 18 - Screen Saver Settings Window

- Click *OK*.

2.5.2 Configure Power Settings: Disable Sleep and Stand-by Mode

In order to display the Whiteboard page continuously the power settings need to be adjusted so that the computer will never enter into hibernate or stand-by and also the screen will never turn off.

NOTE: The Windows menu that allows the configuration of the power settings might be different from one version of Windows to another. For example, for Windows 7 the needed operations are:

- Go to Control Panel

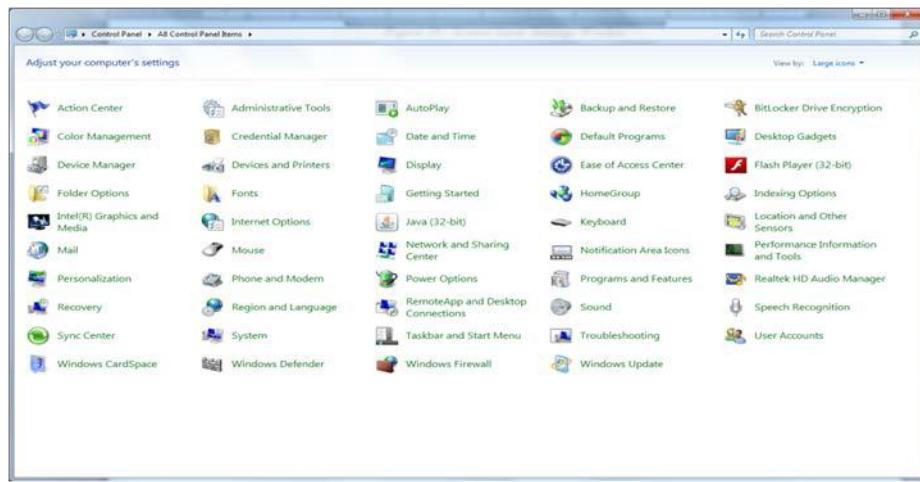

Figure 19 - Control Panel Window

- Select Power Options

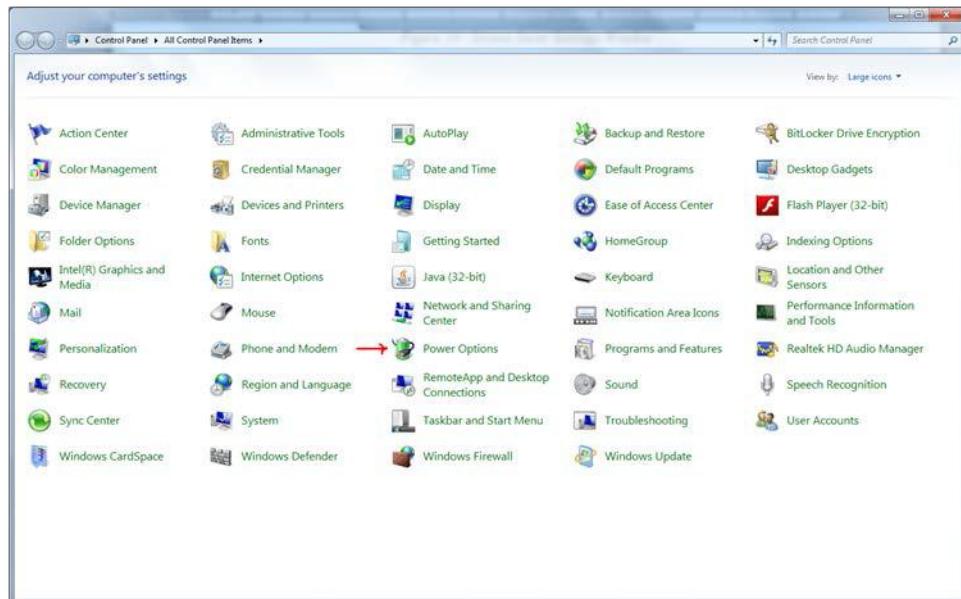

Figure 20 - Power Options

- Click on “Change Plan settings” for the active plan

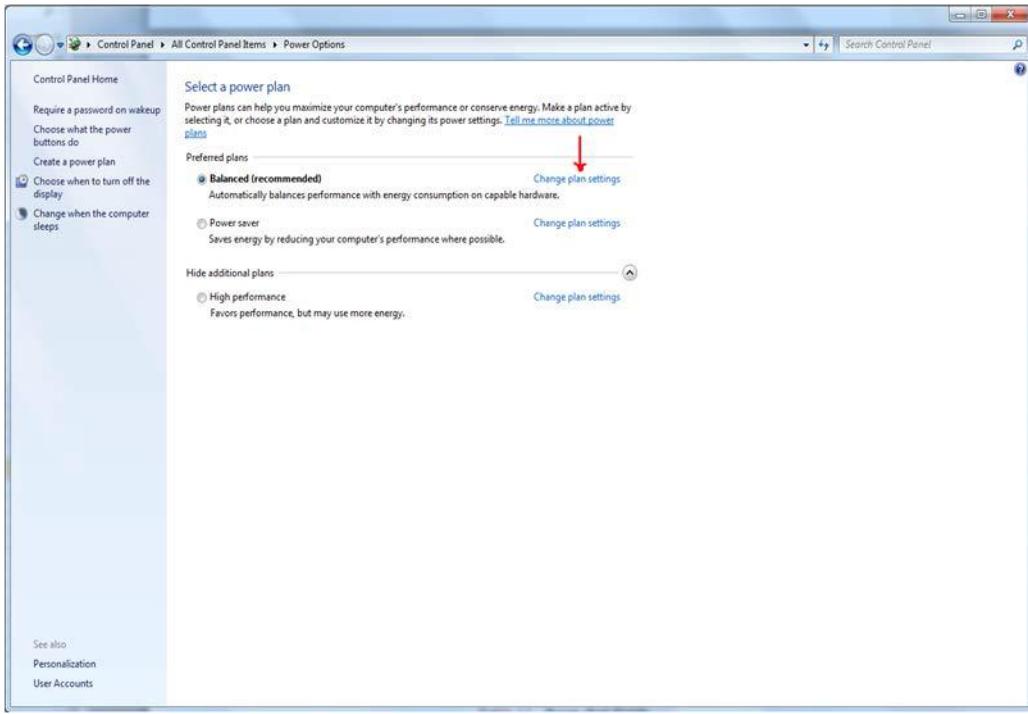

Figure 21 - Change Plan Settings Option

- Select “Never” from the drop downs associated with “Turn off the display” and “Put the computer to sleep”

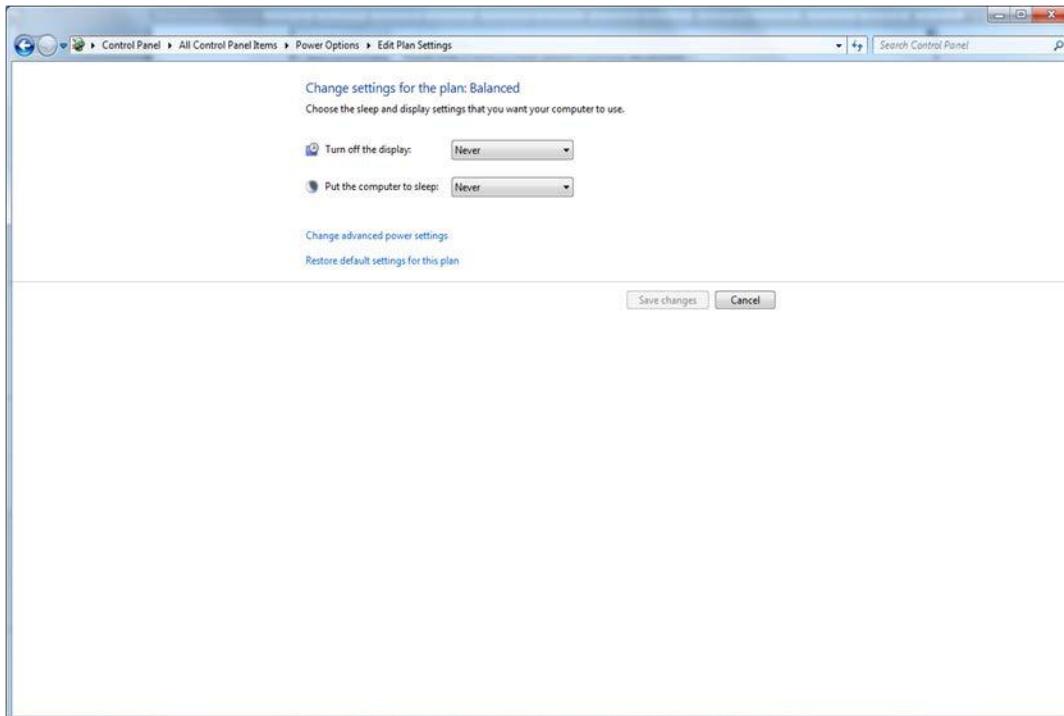

Figure 22 - Power Options Settings

- Click “Save changes”

2.5.3 Configure Auto-login Option

The computer that will display the Whiteboard page needs to have the auto-login configuration set to true.

NOTE: The Windows menu that allows the configuration of the auto-login settings might be different from one version of Windows to another. For example, for Windows 7 the needed operations are:

- Press the Windows key + R on your keyboard to launch the “Run” dialog box.

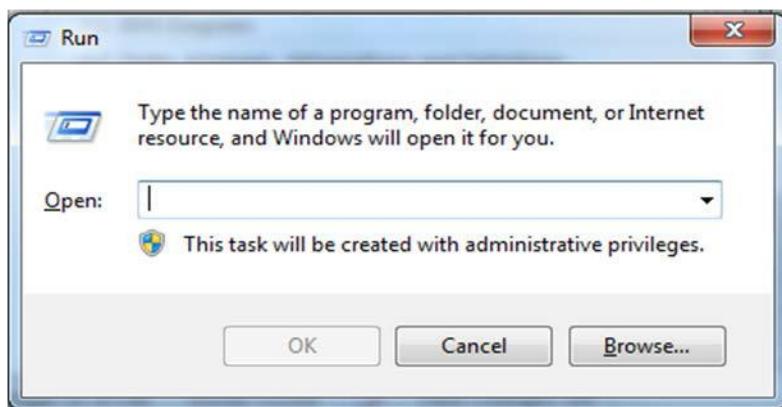

Figure 23 - Run Window

- Type in “control userpasswords2”

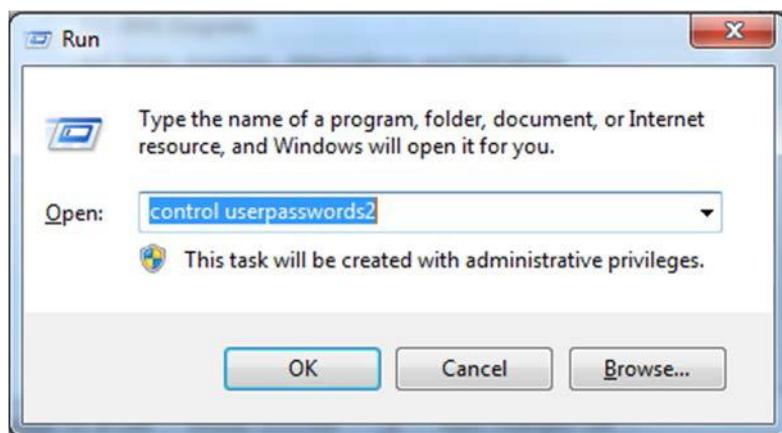

Figure 24 - Run Window with Command Entered

- Press Enter. The User Accounts window will display.

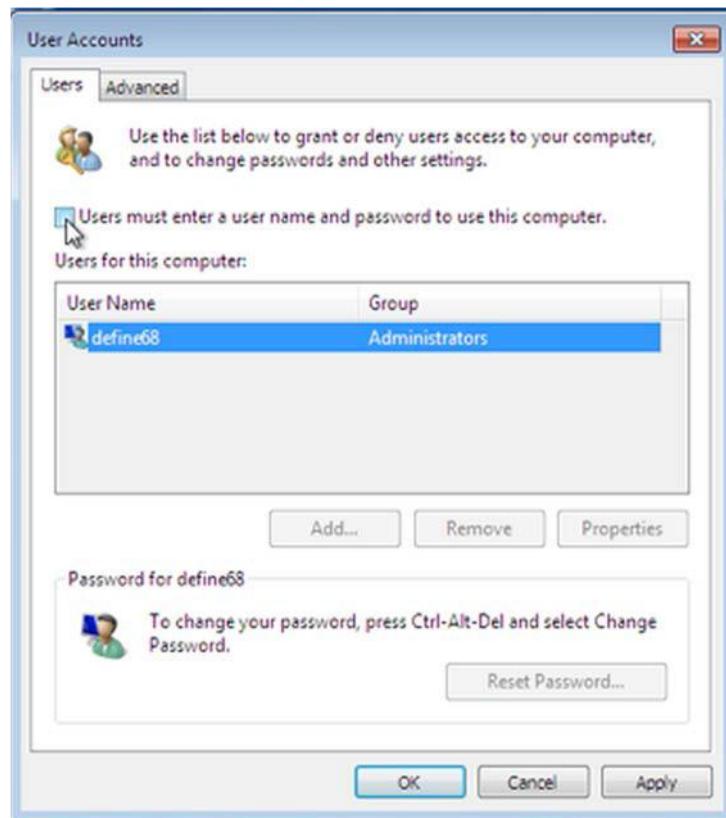

Figure 25 - User Accounts Window

- Uncheck the option “Users must enter a user name and password to use this computer”

Figure 26 - User must enter a user name and password to use this computer option

- Click “OK”

2.5.4 Configure BMS Whiteboard Kiosk Default Login User

For the current facility that uses the computer that will display the associated Whiteboard page, a default user needs to be configured in BMS application for the Ward Whiteboard Kiosk.

For that the user needs to:

- Go to Home Page
- Click on the Site Options link
- Click on the Facility Setting link
- Fill the fields “Whiteboard Kiosk Default User Name:”, “Whiteboard Kiosk Password:” and “Whiteboard Kiosk Password Confirm:” with the BMS Service Account ID

2.5.5 Whiteboard Kiosk Default User Role Assignment

Each facility must assign the BMS “EMS USER” Role to the Service Account ID created to run the Whiteboard Kiosk URL. This assignment can be done from the **BMS Admin Section → Add/Edit BMS User** hyperlink or Facility **Site Options → BMS User Add/Edit** hyperlink.

- Click the **Select Existing NT User Name** button
- Select the correct VISN Domain from the left Drop Down Box.
- In the **User Name** box Enter the BMS Service Account ID created for the BMS EMS/Whiteboard Kiosk. Then click the Find button
- Click the Selected Radio button for the user. Then click the Select button.
- In the EMS User box, select “Yes”. All other roles should be “No”.
- In the Default Region box, select the correct Region.
- In the Default VISN box, select the correct VISN.
- In the Default Site box, select your Site.
- In the READ Access box, select “Yes”.
- In the WRITE Access box, select “Yes”.

Figure 29 – Whiteboard Kiosk User Role Assignment Fields Filled on the BMS Admin Section Add/Edit BMS User Page

- Click Submit

2.5.6 Configure Start-up Command

A specific URL needs to be configured as the Home-Page for the intended browser. The menu to set the default home-page might differ from one browser to another.

For example, for Internet Explorer (IE) 9.0 the user needs to:

- Click ALT
- Select Tools menu

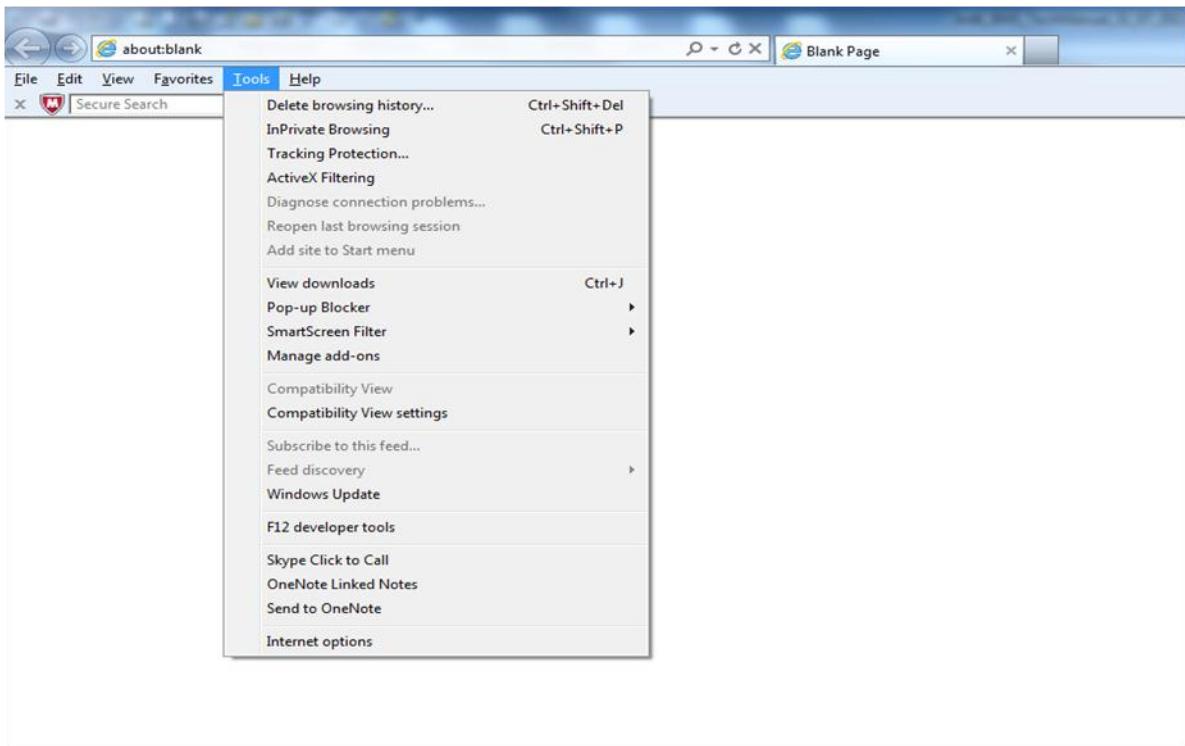

Figure 30 - Tools Menu of Internet Explorer 9

- Select Internet Options
- On the General tab, under the homepage text field enter the URL

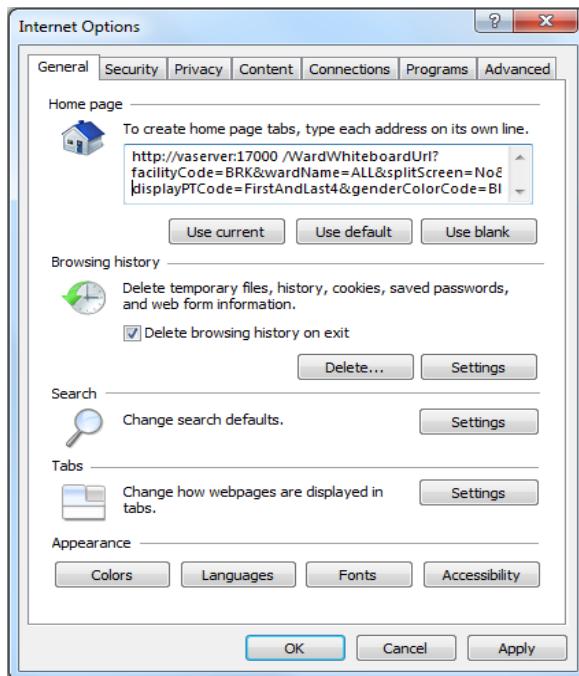

Figure 31 - General Tab of Internet Options

- Click OK

The URL that needs to be configured here has a special format as follows:

<https://vaww.bms.va.gov>

/WardWhiteboardUrl?facilityCode=BRK&wardName=ALL&splitScreen=No&displayPTCode=FirstAndLast4&genderColorCode=Blue/Pink&displayFooterCensus=Yes&displayStaffAttending=Staff%20and%20Attending&scrollRate=20

Description and available values of the page parameters:

Table 15 - Description and configuration for Whiteboard URL parameters

Parameter	Short Description	Options
<u>facilityCode</u>	Code of facility (e.g. BROCKTON = BRK);	Enter the 3 character facility ID.
<u>wardName</u>	Name of BMS Ward Name. To see all the wards the value that needs to be configured is ALL.	These are the BMS WARDS as defined in the Facility, Site Options, VistA Ward Add/Edit. The Ward name value should match the "BMS WARD GROUP TEXT". A single ward can be entered or the value "ALL" to display all the wards at the facility.
<u>splitScreen</u>	To split the page in two tables enter the value "Yes".	Yes No
<u>displayPTCode</u>	How should be displayed the patient under the column "Patient" (full name or 1st+Last 4).	<u>FirstAndLast4</u> <u>LastName</u>
<u>genderColorCode</u>	To change the background color for the row according with patient's gender.	<u>Blue/Pink</u> <u>None</u>
<u>displayFooterCensus</u>	To view the footer census.	Yes No
<u>displayStaffAttending</u>	What column is displayed in the table? (Staff column, Attending column or both)	<u>Staff and Attending</u> <u>Staff</u> <u>Attending</u>
<u>scrollRate</u>	The timer interval will affect the scrolling speed. This parameter can be absent. (if specified then it represents seconds)	Null or an integer value.

