# Introduction

---

PXRM\*2.0\*61 contains 2 Reminder Exchange entries:

1. PXRM\*2.0\*61 TAXONOMY UPDATES INC 2
2. PXRM\*2.0\*61 IRAQ UPDATES

## 1. National Taxonomy Updates:

This patch is the second patch being developed and released to update national reminder taxonomies to include ICD10 and SNOMED codes. On October 1, 2015, the VA will begin to use ICD-10 diagnosis codes in place of ICD-9. In preparation for this change, the national clinical reminder taxonomies are being reviewed and updated by the responsible Program Offices in VACO. Some of the taxonomies are also being updated to include SNOMED-CT codes which are currently used in VistA/CPRS on the problem list. And in some cases HCPCS codes, CPT codes and ICD10 procedure codes are being added or updated. This taxonomy patch covers the second set of taxonomies whose review has been completed.

The process for review included a detailed review by HIMS coding staff to provide possible ICD10 codes for inclusion and then subsequent review by SMEs designated by the responsible Program Office. The responsible Program Office is listed as the sponsor in each taxonomy definition.

In the process of reviewing all the national taxonomies, a large number of old and outdated Taxonomies were found that were originally used in reminders that were distributed in 1996. Most of those old, antiquated reminders have already been inactivated and renamed but the taxonomies that were included in them had not been reviewed or updated. These taxonomies are being renamed with a leading 'ZZ' and inactivated by this patch. These taxonomies should not be in use at any site and there are no plans to support them or update them.

Sites should run a Taxonomy Inquiry for each taxonomy being updated (refer to appendix B) and either print out or save to a file for comparison after patch install.

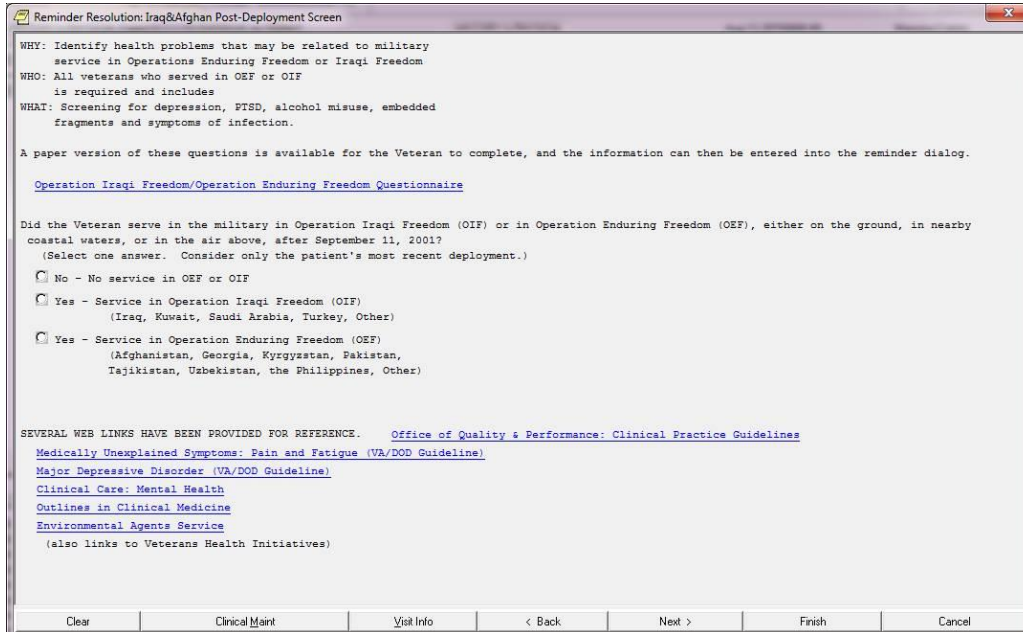

## 2. IRAQ&AFGHAN POST-DEPLOYMENT SCREEN Reminder Dialog Update

Remedy ticket xxxxxxxx was entered which listed an issue with the URL's not functioning anymore. These URL's were changed and now are working correctly with the release of this patch. To accomplish this, 2 reminder dialog elements were changed. They are as follows:

