Functionality

Version 1.0 of PCE provides options that allow:

- Collection and management of outpatient encounter data
- Presentation of outpatient encounter data through Health Summary components and Clinical Reports.
- Capture of outpatient encounter data through interactive and non-interactive interfaces.

Interactive interfaces

- Online data capture using a user interface developed with List Manager tools.
- Online data capture in which Scheduling integrates with PCE to collect checkout information.

Non-interactive interfaces

- PCE Device Interface, which supports the collection of encounter form data from scanners such as PANDAS, Penbased Teleform, and Automated Information Collection System (AICS). The interface also supports workstation collection of outpatient encounter data.
- PCE application programming interface (API) which supports the collection of outpatient encounter data from ancillary packages such as Laboratory, Radiology, Text Integration Utility (TIU), and Computerized Record Patient System (CPRS).

PCE Workflow

1 A provider has a patient encounter (appointment, walkin, telephone call, etc.

Materials available to provider:

Health Summary with new components summarizing previous encounters, and a health reminders component based on PCE data

Encounter Form (hard copy or workstation) with predefined terminology for the provider's clinic/service type

Other VISTA reports—PCE Clinical Reports, Action Profile, Daily Order Summary, Lab Interim report, etc.

2. The provider documents the encounter (hard copy or online). Types of data collected and stored in PCE:

Providers
Diagnoses
CPT procedures provided
Immunizations (CPT-mappable)
Skin tests (CPT-mappable)
Patient education
Exams (non-CPT-mappable)
Treatments (non-CPT-mappable)

- **3.** Information from a hard copy encounter form is entered into **V***IST***A** by a data entry clerk or scanned via an interface utility.
- **4.** Encounter form data that isn't scanned or is scanned incorrectly can be entered or edited through the PCE data entry program.
- **5.** Nurses and other providers can enter immunizations, patient education, or other pieces of clinical information through PCE.
- **6.** The provider can view items entered into PCE on a Health Summary or customized report. If items such as health factors, immunizations, or patient education have been set up for clinical reminders, these reminders will appear on the patient's health summary.

Adding Encounter Data

With the Update Encounter action you can add or edit encounter information, either through the Edit an Item or Delete an Item actions, or by choosing one of the other actions shown below.

Steps to add an Immunization

- **1.** Select UE from the PCE Appointment List screen.
- **2.** Select IM from the PCE Update Encounter screen.

```
PCE Update Encounter Nov 10, 1994 10:36:29 Page:1 of
PCEPATIENT, ONE 000456789
                           Clinic or Ward: ORTHOPEDICS
Encounter Date 11/07/94 08:00
                              Clinic Stop: ORTHOPEDICS
 1 Encounter: 11/07/94 08:00
   Encounter Type: X Appointment
     + Next Screen - Prev Screen ?? More Actions
ED Edit an Item
                    TR Treatment
                                  DD Display Detail
                   IM Immunization DB Display Brief
DE Delete an Item
EN Encounter
                   PE Patient Ed IN Checkout Interview
PR Provider
                   ST Skin Test
                                  SC Stop Code
DX Diagnosis (ICD 9) XA Exam
                                   QU Quit
CP CPT (Procedure) HF Health Factors
Select Action: Quit/// IM Immunization
```

3. Respond to the following prompts for the immunization, as appropriate.

```
Immunization: POLIOMYELITIS SALK
Encounter Provider: PCEPROVIDER,ONE//[RET] PCEPROVIDER,ONE
Is this provider Primary or Secondary? P// [RET]
Series: B
Reaction: [RET]
Repeat Contraindicated: NO// [RET] NO (OK TO USE IN THE FUTURE)
Administered Date and (optional) Time:(4/21/96-5/22/96):
[RET]
Comments: [RET]
Immunization: [RET]
```

4. The edited screen is then displayed.

Clinical Reminders

The PCE Clinical Reminders functionality works in conjunction with Health Summary to provide providers with timely information about their patients' health maintenance schedules. Providers can work with their local ADP coordinators to set up customized schedules based on local and national guidelines for patient education, immunizations, and other procedures.

Clinical Reports

The PCE Clinical Reports options provide clinicians and managers with summary data about their patients, workload activity, and encounter counts.