The next step is to add to the startup commands the launch of the chosen browser.

NOTE: This operation might differ from one version of Windows to another. For example for Windows 7 the steps needed are:

- Click Start.
- Select All Programs
- Right click on the Startup folder
- Select Open

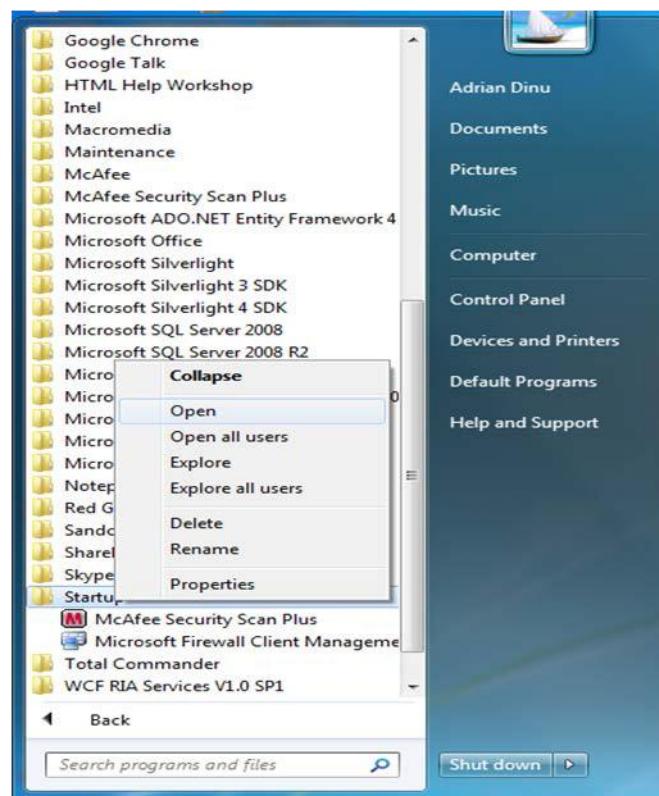

Figure 32 - Open Option

- Create a shortcut of the Internet Explorer and copy it to Startup folder

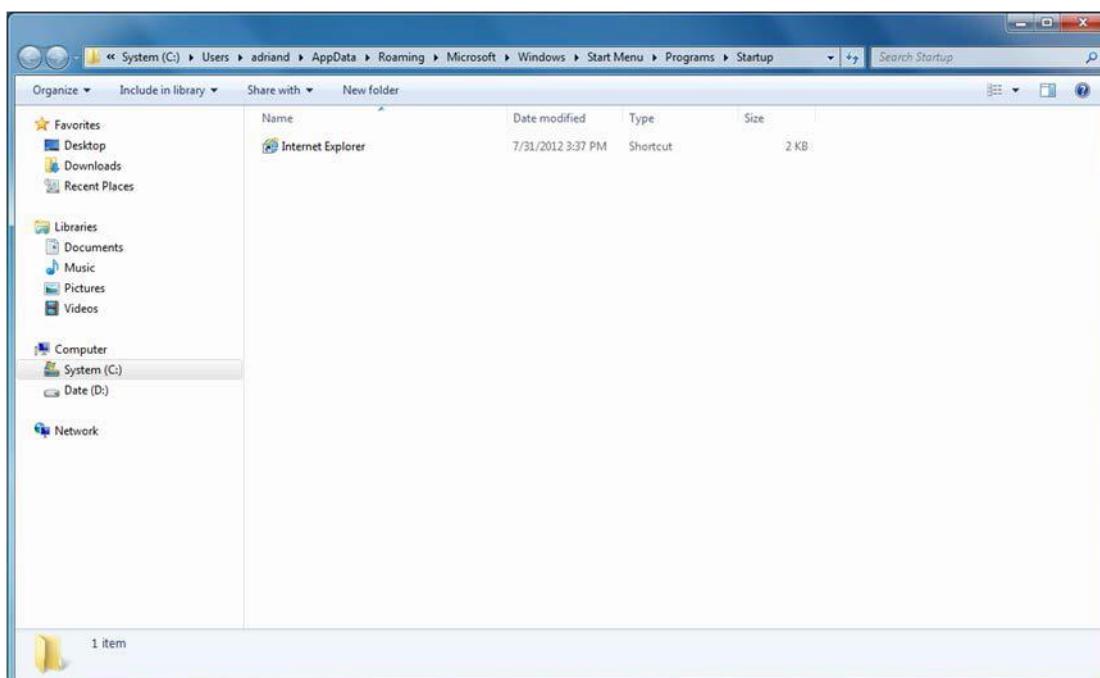

Figure 33 - Internet Explorer Shortcut

2.6 Whiteboard Snapshot Configuration

In order to configure the Whiteboard snapshot certain steps need to be completed:

1. Create snapshot folder
2. Define network share
3. Assign rights to user
4. Assign snapshot folder path to ward group
5. Associate scheduler with the whiteboard report

Suppose the goal is to configure the settings for two BMS Ward Groups: WARD GROUP 1 and WARD GROUP 2.

Assuming that these two Ward groups are in different physical locations, a designated workstation will be assigned for each one of them.

For the purpose of example, these workstations are called: WARDGROUP1-PC and WARDGROUP2-PC.

2.6.1 Create Snapshot Folder

On WARDGROUP1-PC and WARDGROUP2-PC, a folder should be created for this purpose. For example, assume that this folder is on the “C:” drive, like this “C:\WhiteboardSnapshot”.

On Windows 7 the needed operations are:

- Click Start button
- Select All Programs
- Select Accessories folder
- Click Windows Explorer
- Go to C drive
- Right click on C drive
- Select New folder
- Enter the name of the folder, e.g. WhiteboardSnapshot

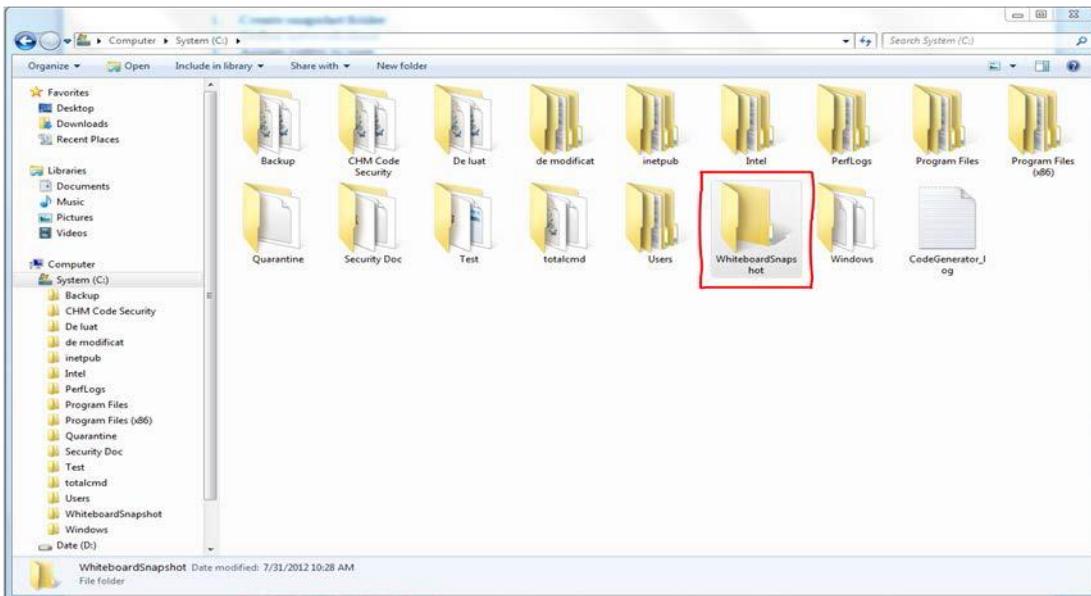

Figure 34 - Whiteboard Snapshot Folder

2.6.2 Define Network Share

For these two folders (one on each computer) the Network Admin needs to define network shares. For example, assume that the network share name on each computer is “WhiteboardSnapshot”.

Note: The Windows menu that allows the configuration of folder sharing might be different from one version of Windows to another. For example, for Windows 7 the needed operations are:

- Navigate to the “WhiteboardSnapshot” folder, right-click it and choose Properties

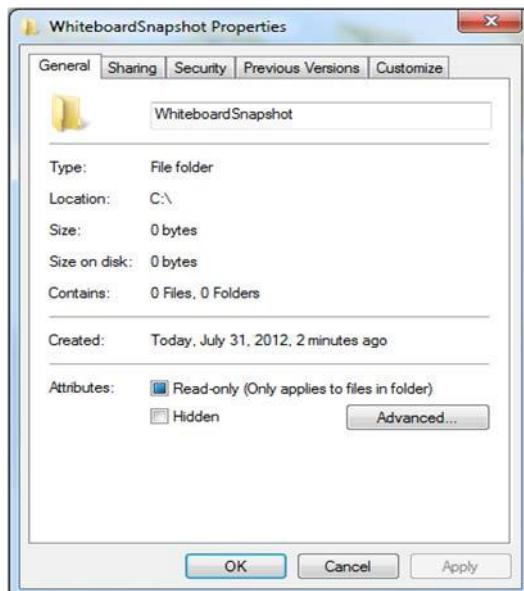

Figure 35 - Whiteboard Snapshot Folder Properties

- Go to Sharing tab and select Advance Sharing option.

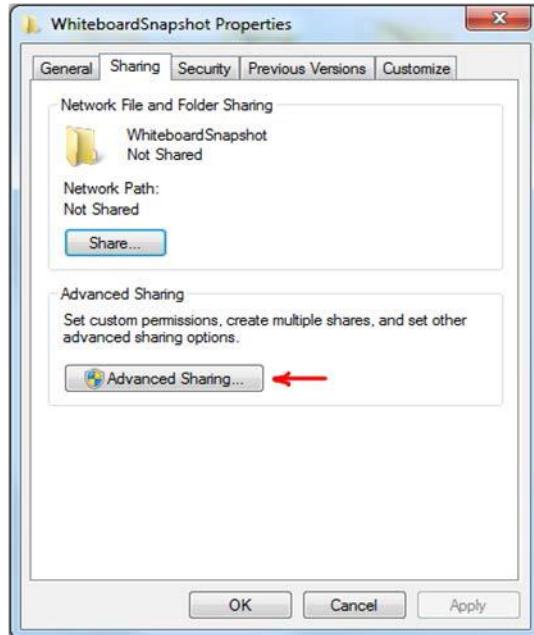

Figure 36 - Advanced Sharing Option

- In Advanced Sharing dialog, enable Share this folder option. It will automatically add folder's name as Share name.

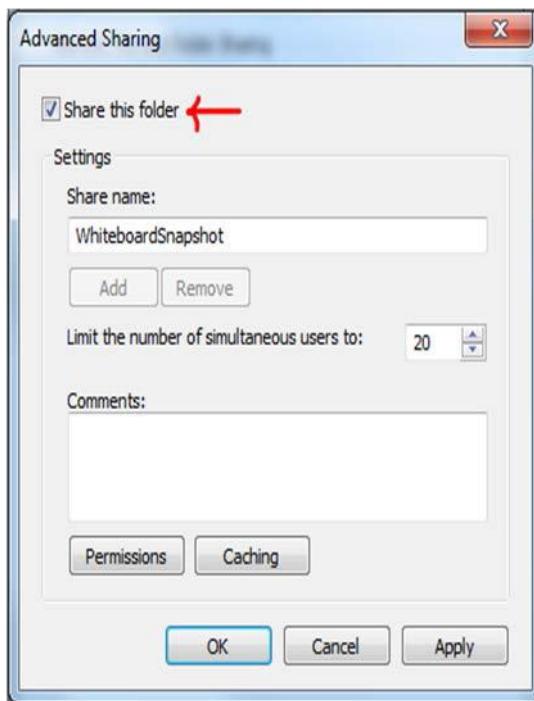

Figure 37 - Share this folder Option

2.6.3 Assign Rights to Master BMS Service Account User

The BMS Application runs under a service account. AICT has created the Windows User (**acc\bms_svc_prod**) as the master service account that the BMS Services runs under. The Windows user (**aac\bms_svc_prod**) that is configured to be the Login that runs the four BMS Windows Services needs to have full rights to these shares.

This user ust have full control on each facilities file folder that is used to store the Whiteboard Contingency Reports.

On Windows 7 the needed operations are:

- Having Advanced Sharing window open click on Permissions button to set the folder's permissions.

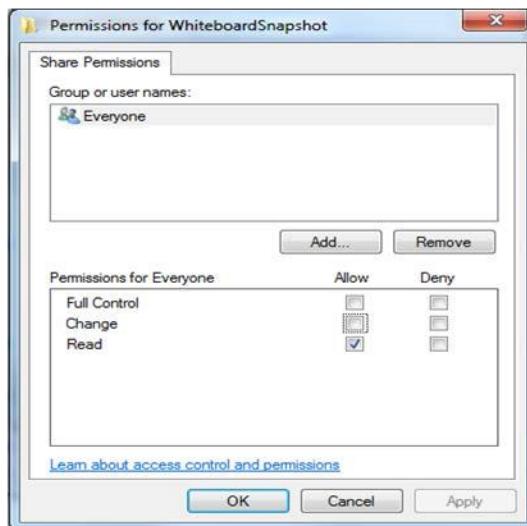

Figure 38 - Permissions for Whiteboard Snapshot

- In the Permissions window click Add button to set the network user rights on the shared folder.

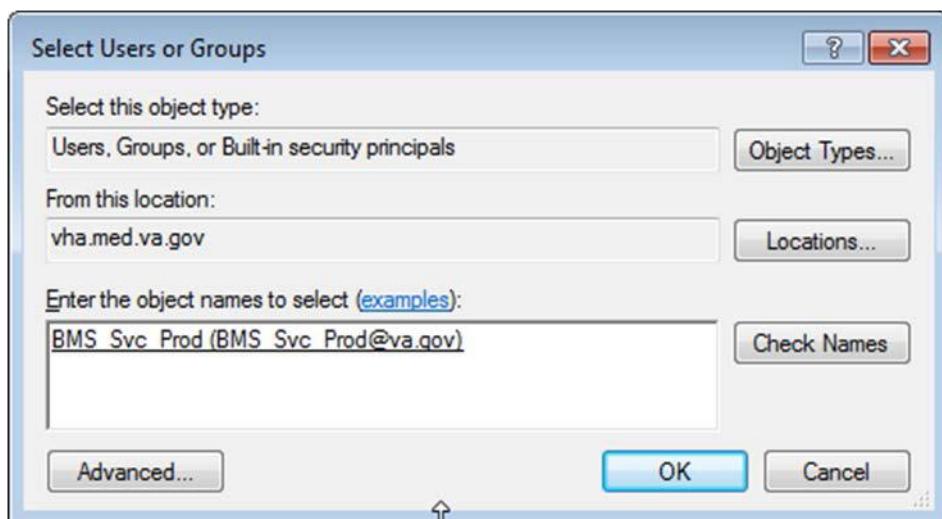

Figure 39 - Select Users or Groups Window

- Click "Advanced" button to select user.