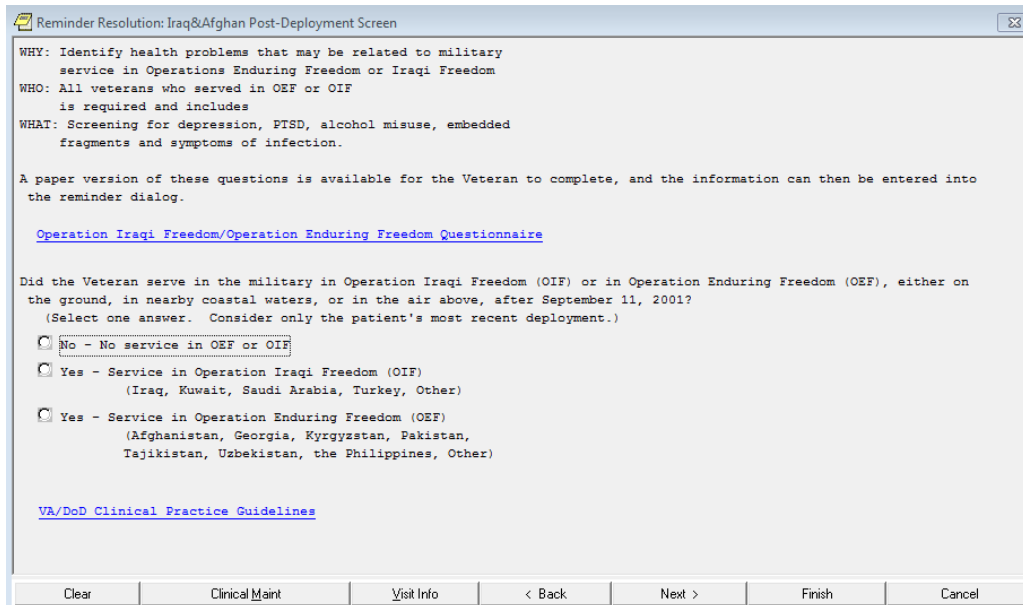

1. VA-TEXT OIF WEB SITES
2. VA-TEXT OIF INTRO

In the IRAQ&AFGHAN POST-DEPLOYMENT SCREEN reminder dialog, the hyperlinks were no longer working. This was corrected and the number of links was reduced. Below are screenshots of Pre and Post install of PXR\*2.0\*61

### IRAQ & AFGHAN POST-DEPLOYMENT SCREEN reminder dialog prior to install of PXR\*2.0\*61

### IRAQ & AFGHAN POST-DEPLOYMENT SCREEN reminder dialog post install of PXR\*2.0\*61

# Install Details

---

This patch is being distributed as a host file. The name of the host file is PXRМ\_2\_0\_61.KID. This file should be downloaded in ASCII format.

The preferred method for obtaining these files is to use File Transfer Protocol (FTP) to download them from:  
ftp://download.vista.med.va.gov/.

This transmits the files from the first available FTP server. Sites may also elect to retrieve the files directly from a specific server as follows:

Albany           ftp.fo-albany.med.va.gov  
Hines           ftp.fo-hines.med.va.gov  
Salt Lake City   ftp.fo-slc.med.va.gov

File Name:	Description:	Protocol:
=====	=====	=====
PXRМ_2_0_61.KID	PXRМ*2.0*61 Host File	ASCII
PXRМ_2_0_61_RN.PDF	Release Notes	Binary

## Installation:

=====

This patch can be loaded with users on the system. Installation will take five to ten minutes. Refer to Release Notes, PXRМ\_2\_0\_61\_RN.PDF, for complete details.

1. Use the "Load a Distribution" option on the KIDS installation menu. When prompted to enter a host file type in PXRМ\_2\_0\_61.KID
2. On the KIDS menu under the 'INSTALLATION' menu, use the following options, as desired:
  - Print Transport Global
  - Compare Transport global to Current System
  - Verify Checksums in Transport Global
  - Backup a Transport Global
3. On the KIDS menu under the 'INSTALLATION' menu, use the following option to install the patch:
  - Install Package(s)
  - When prompted for INSTALL NAME, use PXRМ\*2.0\*61

4. When prompted "Want KIDS to INHIBIT LOGONs during the install? NO//," respond 'NO'.
5. When prompted "Want to DISABLE Scheduled Options, Menu Options, and Protocols? NO// respond 'NO'.
6. After successful installation, the following init routines may be deleted  
PXRMP61E  
PXRMP61I

## Appendix A: Install Example

---

Select Installation <TEST ACCOUNT> Option: 1 Load a Distribution  
Enter a Host File: USER\$:[PATRICK]TEST61.KID