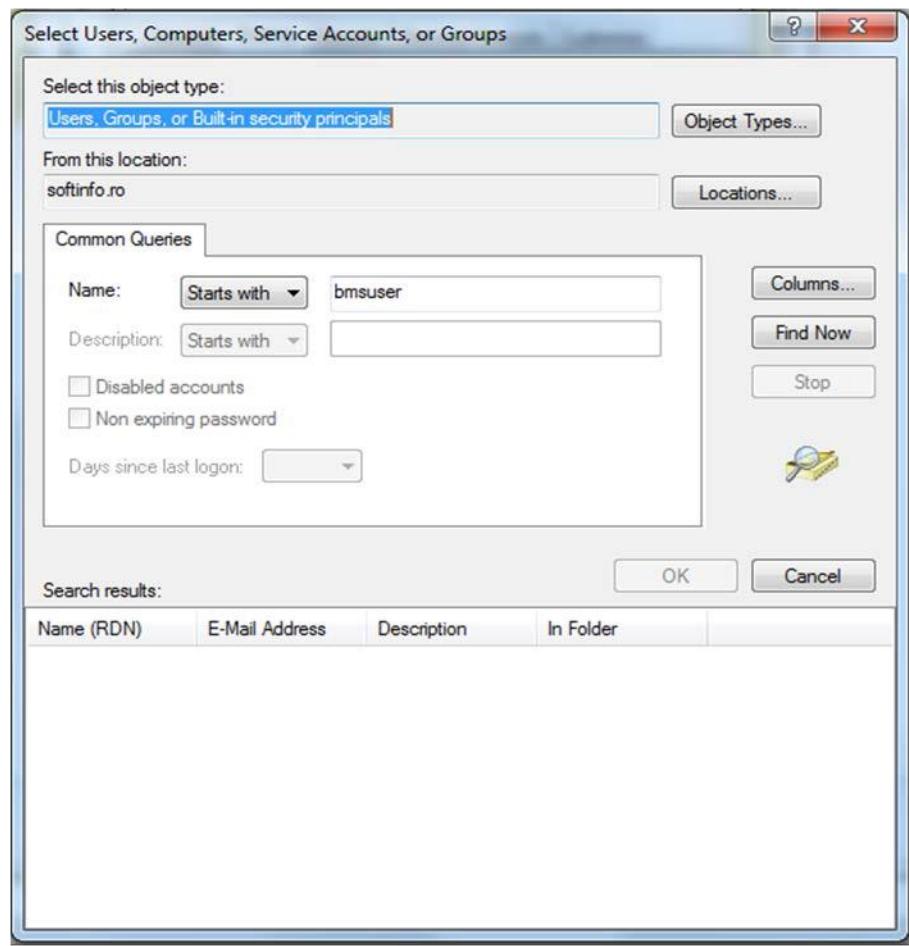

Figure 40 - Advanced Section of Select Users or Groups Window

- Enter the name of the user (**aac\bms_svc_prod**) that runs the two BMS Windows Services. Click Find Now button.

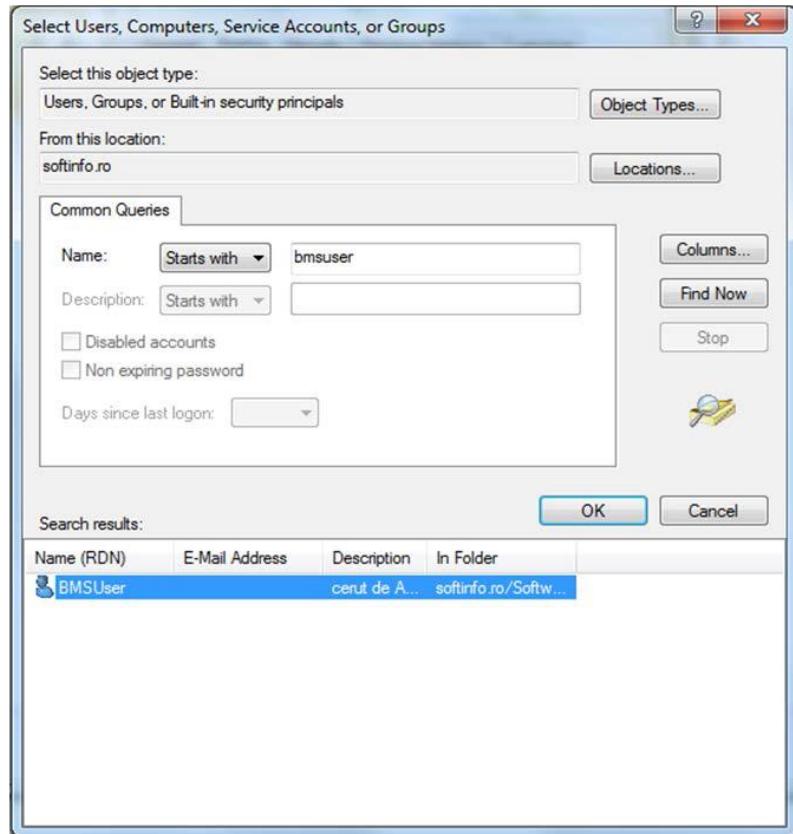

Figure 41 - Search Result Section

- Scroll down the Search results section to select the user. Once done, click OK. It will add the user within the object names section.

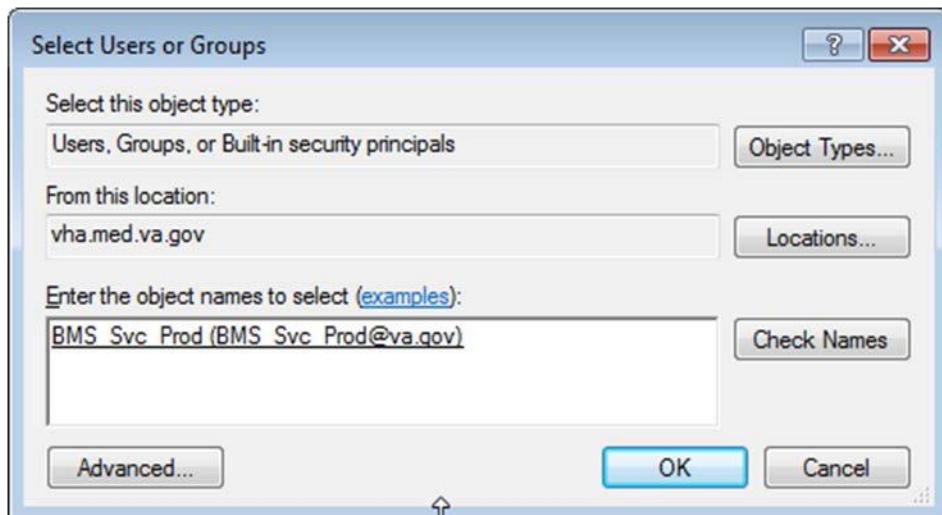

Figure 42 - Object Names Section

- Clicking *OK* will add folder access permission for user and takes you back to *Permissions dialog*, allowing you to configure the permissions for newly added users.

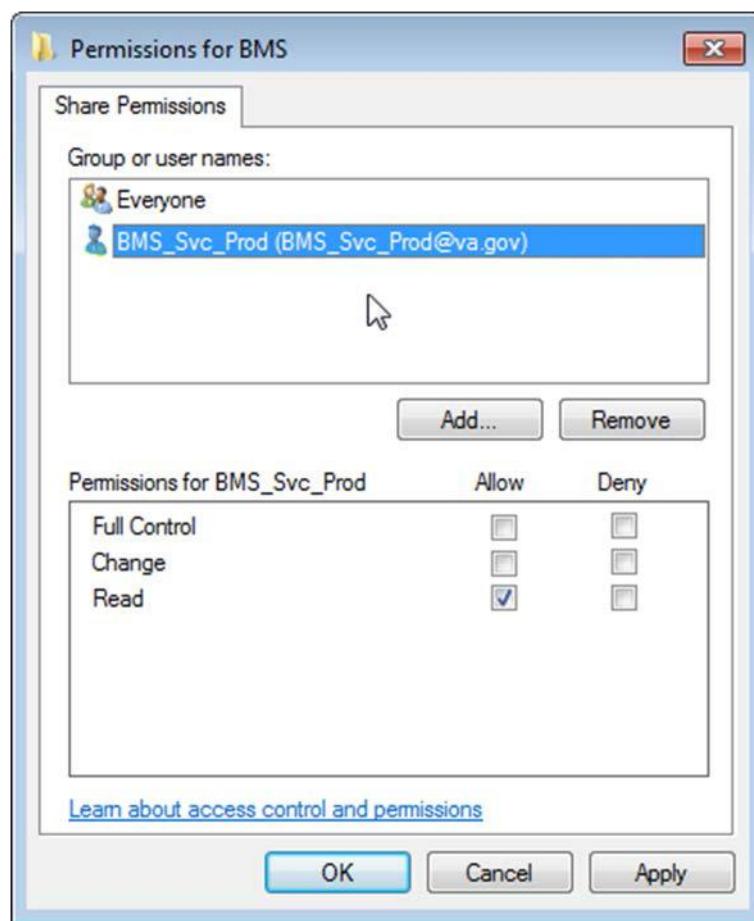

Figure 43 - Permissions Window

- Select user, and from Permissions section check Full Control.

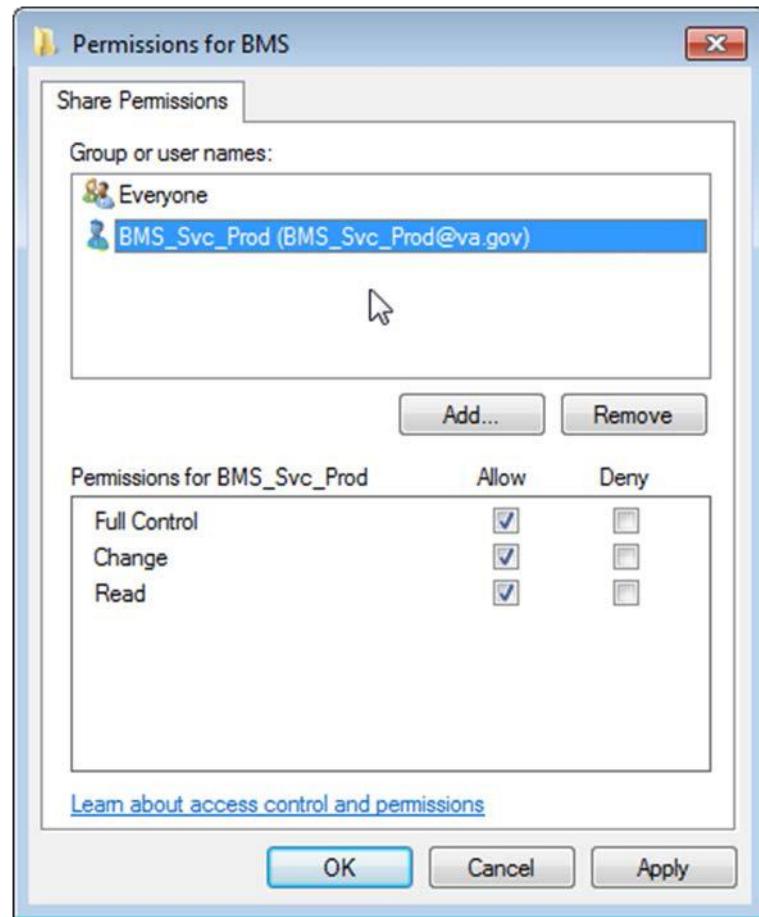

Figure 44 - User Permissions

- Click Ok to close Permissions window. It will take you back to Advanced Sharing window.

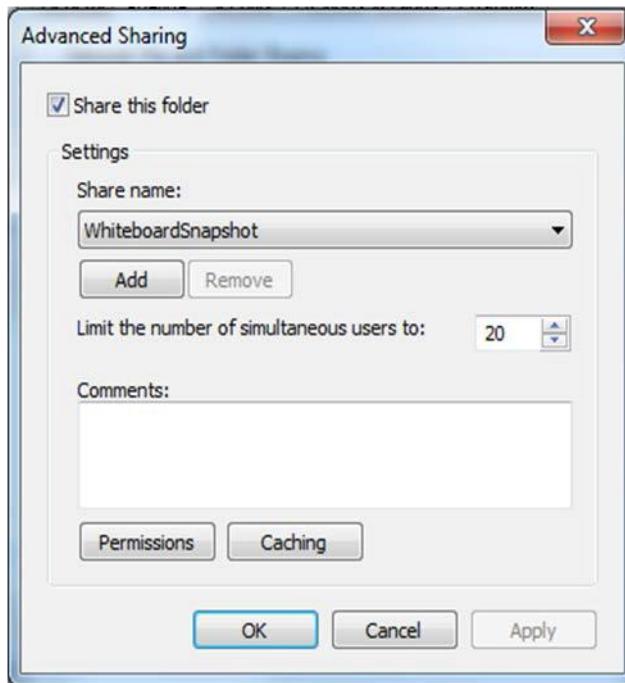

Figure 45 - Advanced Sharing Window

- Now, click OK to share the folder.
- Close Whiteboard Snapshot properties window.

Having these two folders shared and having that user given the rights previously mentioned, if someone is logged in the network with that user, he/she could access those folders from Windows Explorer using an URI address. See screenshot below:

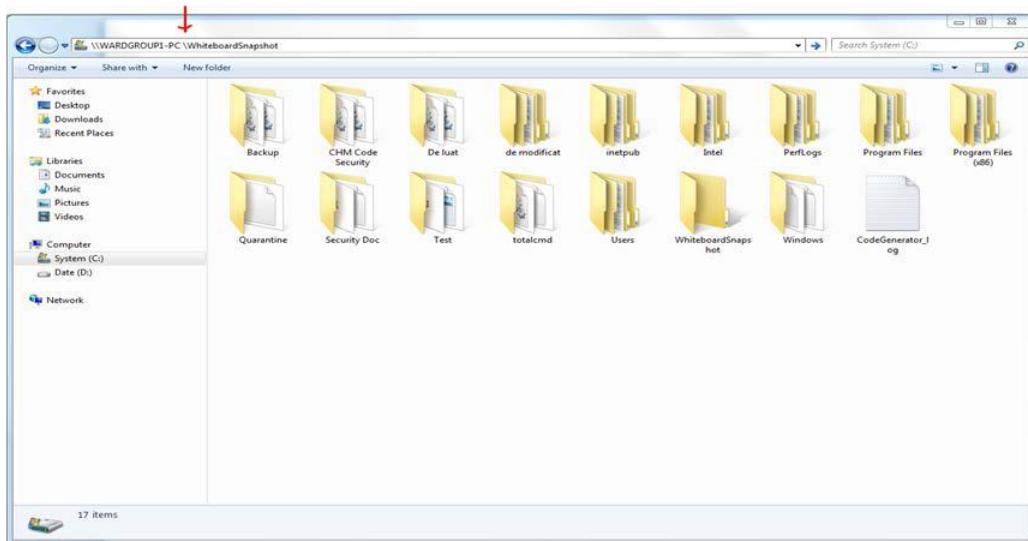

Figure 46 - WardGroup1-PC Path

2.6.4 Assign Snapshot Folder Path to Ward Group

Within the BMS Application, under Site Settings and then Contingency Settings page, the Admin should enter the values as captured in the screenshot (\WARDGROUP1-PC\WhiteboardSnapshot for WARD GROUP 1 and respectively \WARDGROUP2-PC \WhiteboardSnapshot for WARD GROUP 2).

NOTE: The Windows User (**acc\bms_svc_prod**) must have full read/write access to this folder.

2.6.5 Associate Scheduler with Whiteboard Report

Within the BMS Application, Facility Home page, under Site Options and then Background Processors page, a Scheduler should be associated in the Whiteboard Report section.

Under the WhiteBoard Report section:

- In the “**Add/Update Scheduler:**” field, select the schedule frequency that Whiteboard should be backed up.
- Click Save Scheduler button.

2.7 EMS Mobile Device Configuration

In order to configure the BMS EMS Mobile Devices, the following steps must be completed:

- The local IS must create a local Service Account with a password that never expires and does not change. This account must not have any kind of policy that restricts its use to specific computers. The EMS Mobile Device will use this account to access the EMS Mobile page.
- Each facility must enter the local Service Account and Password in the EMS Default User and Password fields on the Facilities Settings page.
- Configure the Mobile Device so that when it boots up, it will automatically open IE and go to the specified URL.

2.7.1 Configure EMS Mobile Device Default Login User

For the current facility, a default user must be configured in the BMS application for the EMS Mobile Device.

To accomplish this, the Facility Admin User must do the following:

- Go to the Facility Home Page.
- Click on the Site Options link.
- Click on the Facility Setting link.
- Fill the fields “EMS Default User Name:”, “EMS Password:”, and “EMS Password Confirm:” with the BMS Local Service Account.

EMS Password:	The BMS Service Account ID password needed to load the EMS Mobile Page for Mobile Devices.
EMS Password confirm:	The confirmation of the password.

2.7.2 Configure EMS Mobile Device URL

For the current facility, the EMS Device URL must be configured in the EMS Mobile Device.

The URL to be entered has a special format:

<https://vaww.bms.va.gov/EMSMobileLogon?code=BRK>.

Table 18 - Description and Configuration for EMS Mobile Device URL parameters

Parameter	Short Description	Options
Code	Code of facility (e.g. BROCKTON = BRK)	Enter the 3-character facility ID.

EMS staff can access the BMS Web page for mobile devices at the URL set up by their local IS staff.

Be sure to use the code of the facility for which access is needed.

The following page is displayed:

Figure 51 – EMS Staff Page for Mobile Devices

2.8 VistA Integration

This chapter describes the process of importing vocabularies, entities, patient admission, transfer, discharge (ADT) and bed pending placement information from VistA.

In order to integrate with VistA certain steps should be completed:

1. Choose VistA site
2. Define Schedulers
3. Run Scheduler
4. View Audit Results

2.8.1 Choose VistA Site

VistA Sites tab from Background Processors page of Admin section allows the user to view the list of VA facility sites sharing the same VistA instance and to add a new VA facility to a VistA instance.

2.8.1.1 Adding a New VistA Site

To add a VA facility site to a VistA instance follow the steps presented below.

- From the Background Processors page of Admin section select VistA Sites to display the page in the following image. A list of VA facility sites is displayed in the column to the left of the page.

The screenshot shows the 'Background Processors' interface with the 'VistA Sites' tab selected. On the left, a sidebar lists 'Defined VistA Sites' with codes like V03NYN, V09LEX, etc. The main panel contains fields for 'VistA Site' (Name and Time Zone), 'Connections' (ODBC and MDWS sections with connection string, user, password, and test connection buttons), and a 'Save' or 'Cancel' button at the bottom right.

Figure 52 - Adding a VistA Site

- Click the Add new VistA site link then from the VistA Site area use the Name field to select the code of the site you want to add to the current VistA instance, and then select the Time Zone.

In the Connections area you can choose between two connection methods: ODBC and MDWS. Fill in the following data for the ODBC method:

Table 19 - New VistA Site Parameters

Column	Description
Connection String	The connection string for the ODBC method.
User	The username for the connection.
Password	The password associated to the user account.
MDWS Endpoint	The specific instance of MDWS that the individual site will bind too.

You can use the Test Connection buttons to verify the connection and press the Save button to enter the data into the system.

The newly added site will be added in the sites list to the left of the screen.

2.8.2 Define Schedulers

The Schedulers tab from Background Processors page of Admin section displays a list of schedulers defined by user. It allows the user to add new schedulers, edit or remove old schedulers.

NOTE: To run the schedulers, the VistA Integration tab must be used (see next section VistA Integration for details).

The Schedulers tab is displayed as in the following image:

Admin Menu Logout

Background Processors

VistA Sites Schedulers VistA Integration Audit Numi Whiteboard Report

Add new scheduler

Name: Every hour
Recur every: 1 Day (s)
Time Zone: CST
Occurs once at: 01:00
Occurs every: 1 Hour Start Time: 01:00 End Time: 23:00

Save Delete Cancel

[Back to Regional Page](#)

Figure 53 - Schedulers Tab

2.8.2.1 Adding a New Scheduler

To add a new scheduler follow the steps presented below.

1. From the Background Processors page select the Schedulers tab.
2. In the Schedulers tab fill in the following data:

Table 20 - New Scheduler Parameters

Column	Description
Name	The name of the scheduler.
Recur every	The frequency.
Time Zone	Time zone associated with the scheduler.
Occurs once at/Occurs every	The frequency values.

After setting the desired frequency for the new scheduler, do not forget to press the Save button to enter the data into the system.

2.8.3 Run Scheduler

The VistA Integration tab is used to run (automatically or manually) the defined schedulers and to select which data categories will be affected by a scheduler's action.

The VistA Integration tab is displayed as in the following image:

The screenshot shows the 'Background Processors' interface with the 'VistA Integration' tab selected. At the top, there are tabs for 'VistA Sites', 'Schedulers', 'VistA Integration' (which is active), 'Audit', 'Nursing', and 'Whiteboard Report'. On the left, a list of categories is shown with checkboxes: ADT, Patients Pending Bed Placement List, Vocabularies, Orderable Item, Specialty, Treating Specialty, Facility Movement Type, and Entities (Hospital Location, Patient, Room Bed, Ward Location, Medical Center Division). To the right, under 'Current Method' and 'Scheduler', 'MDWS' is selected for both. Below this, a dropdown menu shows 'V01BHS - 523'. A 'Details' section contains fields for 'Data' (Specialty), 'Method' (MDWS), and 'Scheduler' (Every 4 hours). A 'Run Job' section includes fields for 'Method' (MDWS), 'Start Time' (09/07/12), and 'End Time' (09/07/12). Buttons for 'Save', 'Cancel', and 'Run' are at the bottom right.

Figure 54 - VistA Integration Tab

From the field in the upper part of the page select the VistA site where the scheduler(s) will run.

Next step:

- Either click one data category from the column to the left (its name will appear in the Data field) and then select a method and scheduler from the **Method** and **Schedulers** fields in the Details area: this will cause the selected scheduler to run at the time set for it in the **Schedulers** tab and to bring data from the selected category.
- Or select several data categories (using the check-boxes) then select a connection method from the Run Job area, set the **Start time/End time** and click the **Run** button: this will cause the scheduler set using the selected method to start running now and bring the data from the selected categories.

2.8.4 View Audit Results

The Audit tab displays the results of the operations performed in the VistA Integration tab.

The Audit tab is displayed as shown in the following image.

[Back to Regional Page](#)

Figure 56 - View Audit Results

A list of operations is displayed. For each entry the following data is available:

Table 21 - View Audit Results Columns Report

Column	Description
VistA	The VistA site where the audit action has been performed.
Method	The method used for connecting to the VistA site.
Data	The type of data retrieved by the VistA integration operation.
Rows no	The number of operations of the selected type captured by the audit action.
Start Date	The start date of the retrieval operation.
End Date	The end date of the retrieval operation.
Launch Type	The way the audit action has been launched.
Parameters	Audit operation start date and time, and end date and time.
Status	The status of the VistA integration action.
Details	Clicking this link will display the number of entries in the report.

2.9 NUMI Integration

This chapter describes the process of importing patient level of care information from NUMI.

In order to integrate with NUMI certain steps should be completed:

1. Choose VistA site
2. Define Schedulers
3. Select Scheduler

2.9.1 Choose VistA Site

This step is the same as the one performed on VistA Integration process and can be referenced from [Section 2.7.1](#).

2.9.2 Define Schedulers

The process of defining schedulers can be referenced from Vista Integration process, [Section 2.7.2](#).

2.9.3 Select Scheduler

The NUMI tab is used to select the scheduler that will connect to the NUMI server and will retrieve data for a certain VistA site.

The NUMI tab is displayed as in the following image.

Figure 57 – NUMI Tab

From the Schedulers field select the scheduler created to retrieve the NUMI data then click the Add button: following page is displayed.

The screenshot shows a web-based application interface titled 'Edit NUMI data Scheduler'. At the top, there is a navigation bar with tabs: 'VistA Sites', 'Schedulers', 'VistA Integration', 'Audit', 'Numi', and 'Whiteboard Report'. On the far right of the top bar are 'Admin Menu' and 'Logout' links. Below the navigation bar, the title 'Background Processors' is centered. The main content area is titled 'Edit NUMI data Scheduler'. It contains a list of VistA sites, each with a checkbox next to its name. The site 'V01BED' has a checked checkbox. A vertical scroll bar is visible on the right side of the list. At the bottom of the list is a 'Save' button. Below the list, there is a link 'Back to Regional Page'.

Figure 58 - Selecting the VistA Site for Which to Gather NUMI Data

Select the VistA site for which the selected scheduler will retrieve NUMI data then press the Save button.

Use the Edit link to select a different site for which the scheduler should retrieve NUMI data.

3 Application structure

3.1 Application Components

BMS application consists of the following components:

- BMS Databases (BMS Database, BMS Authz, BMS EIS, BMS EVS, BMS_DS, BMS_DW, BMS InstanceStore and BMS History)
- BMS Services (BMS Service and Win ServiceHost)
 - BMS Service
 - Win Service Host (EIS Service, EVS Service, PAP service, PDP service, RS service and STS service)
- BMS Web Site

3.2 Application Directory Structure

BMS application directory is structured as is presented below:

```
+---Consoles  
|   +---PolicyManager  
+---Databases  
|   \---SQLData
```

```

|   |   \---Job Logs
|   |   \---WMI_UserGroup
+---Services
|   +---BMS
|       |   \---DBRepository
|       |   \---LinqToSql
|       |   \---LocalReportWhiteboard
|       |   \---Scripts
|   +---EIS
|       |   \---DBRepository
|   +---EVS
|       |   \---DBRepository
|   +---PAP
|       |   \---DBRepository
|   +---PDP
|   +---RS
|   +---Shared
|   \---STS
+---WebSite
|   +---bin
|       |   \--- LocalReportWhiteboard
|       |   \--- Scripts
|   +---Content
|       |   \---images
|       |   +---themes
|       |       |   +---base
|       |       |       |   \---images
|   +---Reporting
|   +---ReportsLocal
|   +---Scripts
|   \---Views

```

3.3 Database Architecture

Database architecture contains three main parts:

- BMS Database - Contains BMS_EVS (Enterprise Vocabulary database), BMS_EIS (Entity Identification Services database), BMS_AUTHZ (Authorization database) and BMS (Bed Management database).
- BMS_DS - By an ETL job the data are loaded into the data storage database.
- BMS_DW - By an ETL job the data are inserted/updated/deleted in/from the data warehouse database.

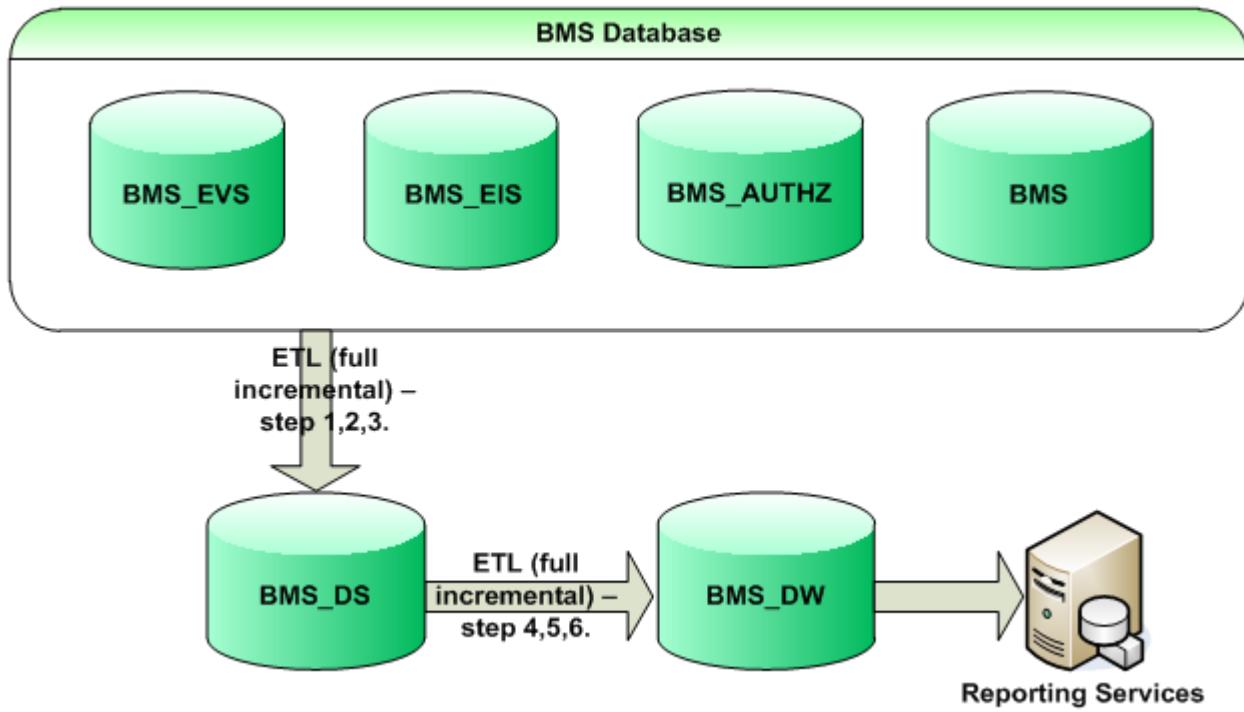

Figure 59 - Database Architecture

3.4 Component Files

A list with files for each BMS component is presented below:

Table 22 - BMS Database Files

Relative Path	File	Description
Databases\SQLData	BMS_AUTHZ_Data.mdf	Database files (BMS database, BMS Authz, BMS EIS, BMS EVS....)
	BMS_AUTHZ_log.ldf	
	BMS_Data.mdf	
	BMS_log.ldf	
	BMS_DS_Data.mdf	
	BMS_DS_log.ldf	
	BMS_DW_Data.mdf	
	BMS_DW_log.ldf	
	BMS_EIS_Data.mdf	
	BMS_EIS_log.ldf	
	BMS_EVS_Data.mdf	
	BMS_EVS_log.ldf	
	BMS_HISTORY_Data.mdf	
	BMS_HISTORY_log.ldf	
Databases\SQLData\Job_Logs	BMS_Reports_Log.txt	BMS Report Full job file log and BMS Incremental job file log.
	BMS_Reports_Log_Incremental.txt	
Databases\SQLData\WMI_UserGroup	AdapterRepository.dll	Binaries of WMI UserGroup application.
	Common.dll	
	connectionConfiguration.config	
	Connections.SingleDatabase.dll	
	ContextWriter.dll	
	General.MT.dll	
	Infoworld.Configuration.dll	
	MiddleTier.dll	
	MS.Common.dll	

Relative Path	File	Description
	MS.Configuration.dll MS.Connections.dll WMI_UserGroup.exe WMI_UserGroup.exe.config WMI_UserGroup.vhost.exe WMI_UserGroup.vhost.exe.config WMI_UserGroup.vhost.exe.manifest	
Databases\SQLData\WMI_UserGroup\ DBRepository	Connections.xml InfoWorld.WMI_UserGroup.DTO.DTOUserGroupDomain.xml	File used to set the connection to the database. XML mapping file which contain mapping definitions between ePractice datasets and SQL tables. The dataset is specified by setting the <MyDataSetInfo> tag. The table to interact with – specified through the <MyDataTable> tag – is defined by four commands – usually stored procedures – which represent the Create, Read, Update and Delete (CRUD) operations which can be performed on the table: select (Read), insert (Create), update (Update) and delete (Delete). Stored procedure parameters are passed from these datasets and mapped in the same XML file.

Table 23 - BMS Service Files

Relative Path	File	Description
Services\BMS	AdapterRepository.dll AuditTrailSender.dll AuthenticationProxy.dll AuthorizationSubscriber.dll BMS.Contracts.dll BMS.Facade.dll BMS.Facade.Contracts.dll BMS.Host.dll BMS.MT.dll BMS.MT.dll.config BMS.Numi.dll BMS.Schedulers.dll	The binaries of the BMS Service.

Relative Path	File	Description
	BMS.Security.dll BMS.ServiceHost.exe BMS.ServiceHost.exe.config BMS.ServiceImplementation.dll BMS.ServicesWrapper.dll BMS.UnitTesting.dll BMS.UnitTesting.dll.config BMS.Utils.dll BMS.VistaIntegration.dll BMS.VistaIntegration.Cache.dll BMS.VistaIntegration.Data.dll BMS.VistaIntegration.HL7.dll BMS.VistaIntegration.Mdws.dll BMS.VistaIntegration.UnitTesting.dll BMS.VistaIntegration_Accessor.dll BMS.VistaWorker.dll BMS.VistaWorker.Reader.dll BMS.VistaWorker2.Writer.dll BMS.Web.dll BMS.WhiteboardReport.dll BMS.Workflows.CustomActivities.dll BMS.Workflows.PropertyPromotionActivity.dll BMS.Workflows.WF.dll Castle.Core.dll Common.dll connectionConfiguration.config Connections.SingleDatabase.dll ContextWriter.dll DataUtil.dll FakeItEasy.dll General.MT.dll

Consoles\PolicyManager\ ro-RO	PolicyEditor.resources.dll ResourceSecurityProperties.resources.dll	Binaries used by Policy Manager.

4 Archiving

All the sensitive data in the BMS solution is persisted in a collection of SQL Server Databases. Therefore the archiving process is implying the definition of maintenance plans that will regularly make backups of these databases, backups that can be restored if needed.

The maintenance plan can be defined as detailed in the following pictures:

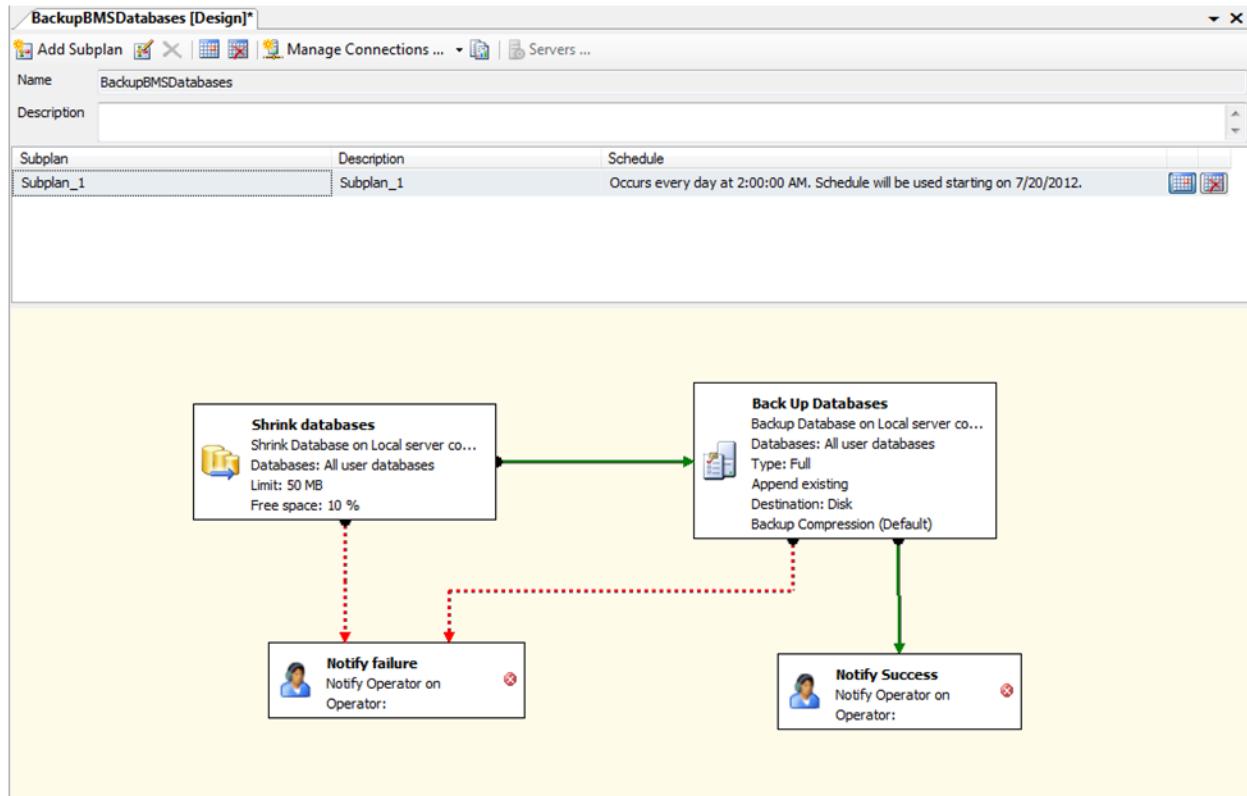

Figure 60 - Backup Maintenance Plan

5 External Relationships

External relationships can be referenced from [External Interfaces](#) in the next section.

6 External Interfaces

VistA and NUMI are the external interfaces that are connected with the BMS system (see screenshot below):

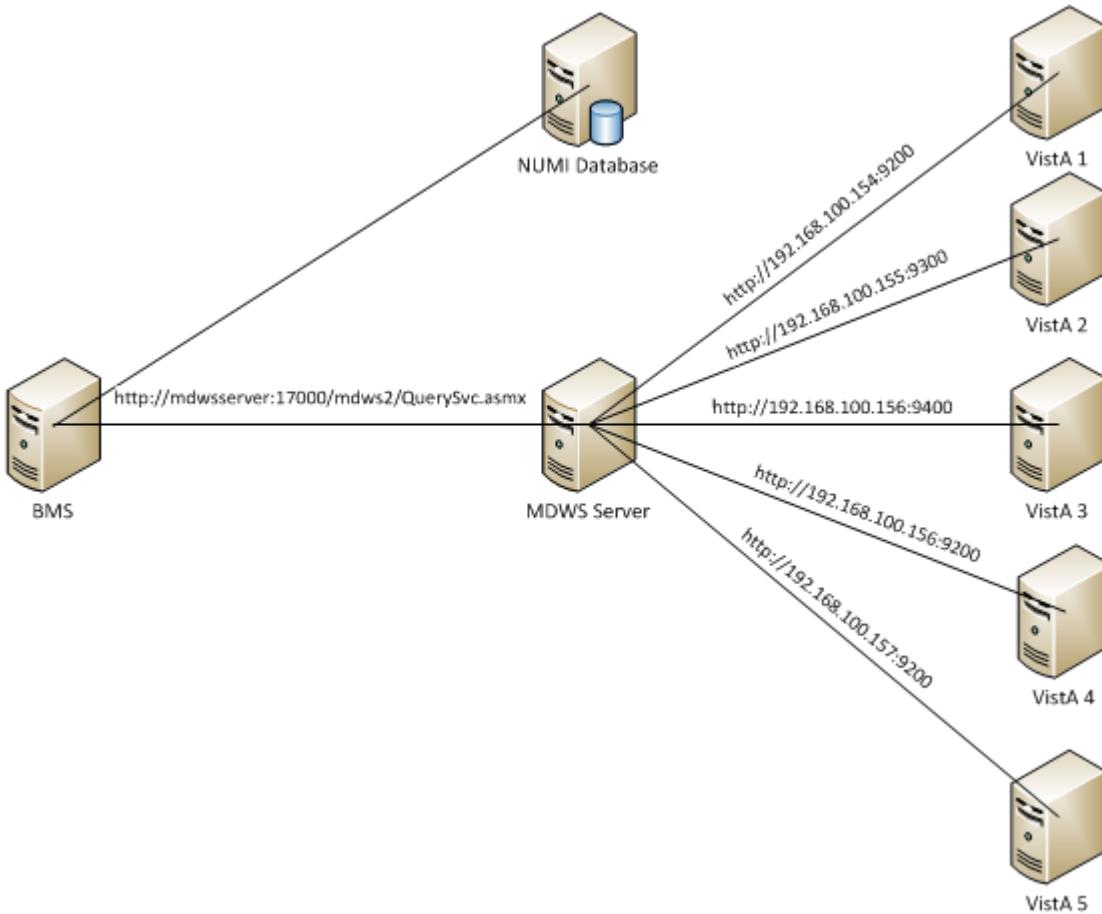

Figure 61 - BMS External Interfaces

All the VISTA deployments will be connected through a Healthcare Integration Engine (MDWS version 2) to the BMS. MDWS v.2 is a suite of Service Oriented Architecture (SOA) middle-tier web services that exposes medical domain functionality, Medical Domain Objects (MDO).

In order to connect to MDWS v.2, BMS service configuration file (BMS.ServiceHost.exe.config) should be changed as follows, see **Table 4 - BMS ServiceHost Configuration Parameters** section:

- A MDWS client service endpoint should be set: `http://mdwsserver:17000/mdws2/QuerySvc.asmx`
- `VistaIntegration.Enabled` should be set to true: `VistaIntegration.Enabled=true`

The following configurations should be set in MDWS to be able to connect to VistA deployments:

- Application protocol: `http://192.168.100.156:9200`
- VistA DataSource connection string: `<DataSource modality="HIS" protocol="VISTA" source="192.168.100.156" status="active" port="9200"/>`

These configurations should be done for each VistA deployment.

A connection string to NUMI database needs to be set in service configuration file (BMS.ServiceHost.exe.config), see **Table 4 - BMS ServiceHost Configuration Parameters** section:
`<ConnectionString>Data Source=numiserver;Initial Catalog=NUMI;Integrated Security=True;</ConnectionString>`

NOTE: All the configurations described above are using dummy servers and ports. Real deployment should use appropriate server, port and database connection strings.

7 Software Security

BMS Security is implemented at two levels:

- The first level of security consists in deciding which users have access to what pages (National/Regional, VISN, facility, EMS page).
- The second level of security refers to the read/write permissions (which are the pages a user can edit/update).

Both levels of security are implemented by means of the Policy Manager application described in the next section.

An additional level of security is provided by the domain restrictions: users can access only the BMS pages within the domain where they have been granted access rights.

7.1 Policy Manager

From the Console folder of your BMS solution, select Policy Manager and then double-click the PolicyManager.exe file to display the following dialog window:

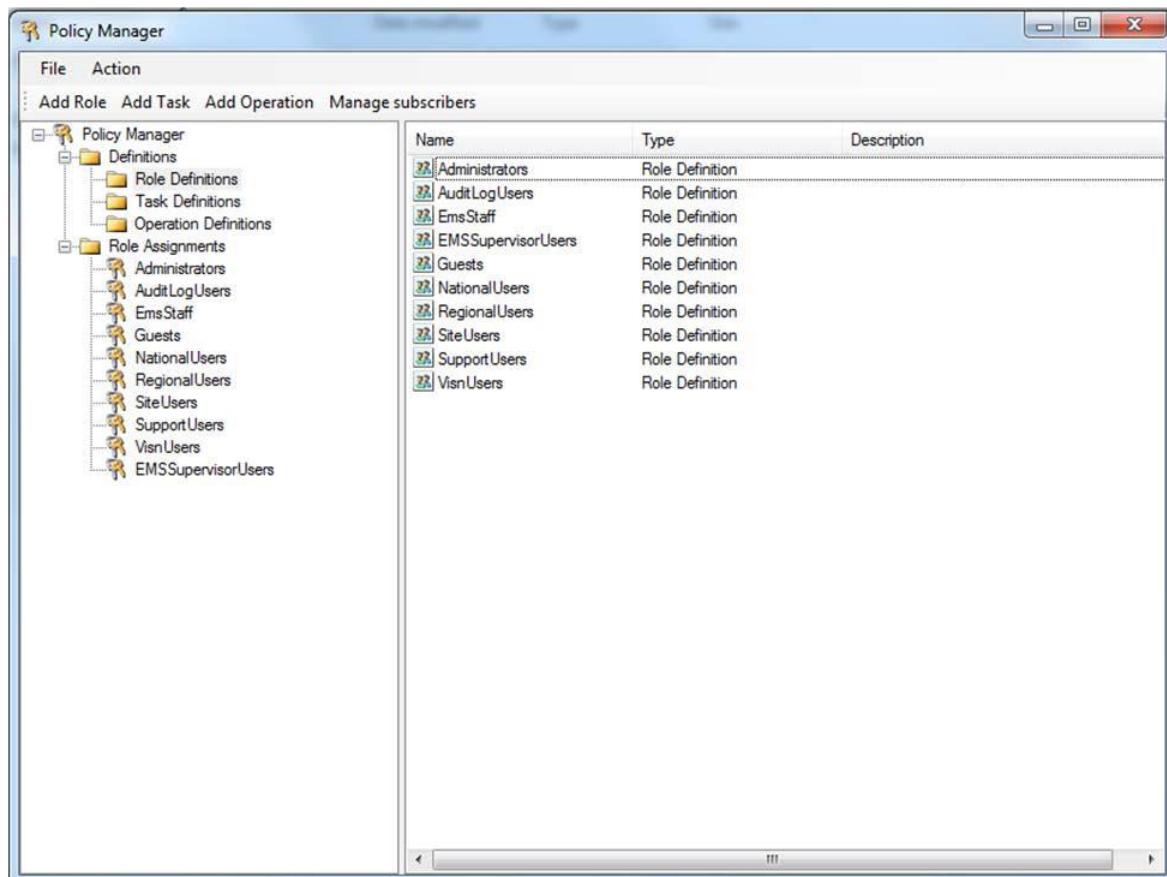

Figure 62 - Policy Manager Main Window

The Definitions folder in the left hand panel contains the definitions of the roles, tasks and operations valid within the BMS application.

The Role Definitions folder contains the list of user roles defined within BMS.

The Task Definitions folder contains the list of tasks that can be performed within BMS and their corresponding definitions. A task usually requires the completion of several operations.

The Operation Definitions folder contains the list of operations that can be performed within BMS and their corresponding definitions.

7.2 Operation Definitions

To view the definition of an operation select Operation definitions from the left-hand panel of the main Policy Manager window and double-click the operation to display the following dialog window:

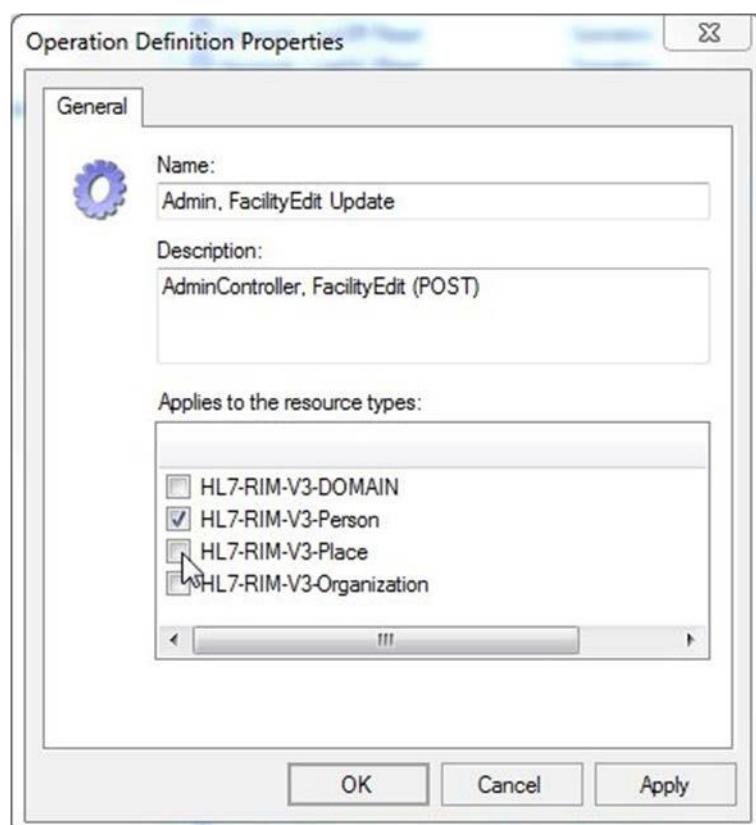

Figure 63 - Operation Definition

A list with all the operations of BMS application is presented below:

Table 27 - BMS Operations

Operation Name	Operation Description
Admin, AddEditUser Read	'Add/Edit BMS User' hyperlink from the Administration section's menu.
Admin, FacilityEdit Read	'Edit BMS Site' hyperlink from the Administration section's menu.
Admin, Index Read	'BMS Admin' hyperlink from the National And Regional Page.

Operation Name	Operation Description
Admin, SelectUser Read	'Select Existing NT User Name' button from the ADMINISTRATION SECTION - USERADD/EDIT page.
Admin, SisterSiteAddEdit Read	'Edit Sister Sites' hyperlink from the Administration section's menu.
Admin, AddUserOperations Read	'Add User' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, RemoveUsers Read	'Remove Selected' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, SearchUser Read	'Find' button from the 'Select user' page ('Select Existing NT User Name' button from the Administration Section menu, 'Add/Edit BMS User' submenu).
Admin, SearchUsers Read	'Find' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, ClearCache Read	'Clear Cache' link from the Administration section's menu.
Admin, AddEditUser Update	'Submit' button from the ADMINISTRATION SECTION - USERADD/EDIT page.
Admin, FacilityEdit Update	'Submit' button from Administration section's menu 'Edit BMS Site' hyperlink (page ADMINISTRATION SECTION - FACILITY EDIT).
Admin, SisterSiteAddEdit Update	'Edit Sister Sites' hyperlink from the Administration section's menu, 'Submit' button.
Admin, AddUserOperations Update	'Add' button from Add users page (Add User button from the Facility page).
Admin, RemoveUserOperations Update	'Remove Selected' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
AdminComments, Delete Read	'Delete' hyperlink from the Common Medical Terms page.
AdminComments, Edit Read	'Edit' hyperlink from the Common Medical Terms page.
AdminComments, Index Read	'Common Medical Terms' hyperlink from the Administration section's menu.
AdminComments, Index Update	'Save' button from the Common Medical Terms page.
AdminIcon, Delete Read	'Delete Icon' button on ADMINISTRATION SECTION - EDIT ICON page (Add/Edit Icon Submenu)
AdminIcon, Edit Read	'Edit' Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, Index Read	'Add/Edit Icon' link on ADMINISTRATION SECTION
AdminIcon, Search Read	'Search' Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, ViewIconReport Read	"Report" Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, Delete Update	'Remove' button on ADMINISTRATION SECTION - DELETE ICON page (Add/Edit Icon Submenu)
AdminIcon, Edit Update	'Save' button on ADMINISTRATION SECTION - EDIT ICON page (Add/Edit Icon Submenu)
AdminIcon, Index Update	'Up/Down arrow' buttons on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminSpecialtyAssociation, Delete Read	'Delete' Link on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Edit page (Treating Specialty/NUMA/HAvBED Submenu)
AdminSpecialtyAssociation, Index Read	'Treating Specialty/NUMA/HAvBED' Link on ADMINISTRATION SECTION

Operation Name	Operation Description
AdminSpecialtyAssociation, Delete Update	'Delete' Button on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Delete page (Treating Specialty/NUMA/HAvBED Submenu)
AdminSpecialtyAssociation, Index Update	'Save' Button on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Edit page (Treating Specialty/NUMA/HAvBED Submenu)
AdminUnavailableReason, Delete Read	'Delete' link on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminUnavailableReason, Edit Read	'Edit' link on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminUnavailableReason, Index Read	'National Unavailable Reason' Link on ADMINISTRATION SECTION
AdminUnavailableReason, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - National Unavailable Reason Delete page (National Unavailable Reason Submenu)
AdminUnavailableReason, Edit Update	'Submit' button on ADMINISTRATION SECTION - National Unavailable Reason Edit page (National Unavailable Reason Submenu)
AdminUnavailableReason, Index Update	'Add' button on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminWaitingArea, Delete Read	'Delete' link on ADMINISTRATION SECTION - National Waiting Areas Parameter page (National Waiting Area Submenu)
AdminWaitingArea, Edit Read	'Edit' link on ADMINISTRATION SECTION - National Waiting Areas Parameter page (National Waiting Area Submenu)
AdminWaitingArea, Index Read	'National Waiting Area' Link on ADMINISTRATION SECTION
AdminWaitingArea, DeleteAction Update	'Delete Record' button on ADMINISTRATION SECTION - National Waiting Area Parameter Delete page (National Waiting Area Submenu)
AdminWaitingArea, Edit Update	'Submit' button on ADMINISTRATION SECTION - National Waiting Area Parameter Edit page (National Waiting Area Submenu)
AdminWaitingArea, Index Update	'Add' button on ADMINISTRATION SECTION - National Waiting Area Parameter page (National Waiting Area Submenu)
AdminWhiteboardReport, Delete Read	'Delete' link on ADMINISTRATION SECTION - Whiteboard Report page (Background Processor Submenu)
AdminWhiteboardReport, Edit Read	'Edit' link on ADMINISTRATION SECTION - Whiteboard Report page (Background Processor Submenu)
AdminWhiteboardReport, Index Read	'Whiteboard Report' tab on ADMINISTRATION SECTION - Background Processor page
AdminWhiteboardReport, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - Whiteboard Report Delete page (Background Processor Submenu)
AdminWhiteboardReport, Edit Update	'Save' button on ADMINISTRATION SECTION - Whiteboard Report Edit page (Background Processor Submenu)
AdtOrderableItems, Index Read	Site Options, ADT Orderable Items Add/Delete hyperlink
AdtOrderableItems, Delete Update	'Delete' hyperlink from the list of orderable items.
AdtOrderableItems, Index Update	'Add' button from the Bed Board ADT Orderable Items Configuration.

Operation Name	Operation Description
BackgroundProcessors, Index Read	'Background Processors' hyperlink from Site Options page.
BackgroundProcessors, Index Update	'Save Scheduler' button from Background Processors page within Site Options.
AuditLogReport, Index Read	'View audit log' link on ADMINISTRATION SECTION
rep, Audit Log Report	Access the Audit Log Report.
BedBoard, ChangeFacility Read	Click on a facility link from the VISN Network Bed Boards list.
BedBoard, Index Read	'Return to VISN Network' hyperlink from the home page.
BedBoard, ShowFacilityBedSummaryReport Read	Click on a Facility Summary Report on VISN Network Bed Boards list
BedBoard, ShowVISNBedSummaryReport Read	Click on a VISN Summary Report on VISN Network Bed Boards list
BedBoardModule, Index Read	Site Options, Bed Board Module Enable/Disable link.
BedBoardModule, Index Update	'Submit' button from the Bed Board Module Activation and Configuration page.
BedInformation, Index Read	Ward Occupancy, click on a hyperlink from the BED column.
BedInformation, ClearAll Read	Click on button 'Clear ALL Comments For ALL Wards Associate To This Bed...'.
BedInformation, NotifyChange Read	'Submit' button from the Add/Edit Bed Unavailable Reason page.
BedInformation, Index Update	Click on buttons 'Submit' and/or 'Update Reason and Comments'.
ContingencySettings, Index Read	'Contingency Settings" link on Site Settings pages.
ContingencySettings, Index Update	'Save' button on Contingency Settings page on Site Settings pages.
DischargeClinic, Index Read	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink.
DischargeClinic, Delete Update	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink, 'Delete' button.
DischargeClinic, Index Update	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink, 'Add' button.
EmsBedStatusAdmin, EMS Supervisor Read/Update	'Assigned To' drop down on EMS Bed Edit page
EmsBedStatusAdmin, EMSBatchAssign Read	'Batch Assign' button on Ems Bed Status Admin page
EmsBedStatusAdmin, EMSBatchAssign Update	'Submit' button on EMS Bed Edit page on EMS Bed Status Admin page
EmsBedStatusAdmin, Edit Read	RoomBed column link click.
EmsBedStatusAdmin, Index Read	'Return to VISN Network' link from the home page, 'Return to Regional Page' link, 'Go To Facility Bed Cleaning Page (EMS Staff Only)' button.
EmsBedStatusAdmin, SaveConfirmation Read	'Submit' button click in the Environmental Management Service Bed Status page.
EmsBedStatusAdmin, Edit Update	'Submit' button click in the Environmental Management Service Bed Status page.
EMSMobile, EMSList Read	Load Bed Clean Requests on EMS Mobile Pages
EMSMobile, Users Read	Click on a User button on EMS Mobile Pages
EMSMobile, EMSList Update	Click on a Bed Clean Request button on EMS Mobile Pages
EMSMobile, Users Update	Click on Submit button after entering a PIN on EMS Mobile Pages

Operation Name	Operation Description
EmsNotification, AddEdit Read	'Edit' link from the Current Locations table (EMS Bed Notification).
EmsNotification, AddEditAction Read	'Submit' button from the EMS Bed Notification Edit page.
EmsNotification, Delete Read	'Delete' link from the Current Locations table (EMS Bed Notification).
EmsNotification, Index Read	Site Options, 'EMS Notification Add/Edit' link
EmsNotification, DeleteAction Update	'Delete Record' button from the EMS Bed Status Notification Delete page.
EmsNotification, Index Update	'Submit' button from the EMS Bed Notification Edit page or Notifications Add page.
EmsStaff, Delete Read	'Delete' link on EMS Staff page on Site Options pages
EmsStaff, Edit Read	'Edit' link on EMS Staff page on Site Options pages
EmsStaff, Index Read	EMS Staff link on Site Options page
EmsStaff, Delete Update	'Delete Record' button on Ems Staff Delete page on Site Options pages
EmsStaff, Edit Update	'Submit' button on Ems Staff Edit page on Site Options pages
EventNotification, AddConfirmation Read	'Submit' button from the Event Notification Add page.
EventNotification, AddEdit Read	'Add' button or 'Edit' link from the Event Notifications page.
EventNotification, EditConfirmation Read	'Submit' button from the Event Notifications Edit page.
EventNotification, Index Read	Site Options, 'Event Notification Add/Edit' hyperlink.
EventNotification, Index Update	'Submit' button from the Event Notification Add page.
Exception, Index Read	Appears when an exception occurs.
FacilityDiversion, Add Read	'Add' button from the Facility Diversion page.
FacilityDiversion, AddConfirmation Read	'Add' button from the Add New Diversion Status page.
FacilityDiversion, Edit Read	'Edit' link from the Facility Diversion page.
FacilityDiversion, EditConfirmation Read	'Save' button from the Diversion Status edit page.
FacilityDiversion, FilterDiversions Read	'Current Diversions' or 'All Diversions' button from the main Facility Diversions page.
FacilityDiversion, Index Read	'Facility Diversion' hyperlink from the home page.
FacilityDiversion, Index Update	'Add' button or 'Edit' link from the Facility Diversion page.
FacilitySettings, Index Read	Site Options, Facility Settings link
FacilitySettings, Index Update	Site Options, Facility Settings link, Submit button
Home, Index Read	Home page.
Home, Index2 Read	Current, Past 30-Days, Past 60-Days, Past 90-Days home page's buttons.
Home, PatientInquiry Read	Click on the patient link from the Patients Pending Placement list (Home page).
Home, RemoveAdmission Read	Remove link from the Patients Pending Placement list (Home page).
Home, UndoRemoveAdmission Read	Undo link from the Patients Pending Placement list (Home page).

Operation Name	Operation Description
Home, RemoveAdmissionPost Update	Remove link from the Patients Pending Placement list (Home page), Remove button from the confirmation page.
Home, UndoRemoveAdmissionPost Update	'Undo' button on Undo Remove Admission Page on Facility HomePage
IconLegend, Index Read	'Icon Legend' link from the bottom of the Home page or Site Options, BMS Icon Legend link.
IconLibrary, Edit Read	'Edit' Link on Site Options - Site Configurable Icons page.
IconLibrary, Index Read	Site Options, Site Configurable Icons link.
IconLibrary, ResetConfirmation Read	'Reset' button on Edit Site Configurable Icon page.
IconLibrary, Edit Update	'Save' button on Site Options - Site Configurable Icons page.
IconLibrary, Index Update	'Up/Down arrow' buttons on Site Options - Site Configurable Icons page.
IconLibrary, ResetConfirmation Update	'Reset' button on Reset Site Configurable Icon page.
Information, Index Read	'Information' link from the bottom of the Home page.
MaintainMarquee, Index Read	'Maintain Marquee Text' link from the Administration Section's menu.
MaintainMarquee, ChangeMarquee Update	'Submit' button from the ADMINISTRATION SECTION - MAINTAIN MARQUEE TEXT page.
NationalAndRegional, Index Read	Home page, Return to VISN Network link, Return to Regional Page link.
NewEvents, Index Read	Home page, New Events link.
Numi, Add Read	'Add' button on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Delete Read	'Delete' Link on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Edit Read	'Edit' Link on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Index Read	'Numi' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - Background Processors Delete page (Background Processors Submenu).
Numi, Edit Update	'Save' button on ADMINISTRATION SECTION - Background Processors Add/Edit page (Background Processors Submenu).

Patient, Select Read	'Add New Patient' link from the Home page, Patients Pending Placement section.
Patient, Admission Update	'Submit' button from ADD/EDIT Patients Pending Placement page.

Operation Name	Operation Description
rep, Active Admission Orders Report	Access the Active Admission Orders Report.
rep, Active Discharge Orders Report	Access the Active Discharge Orders Report.
rep, Active Transfer Orders Report	Access the Active Transfer Orders Report.
rep, Antic Discharge Orders Report	Access the Antic Discharge Orders Report.
rep, BED AVAILABILITY STATUS REPORT	Access the BED AVAILABILITY STATUS REPORT.
rep, Bed Specialty Report	Access the Bed Specialty Report.
rep, Bed Specialty Roster	Access the Bed Specialty Roster.
rep, Bed Summary Report	Access the Bed Summary Report.
rep, Bed Turnaround Time Report	Access the Bed Turnaround Time Report.
rep, Beds Out of Service Report (All)	Access the Beds Out of Service Report (All).
rep, Beds Out of Service Report (By Date)	Access the Beds Out of Service Report (By Date).
rep, Discharges In Progress	Access the Discharges In Progress.
rep, Emergency Management Evacuation Report	Access Emergency Management Evacuation Report
rep, Icon Usage Report	Access the Icon Usage Report
rep, Patient Inquiry	Access the Patient Inquiry report.
rep, Patient Movement Report	Access the Patient Movement Report.
rep, Patient Movements by Date	Access the Patient Movements by Date.
rep, Patients w Discharge Appointments	Access the Patients w Discharge Appointments.
rep, Scheduled Admissions by Date	Access the Scheduled Admissions by Date.
rep, Scheduled Admissions Report	Access the Scheduled Admissions Report.
rep, VISN Bed Summary Report	Access VISN Bed Summary Report
rep, VISN Network Active Report	Access the VISN Network Active Report.
rep, VISN Network Audit Report	Access the VISN Network Audit Report.
rep, VISN Network Contract Report	Access the VISN Network Contract Report.
rep, VISN Network Disposition Report	Access the VISN Network Disposition Report.
rep, Wait List Status Report	Access the Patients Pending Placement Status Report.
Reports, Index Read	'Submit' buttons from the Home page corresponding to the reports.
SiteOptions, Index Read	Home page, Site Options link.
SiteOptions, EvacuationConfirmation Read	Access to Evacuation Confirmation page.
SiteOptions, Index Update	'Submit' button from Site Options page.
SiteOptions, EvacuationConfirmation Update	'Save' button from Evacuation Confirmation page.
Transfer, AddTransfer Read	VISN page, Add New Patient button, Submit button from the Select Patient page.
Transfer, EditTransfer Read	'Edit' link from the VISN page, Patients in Community

Operation Name	Operation Description
	Hospitals list.
Transfer, FinalizeTransfer Read	'Finalize' link from the VISN page, Patients in Community Hospitals list.
Transfer, Index Read	VISN page, Add New Patient button.
Transfer, AddTransfer Update	VISN page, Add New Patient button, Submit button from the Select Patient page, and Submit button from the Enter Patient Data page.
Transfer, EditTransfer Update	'Edit' link from the VISN page's Patients in Community Hospitals list and then Submit button.
Transfer, FinalizeTransfer Update	'Finalize' link from the VISN page's Patients in Community Hospitals list and then Submit button from the Finalize Patient Data page.
UnavailableReason, Delete Read	'Delete' link from the Bed Board Site Unavailable Reason page's list.
UnavailableReason, Edit Read	'Edit' link from the Bed Board Site Unavailable Reason page's list.
UnavailableReason, Index Read	Site Options, Unavailable Reason Add/Edit link.
UnavailableReason, Delete Update	'Delete' link from the Bed Board Site Unavailable Reason page's list and then 'Delete Record' button.
UnavailableReason, Edit Update	'Edit' link from the Bed Board Site Unavailable Reason page's list and then Submit button.
UnavailableReason, Index Update	'Add' button from the Bed Board Site Unavailable Reason page.
UserConfiguration, Index Read	Site Options, Add/Edit BMS User link.
UserConfiguration, SearchUser Read	'Find and Save' buttons from the 'Select user' page ('Select Existing NT User Name' button from the Site Options, 'Add/Edit BMS User' link).
UserConfiguration, SelectUser Read	'Select Existing NT User Name' button from the Site Options - Add/Edit BMS User page.
UserConfiguration, Index Update	'Submit' button from the Site Options - Add/Edit BMS User page.
VistaIntegration, Audit Read	'Audit' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu) and 'Filter By' button from the 'Audit' tab.
VistaIntegration, Categories Read	'Vista Integration' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
VistaIntegration, DeleteScheduler Read	'Add new scheduler' link and select a scheduled name from the 'Scheduled' tab.
VistaIntegration, Index Read	'Background Processors' link on ADMINISTRATION SECTION.
VistaIntegration, Schedulers Read	'Schedulers' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
VistaIntegration, TestMDWSConnection Read	'TestMDWSConnection' button from the 'Vista Sites' tab.
VistaIntegration, TestODBCConnection Read	'TestODBCConnection' button from the 'Vista Sites' tab.
VistaIntegration, VistASites Read	'Vista Sites' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
VistaIntegration, Categories Update	'Save and Run' buttons from the 'Vista Integration' tab.
VistaIntegration, DeleteScheduler Update	'Delete' link from the 'Scheduled' tab and then 'Delete Record' button.

Operation Name	Operation Description
VistaIntegration, Schedulers Update	'Save' button from the 'Scheduled' tab.
VistaIntegration, VistASites Update	'Save' button from the 'VistA Sites' tab.
WaitingArea, Delete Read	'Delete' link from the Patient Waiting Areas page's list of Current Waiting Areas.
WaitingArea, Edit Read	'Edit' link from the Patient Waiting Areas page's list of Current Waiting Areas.
WaitingArea, Index Read	Site Options, Waiting Area Add/Delete link.
WaitingArea, DeleteAction Update	'Delete' link from the Patient Waiting Areas page's list of Current Waiting Areas and then 'Delete Record' button.
WaitingArea, Edit Update	'Edit' link from the Patient Waiting Areas page's list of Current Waiting Areas and then Submit button.
WaitingArea, Index Update	'Add' button from the Patient Waiting Areas page.
WardConfiguration, Delete Read	'Delete' link from the Bed Board Ward Configuration, Current Vista Wards list.
WardConfiguration, Index Read	Site Options, Vista Ward Add/Edit link.
WardConfiguration, Index Update	Site Options, Vista Ward Add/Edit link, Save button.
WardConfiguration, DeleteWard Update	Site Options, Vista Ward Add/Edit link, Delete operation.
WardOccupancy, Index Read	'Submit' button from the Home page corresponding to the Ward Occupancy.
WardWhiteboard, Edit Read	Click on a link from the BED column from WARD Whiteboard Report.
WardWhiteboard, EditPT Read	Click on a link from the PT column from the WARD Whiteboard Report.
WardWhiteboard, Index Read	Home page, 'Ward Whiteboard' link.
WardWhiteboard, NotifyChange Read	Click on a link from the BED column from WARD Whiteboard Report and then on the Submit button.
WhiteboardStaff, Index Read	Click on the checkbox from the STAFF column from the WARD Whiteboard Home.
WardWhiteboard, ShowReport Read	'Export Report' link from the right of the WARD Whiteboard Home page or WARD Whiteboard Report page, Export Report.
WardWhiteboard, Submit Read	'Submit' button from the WARD Whiteboard Home page.
WardWhiteBoard, WardWhiteBoard Read	Home page, 'Ward Whiteboard' link, Submit button from the WARD Whiteboard Home.
WardWhiteboard, ClearAll Read	Click on a link from the BED column from WARD Whiteboard Report and then click on the button 'Clear ALL Comments For ALL Wards Associate To This Bed...'.
WardWhiteBoard, WardWhiteBoard Update	Click on a staff name from the STAFF column from the WARD WhiteBoard Report and then click on the image 'Save Staff'.
WhiteboardStaff, Index Update	Click on the checkbox from the STAFF column from WARD Whiteboard Report and then on the 'Save' button.
WardWhiteboard, Edit Update	Click on a link from the BED column from WARD Whiteboard Report and then on the Submit button.

7.3 Task Definitions

To view the definition of a task, select Task definitions from the left-hand panel of the main Policy Manager window and in the list in the right-hand area, double-click the task to display the following dialog window.

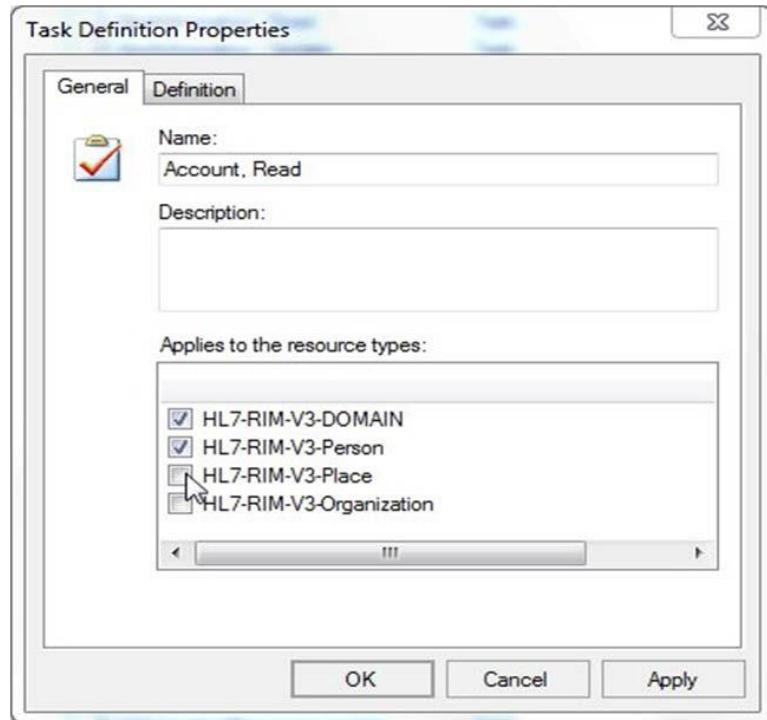

Figure 64 - Task Definition

To determine what resource type the task refers to, select one or more of the elements in the “Applies to resource types” area.

To view the operations that need to be performed in order to complete the task, select the Definition tab to display it as in the following image:

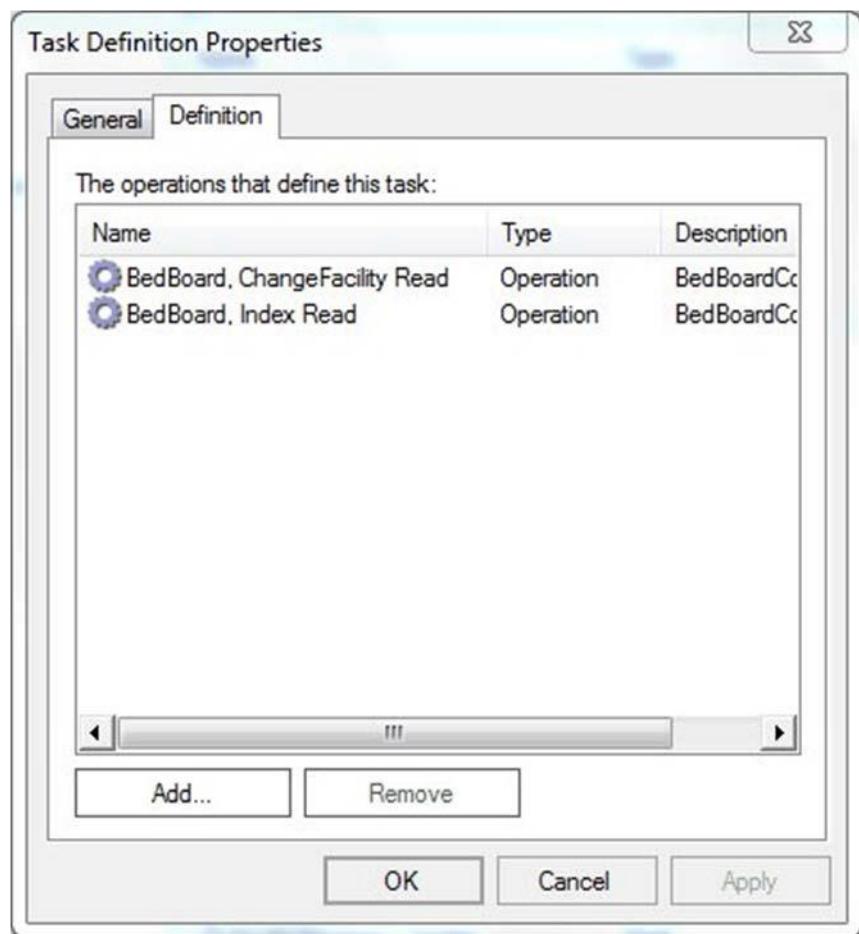

Figure 65 - Operations Defining a Task

Use the Add and Remove buttons to add or remove operations from the list.

A list with all the tasks, along with corresponding operations of the BMS application, is presented below:

Table 28 - BMS Tasks

Task Name	Task Description	Operation Name
Admin, Read	Admin Read permission, user has the right only to view data.	Admin, AddEditUser Read
		Admin, FacilityEdit Read
		Admin, Index Read
		Admin, SelectUser Read
		Admin, SisterSiteAddEdit Read
		Admin, AddUserOperations Read
		Admin, RemoveUsers Read
		Admin, SearchUser Read
		Admin, SearchUsers Read
		Admin, ClearCache Read
Admin, Update	Admin Update permission, user has the right to modify data.	Admin, AddEditUser Update
		Admin, FacilityEdit Update

7.4 Role Definitions

To view the actual definition of a BMS user role, from the Definitions folder select Role Definitions and double click the role name in the main panel of Policy Manager: in the Role Definition Properties dialog window, select the Definition tab to display it as in the following image:

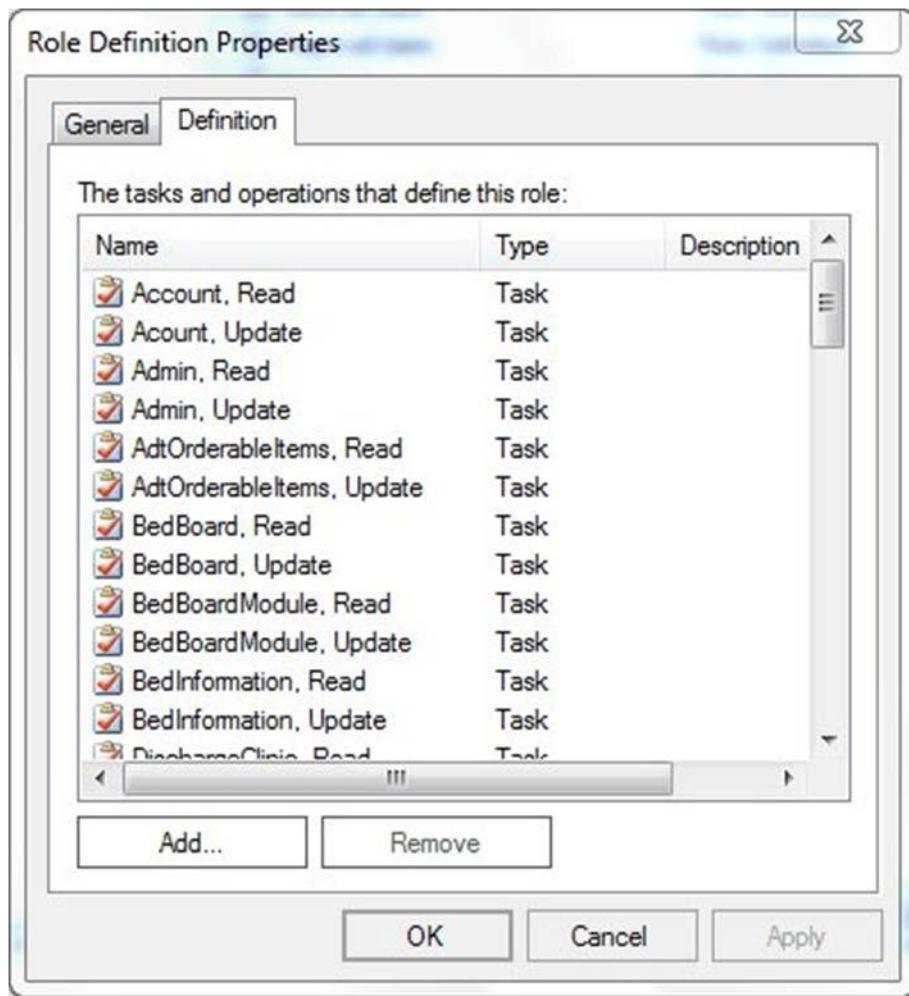

Figure 66 - Role Definition

7.5 Assigning a Role to a User

To assign one of the roles defined for BMS to a user follow the steps below.

From the main page of Policy Manager, from Role assignments folder select a role then right-click and select “Assign Windows Users and Groups”: the following dialog is displayed.

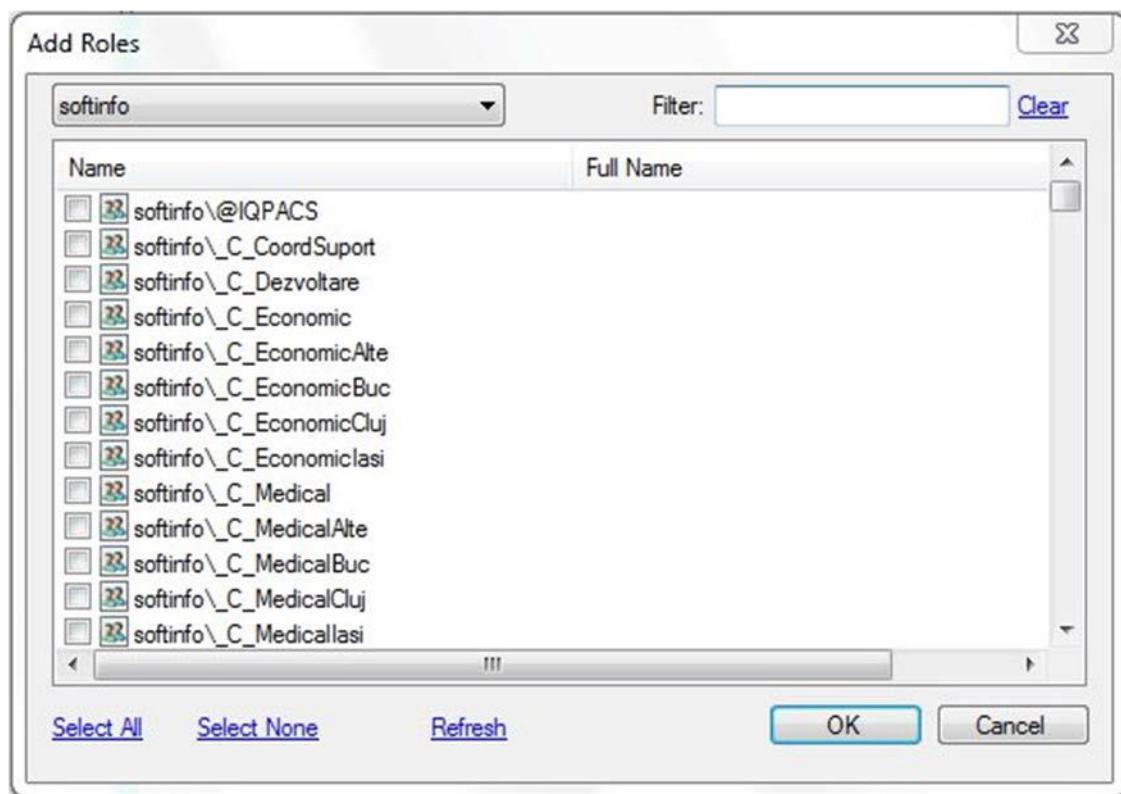

Figure 67 - Assigning Roles to Users

A list of users and user groups existing in the current domain are displayed. Use the arrow button of the field in the upper left corner of the dialog to select the domain and the Filter field if necessary, and then click each applicable check box to select the user or group of users for which you want to assign the selected BMS role. Click OK to finalize the operation.

7.6 Adding a New Role

To add a new role, click the Add Role button from the main Policy Manager window or right-click Role Definitions folder and select New Role Definition...: the following dialog window is displayed:

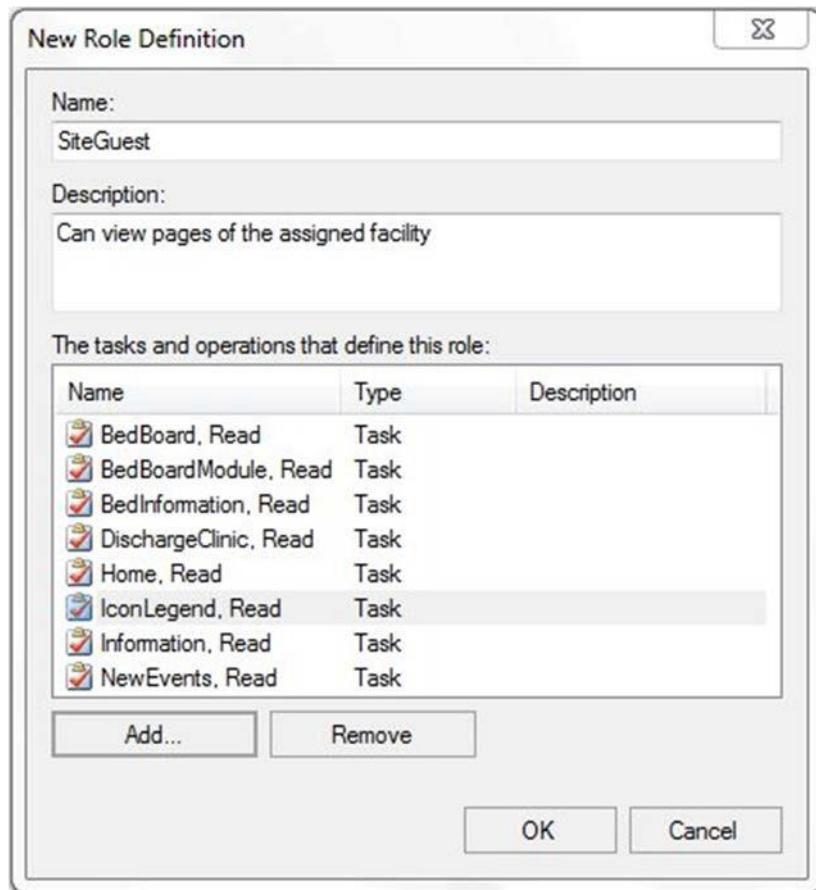

Figure 68 - New Role Definition

Enter the name of the new role and a short description.

To add the tasks and operations that can be performed for this role click the Add button to display the following dialog window:

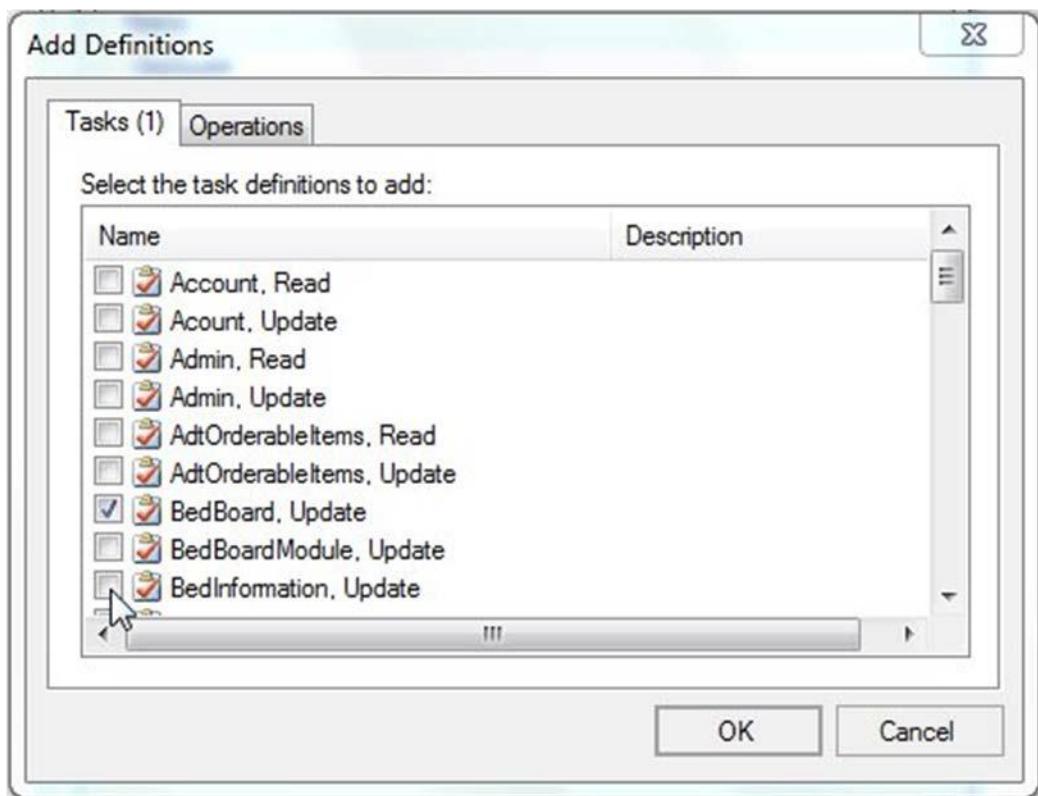

Figure 69 - Adding Tasks and Operations to a Role

Tasks and operations that can be performed within the BMS system are available in separate tabs. Select the ones to be included in the definition of the current role (the number of selected tasks/operations will be displayed in the corresponding tab title) then press OK: The selected tasks and operations will be displayed in the New Role Definition dialog box. Press OK to add the role to the list of roles defined for BMS: The Roles Definitions list will be updated to contain the new role.

To add the new role to the Role Assignment folder, select the folder, right-click and select Assign Roles to display the following dialog window:

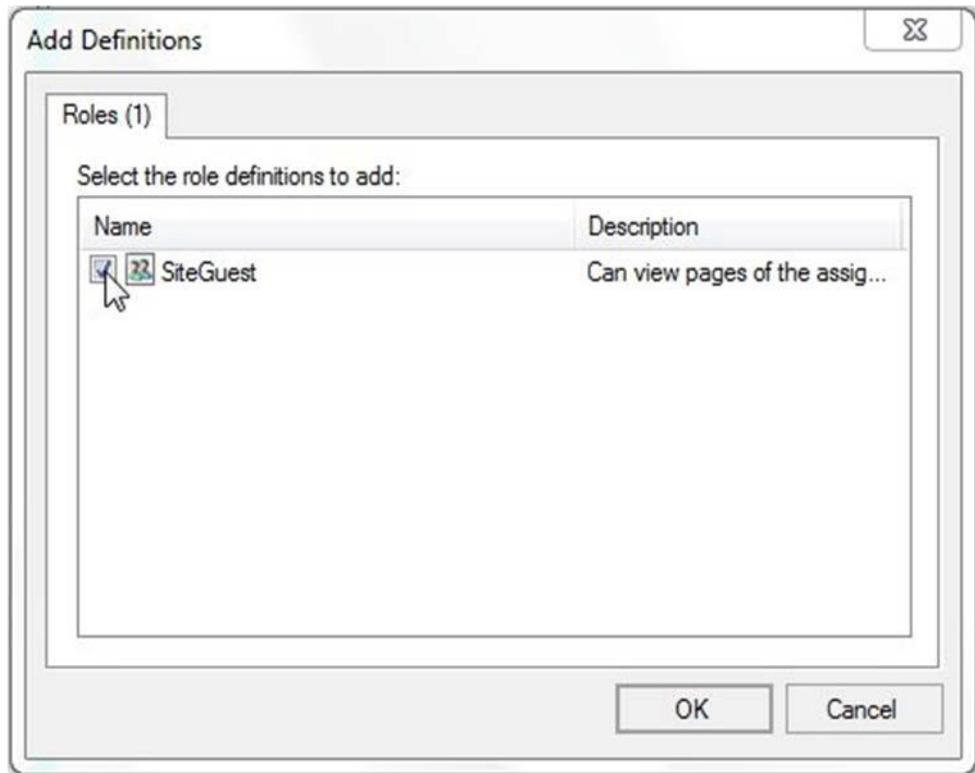

Figure 70 - Add Role to Role Assignments List

Select the role then press OK: The newly added role will be displayed in the Role Assignments list and you will be able to assign the new role to BMS users.

7.7 Adding a New Task

To add a new task, click the Add Task button from the main Policy Manager window or right-click Task Definitions folder and select New Task Definition: The following dialog window is displayed:

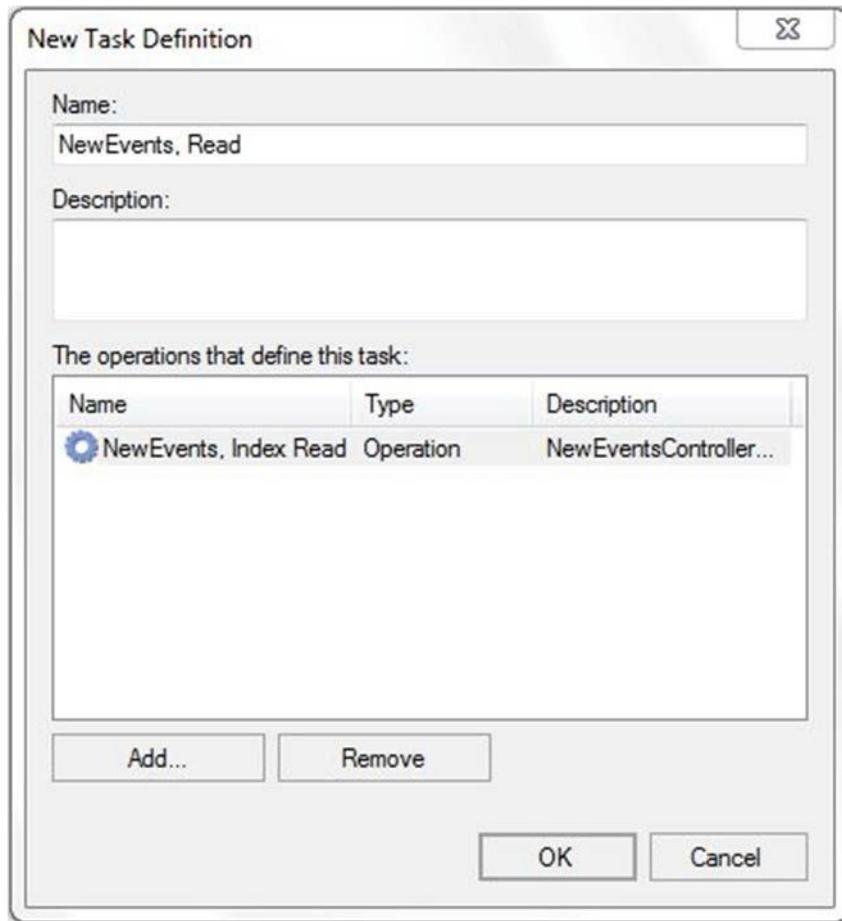

Figure 71 - New Task Definition

Enter the name of the new task followed by read/write option and a short description.

To add the operations that define the Task, click the Add button to display the following dialog window:

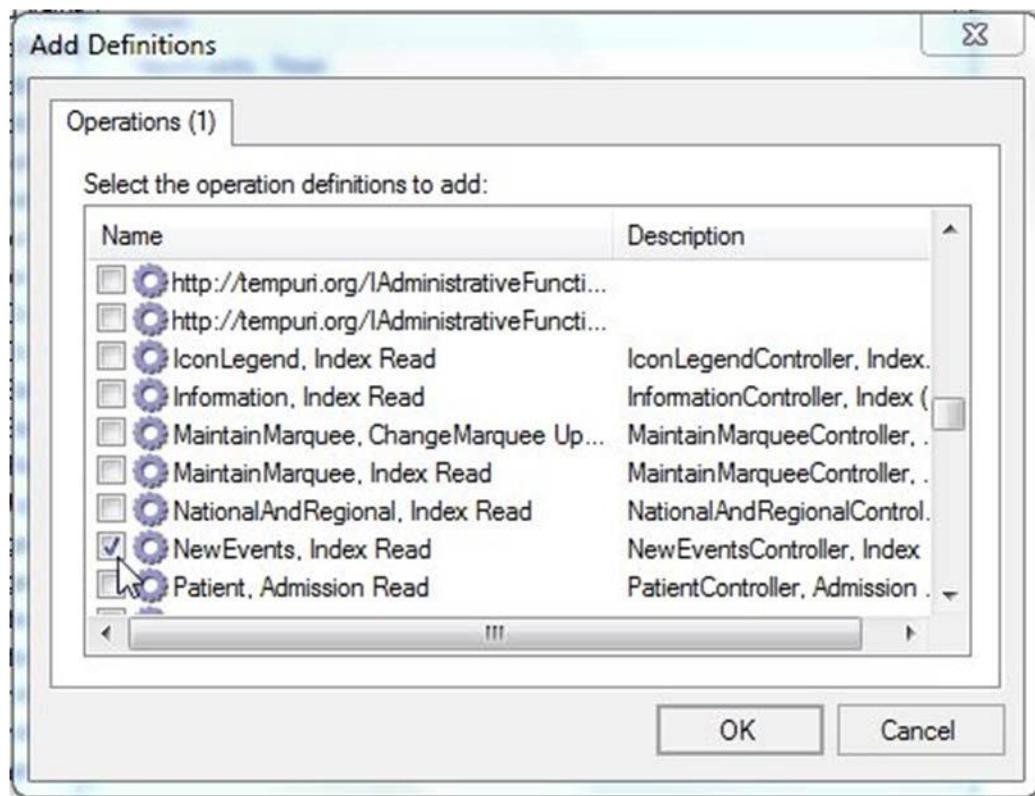

Figure 72 - Adding Operations to a Task

Select the operations that define the selected task then click OK to return to the New Task Definition dialog box. Click OK to add the new task to the Task Definitions list.

7.8 Adding a New Operation

To add a new operation, click the Add Operation button from the main Policy Manager window or right-click Operation Definitions folder and select New Operation Definition: The following dialog window is displayed.

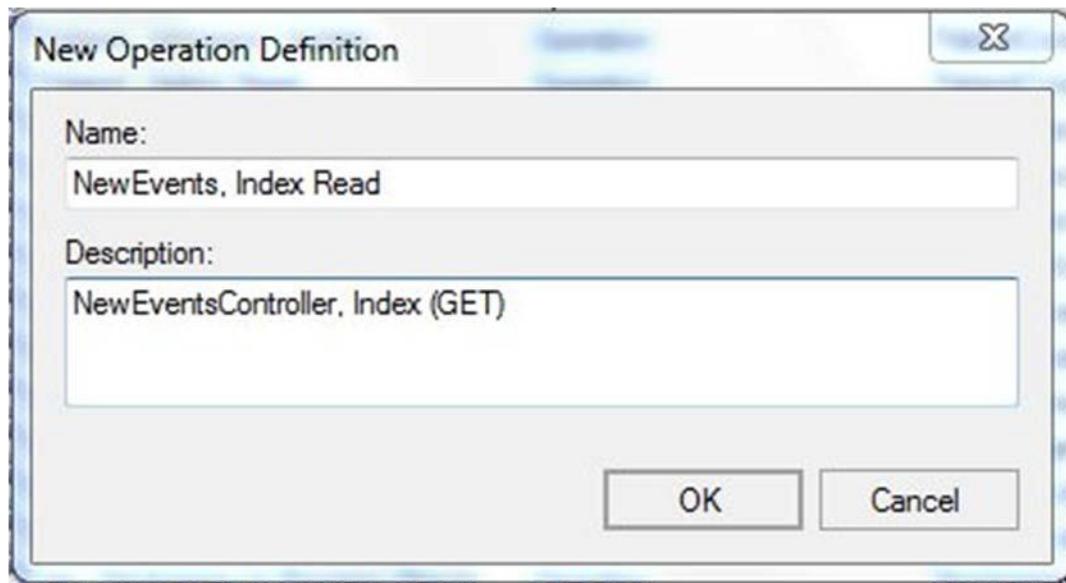

Figure 73 - New Operation Definition

Enter the name of the new operation followed by read/write option and a short description.

Click OK to add the new operation to the Operation Definitions list.

7.9 BMS Roles

BMS users fall under the following categories:

Administrators: This type of user will customize the BMS settings according to the needs of a facility. They will have access to the Site Options pages. This role refers to a group of users whose members are the person(s) responsible for setting up BMS options for the current facility.

AuditLogUsers: This type of user will have access to Audit Log Report. This role cannot be used alone, only together with another role.

EmsStaff: The EMS group of users will be allowed to edit and update the bed cleaning process but not the other parts of the bed board. Any member of your EMS staff that will be interacting with BMS must be in this group.

EMSSupervisorUsers: The EMS supervisor group of users will be allowed to view the requests for bed clean operations, to filter existing requests by different criteria and to select requests in order to assign them to EMS staff. This role cannot be used alone, only together with EmsStaff role.

Guests: The guest user will be allowed to generate the National Bed Availability report from National/Regional page.

National Users/Regional Users: This type of user will have access to the National/Regional page only.

Site Users: This type of user only has access to the BMS facility page.

Support Users: This type of user will have access to the Administrative page of the BMS solution. They configure the sites for the BMS facilities and grant access and read/write rights to the users.

VISN Users: This type of user will have access to the pages of different facilities within the VISN where they have been granted access.

8 Troubleshooting

This section contains information on common issues with using BMS solution and how those may be resolved.

Symptom 1

When you try to load the BMS application, one of the following error messages appear:

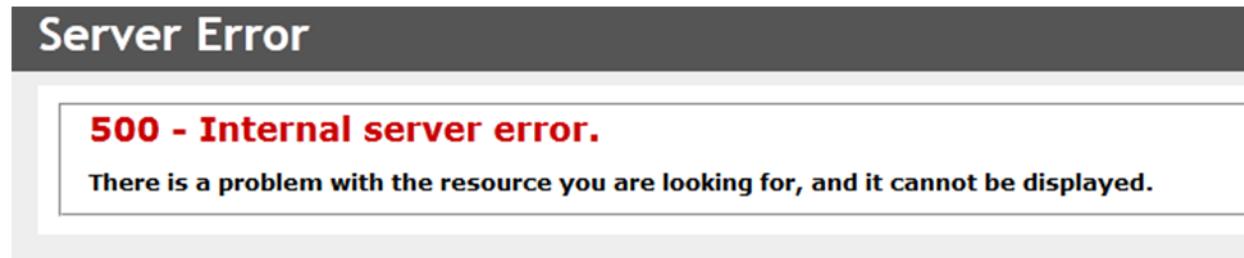

Figure 74 - 500 Internal Server Error

Diagnoses and Solutions

Start the IIS Manager and check if the Application Pool Identity is set to the correct identity (bmsuser).

Symptom 2

When trying to load the BMS application, one of the following error messages appears:

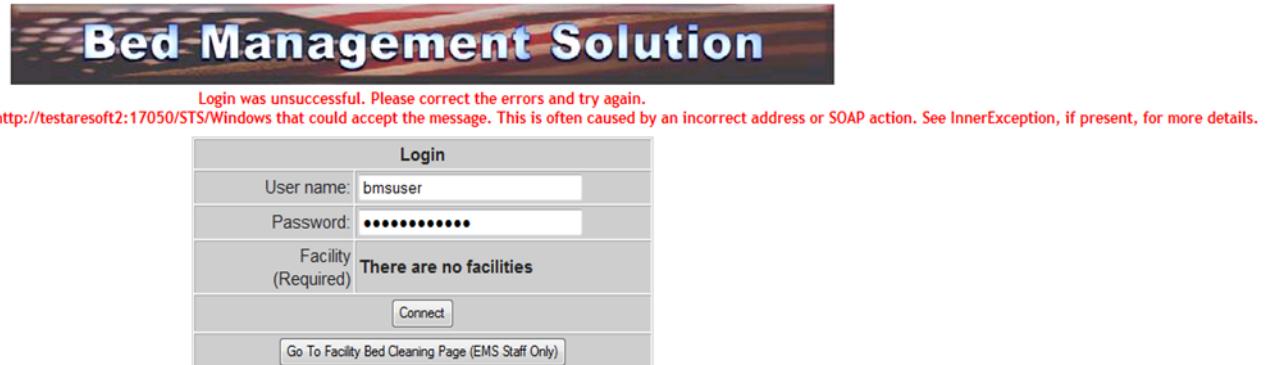

Figure 75 - There are no Facilities

Diagnoses and Solutions

Go to the services' machine and check if the BMS.ServiceHost service is stopped. Start the services.msc console and start the service.

Symptom 3

When trying to load the BMS application, one of the following error messages appears:

Figure 76 - Unhandled Exception

Diagnoses and Solutions

- Check if BMS.BMService service is stopped or SQL Server might also have stopped.
- Go to the SQL Server machine and start the SQL Server from the SQL Server Configuration Manager. Verify if the connection string to the database server is set properly.
- Then go to the services' machine, start the services.msc console and start the BMS.BMService service.

Symptom 4

When trying to log-in to the BMS application, the following error is displayed:

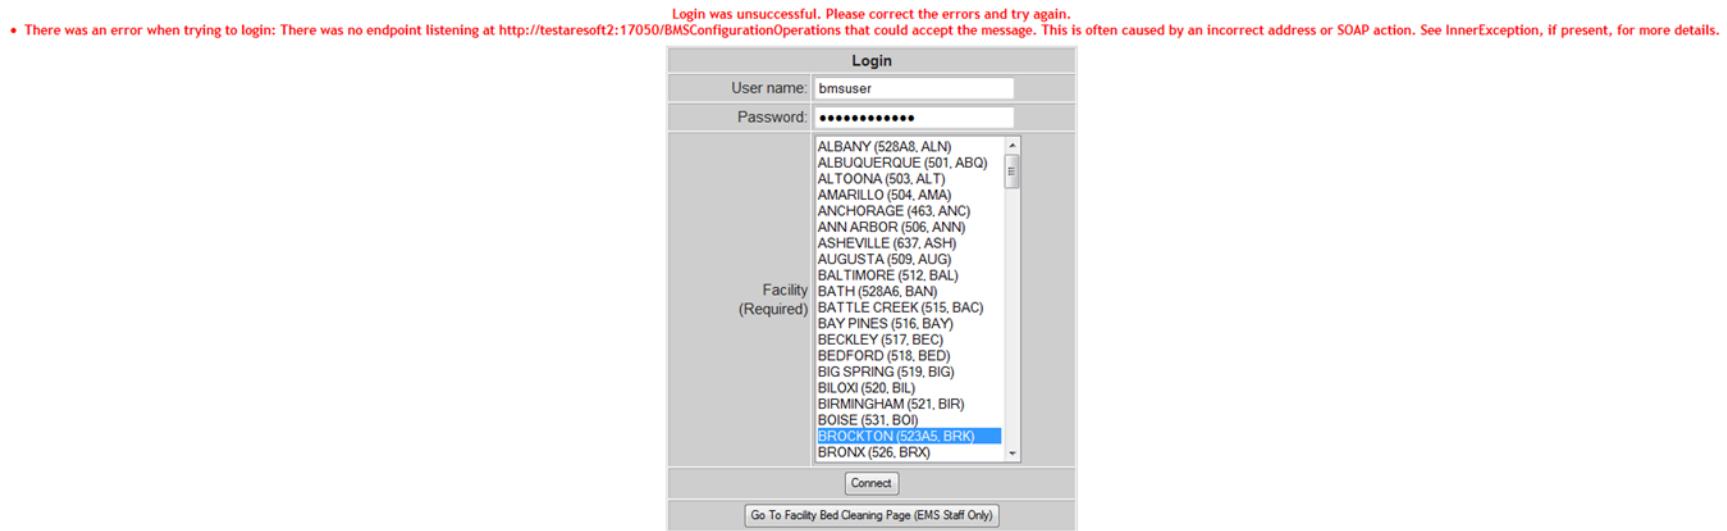

Figure 77 - Login Unsuccessful

Diagnoses and Solutions

Check if BMS.BMService service is stopped. Go to the services' machine, start the services.msc console and start the service.

Symptom 5

Data does not appear in the reports. Data does not get refreshed in the reports.

Diagnoses and Solutions

In SQL Configuration Manager, check if the SQL Server Agent is started, and if it isn't start it; then, in the SQL Server Management Studio, check if the *BMS - Reports Full* and *BMS - Reports Incremental* are deployed and run without errors. If the jobs are not deployed, install them.

Symptom 6

A report is missing from Other Reports section on the Facility Home Page (e.g. *EMS Bed Status Report (Admin)*).

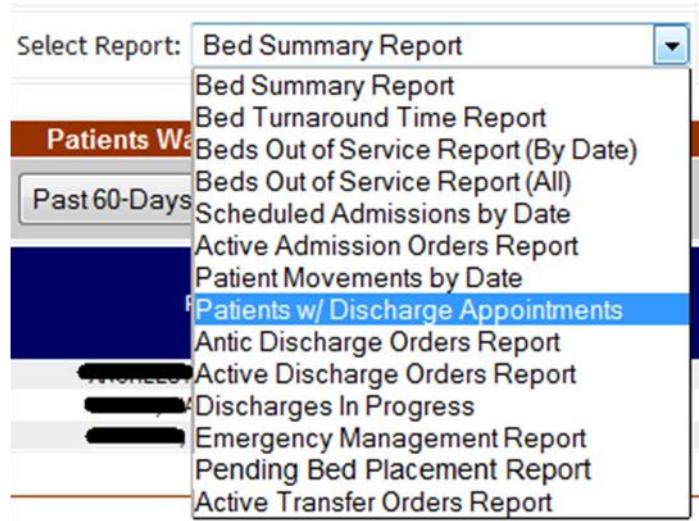

Figure 78 - EMS Bed Status Report is Missing

Diagnoses and Solutions

Check if the report is missing from the SQL Server Reporting Services. Go to the management web page and add the missing report (Upload File).

Symptom 7

When trying to view one of the reports (other than the *Other Reports*) the following error appears:

[Return to Previous Page](#)

rsItemNotFound The item '/BMS/Others/Bed Specialty Report' cannot be found. (rsItemNotFound)

Figure 79 - Report Cannot be Found

Diagnoses and Solutions

Check if the mentioned report is missing from the Reporting Services. Go to the management web page and add the specified report.

BMS Log Files

There are five log files available to anyone supporting the BMS system, the **WinServiceHost**, the **SecurityHost**, the **BMS.ServiceHost**, the **BMS.VI.ServiceHost** and the **WebTrace log**.

- The WinServiceHost log file is named **BMS-Services.log** and its location is on the application server (vaausbmsmul25) D:\BMS\Bin.
- The SecurityHost log file is named **BMS-Security.log** and its location is on the application server (vaausbmsmul25) D:\BMS\Bin.
- The BMS.ServiceHost logfile is named **BMS.trace.log** and its location is on the application server (vaausbmsmul25) at D:\BMS\Bin\BMS.
- The BMS.VI.ServiceHost logfile is named **BMS.VI.trace.log** and its location is on the application server (vaausbmsmul25) at D:\BMS\Bin\BMS.
- The Web trace log is named **WebTrace.log** and its location is on the web server (vaausbmsweb25) at D:\BMS\BMS.Web.

These logs contain various types of information (informational, warnings, and errors) with the exception of the web trace log, which only contains error messages.

There is no log file for MDWS, those errors are captured through our integration calls and posted in the BMS.ServiceHost log file (Trace.log). These are bit more tricky to debug as in any attempt requires the exact parameters to be passed to MDWS.

9.5 Dallas NTX Local Policy Example

Below is an example of the BMS Whiteboard Kiosk mode setup by North Texas VAMC (NTX).

1. Create a VA Domain User Name and Password
2. Image a PC with the “One Off” VA Gold Image
3. Pull Network cable once image is completed
4. Log in as Administrator
5. Create a local user account on PC that matches the created VA Domain Account
6. Make local user Administrator (Temporary)
7. Log into PC as Local User
8. Take computer off of the domain and place into a work group
9. Delete The computer in Active Directory
10. Change Screen Saver to None
11. Change Power Options to Never Turn off the display and Never Put the computer to sleep

12. Pull up the Run window (Windows button + R) and type in ***control userpasswords2***
13. Uncheck the box next to Users must enter a user name and password to use this computer while local user is highlighted
 - a. In windows 7 this check box is only available if the computer is not on a Domain.
14. Export “VA Internal Root” certificate from a computer on the Domain to a flash drive or other media
15. Import the “VA Internal Root” Certificate to Trusted Root Certificate Authorities folder on the BMS PC
16. Set Up a scheduled task to run at login to have the computer automatically go to the website
17. Completed registry edits in both 32 bit and 64 bit locations
18. Gpedit.msc
19. Take away admin rights
20. Reboot PC

Local Group Policy Changes:

User Configuration\Administrative Templates\System\Ctrl+Alt+Del Options

Remove TaskManager	Enable
Remove Lock Computer	Enable
Remove Change Password	Enable
Remove Logoff	Enable

User Configuration\Administrative Templates\Control Panel\Personalization

Enable Screen Saver	Disabled
---------------------	----------

Registry Edits:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon

DefaultDomainName	REG_SZ	(local computer name)
DefaultUserName	REG_SZ	(Local Username i.e. kioskuser)
DefaultPassword	REG_SZ	(Local user account's password)
AutoAdminLogon	REG_SZ	1

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Microsoft\Windows

NT\CurrentVersion\Winlogon

DefaultDomainName	REG_SZ	(local computer name)
DefaultUserName	REG_SZ	(Local Username i.e. kioskuser)
DefaultPassword	REG_SZ	(Local user account's password)

HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Internet Explorer\Restrictions

NoContextMenu	REG_DWORD	1
NoFileOpen	REG_DWORD	1
NoOpenInNewWnd	REG_DWORD	1

10 Appendix B - Terms, Acronyms, and Abbreviations

Table 29 - Terms, Acronyms, and Abbreviations

Terms, Acronyms, Abbreviations	Definitions
ASP	Active Server Pages
BMS	Bed Management Solution
CRUD	Create, Read, Update, Delete
EIS	Entity Identification Service
EMS	Environmental Management Service
ETL	Extract Transform Load
EVS	Enterprise Vocabulary Service
IE	Internet Explorer
IIS	Internet Information Services
IRM	Information Resources Management
MDO	Medical Domain Objects
MDWS	Medical Domain Web Services
MVC	Model-View-Controller
NUMI	National Utilization Management Integration
ODBC	Open Database Connectivity
PAP	Policy Administration Point
Patients Pending Placement	A queue of patients in need of beds at VA facilities
PDP	Policy Decision Point
RS	Reporting Services
SOA	Service Oriented Architecture
SQL	Structured Query Language
STS	Secure Token Service
URI	Uniform Resource Identifier
URL	Uniform Resource Locator
VA	Department of Veterans Affairs
VAMC	VA Medical Center
VISN	Veterans Integrated Service Network
VistA	Veterans Health Information Systems and Technology Architecture
WCF	Windows Communication Foundation
XAML	Extensible Application Markup Language
XML	eXtensible Markup Language
WMI	Windows Management Instrumentation
